Canadian Trade

Report of the special trade commission to Great Britain, Italy and France. Ocean transportation problem is one for government consideration. Until Britain's tariff policy is declared, other proposals are speculative. Canada needs better publicity. Information for exporters, **Page 5**

The Week's Topics

The problem of ocean transportation is a matter for the serious attention of the government.—How the life insurance companies are operating under war conditions, Page 9. The Canadian Fire Underwriters' Association have good reasons for forming combine, **Page 10**

Bond Market

Interesting official figures as to the results of the three war loans, Page 26. The Lacombe & Blindman Valley Electric Railway has withdrawn its bond offering, awaiting better conditions, Page 28. Many municipalities refused offers for their bonds last month, **Page 26**

Fire Insurance

The insurance committee of the Canadian Manufacturers' Association defends unlicensed fire insurance, Page 18. Canada's fire losses for June, Page 28. That the licensed fire insurance companies are highly protected, is the statement of insurance brokers, **Page 10**

Transportation

Much criticism has been levelled in London at the Drayton-Acworth railroad proposals, Page 32. Record of transcontinental railroad earnings for May and June, Page 42. Committee has made progress with the reorganization of the Algoma Central interests, **Page 42**

Banking

Record of bank branches opened and closed during May, Page 30. The control of the Merchants National Bank of New York was purchased by Canadians for $2,860,000, Page 24. Canadian banker predicts firm money; an interview with Mr. F. L. Appleby, **Page 30**

Municipal Finance

Montreal city wants loan of $1,000,000 but bank will advance only $500,000; Sir Frederick Williams-Taylor's letter, Page 7. The weekly record of municipal financing, Page 7. *The Monetary Times'* monthly record and review of the Canadian municipal bond market, **Page 26**

Business Conditions

Amended companies' act will provide for issue of stock without par value, Page 24. Record prices received at Ontario's wool sale, Page 14. Study of national problems; an outline of an important movement, Page 22. List of new companies incorporated this week, **Page 34**

Canada's Trade Commission Makes Report

OCEAN *Transportation Problem is One for Government Consideration —Until Britain's Tariff Policy is Declared, Other Proposals are Speculative — Trade With Britain, France and Italy — Canada Needs Better Advertising — Valuable Information for Our Exporters.*

THAT Canadian exporters to France will find that the banking system of that country is admirable and the facilities afforded are adequate for the ordinary requirements of commerce, is the opinion of the special Canadian Trade Commission to Great Britain, France and Italy. The report of the Commission has just been issued at Ottawa by Sir George Foster, minister of trade and commerce. The Commission learned, however, that there is a movement on foot in France for an expansion of banking credit for the help of industrial establishments, based upon the systems obtaining in other countries; this will no doubt have an important influence upon France's future industrial development. The Bank of France holds a predominant position, and can be looked upon in the same way as the Bank of England is regarded amongst merchants of Great Britain. Other banks which have an important influence in French finance are the Banque Nationale d'Escompte and the Credit Lyonnais, and, in so far as trade with English connections is concerned, the French branch of Lloyds Bank has a most important influence. Canadian exporters will have no difficulty in establishing relations through these banks.

The report continues:—

"The functions of the banks are rendered all the more simple by the fact that the French people pay their financial obligations without the slightest hesitation, and exactly on the date set. They expect in return all debts due to them to be paid promptly.

"The French trader wishes to conduct his business upon a cash basis. Canadian exporters who wish to extend business relations in France may rest assured of the best possible treatment in the matter of payments, when good relations and confidence between buyer and seller are established. Some French manufacturers are so punctual in these matters that they even require cash with the order, and importers, on the other hand, are so prompt in their payments that no notification of the maturity of notes is needed, and still less is any extension required.

"The 'Commissionaire' is an important factor in the mercantile life of France. His sphere of usefulness will appear unusually large to Canadian manufacturers. Very few business transactions are carried on direct, and the commissionaire or middleman, therefore, occupies a unique position.

"Canadian exporters will find French business men active, alert and progressive. Their only difficulty will lie in the fact that Continental competition has already evolved a system of service to the French customer which was extremely good, and which relieved the purchaser of a good deal of trouble.

"Let Canadian manufacturers, therefore, if they wish to secure business in a way that will be perfectly fair, and in accordance with the customs of our French Allies, look particularly to the specifications which are laid down; let them endeavor to quote always in the customer's currency and at his own warehouse. In short, let them go more than half-way towards making business between the two countries easy and mutually profitable.

"Canada is particularly interested, of course, in the changes which will come about in French industry after the war. Many of the brave Allies have fallen in the fields of battle, many others will be incapacitated; but demands for increased production along all lines will be very insistent, and, therefore, the introduction of machinery is much more than a possibility. Canadian manufacturers of machinery and other mechanical means of reducing labor costs will find in France a ready demand for their products. It only remains to be seen what can be done along the lines of transportation—and possibly also of fiscal changes—to make it possible for Canada to meet the competition which Germany will press upon her former customers, both directly and through neutral channels under the guise of neutrality." The report deals at length with various Canadian exports to France, giving many valuable hints to our manufacturers and merchants.

Discussing trade relations between Canada and Italy, which are of comparatively recent date, it is pointed out that, while there have been small exports from Canada to Italy since Confederation, and while imports from Italy have always attained some importance, the total volume of trade between the two countries in 1913 was approximately only 25,000,000 lire* (less than $5,000,000). This, while small, indicates that there is a possibility of trade, for less than ten years ago, in 1906, the Italian exports to Canada amounted to only 277,000 lire, and the Canadian exports to Italy were only a little more than one-and-a-half million lire. Since 1906, therefore, the exports from Canada to Italy have increased ten times, and Italian exports to Canada are now thirty times those of 1906.

---

*Lira = 19.3 cents

"This is an excellent showing, and it is fair to expect that the future commercial relations between the two countries would be large, even without the bonds which the war has thrown around the two countries. Further, there are more than 40,000 Italian immigrants in Canada who constitute an important influence in the commercial relations between the two countries.

Peculiarities of Market.

"The climatic conditions in Italy make it easy for most of the population to live comfortably with fewer of what are considered the necessities and comforts in the northern latitudes. Canadian exporters will have to bear this in mind, as it will indicate that many commodities ordinarily in use in Canada, Great Britain and France will not appeal to the Italian purchaser. The goods required are of a less expensive quality—a point on which the Germans seized with great zeal. The Canadian manufacturer who wishes to export to Italy must face the demand for long credits, although even in this respect much exaggeration has occurred. Careful selling so as to relieve the Italian merchant from the necessity of buying in large quantities is most desirable.

"The Commission was informed on the very highest authority that Italy will not be able to maintain, after the conclusion of peace, the modes of payment, and, generally speaking, the customs in trade introduced during the European war. International competition will sooner or later make payments at three months or more from date of shipment again customary. The Italians fully expect Germany to make tremendous efforts to overcome her present disability, and the recommendation is strongly made by Italian men of affairs that Canadians organize their trade in such a way as to concede a liberal degree of credit to the Italian firms with whom they will initiate relations."

The report also deals in some detail with the principal items of Canadian-Italian trade.

Trade with Britain.

About sixty pages of the report discuss Canadian trade with Great Britain, and we are reminded that Canadian wheat is the standard of the British market.

"While Britain is," says the report, "looking for markets, she is also looking for raw materials for industry, and other products of a nature which Canada and the other overseas Dominions are well able to supply. There is no doubt of the possibilities of developing a very large trade between our country and the Motherland."

Some exceptionally valuable information is given regarding the British market for Canadian canned vegetables and fruits. Our manufacturers have much to learn in packing their goods to compete with other nations in this line. Concluding their extensive chapter on Anglo-Canadian trade, which goes into details as to various trades, the report says:—

Will Cement Bonds.

"British goods have a preference with Canadians, both in sentiment and in actual fiscal policy. The great war can only cement more firmly the bonds with Great Britain which have existed throughout the life of the Dominion."

In an interesting chapter on transportation it is pointed out that one of the most important features to be considered by the Canadian authorities in connection with the encouragement of vessels to use the St. Lawrence route is the question of an improved insurance rate. The Commissioners also insist that the ocean transportation problem is one for drastic action by the government.

"Exactly how this is to be done," says the report, "does not come within the province of the Commission, but undoubtedly until the high rate of insurance charged on vessels coming up the St. Lawrence is remedied there will be reluctance on the part of the shipowners to send their vessels to Quebec and Montreal, as the difference in premium constitutes a serious charge on the vessel. It may, however, be suggested that the plan adopted by the British government for controlling marine insurance rates be seriously considered by the Canadian government. Some improvement is vital to the development of the St. Lawrence route, even if the Canadian government has to absorb the difference between the insurance rates to Quebec and Montreal, where they are higher than those to other North Atlantic ports."

Better Advertising for Canada.

As the result of its investigations, the Commission is of the opinion that a more systematic method of advertising Canada would be a distinct advantage to the Dominion.

"At present," they say, "there are many government departments, private firms and institutions, who are in their own way advertising Canada, and in many instances doing the work very well, indeed. It is manifest, however, that there is considerable loss of power and money owing to divided efforts in this direction. It should be possible for the government to organize a definite scheme of advertising which would embrace the various interests, and thus secure co-ordination in the making of Canada and its resources better known throughout the world. It would be worth while employing an individual who has comprehensive grasp of all branches of advertising who would act as adviser in this important direction.

Exhibitions are Advocated.

"To the end that the products of Canada may be more satisfactorily placed before the peoples of Great Britain, France and Italy, the Commission would suggest that permanent exhibitions, not only of the raw, but of the manufactured products, should be shown in the most suitable centres of the countries named. To some extent, this is practised locally in Great Britain, but the plan might be extended, and certainly might be inaugurated in France and Italy with great advantage.

"The Commission would also recommend that a special trade representative should be appointed in France to look after purely commercial interests, as the character of the calls upon the services of the Commissioner-General of Canada, in Paris, at the present time preclude him from taking too direct an interest in commercial matters. Such a commercial representative in Paris would contribute very materially to the extension of Canadian export trade.

Matter of Tariffs.

Some space is devoted to fiscal questions, and it is pointed out that the leading statesmen and commercial leaders of the Empire are unanimous with regard to the policy to be pursued after the war. Until the policy of Great Britain is declared, the Commissioners are of opinion that any proposals for preferential tariffs between the Allies must be considered speculative.

"In France," the report says, "there was a most pronounced tendency to favor preferential tariffs between the Allies. It was explained that France would have no difficulty in adopting this policy, as she had already a fiscal system that would enable her to make terms readily with the Allied countries. It was distinctly stated, however, by the ministers in France that nothing definite could be formulated until Great Britain had decided as to her future policy. Should the United Kingdom and the Empire decide upon a system of preferential tariffs, France would be most willing to enter into an agreement whereby Great Britain and the Dominions would be granted special concessions. Everything, however, it was pointed out, would depend upon the action of Great Britain in the matter.

"Italy's position was found to be much the same as that of France. Her ministers declared their willingness to consider favorably the allied preferential plan. They expressed surprise that tariffs should be the battledore and shuttlecock of politics, and expressed themselves willing, then and there, to modify their tariffs in favor of Canada if a quid pro quo could be given. As to the establishment of a preferential plan with Great Britain and her other Allies, the Italian ministers said that everything depended upon the steps Great Britain would take.

"The impression of the Commission in the countries visited was, that it was desired that a preferential tariff should be given by each allied nation to the other Allies—that there should be an intermediate tariff for neutral countries, and that enemy countries should be penalized as far as possible by a tariff wall, which, if not prohibitory, would restrain to a large extent the unfair competition and 'dumping' methods which had been such an unsatisfactory feature of commerce during the past.

The report is signed by Mr. James W. Woods, chairman, Toronto; Mr. Theo H. Wardleworth, vice-chairman, Montreal; Mr. H. Edmond Dupré, Quebec; Mr. W. Frank Hatheway, St. John, N.B.; Mr. Frank Pauzé, Montreal; and Mr. George W. Allan, Winnipeg. Mr. Roy Campbell, Montreal, acted as secretary to the Commission.

NEW BRUNSWICK POWER STOCK

None of the preferred stock of the New Brunswick Power Company was placed by Harris, Forbes and Company, and Coffin and Burr, the well-known bond houses, as stated last week. These firms placed the company's bonds only.

VANCOUVER LIFE INSURANCE COMPANY

By a bill now before Parliament the time in which the Vancouver Life Insurance Company may obtain a Dominion license is extended to June 29, 1918.

The proposal of the Ontario government to buy $17,000,000 worth of its bonds, now held in Great Britain, has been abandoned at the request of the British government. Seventeen million dollars worth of Ontario government securities are held at present in Great Britain. The Ontario government proposed to buy those securities, reborrow the money on this side of the Atlantic, and to that extent help Great Britain in financing the war. With the entrance of the United States into the war, the financing of munitions purchases in the United States has been simplified.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

York Township, Ont.—Messrs. C. H. Burgess and Company, Toronto, have purchased $30,000 5½ per cent. 25-instalment bonds.

Carleton County, Ont.—Tenders are invited up to July 14, for $20,000 debentures, dated August 1, 1917. Charles Macnab, county clerk, Ottawa.

Lindsay, Ont.—Tenders will be received up to July 12, for $60,000 waterworks, 6 per cent., 20-years debentures. F. M. Currie, town treasurer, Lindsay, Ont.

Saskatoon, Sask.—The city has decided not to carry out any work involving capital expenditures this year; therefore the sale of debentures will be unnecessary.

Renfrew, Ont.—Messrs. Wood, Gundy and Company have purchased $100,000 6 per cent. serial bonds (1918-1947). A substantial part of this issue has already been placed.

Wilkie, Sask.—Tenders will be received up to July 16 for $6,000, 7 per cent., 20-year, equal annual instalment waterworks debentures. S. A. Dinsley, town clerk, Wilkie, Sask.

Glace Bay, N.S.—The town will issue $12,500 debentures for New Aberdeen school at 5 per cent., redeemable in 13 years by payment of $1,000 each year for 12 years, and $500 for one year; also $10,000 debentures for a motor truck to be redeemed in 10 years in payments of $1,000 each year at 5½ per cent., the denomination of bonds to be $500. Sewer bonds are to be issued for 15 years at 5 per cent., and electrical meter bonds for 8 years at 5½ per cent.

Winnipeg, Man.—Mr. J. A. Thompson, Winnipeg, reports to *The Monetary Times* the sale of the following debentures: Manitoba School District, Rosamond S.D., $6,000, 6 per cent., 20-years; Bruan S.D., $1,300, 7 per cent., 15-years. Saskatchewan Rural Telephone Company, debentures, Fallowmead Rural Telephone Company, $4,000, 7 per cent., 15-years; Bromhead South Rural Telephone Company, $9,600, 7 per cent., 15-years; Moose Valley Rural Telephone Company, $12,000, 7 per cent., 15-years.

Norfolk County, Ont.—For the issue of $75,000 5 per cent. 15-instalment debentures, A. E. Ames' bid of 94.64, or $70,980 was accepted. The following were the other bids: Ferguson, Sanson and Graham, $70,807; Brent, Noxon and Company, $70,533; Wood, Gundy and Company, $70,583; A. H. Martens and Company, $70,309; Canada Bond, $70,446; R. C. Matthews and Company, $69,802; C. Meredith and Company, 94.34; Burgess and Company, 94.26; Macneill and Young, 93.65; W. A. Mackenzie and Company bid $71,097, subject to certain conditions.

St. Catharines, Ont.—Tenders will be received by the city treasurer not later than July 6, for the following bonds: Relief sewer, $76,000, 30-years, 5½ per cent.; bridge right of way, $110,000, 10-years, 5¼ per cent.; hydro-electric extension, $25,000, 20-years, 5½ per cent.; gas plant, $12,000, 10-years, 5½ per cent.; local improvements, $4,597.88, 15-years, 5 per cent.; local improvements, $21,038.28, 10-years, 5 per cent.; local improvements, $14,194.37, 7-years, 5 per cent.; local improvements, $819.45, 5-years, 5 per cent.; public school, $28,000, 30-years, 5½ per cent.

Ontario County.—The county has awarded to Brent, Noxon and Company, Toronto, an issue of $50,000 5½ per cent. debentures. Of these $40,000 run 10 years and were issued for patriotic purposes and $10,000 run 20 years and are on bridge account. The sale price was 98.14. Among the offers received were the following:—

Macneill and Young	97.74
Mulholland, Bird and Graham	97.71
Bankers' Bond Company	97.55
Dominion Securities Corporation	97.54
W. A. Mackenzie and Company	97.37
A. E. Ames and Company	96.87
Wood, Gundy and Company	96.53
Canada Bond Corporation	96.33
Brent, Noxon and Company	96.24
Imperial Bank	96.13
A. H. Martens and Company	95.40

Calgary, Alta.—The Molsons Bank has agreed to advance the city a line of credit similar to that extended last year.—

namely, $1,000,000, pending the collection of some of the current year's taxes. It was stated that under no conditions would more than $1,000,000 be advanced, and that this sum also would include the money already expended and planned to be expended this year on the improvements to the water system. As the end of the first half-year of 1917 is past, the city already has anticipated this loan to a large extent in paying current salaries, etc. The money expended on the water improvement scheme and that planned for this year will aggregate approximately $216,000, so that the city will have to collect a large share of this year's taxes if it continues to make current expenditures.

Halifax, N.S.—Two tenders were received for the city's bond issue of $199,500. Messrs. J. C. Mackintosh and Company offered for such an amount of 5 per cent. debentures, maturing 1951, as would provide $50,000, and would pay 87.27 and accrued interest, provided that firm be given an option on the balance at the same rate for a period of 30 days, and provided the city would undertake not to offer same elsewhere during that period. Messrs. Harris, Forbes and Company, Montreal, bid for $55,000 sewerage bonds at 83.53, with an option on the balance of the $199,500 until August 1. The board thought the prices too low. The bank will be asked to advance funds sufficient for the city's present needs. In January the city borrowed $265,060 at 98.59, and a year ago borrowed $150,000 at 100.53.

The city's terms for the present offering were for separate tenders for debentures or stock "in whole or in part, sufficient to produce at the price offered the sum of $199,500, plus loan expenses. One tender to cover debentures or stock for 34 years from July 1st, 1917. Principal repayable at end of term, and bearing 5 per cent. interest, payable by coupon semi-annually on January 1st and July 1st in each year. The second tender to cover debentures or stock repayable in 30 equal annual instalments of principal and interest."

Montreal, Que.—Finding that the $500,000 offered by the Bank of Montreal will not be sufficient to run the city until the end of July, the board of control passed a resolution last week asking the bank to advance $1,000,000 to cover operating expenses and the payment of interest until the end of August. By that time, it is hoped that the city will be able to float its $1,400,000 loan. The bank has already signified its willingness to lend half a million, provided all public works be discontinued. The text of the resolution passed is as follows: "That the Bank of Montreal be respectfully requested to modify the terms and conditions which were agreed to by the board of control, and by which a temporary loan of $500,000 was granted, since it is found on thorough investigation that the sum allowed would be hardly sufficient for the expenses of administration until the end of July, and that, consequently, it would be impossible to meet certain expenses on the capital account which are absolutely necessary to fulfil the obligations that exist and to finish the construction of certain sewers and pavements which cannot be left incompleted, without grave inconvenience and discredit to the city."

The bank, however, is unwilling to advance $1,000,000. The following is the text of the letter received by the city from Sir Frederick Williams-Taylor, general manager of the bank: "We much regret that we are unable to comply with your request that we increase our temporary loan to you from $500,000 to $1,000,000, and I must reiterate that we will look to the city to use the $500,000 credit we have granted them as expressed in the resolution published by the press this morning. We must remind you that we are not yet aware of the city's policy in regard to the question of annual deficits. Should the city's bonds be sold during the month of July, as you have intimated, we assume it will not be necessary for the city to ask us to increase the temporary loan above the $500,000 authorized. Meanwhile, it will be interesting if you will be good enough to furnish us with a list of the capital expenditure which your resolution states is necessary to complete sewer, sidewalk and other contracts that cannot be left unfinished without inconvenience, discredit and actions for damages for non-accomplishment of obligations."

The board of control will accept a temporary loan of $500,000 for four months, from June 30, and discounted by the Bank of Montreal at 5¾ per cent. without commission.

The Bureau of Municipal Research will make a report on the city's administration. "This means," said Controller Villeneuve, "that we will find out whether it is possible to administer the city on $12,000,000 a year, and it means that if increased taxation is necessary, the citizens who desire the survey will be shown just and fair cause for increased taxation. It will also mean that once for all it will be decided what departments are undermanned and which of them have too many employees—it will, in fact, precede the solution of all civic difficulties."

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—*Acreworth, $1,900, 10-years, not ex. 8 per cent. annuity. A. K. Walker, Estuary; North Instow, $1,400, 10-years, not ex. 8 per cent. instalment. C. Herbert, Instow; Meuse, $1,900, 10-years, not ex. 8 per cent. instalment. H. Bardford, Young; *Biggar, $17,000, 30-years, 6 per cent. annuity. B. Robinson, Biggar; Burke, $1,800, 10-years, 6 per cent. instalment. F. B. Milne, Lashburn; *Parkside, $1,200, 10-years, not ex. 8 per cent. instalment. W. Hamilton, Parkside; *Glaslyn, $1,500, 10-years, not ex. 8 per cent. annuity. S. Wood, Glaslyn; St. Cunugunda, $1,800, 10-years, not ex. 8 per cent. annuity. A. Green, Cudworth; Howard, $1,200, 10-years, not ex. 8 per cent. annuity. Jos. Ratcliffe, Square Hill; Prussia, $12,500, 20-years, not ex. 8 per cent. annuity. F. G. Stanley, Prussia.

Rural Telephone Companies.—Yellow Lake, $4,800, 15-years, 8 per cent. annuity. L. Briand, Beverley; Speers, $22,000, 15-years, not ex. 8 per cent. annuity. S. C. Wilson, Speers; Arlington, $11,500, 15-years, not ex. 8 per cent. annuity. E. W. Brett, Grenfell; Springwater, $7,500, 15-years, not ex. 8 per cent. annuity. R. E. Bourk, Springwater; Mawer, $18,000, 15-years, not ex. 8 per cent. annuity. J. H. Grant, Mawer; Dilke, $8,400, 15-years, not ex. 8 per cent. annuity. Thos. Ritson, Dilke; Turnhill, $3,400, 15-years, not ex. 8 per cent. annuity. J. A. George, Turnhill; Belfast, $600, 15-years, not ex. 8 per cent. annuity. P. A. Leach, Netherhill; Greek Valley, $9,000, 15-years, not ex. 8 per cent. annuity. J. W. Watkinson, Central Butte; Quill Lake, $3,700, 15-years, not ex. 8 per cent. annuity. J. Bird, Quill Lake; Darwin, $1,500, 15-years, interest, 8 per cent. annuity. T. E. Miller, Redvers; City View, $3,000, 15-years, not ex. 8 per cent. annuity. Thos. Wilkinson, Regina; Smiley Western, $1,500, 15-years, not ex. 8 per cent. annuity. E. Swan, Smiley; Pizarra, $11,900, 15-years, not ex. 8 per cent. annuity. C. I. Firth, Loverna; Carlton, $9,500, 15-years, 7 per cent. annuity. R. S. Breckenridge, Carlton; Verwood, $8,000, 15-years, not ex. 8 per cent. annuity. F. Parks, Verwood; Loch Ayr, $2,200, 15-years, not ex. 8 per cent. annuity. D. Bryden, Bethune; Pinto Creek, $18,000, 15-years, not ex. 8 per cent. annuity. I. W. Bristow, Pinto Creek.

The following is a list of bonds reported sold:—

School Districts.—Beechmore, $1,800, Goldman and Company, Regina; Alton, $1,200. H. O'Hara and Company, Toronto; Helena, $2,000. Western Canada Bond Company, Winnipeg; Grangehurst, $225. Grand Lodge A.F. & A.M., Regina; Manor Park, $700. H. O'Hara and Company, Toronto; Midale, $2,500. Great-West Life Assurance Company, Winnipeg; Scout Hill, $1,800. Great-West Life Assurance Company, Winnipeg.

Rural Telephone Companies.—Mitchellton, $14,000. W. L. McKinnon and Company, Regina; Moose Valley, $12,000. J. A. Thompson, Winnipeg; Gerald, $2,950. W. L. McKinnon and Company, Regina; Dodsland Northern, $7.800. Somerville and Olson, Regina; Lenora Lake, $11,000. J. A. Thompson, Winnipeg; North Ernfold, $7,400. W. L. McKinnon and Company, Regina; Hope Lodge, $8,000. W. L. McKinnon and Company, Regina; Plunkett, $22,600. Goldman and Company, Regina.

Village.—Aylesbury, $1,000. W. L. McKinnon and Company, Regina.

*Being sold by the local government board.

Mr. F. W. Ashe, London manager of the Union Bank of Canada, during a recent interview with the Montreal Gazette, stated that the financial position of Great Britain at the present time was excellent, and that in banking circles there was no doubt that a further large war loan could be floated with ease during the first part of the coming year. Mr. Ashe remarked that the English banks were in a strong position, and that there was no apprehension as to the outcome of the war as far as the financial end of it was concerned. Discussing general conditions in the money market at London, Mr. Ashe said there were no fears of a stringency, and as far as he could see it the situation should be easier in July and August.

TRADE AND TRANSPORTATION

In the report of the special Canadian trade commission to Great Britain, France and Italy, just published, considerable emphasis is placed upon the problem of ocean transportation. The commissioners think that the established lines between Canada and the allied nations have not given that service in linking this country with other countries which might have been expected. Freight rates have been of such a character as seriously to impair their usefulness as a means of developing Canadian trade. "Canada's ocean transportation will have to be completely reorganized if the Dominion is to derive the fullest benefit from her natural resources and manufactured products," says the report. A suggestion of the commission, one member dissenting, is the centralization under Imperial control, say, in London, of ocean cargo tonnage available by tramp steamers, which form the larger proportion of the tonnage. Employment of ships might be so adjusted, it is thought, that the different means of the Empire might be met as the requirements of the crop or season might demand. "If such a mobilization of Imperial transportation facilities could be achieved," says the commission, "it would lead to an adjustment of freight carrying which would ensure adequate return to the steamers and at the same time bring about a reduction of freight rates which would enormously assist transportation between Canada, the ports of Great Britain and the allied nations. This is a novel suggestion. A centrally controlled commercial fleet, placed during the busy season in various parts of the Empire, would probably have a drastic effect on the freight rates of privately owned vessels. Whether such a scheme is practicable and could satisfy various needs without conflict of interest in various parts of the Empire is a matter for decision when further information is available. The ocean carriers, until the war broke out, were apparently strong enough to withstand all the influence of government commissions and of governments themselves exerted with a view to regulating freight rates and sailing schedules. The war has brought about important changes in the world's shipping. Governments have, as war measures, taken an active interest in the control of shipping. How far this influence will be exerted after the war is problematical. One may reasonably expect, however, considerable opposition from shipping companies to any scheme of government control of ocean transportation. These considerations do not belittle the fact that the problem of ocean transportation is one for serious consideration by the governments of the British Empire. Our trade commission points out that they were confronted by this problem at every point. The commission feels that it can only report conditions respecting freight rates as they find them, but they reaffirm their belief that the question is a matter of such material importance to the country's export and import business that they recommend "as strongly as possible a complete governmental survey of the freight situation, and prompt application of such remedial measures as may be found necessary."

The report is one of 158 pages, and contains many other important recommendations, together with valuable information concerning the competition which Canadian manufacturers must expect to meet in marketing their goods, especially in Great Britain, France and Italy. The commissioners signing the report are Mr. J. W. Woods, chairman; Mr. T. Wardleworth, vice-chairman; Mr. W. F. Hatheway, Mr. F. Pauzé, Mr. H. E. Dupré and Mr. G. W. Allan. They have produced an exceptionally useful document which has much matter for the active consideration of the government, our manufacturers and trade interests generally.

WAR AND LIFE INSURANCE

With the prospects of conscription in Canada, the life insurance actuaries are speculating as to how far such a new war risk will affect the business. Prior to the war, the majority of the companies issued policies at the regular rates which were free from restrictions as to naval or military service. When the war broke out, they were carrying at the ordinary rates many millions of insurance on those eligible for war service. After nearly three years of war, they are carrying a heavy liability under these policies, at ordinary rates. This is indicated by the amounts already paid out in war claims. Up to the end of 1916, the companies transacting life insurance in Canada had paid over $7,000,000 in war claims.

Our life insurance companies make no profits on war risks. The premium is calculated to cover the risk of death arising from ordinary causes. In it there is no provision for war mortality. If the war risk is to be covered, an extra premium is necessary. The extra premium does not cover the extra mortality experienced in this war. Indeed, the insurance companies have to base their rates for this war largely on the experience of this war, unique, so far as mortality experience is concerned, in the history of life insurance companies. As the war continues, the strain upon the companies will increase. The Canadian companies have been liberal in their settlement of war claims, and generally have combined a policy of liberality with a proper respect for the rights and welfare of all policyholders.

FIRE UNDERWRITERS' ASSOCIATION

The evidence of several witnesses at the Ontario insurance inquiry this week and the report of the insurance committee of the Canadian Manufacturers' Association, indicate a marked dislike of the Canadian Fire Underwriters' Association. That the association is a combine, the combine admits, but a combination of insurance companies is necessary to fix the proper rates. As Mr. Robertson, secretary of the Canadian Fire Underwriters' Association, pointed out in a statement filed last fall with Judge Masten, commissioner presiding at the inquiry, "Owing to the price value of any single fire insurance contract being unknown, it is necessary for the companies to combine in order, by their united experience, to fix rates, which, in the average will cover the aggregation of risks of a similar class. This combination enables effective services to be given to the advantage and in the interest of the public; and finally, only by combination and by agreement to maintain adequate rates can the companies remain in such a financial condition as will enable them to fulfil their duty of providing the necessary security to the public in the event of any and every fire disaster."

The fire insurance companies, we think, will be found quite ready to accept any reasonable regulation of rates. In the meantime, the investigating commissioner is probably accepting the heated attacks on the Canadian Fire Underwriters' Association with the proverbial grain of salt.

LICENSED FIRE COMPANIES WELL PROTECTED

This is Opinion Expressed by Insurance Broker at Ontario Inquiry

In giving evidence before the Ontario Insurance Commission on Wednesday, Mr. W. H. Slater, of the Willis, Faber and Company of Ontario, Limited, insurance brokers, stated that the principal reason for the establishment of the Canadian Fire Underwriters' Association was doubtless the reduction of expense in the operation of the adhering companies, and to that extent fire insurance rates in general must benefit. The control exercised by the Association and its members has, however, assumed such proportions that, but for the very limited competition which now exists, the general public would have no protection against what would be an absolute monopoly. The volume of competition existing to-day, licensed and unlicensed, is a useful check on unduly high rates, but it is not nearly adequate except in the case of first class sprinklered risks. There are many risks in Ontario, the value of which is so great, that only a comparatively small proportion of the insurance can be placed in non-tariff companies, licensed and unlicensed, and the effect of such conditions is usually reflected in the rate. On unsprinklered business, the volume of insurance which can be written in licensed non-tariff companies is so small as to be almost negligible as a competitive restraint on rates.

Encourage Independent Competition.

Sufficient evidence has already been given to show the importance of unlicensed competition and its effect on tariff rates, and the commissioner has intimated that he realizes the undesirability of restricting or discouraging it. Indeed, conditions would be greatly improved if the amount of independent competition were doubled instead of reduced. It should be obvious that any tax whatever on premiums paid to unlicensed companies would exercise on such competition a discouraging effect exactly proportionate to the magnitude of the tax. I estimate that the average reduction from tariff rates on insurance placed abroad is about fifteen per cent. In some cases it is higher and in some cases lower, but, for every risk placed at 20 per cent. reduction, there is probably one placed at 10 per cent. reduction, and for every risk placed at 30 per cent. reduction, there is probably more than one placed at actual tariff rates. The average reduction being fifteen per cent., therefore, a tax of 5 per cent. on premiums would reduce the efficacy of unlicensed competition by exactly one-third. There is an Ontario firm which induced the Canadian Fire Underwriters' Association to moderate their demands by placing practically all their insurance abroad at a reduction of 8 per cent. off the tariff rate. A tax of 5 per cent. on the unlicensed premiums would have reduced the value of that competition by more than 60 per cent., and would probably have deterred the assured from taking advantage of the competition at all.

Automatic Sprinkler Question.

In speaking of the discouraging effect which a tax would exercise on unlicensed competition, I have in mind mainly unsprinklered risks which are, after all, in the majority. A firm which erects a plant of first class construction and equips it with automatic sprinklers can take advantage of unlicensed mutuals or reciprocals by which its net rates are, through careful selection, reduced to so low a level that a tax of 5 per cent. on the net premium would not perhaps act as a deterrent, particularly since the inspection service of the New England Mutuals appears to be considered as being worth more than the tax. In the case of insurance placed with unlicensed stock companies and Lloyds, however, that is, mainly insurance on unsprinklered property, the total amount of annual tax on the average individual risk would be sufficient to act as a great check on the value of the competition, and it is difficult to see how one class of unlicensed insurance could be taxed and not another.

Disadvantages of Unlicensed Companies.

The competition of unlicensed companies is necessary, not only as a check on high rates, but as a means by which property owners may obtain forms of contract which the Canadian Fire Underwriters' Association refuse to permit their members to write. Circumstances often arise which render it most desirable for an assured to obtain a special form of policy. Individual companies may be, and frequently are, perfectly willing to grant such a policy, but if it is not just in accordance with Canadian Fire Underwriters' Association rules, they are not allowed to do so, and the assured, in order to obtain such special form of policy, is driven to place his insurance abroad. The underwriters are, therefore, in the position of declining to supply something that can be obtained abroad, but at the same time seeking by taxation to hinder the insurance buyer from going abroad to fill his requirements. In asking for a tax on unlicensed insurance, the Canadian Fire Underwriters' Association complain that they are faced by serious competition and they intimate, if they do not actually state, that, since licensed companies are taxed by the provincial and Dominion governments, and unlicensed companies are not, the latter can operate under a lower expense ratio and are thus virtually protected against the licensed companies. If that is the case, why do British and American companies take out licenses in Canada? The reason is that a company not licensed here is under very heavy disadvantages which much more than offset the taxes payable in this country. Among these disadvantages are the facts that, being unlicensed, they are not regarded so favorably by Canadian premium payers; that they cannot maintain offices here, and that no person is allowed to solicit business on their behalf. Without active solicitation, no company can obtain a large volume of premiums, either in Canada or elsewhere.

Tariff Companies Open to Criticism.

Any assured desiring to take advantage of the insurance market outside of Canada must, either directly or through a broker, actually seek the companies. The very fact that an assured will seek unlicensed companies is sufficient proof that the conditions or terms obtainable from licensed companies are unsatisfactory. An assured should not be debarred or hindered from completing a financial contract on the best terms obtainable. It would be as reasonable to tax a man from borrowing money from a New York bank at 6 per cent. interest as an alternative to paying 7 per cent. to a Canadian bank. It is obvious that unlicensed companies will not accept insurance at rates at which it is likely to be unprofitable. There is no reason why a rate which is profitable to an un-

DIVIDEND No. 108.

Notice is hereby given that a Dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1917, and that the same will be payable at the Head Office and Branches on and after Wednesday, the first day of August next.

The transfer books will be closed from the 17th to the 31st July, 1917, both days inclusive.

By order of the Board,

E. HAY, General Manager.

Toronto 20th June, 1917.

[illegible] company. If, as the Canadian Fire Underwriters' Association complain, the unlicensed companies operate under a lower expense ratio, that surely only lays the tariff companies open to criticism. Let them reduce their expenses proportionately. One thing is certain, property owners in Ontario will not send their insurance abroad when they can obtain equally good terms and conditions at home.

Cannot Tax Unlicensed Companies.

Instead, however, of seeking to meet competition by ordinary competitive methods, the Canadian Fire Underwriters' Association desire to block competition by increasing the cost to the assured of insurance obtained from unlicensed companies. Their cry is, "Tax the unlicensed companies." That is impossible. The unlicensed companies are outside Canadian jurisdiction and cannot be taxed. Any tax imposed on unlicensed insurance will be borne by the assured and by the assured alone. It is said that the taxes paid by licensed companies are indirectly paid by the assured and are, therefore, taxes imposed on insurance buyers. I take it, however, that insurance taxes in Ontario are taxes imposed on the profit making business carried on by the insurance companies. This must be so, or how is it that the farmer's mutual companies in Ontario are practically immune from taxation. The only tax paid by these companies is a proportionate share of the upkeep of the Ontario Insurance Department. It is almost infinitesimal, in many cases only amounting to $4 or $5 annually. These farmers' mutual companies are not operated for profit and are not taxed. It appears to be almost conclusive proof that the taxes are not aimed at the assured, but at the profit made by the companies. Why then should a tax be imposed on other classes of insurance buyers?

Fire Marshal's Illogical Tax.

The Canadian Fire Underwriters' Association complain that they are under a great disadvantage by reason of taxes which they must pay, and they therefore ask insurance buyers not patronizing licensed companies shall be made to pay 5 per cent. to 10 per cent. on the amount of their premiums. The taxes paid by licensed companies to the Ontario government amount in all to less than 1½ per cent. There is a tax of 1 per cent. on premiums under the Corporations Tax Act, and a tax of ⅓ of 1 per cent. on premiums under the Fire Marshal's Act, and I understand that a considerable proportion of the latter is being rebated. In addition, there is a sum of $5,000 for the upkeep of the Ontario Insurance Department paid in proportion to the premium income only by companies incorporated in this province. The Dominion taxes consist of a war tax of 1 per cent. on premiums, and a fixed amount divided amongst companies with a Dominion license for the upkeep of the Dominion Insurance Department. I am informed that this amounts to not more than ¼ of 1 per cent. Not very long ago the tariff companies, under the name of the All Canadian Insurance Federation, approached Sir Thomas White with the request that the Dominion government impose a tax on unlicensed insurance. The minister replied that the question had been very carefully considered in 1909, when opinions from all concerned were received, and that the evidence against the propriety of such taxation had been so decided that it would be useless to reopen the discussion. If, then, the Canadian Fire Underwriters' Association are not asking the Ontario government to impose taxation which has been declined by the Dominion government, they must base their present request on Ontario taxes only, and are demanding that assured other than their patrons shall pay four to seven times the tax levied on them as profit-making concerns. They entirely pass by the fact that unlicensed insurance is already taxed in Ontario. The firm I represent, as brokers, pay a tax of 1 per cent. on the premiums of all insurance placed by them in unlicensed companies. Besides this, there is the Fire Marshal's tax of 1 per cent. on all losses collectable from unlicensed companies—probably the most illogical tax ever imposed anywhere, since a contribution is levied at the very time when the assured stands most in need of all his assets. The Fire Marshal's tax payable by licensed companies is nominally one-third of 1 per cent. on the premiums, but a great percentage of this is being rebated to the companies, largely by reason of the tax collected on unlicensed losses. Thus, insurers in unlicensed companies are already bearing a disproportionate share of the cost of the Fire Marshal's office.

In effect, since the Canadian Fire Underwriters' Association are asking that the assured shall pay far heavier taxes than they pay themselves, they are demanding nothing less than protection. Insurance is no more a fit subject for protection than banking. Insurance companies are not producers but distributors. They act as an exchange for the distribution of losses over a wide area, retaining as their profit as large a proportion as possible of the funds entrusted to them. The labor employed is nominal in comparison with the capital involved. The licensed companies state, for instance, that the New England Mutual companies do not employ any labor in Canada. If the New England Mutual companies were licensed here all the office work in connection with Canadian risks could probably be done by one man and a stenographer; the inspectors would still come to Canada from the States, as they do now. The imposition of a protective tax would not be protecting any industry at all, much less a Canadian industry. The vast bulk of licensed insurance is placed with foreign corporations, and the profits are remitted to Great Britain or the United States. Nevertheless, the licensed companies are already very highly protected by the facilities which they enjoy in return for the taxes they pay. Further protection by means of a tax on unlicensed insurance would help to increase the profits made by licensed companies, but would gravely affect, both directly and indirectly, the great bulk of the population—the insurance buyers.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended June [illegible]:—

McKinley-Darragh-Savage Mines, 84,459; Trethewey Silver Mine, 45,475; O'Brien Mines, 56,555; Nipissing Mining Company, 479,693. Total, 666,182 pounds, or 333 tons.

The total shipments since January 1st, 1917, now amount to 13,306,045 pounds, or 6,653.022 tons.

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks of June 29th, 1916, and June 30th, 1917, respectively, with changes:—

ONTARIO FIRE INSURANCE INQUIRY

Hearings Resumed at London, Hamilton and Toronto

"The average man pays too much for his insurance," said Mr. Pocock, chairman of the London Utilities Commission, giving evidence at the Ontario government fire insurance inquiry resumed at London last week. Judge Masten presided as commissioner. Controller E. S. Little was the first witness, and advocated the appointment of a permanent insurance commission to deal with insurance rates. He stated that there was discrimination by the underwriters, but the individuals had no court of appeal. He instanced firms paying 40 cents per $1,000, when others with more risks, etc., paid 30 cents. His firm had held out against paying the higher rate, and threatened to cancel the insurance. The rate was met. He thought a tribunal to which all could appeal would be proper. Philip Pocock referred to the disputes between the city and the underwriters relative to the demands of the latter for better protection against fires. Mr. Pocock thought that the means of protection were ample, and the citizens should not be further burdened. The underwriters did not agree to that, and unless their demands were complied with the insurance rates were boosted. In his judgment, there should be some court of appeal where matters of this nature could be settled.

Says Ontario Rates Excessive.

"I do not think that London is discriminated against so much by the underwriters, but I do think that the insurance rates over the province are excessive," said Mr. Pocock. "The underwriters are a combine. That should not be. There should be a commission, in my judgment, to deal with such cases, so that the rates may be fixed on a proper basis. I think that some of the big men can get protection, by putting up certain kinds of structures, but the average man pays too much for his insurance. There is no doubt about that in my mind."

He refused to admit that there was any parallel between the insurance business and the railway business. The former's rates were largely governed by competition. A man could go anywhere in the world and get his insurance. The insurance companies got no bonuses from the government. The commission could not discriminate in the matter of moral risks, if it had control.

Commission or Complaints Tribunal?

Judge Masten, in discussing the question with Mr. Pocock, declared that the whole question narrowed down to two aspects, if a change was to be made. One was that a commission should be formed. Information had come to him from many sources that such a commission would be rather hard to handle. A large corps of experts would be needed, and the results would seem not to justify the expenditure. The other was a tribunal, merely to settle disputes. This would not require so expert a knowledge of conditions, and would be much cheaper and much more easily handled. City Solicitor Meredith stated that there were differences of opinion between the people and the underwriters. It resolved itself simply into this question: Shall there be some court to which a person may appeal to settle these differences? The nature of the tribunal was something to be decided by those in authority. There was a necessity, in his judgment, for some tribunal to deal with these matters.

Suggests Government Insurance Scheme.

John M. Parsons suggested that the companies be compelled to take insurance. He instanced cases where the companies had refused. He advocated amendments to the insurance act to allow city property holders to form mutual companies for the protection of residential property. This would reduce the rate a great deal. He thought there might also be a government insurance scheme. City Solicitor Meredith, in winding up the case, pointed out that he had made his point, namely, that there were disputes between the municipality and the underwriters and between the underwriters and individuals, and in consequence, there should be a tribunal to settle them.

It was decided to hear the arguments in October, when Judge Masten will have completed his investigations.

The commission have held sessions also at Hamilton and Toronto this week.

ONTARIO'S WOOL RECORD

Farmers, Co-operating, Get Record Prices for Their Wool at Guelph

That a record price for wool sold by the Ontario farmers under the auspices of the Ontario Sheep Breeders' Association was partly due to the fact that the wool was kept in good condition by being tied with paper twine, thus preserving the cleanness of the fleece and soundness of the fibre, was the opinion expressed to *The Monetary Times* by Mr. R. W. Wade, secretary-treasurer of the association.

Over 200,000 pounds of wool were sold. Prices averaged well over 60 cents per pound, which is believed to be the highest in the history of Canada. In 1913, before the war, wool sold at 12 to 15 cents per pound; in 1914, at 20 cents; in 1915, at 27 cents; in 1916, at [illegible] cents.

Prices Received per Pound.

Prices for 1917, as given by Mr. Wade, were as follow:—

Grade.	Approximate weight.	Price per lb.
Fine medium combing	3,500	67 cents
Medium combing	80,000	66 cents
Medium clothing	7,000	67 cents
Low medium combing ...	62,000	63⅛ cents
Coarse	90,000	57 cents
Lustre	4,300	57 cents
Rejects	8,200	50 cents
Gray and black	1,200	46 cents
Locks and pieces	600	34 cents
Tags	4,500	26 cents
Washed (a small lot)	....	78 cents

First Co-operative Sales.

This is the first year the farmers of Ontario have sold wool co-operatively. Over 1,600 of them participated in the scheme, which was worked out in the department of agriculture, and shipments were made to the Winter Fair Building at Guelph, where the wool was graded by an expert, and buyers for the leading wool merchants of the Dominion came to inspect the offerings and submit tenders. The wool sold co-operatively was valued at about $139,000. Ontario's annual output is about 2,000,000 pounds.

LIFE UNDERWRITERS' CONVENTION AT WINNIPEG

The life underwriters of Canada will meet in convention at Winnipeg from August 21st to August 25th at the Fort Garry Hotel. The following is an outline of the programme:

Addresses and Discussions.—"Selection and Training of Agents," Mr. Winslow Russell, agency manager, Phœnix Mutual, of Hartford, Conn.; "The Economic Value of Life Insurance," Professor W. W. Swanson, of the University of Saskatchewan; "The Licensing of Agents," Mr. A. E. Ham, superintendent of insurance for Manitoba; address, Mr. C. C. Ferguson, general manager, Great-West Life, Winnipeg; "The Standardization of Provincial License Laws," Mr. A. E. Fisher, superintendent of insurance for Saskatchewan; Presidential address, Mr. J. Burtt Morgan, Victoria, B.C.

Discussions.—"Enlarging One's Clientele." Led by Mr. F. G. Hassard, Dominion Life, Toronto; "Monthly Income Insurance and How to Sell It." Led by Mr. E. J. L'Esperance, Imperial Life, Montreal; "The Need of Life Insurance for the Farmer, and How to Sell Him." Led by Mr. P. A. Wintemute, vice-president for Alberta and British Columbia; "Institutional Advertising." Led by Mr. J. H. Castle Graham, general secretary and treasurer; "Salesmanship"; "Enthusiasm," R. G. McCuish, Canada Life, Regina; "Teaching of Life Insurance in Our High Schools and Colleges." Open competition. First prize, $20; second prize, $15. Demonstration of the best canvass. Competitors will try to sell life insurance on the platform to a selected prospect.

Banquet.—The following speakers will be present: His Hon Sir J. A. M. Aikens, lieutenant-governor of Manitoba; the Hon. T. C. Norris, premier of Manitoba; Mr. Geo. T. Wilson, vice-president Equitable Life, New York city. Subject, "Now." Subject to slight changes and additions.

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

PERSONAL NOTES

DR. W. W. AMES, late deputy commissioner of Saskatchewan liquor stores, has been appointed deputy provincial treasurer and registrar.

CAPT. R. L. JUNKIN, son of Mr. Robert Junkin, of the Manufacturers Life, Toronto, enlisted with the Canadian Engineers as a private in October, 1914. Having passed his examinations with the Engineers, infantry and cavalry, he was soon recommended for a commission and went overseas with the second division in May, 1915. In November, 1916, he was awarded the Military Cross for conspicuous gallantry and resourcefulness on the battlefields of Belgium and France. A short time ago he was gazetted a Captain in the Engineers and was decorated by the King at Buckingham Palace recently.

HON. AUBIN EDMOND ARSENAULT, the new premier of Prince Edward Island, is a prominent barrister of the island province. He has been one of the leaders of his profession for many years and like so many barristers in other provinces, has taken a keen interest in politics, finally becoming a cabinet minister and now premier. He is the son of the late Joseph O. Arsenault, member of the Senate of Canada, and was born at Egmont Bay, Prince Edward Island, on July 28th. 1870. Educated at St. Dunstan's College, Charlottetown, and St. Joseph's College, Memramcock, he read law with McLeod, Morson and McQuarrie, Charlottetown, and with Hon. Charles Russell, London, England. In November, 1898, he was called to the Prince Edward Island bar, and in 1908 was elected to Prince Edward Island legislature for County Prince. In December, 1911, he became member of the Prince Edward Island government; and last month became premier in succession to Hon. J. A. Mathieson. In 1913 Mr. Arsenault was appointed member of the Commission of Conservation of Canada. He is a conservative and a Roman Catholic.

Hon. Aubin E. Arsenault.

MR. FRANK H. CROCKARD assumed his duties as president and general manager of the Nova Scotia Steel & Coal Company this week. He has left his former position as vice-president of the Tennessee Coal, Iron & Railroad Company, Birmingham, Alabama, with the best wishes of his Alabama friends. Mr. George G. Crawford, president of the Tennessee Company, said:—"Mr. Crockard has rendered loyal and efficient service and his departure is regretted. In leaving he takes with him the respect and esteem of his friends in the Tennessee company and their best wishes for success in his new field of work." Commenting upon his departure for Nova Scotia, the Birmingham Age-Herald says:—"While regretting to lose Frank H. Crockard, Birmingham congratulates him on the splendid recognition he has received in being made president of the Nova Scotia Steel & Iron Company, one of the largest concerns of its kind on the American continent. Mr. Crockard came to Birmingham in 1906, as vice-president and general manager of the Tennessee company when the property was acquired by John W. Gates and associates. He has resigned that office to accept his new position, which ranks with those of President Farrell, of the Steel Corporation, Charles M. Schwab of the Bethlehem Company, and other great captains of industry who form a brilliant galaxy in America's industrial life. A man of exceptional executive ability and broad experience, Mr. Crockard in addition to the important work he has performed in helping to bring the Tennessee Company up to its present state of efficiency, has aided materially in the upbuilding of Birmingham. He has taken a prominent part in civic affairs and has been conspicuously successful in movements undertaken for the public welfare. His work in improving the living conditions of the Tennessee Company's employees has won him national fame." Among the friends who know him best Mr. Crockard is looked upon as an exceptionally hard worker—a man with a genuine passion for hard, detailed and exacting work.

CALGARY'S FINANCIAL POSITION

Taken as a whole, the financial statement of the city of Calgary for the year ending December 31st, 1916, is a satisfactory document. There are certain adverse features in the statement, some of them unavoidable, but it is gratifying to know the good work which the city authorities have done during the past year to bring the civic finances to a healthy position. Good progress has been made, for example, with the debenture coupon register, which was recently balanced for the first time. Every effort will undoubtedly be put forward to retain this advantage. While the real estate register is not complete, considerable attention has been given to it and this important record will probably be perfected during the current year. An examination of the general statement of assets and liabilities indicates that at the end of the year care had been taken of all debenture interest then becoming due and that, in addition, cash in hand and in bank amounted to approximately $50,000. There were no obligations to banks either on behalf of the city or any of its utilities.

Two matters to which the city's consulting chartered accountants, Messrs. Macintosh and Hyde, have drawn attention are the shortage in the sinking fund and doubtful taxes. The sinking fund is now short-provided to the extent of $809,544. This is solely due to the difficulties experienced by the city recently in collection of taxes, but as the accountants point out, it is a matter which should have the earnest attention of council. Last year there was a loss of interest-earning power in the fund because of the amounts short-contributed. Seeing that a large part of the sinking fund investments are earning over the required 4 per cent. per annum, it may be that the extra income will, for a time, off-set the short-earnings. Should it be found that the total earnings are short of the amount required, an additional levy should be provided for in the estimates.

The doubtful taxes debtors item stands in the accounts at $81,931. This sum represents taxes for which credit has been given to revenue in past years and which are deemed uncollectable. A large proportion of this amount represents taxes which the assessor has requested council to approve for cancellation. Should the city council adopt the view taken by the assessor, a heavy charge to revenue will become necessary for which provision should be made.

The general revenue and expenditure account shows an adverse balance of $12,208, caused largely by an over-estimate of revenue to be derived from penalties on arrears of taxes, together with the necessity which arose to write off to a revenue local improvement plank sidewalk by-law for $2,792.

The utility results for the year 1916 have been as follows: Electric light and power, profit, $15,254; street railway, profit, $28,722; waterworks, loss, $56,771; market and weigh scales, loss, $6,612; paving plant, loss, $10,002, after all charges properly applicable to the year have been made. Full depreciation has been allowed in each case. For many years, the electric light and power department has made a practice of calculating its expenses for the year to December 31st, and its revenue for the year to January 15th. This was changed during 1916, with the result that the above figures contain revenue for 11½ months, as against expenses for a full year. Under these circumstances, a profit of $15,254 is gratifying.

Calgary is one of the thriving cities of Western Canada, being an important business centre, surrounded also with some of the best agricultural lands in the Dominion. The mayor, city treasurer, finance committee and civic rulers generally, have a proper conception of the steps necessary to ensure the city's finances being placed in an absolutely unquestionable position. They have also the advice of chartered accountants and one may anticipate even better results in the balance sheet for the current year.

Unlicensed Insurance Supported by Manufacturers

Licensed Fire Insurance Companies, They Say, Are Not Subjected to Unfair Competition—"The Theory of the Control of Insurance Rates is Visionary"—Report of the Insurance Committee of the Canadian Manufacturers' Association.

AFTER stating their position regarding the Canadian Fire Underwriters' Association and insurance generally, as outlined in *The Monetary Times* two weeks ago, the insurance committee of the Canadian Manufacturers' Association, say in their recent report: "The policy of our association is to encourage the placing of business in licensed companies, so long as they will provide proper covers at reasonable prices, but not otherwise. In adopting this attitude we are not advocating any deviation from 'Made-in-Canada' doctrine that we would characterize as unpatriotic when applied to the goods we offer for sale. So far as the principle of protection is concerned, your committee contend that the cases are in no way parallel."

"Upon what grounds," asks the insurance committee of the Canadian Manufacturers' Association, "would any government be justified in according protection to insurance companies unless it was prepared to accord similar protection to banks? Is there anything about an insurance contract that would make it a fit matter for protection, that would not equally characterize a loan or a debenture issue? Would it be proper to suggest that a joint stock company, that sells a bond issue in New York, should be taxed thereon when it is engaged in the patriotic work of bringing in outside capital to help build up the country? Would it be acceptable to the municipal corporation of Winnipeg, for instance, to pay a tax on the debentures it disposes of in London? If a loan of that kind is to be taxed, then why not a promissory note? Viewed from this standpoint, the proposition is so absurd that it carries its condemnation on the face of it.

Licensed Companies and Unfair Competition.

"The licensed companies make out a plausible case for protection when they cite the taxes they have to pay, and the regulations they have to comply with, all of which, they tell us, the unlicensed companies escape. But this form of argument is plausible only, for upon closer examination it will be found that it does not hold water. True, the licensed companies have to maintain deposits at Ottawa and the unlicensed companies do not; but the latter have similar deposits to maintain somewhere, and there is capital tied up just the same in either case. Nor should it be forgotten that such deposits are maintained in the form of interest-bearing securities, the returns from which are regularly paid over to the depositors.

Pay Special War Taxes.

"True, that the licensed companies have to pay special war taxes on their income—taxes which our government does not collect upon the Canadian income of unlicensed companies; but the taxation laws of England and the United States (practically the only two markets for unlicensed insurance used by Canadian manufacturers) are just as severe on insurance companies as the Canadian laws, so that the competitors against whom the Canadian Fire Underwriters' Association asks protection do not enjoy immunity in this regard. True, still further, that the licensed companies, as good citizens, contribute to the Patriotic and Red Cross Funds, and pay their municipal taxes; the unlicensed companies may not make any contribution to Canadian coffers, but they make similar subscriptions and pay similar taxes in their own country, so it is difficult to see wherein they possess an advantage that enables them to underbid.

"But even were it the case that licensed companies, as a result of these taxes, deposits, subscriptions, etc., had an overhead expense of from 5 to 10 per cent. to pay which unlicensed companies escaped, it would still be permissible to argue that they thereby secure certain advantages over their unlicensed competitors, which apparently are well worth the price. Some of these advantages have already been referred to in this report, and need not be repeated. If these advantages were not real there would be nothing to prevent the licensed companies surrendering their licenses and operating in Canada through brokers only. The fact that they continue their business in Canada under circumstances said to be so adverse, when they really have no stake in the country sufficiently large to hold them here, is fairly good evidence that they recognize and appreciate their advantages over unlicensed companies and that the unfair competition with which they have to contend is not the serious factor they try to make it out to be.

Control of Insurance Rates.

"The Ontario investigation has developed one feature, which under the circumstances, was probably only natural. With the insurance companies on the one hand complaining that they were making very little money as the result of unfair competition, and with the insured on the other hand, complaining that the companies were demanding exorbitant rates and acting in a high-handed and arbitrary manner, a suggestion has been put forward that rates and competition should both be submitted to some form of control.

"Your committee are not impressed with the likelihood of any real relief being secured in that way, simply because it does not get at the root of the trouble. They cannot conceive, for instance, of any law which would compel an insurance company to continue in business at a loss, or to continue writing any class of business which its experience showed to be unprofitable. Control might be effective within certain limits as a means of doing away with discrimination where such exists; but under some circumstances it would be manifestly unfair to deprive the company of its discriminatory rights, as for example in the case of the moral hazard. Two risks might be to all intents and purposes identically the same, so far as construction, occupation, protection and exposure were concerned, yet in the moral hazard they might be entirely different.

Moral Hazard and Rates.

"No government bureau could probably afford, on political grounds, to recognize a difference in moral hazard as justifying a difference in rate. What, then, would be its policy in such a case? Would it order the company to write the undesirable risk at the same rate as the desirable one? Would it have power to compel the com-

pany to write any risk against the company's judgment, or would it simply have power to compel the company to avoid discrimination? The simplest method in this case for the company to avoid discrimination would be to refuse both risks, and if other companies in the Canadian Fire Underwriters' Association pursued the same policy, as they almost certainly would, then both risks would have to look for cover in unlicensed companies and submit to a tax. In that event, the very law which would be intended to protect insurance companies and secure fair treatment for the insured, would drive the business out of Canada and force it to pay a tax.

Rate Control is Visionary.

"The theory of rate control is visionary. If it were to yield results satisfactory to the insured, it would only be by the enforcement of orders which the companies would resent as impracticable, and which might ultimately cause them to retire from the field. If it were to yield results satisfactory to the companies, it would only be by the authorization of rates and regulations that would add to the burdens of the insured. In some of the States, where it has been tried, it has had to be abandoned; in others it has relieved the situation so slightly as to have been hardly worth while. And the reason for its failure is that it does not strike deep enough; it makes no provision for eradicating the fundamental trouble underlying the whole situation. That trouble is the enormous fire waste of this country."

Tax on Unlicensed Insurance.

The report then discusses the matter of fire prevention, reverting then to the matter of a tax on unlicensed insurance, such a tax being operative in Western Canada but not in Eastern Canada. "Our efforts this year," says the report, "have been exercised in trying to protect our eastern members against something which our western members are already suffering from. To be consistent, we ought to work with equal zeal for the elimination of the tax in the West, for there can be no question but what it is responsible for unnecessarily high rates of insurance in this territory, so say nothing of the fact that the existence of such a law in any province is always more or less of an invitation to other provinces to follow suit.

"Ontario manufacturers were not the only ones who had to defend themselves this year by reason of the example set by the West, for a bill was introduced into the Nova Scotia legislature, that would have invalidated any contract of insurance on property within the province unless the insuring company had an agent resident in the province at the time the contract was made, and unless the policy was actually countersigned by such agent before delivery. Fortunately the bill did not pass, but the mere fact of its having been introduced is significant of the extent to which Canadian underwriters are prepared to go in their efforts to exclude outside competition. With such evidence before us, we should not be content to rely upon defensive operations only, but should wage an offensive for the purpose of driving the aggressor out of the stronghold he has obtained possession of. Our prairie provinces branch, with the situation clearly before them, and with a resourceful and influential organization at their command, can handle the matter successfully if they will. Needless to say, the insurance committee will be pleased to help in any way that the branch might wish.

"As emphasizing the need for increased activity in insurance matters in the West, it might be mentioned that a few months ago the Western Fire Underwriters' Association circularized all fire insurance agents in these provinces, asking them to sign agreements with the tariff companies they represented, undertaking to operate in conformity with one of three schedules, designated as "A", "B" and "C", respectively. Schedule "A" provided for a commission of 20 per cent. on all preferred business, 15 per cent. on all other business, and contained a non-intercourse rule whereby the agent agreed not to represent any company which was not a member of the association, nor to give business to any such company, unless he was unable to place the business with companies which were members of the association. Schedule "B" provided for a commission of 15 per cent. on all business, but did not bind the agent to observe the non-intercourse rule. Schedule "C" provided for a commission of 10 per cent., and a small contingent profit commission.

"Has Strangled Competition."

"This circular was followed up in all the larger places, such as Saskatoon, Edmonton, Calgary, Lethbridge, Medicine Hat, Moose Jaw and Regina by a visit from the secretary of the association and two other members. These gentlemen were successful in most of the places in forming a local committee, which consisted of the leading agents in each centre, with the object of bringing pressure to bear on all agents to sign Schedule "A" agreement. Agents who refused to comply with the request of the committees were threatened with the withdrawal of the agencies of the tariff companies which they represented.

"In a number of these towns the local committees have been entirely successful, with the result that the Western Fire Underwriters' Association has been able to strangle the competition of the non-tariff companies just as effectively as the legislation it has secured has strangled the competition of the unlicensed companies. It needs no more than this to make clear to our western members the danger with which they are threatened, and the necessity for prompt and energetic action if they are to protect themselves against the inevitable consequences of a monopoly."

INDUSTRIAL CONDITIONS IN CANADA

Labor conditions render it increasingly difficult to meet the continued heavy demand for munitions. Loss of time through trade disputes and desultory work are as great an obstacle to the full utilization of the country's industrial resources as the actual shortage in the supply of labor. Unless some more effective regulation of labor is introduced, which will bring about more regular and more permanent service, it may not be possible to sustain the present volume of exports of manufactured goods, essential as it is to the maintenance of our financial position. Labor and ocean transportation difficulties are, perhaps, equally responsible for the falling off in exports which were less in April by $21,000,000 than the imports for that month, the first unfavorable balance since February, 1915.

The reports of industrial companies recently issued show remarkable profits for the twelve-month periods which they cover, but it is noticeable that the output of coal is less and that strikes in that industry are having a far-reaching effect. In southern British Columbia an important smelting plant has been closed down since the first of May owing to the shortage of coke caused by the strike in the Crow's Nest Pass collieries, and at the end of May the prospects of a settlement were regarded as being somewhat remote. The indirect results of this strike are no less serious. Railways are handicapped by a shortage of fuel for their engines, and, consequently, the movement of freight is obstructed and business is affected in endless ways. The effect of recent strikes in the coal mines, in the shoe industry in Quebec, in the steel industry in the maritime provinces, in the mines of Ontario and elsewhere has been to cause a serious decrease in production. An undesirable result of the prevailing high wages has been that a few weeks of work is followed by a few weeks of holiday. Contrary to expectations, high wages have not in many cases contributed to labor stability or efficiency.—Canadian Bank of Commerce.

Let Us Safeguard Your Valuables This Summer

Leave your small valuables in a Safety Deposit Box and your larger ones in a trunk, valise or packing case in our Storage Vaults. Absolute safety and most reasonable vault fees. Visitors welcome to inspect these burglar-proof and fireproof steel storage rooms.

STUDY OF NATIONAL PROBLEMS

Movement, With That End in View, Makes Good Progress

Some months ago a small group of men, convinced that the great problems of our country, present and to come, require the earnest consideration of all men and women who are in touch with some one or more of them, addressed to a number of representative citizens all over Canada a proposal for the establishment of a National Problems Club. The reception of this proposal was such as to place beyond question its practicability. The need for investigation is admitted, the value, as an educative influence and as a preparation for reconstruction, of groups constituted and co-ordinated to fill this need, is equally clear. "We have been assured of the co-operation of many active-minded citizens, representative of the leading activities of the country," says a statement issued this week by the central committee. "Branches have already been established or are in process of establishment in various cities and towns, including many of the important centres of the Dominion. It is now possible, therefore, to put forward, as a result of experience already gained and in the light of suggestions received, a more definite statement of the scheme, as well as to appeal with surer confidence for a widened support." The statement continues:—

Certain of the details of organization which follow are not to be regarded as essential in every case, but are inserted at the request of branches which desired a specific scheme on which to work. It is desirable that the plan of organization should not be rigidly determined in advance, but should be developed as the movement grows.

Committee for Each Province.

The title of Canadian Problems Club (instead of National Problems Club) has been judged the most appropriate for the new organization. Besides the individual clubs (hereafter called branch clubs) some central organization is necessary, as will be obvious from what follows. The plan which appears most workable is that there should be a central committee for each province, to co-ordinate the work of the club within that province. In addition there is needed a general executive committee of the club as a whole. When the provincial central committees are fully organized they will become responsible for the character and composition of the general executive committee. In the interim its work will be carried on by the group responsible for the inception of the scheme, with such additions to their numbers as may seem desirable.

Investigation of National Problems.

It was pointed out in the original statement that the club has for its purpose the disinterested investigation of our national problems, in the spirit of that real citizenship whose first concern is the welfare of the whole, and that therefore it knows no barrier of party, class, or limited interest of any kind. The object of the central committees, which ought to be as representative of different interests as possible, is simply to aid the branch clubs by their service of co-ordination. Through them the branch clubs of each province can be provided with information, questionnaires, lists of books, pamphlets, government reports, etc., bearing on the subjects with which they are concerned. Through them the branch clubs of each province can be kept in touch with one another, especially where different clubs are investigating the same problem. Each provincial committee will be in regular communication with the general executive committee and through it, or directly, with the other provincial committees, thus assuring a Dominion-wide co-ordination. By means of the provincial committees the general executive committee will be enabled to discover and disseminate any important contributions submitted by the branch clubs.

The Work of the General Executive Committees.

The general executive committee will in co-operation with the provincial committees issue a regular annual report, containing a summary of the work done by the clubs and an account of the growth of the movement. It will in other ways also give publicity to the conclusions arrived at by branch clubs as the result of investigation, and, where there is general agreement on any problem, will take steps to present the conclusion in question to such authorities as might be able to carry it into effect. It will also issue as bulletins, for distribution to members of branch clubs, such contributions to the solution of national problems, whether contributed by branch clubs or otherwise, as it judges to be of sufficient importance. It will establish a central office, if possible under the charge of a qualified permanent secretary, where records of the club will be kept, bibliographies, lists and resumes of reports, questionnaires, etc., will be prepared, and in general the material assembled and filed which may prove of service to the branch clubs in their work.

The following excerpts from the original statement will explain further the character of the branch clubs and the final aims of the club as a whole.

As to the Branch Clubs.

The branch clubs should be small in size, say about ten or twelve members. They are meant to foster active thinking and enquiry, in which each member has a part to play. A large club tends to degenerate into a passive body which meets merely to hear addresses by prominent speakers. Too often opinions are expressed which, being based on inaccurate or misleading information, are detrimental rather than helpful. The branch club is meant to discover facts and examine them as a basis for reasoned action. On the other hand there need be no limit to the number of separate branch clubs which may be formed.

Branch clubs may be formed either from the members of particular associations, boards of trade, trade unions, universities, churches, etc., or by any group of persons acting independently. Application for admission as a Canadian problems club should be submitted to the provincial central committee. The club has no platform or creed. Any group composed of people who are genuinely interested in the problems of the country and willing to give thought and energy to the study of these and to co-operate with the provincial central committee in this work will be gladly welcomed as a branch. A small affiliation fee is payable annually to the provincial central committee, to aid it in furthering the work of the branches themselves. The provincial committee in turn will contribute to the expenses of the general executive committee. A draft constitution for branch clubs is appended, to serve as a guide in their formation. A list of national problems has also been prepared, and will be sent on request. Each club should choose one of these for its special investigation.

Post-bellum Problems.

The opportunities of service open to a nation-wide chain of clubs so constituted and organized are very great. In the first place they will help the country to understand the magnitude and urgency of the immediate problems of reconstruction after the war, and so stimulate the sense of responsibility and the spirit of earnest reflection and resolve in which alone they can be met. More generally, they will be valuable aids towards the formation of a broader and deeper public opinion, which alone can save public effort and enterprise from misdirection, waste, and inefficiency. Finally, a system of clubs animated by this spirit and working to this end, whatever problems they solve or fail to solve, should at least lead to a better mutual understanding where interests are found to conflict. Where each understands the viewpoint of the other, the bitterness at least is taken out of conflict. In a country such as ours one of the greatest of dangers is that of cleavage, economic and racial. If we can aid in bringing east and west, French-speaking and English-speaking Canada, agricultural Canada and industrial Canada, to the understanding of each other's problems, we shall be helping in the great work of the welding of a nation, which is the foundation of all true national life. This in the strictest sense is national service, and should enlist the sympathy, and where possible, the co-operation, of all who have at heart the welfare of the nation.

The provincial committees are at present in process of formation. In the meantime all communications and suggestions, applications for membership, etc., should be addressed to Professor R. M. MacIver, The University, Toronto. While it may not in many cases be possible to initiate a branch club during the summer, yet preparations may be made by bringing possible members together, selecting a subject, etc., so that the club may begin operation in the fall without unnecessary delay.

Investment vs. Speculation

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

STOCK WITHOUT PAR VALUE

Amended Companies' Act Will Allow Its Issue—German Corporation Laws

An amended companies act is being considered by the Senate, Mr. Thomas Mulvey, K.C., assistant secretary of state, and a notable authority on company legislation, being largely responsible for the draft act. On account of the act being drawn mainly for the purposes of companies with share capital, it is necessary in section 7 to provide a different method of management and for some method of public control. This control is exercised by requiring the applicants to submit with the application the by-laws regulating the affairs of the proposed corporation or association and also by providing that any change in these by-laws must be subject to the approval of the secretary of state.

This section authorizes the issue of shares without a nominal or par value. Its object is to prevent the implied representation that a share of a company of, say, a nominal value of one hundred dollars ($100) is in fact worth one hundred dollars. In no case is a share of a company of the actual value which the share certificate purports to represent. Even where there is the most careful management and the most scrupulous honesty in promotion, a share is not worth the amount paid upon it. In the general case the costs of promotion and organization must be deducted from the actual value transferred to the company and then the share is worth the proportional amount which the number of paid up-shares bears to the actual value of the assets of the company.

Value of Shares.

It may be that there is a value in the business situation of the company which adds value to its assets, which should be added and therefore places the shares at a premium. In all cases the value of a share is not the amount placed upon the certificate as its face value, but the amount of the value of the assets of the company divided by the number of shares issued. If such is the case, why should the act authorize a statement on the share certificate which is in fact a misstatement? It is suggested that that method of issuing share certificates would prevent stock watering and over-capitalization.

This method was first suggested by Mr. Francis Lynde Stetson, a prominent New York lawyer, at a meeting of the New York State Bar Association in 1892. It was considered by the Commission on Industrial Combinations in 1899. Mr. Stetson's statement before this commission was as follows:—

"Third. To permit the formation of a distinct class of business stock corporations whose capital stock may be issued as representing proportional parts of the whole capital without any nominal or money value.

German Corporation Laws.

"The effect of such amendment would be to provide for the measurement of the interest or shares of the members of such a corporation by a statement of proportion, as in case of part owners of a ship, and not by an arbitrary assignment of money value, which is delusive in case of every corporation whose capital stock has a market value either more or less than its nominal par value.

"Such an amendment, though somewhat radical, is not altogether novel. It embodied a principle adopted in corporation laws in Germany.

"It would relieve any possibility of injury to the public from misleading representations as to the money value of corporate stock, and would also relieve from embarrassment conscientious corporate officers often compelled to deal with legal fiction as to which they have no personal knowledge, as though it were a reality within their own observation."

This section is taken, with verbal changes, from the laws of the state of New York, 1912.

Similar provisions have been adopted by several of the states of the United States. The method appears to have been duly considered before adoption, and the fact that its adoption has been extended shows that it appeals to business necessities.

A number of applications have been made to the state department, Ottawa, for the formation of companies without a par value of shares, and this amendment is brought forward to meet such business demands.

ROYAL BANK'S NEW YORK INTEREST

Canadians Secured Control of Merchants National Bank for $2,860,000

Asked by *The Monetary Times* for a statement as to the interest of the Royal Bank of Canada in the Merchants National Bank of New York, Mr. C. E. Neill, general manager of the Royal Bank said:—"At the moment we have no statement to make regarding a newspaper announcement that the control of the Merchants National Bank, New York, has been acquired by interests friendly to the Royal Bank of Canada."

Commenting upon this development, "Holland," writing in the Wall Street Journal, says:—

"Coupled with the announcement that one of the great banks of Canada had secured a majority by one share of the stock of the Merchants National Bank of New York, was the statement that former United States Senator Theodore E. Burton would remain as president.

History of the Bank.

"Senator Burton was selected as president of the Merchants National Bank largely in recognition of the ability he had shown in the United States Senate, which caused him to be recognized as an authority upon financial and economic subjects. The bank was organized in the first administration of Thomas Jefferson, when Albert Gallatin was secretary of the treasury. It was always suspected that the government then at Washington favored the organization of a new bank in New York. The first bank to be established here, the Bank of New York, was recognized as Alexander Hamilton's bank. To offset the influence Hamilton and his friends possessed, Aaron Burr, by a most clever bit of legislative strategy, was able to organize the Bank of the Manhattan Company. The Hamilton bank was federalistic. The Burr bank was democratic. Business men in New York believed that the time had come when another bank should be established which would be free from the political bias which distinguished these two older banks. They, therefore, with some difficulty obtained a charter, and when organized, the bank was the third of the banks of New York to be established. An opportunity has arisen for greatly increasing the business, the deposit line and the resources of this institution, but it is Canadian capital that is to do this.

Canadians Bought Control.

"The Canadians paid $2,860,000 for one share more than one-half of the capital stock of this institution. The Merchants National Bank remains an American institution. The Canadians have simply bought the majority of the stock. It must conform to the statutory laws, but the new ownership does represent that community of interest between Canada and the United States, for it is a community of interest due almost entirely to the exigencies suddenly created by the European war. The London market was closed to Canada after the war began, but the American market was open, and no Canadian approach to this money market was ever rejected. So it is likely that after the war is ended Great Britain will be for a long time fully occupied with domestic financial problems, entailing thereby a continuation of the financial relations between the United States and Canada."

EMERSON MOTORS STOCK

The Emerson Motors Company, Inc., of [illegible] Broadway, N.Y., has been forced into involuntary bankruptcy in the United States District Court, the company and its officers being indicted by the federal grand jury for being in a conspiracy to defraud, by means of the mails, investors in the stock of the company, together with C. R. Berry and Company, Inc., Robert T. Matches and Company, Inc., and the H. B. Humphrey Company, Inc. The individuals named in the indictment are fourteen officers of the four companies. The indictment charges that the defendants induced investors to purchase the capital stock of the Emerson Motors Company, Inc., well knowing that it was not worth the price which they were inducing the victims to pay for it.

This stock was offered in Canada a few months ago, and, while the company's extensive advertising was accepted and published by many Canadian daily and several financial newspapers, it was not accepted by *The Monetary Times*.

We have examined the Books and Records of the City of Calgary and those of its Utilities and Departments for the year ended 31st December, 1916, and we certify that, subject to our report of this date, the above Statement of Assets and Liabilities represents the true and correct financial position of the City as at 31st December, 1916, as shown by the books.

MACINTOSH & HYDE,
Chartered Accountants.

Calgary, 12th April, 1917.

JUNE MUNICIPAL BOND SALES

Quiet Month is Notable for Lack of Bidding and Refusals of Offers

The municipal bond sales in Canada for June, as compiled by *The Monetary Times*, amounted to $1,642,003, compared with $1,375,039 for May and $4,428,100 for the corresponding period of last year.

Comparing the record of June, 1916, with that of the month just ended, the bond sales are as follow:—

	1917.	1916.
Canada	$1,642,003	$4,428,100
United States	80,000	2,136,226
	$1,722,003	$6,564,326

The municipal bond sales in Canada the first six months of the year, according to *The Monetary Times'* bond record, were as follow:—

	1913.	1914.	1915.	1916.	1917.
January	$1,337,5[illegible]	$1,953,137	$1,784,947	$1,909,441	$1,969,256
February	1,038,806	5,995,336	3,047,011	1,410,900	458,874
March	335,402	5,123,170	2,572,357	2,027,741	229,013
April	3,693,857	2,847,953	8,603,094	1,979,852	430,074
May	880,630	6,400,755	3,464,281	2,649,000	1,375,039
June	2,435,726	4,617,857	2,305,744	4,428,100	1,642,003

The sales last month therefore were the lowest of any June in the past five years.

The only issue sold in the United States last month was apparently the following:—

Trail, B.C., $80,000 6 per cent. 20-year.

This was sold to Sweet, Causey & Foster, Denver, at 93.50.

Canadian municipal bonds sold in the United States during June, compared with sales of the first five months of 1914, 1915 and 1916, were as follow:—

	1914.	1915.	1916.	1917.
January	....	$ 340,000	$3,183,215	$2,285,000
February	$ 50,000	6,471,000	899,506	485,725
March	18,000	6,543,947	595,000	95,000
April	25,000	7,100,825	2,158,306	1,563,200
May	1,750,000	600,000	7,219,000	1,375,039
June	2,100,000	......	2,136,226	80,000

The following are the details of sales in Canada:—

Nova Scotia.

Truro	$ 10,000	5	30

Manitoba.

School Districts	$ 13,700	.	.

Alberta.

Redcliffe	$ 6,000	5	1933
School Districts	41,150	.	....

Quebec.

Pointe aux Trembles	$300,000	6	25
St. Hyacinthe	125,000	5½	1 to 12

Saskatchewan.

Rosthern	$ 23,000	7	20
Pontiex Village	4,100	.	..
Herbert	2,800	.	..
School Districts	40,825	.	..
Estevan	[illegible],500	.	.

Ontario.

North Bay	$ 9,155	6	15
North Bay	28,317	6	30
North Bay	15,000	6	20
Bruce County	100,000	5½	20
Hamilton	35,200	5	..
Renfrew	100,000	6	1918-1947
Peterborough	99,742	5	30
Peel County	50,000	5½	10
Sarnia	24,180	6	10 & 20
Windsor	52,995	5½	20
Windsor	134,686	5	10
Windsor	70,000	5½	40
Lincoln County	140,000	5½	10 & 20
Ingersoll	90,050	...	..
Sudbury	60,603	5	5, 10 & 20
Ontario County	50,000	5½	10 & 20

The features of the June bond market were the comparatively few offerings, the refusal of all bids by several [illegible] the attraction of a single bid. Strict economy on the part of municipalities is partly responsible for the sparse offerings of municipal issues, and the prevailing market conditions are preventing many municipalities from entering the market at this time. The London market continues closed to all applications for capital except for war purposes. The United States market is now practically in the same position. Montreal City did not receive any bids for its $1,400,000 5 per cent. 20-year bonds, although tenders were solicited from Montreal, Toronto, New York, Boston, Philadelphia and other investment houses. The financial condition of the city may possibly have had a bearing on this result, but in normal times it is likely the city would have received several tenders. The most significant incident in the June bond market was the offering of $2,000,000 5-year 5 per cent. bonds of the Greater Winnipeg Water District, no tenders for the issue being received. Under ordinary circumstances, this is an issue which would attract bidding on joint account by Canadian and United States investment houses. That the bonds failed to attract any formal bids is a clear indication of the deadlock in the market, so far as the placing of new issues is concerned.

Several municipalities have tested the strength of local investment conditions, selling their bonds to investors in the district. This feature has been confined largely to Ontario. Among the issues sold in this way last month were the following:—Ingersoll, $90,050; Springfield, $2,500; Hamilton, $35,200.

The Ingersoll bonds were sold in two lots, one of $16,050 and the other of $74,000, so Mr. R. J. Robertson, the town treasurer, informs *The Monetary Times*. This is a notable record. The Springfield, Ont., issue of 5 per cent. bonds, dated January 1st, 1917, was purchased by a local investor. The Hamilton issue of 5 per cent. bonds was sold locally at par. Simcoe will also try to sell its $44,287 5½ per cent. 20 and 29-year instalment bonds locally.

A number of municipalities last month refused all offers received for their bonds. Among them were the following:—

	Amount.	Per cent.	Years.
Simcoe, Ont.	$44,287	5½	20 & 29
Halifax, N.S.	199,500	5	30
Sudbury, Ont.	60,603	5	5, 10 & 20
Amherst, N.S.	43,000	5	30
Trenton, N.S.	50,000	.	..

It is possible that municipalities who refuse to accept prevailing prices for their bonds will regret that action. The town of Simcoe, for instance, which declined all tenders for its bonds last month for the second time was offered two or three points below the best price tendered for the same bonds a few weeks previously. A bid of 91.17 was received for the $43,000 5 per cent. bonds of Amherst, but this and two other bids were refused, the city council stating their unwillingness to consider an offer of less than 94 and interest. The best financial advice to our municipalities is that they should accept the highest bid received under prevailing conditions. The outlook in the money market is that market conditions are not likely to change for the better for some time to come.

The Maisonneuve issue of $70,000 20-year 5½ per cent. bonds, dated May 1st, 1917, is still unsold.

MORE WAR LOAN DATA

The actual amount received by the government through its three war loans was from the first loan $97,003,600.27, from the second $97,789,580.17, from the third to June 28th $139,832,508.04 (incomplete). The amount paid for clerical assistance in placing the loans was $60,876.98, and for advertising $110,027.72.

Brokers received for selling the bonds of the first two loans a commission of one-quarter of 1 per cent., and for the last loan three-eighths of 1 per cent. On the first loan the banks received a commission of one-quarter of 1 per cent., on the second one-half of 1 per cent., and on the third nine-twentieths of 1 per cent. The banks agreed, in consideration of these commissions, to take subscriptions and receive payments, deliver provisional receipts, interim certificates and bonds keep necessary accounts and cash coupons of issues free of exchange. They also agreed, if necessary, to take $50,000,000 of the second loan and $60,000,000 of the third loan.

New Bond List

For those who are considering the investment of their July dividends, maturing principal or other funds, our new Bond List, now ready for distribution, contains particulars of a number of high-grade Canadian Government and Municipal Bonds from which to make a selection, yielding from

JUNE FIRE LOSSES

Last Month's Destruction Was Twice That of the Corresponding Period in 1916

The Monetary Times' estimate of Canada's fire loss during June is $1,184,627, as compared with May loss of $1,163,110 and $494,557 for the corresponding month of last year. The following is the estimate of the June losses:—

Fires exceeding $10,000	$1,005,111
Small fires reported	25,000
Estimates for all unreported fires	154,516

The fires reported in June at which the losses amounted to $10,000 and over were:—

Frazerville, Que., June 1, Frazerville Chair Company, $30,000.

Peterborough, Ont., June 3, Canadian General Electric Company's transformer test department, $20,000.

Selkirk Water, B.C., Cameron Lumber Company's mills, $50,000.

Regina, Sask., June 12, Regina Storage and Forwarding Company's plant and contents, $177,000.

St. John's, Que., Milleurfi block, $80,000.

Winnipeg, Man., June 16, McDermot Building, $40,000.

Emerson, Man., June 16, town hall, $12,000.

Lanark, Ont., June 21, Clyde Woolen Mills, etc., $92,625.

St. John, N.B., June 18, Dock Street fire, $40,000.

Bruce Mines, Ont., June 20, general fire, various properties, $125,000.

London, Ont., Hospital for Insane, $22,000.

Longford Mills, Ont., May 31st, Standard Chemical Company's plant, $30,000.

Sarnia, Ont., June 17, Brown's ice houses, $15,486.

Sorel, Que., June 19, general fire, $200,000.

Erieau, Ont., June 26, Erie Ice Company, Limited, $23,000.

Montreal, Que., June 29, Wm. Rutherford Lumber Company, $30,000.

Regina, Sask., June 20, North Star Drilling Company, $18,000.

The Monetary Times' record of the first six months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January	$ 2,796,312	$1,249,886	$ 1,619,217	$1,918,660
February	2,920,749	1,019,556	3,275,600	2,009,953
March	2,660,666	1,631,696	1,406,501	2,050,650
April	1,916,235	1,463,747	1,460,437	1,317,714
May	1,935,516	881,855	1,850,205	1,163,110
June	1,267,416	773,260	494,557	1,184,627
Totals	$13,496,894	$7,020,009	$10,106,517	$9,644,714

Among the reported causes in June were: Transformer, 1; hot journal box of machine, 1; defective chimney, 1; defective wiring, 2; lightning, 4; spark from engine, 3; ashes from smoker's pipe, 1; gas pressure on machine, 1; oil stove, 1; boiler explosion, 1; defective flue, 1; flying spark, 1.

The structures damaged and destroyed last month included: Steam barge, 1; factories, etc., 18; garages, 2; dwellings, 40; saw and lumber mills, 2; schoolhouses, 3; moving picture house, 1; car barns, 1; steamer, 1; stable, 2; barns, 6; hospital, 1; business blocks, 7; ice houses, 2; grain elevators, 3; railway shops, 1; town hall, 1; farm house, 1; bakery, 1; laundry, 1; livery, 1; and stores, 20.

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first six months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.
January ...	27	27	27	14	26	3	10	21
February ..	15	12	11	21	18	11	23	19
March	20	18	24	22	27	23	23	20
April	37	20	15	11	22	14	6	15
May	15	28	18	33	8	5	14	12
June	52	13	6	18	12	2	6	9
Totals ..	166	118	101	119	113	58	82	96

The fires at which fatalities occurred last month were:—

Toronto, Ont., June 5	Playing with matches	1
Montreal, Que.	Pouring coal oil on a fire ..	4
Peterborough, Ont., June 19	Boiler explosion .	1
Innisfree, Alta., June 26 ..	Burning house	3
		9

ELECTRIC RAILWAY BONDS UNSOLD

The block of $547,400 5 per cent. 20-year gold bonds of the Lacombe and Blindman Valley Electric Railway remains unsold, as the bids received for the issue were not considered high enough. The bonds are guaranteed as to principal and interest by the province of Alberta.

This electric road is to run from Lacombe to Rimbey, Alta., a distance of forty miles. Grading has been completed for the entire distance, but owing to financial conditions, twenty miles, or half of the road (Lacombe to Bentley), will be completed and operated this summer. This will serve a fairly large and rich agricultural territory, and probably considerable freight in addition will be hauled from twenty miles around Bentley. The road will also serve the Gull Lake district, Alberta's famous summer resort. Financial arrangements have been made so that twenty miles of the road can be put into operation, and the bonds will be held until the market improves.

WAIT TILL THE WAR IS OVER

"Let us be done with new streets and new sidewalks, new town halls and new railways till the war is done. Let us walk in our old boots on the old boards, patriots all, with dollar pieces jingling in our pockets, adding up to twenty-five for the latest patriotic loan."

Such is the plea of Professor Leacock in a pamphlet written for the government, which has printed a quarter of a million copies. It is part of the campaign of the National Service Board for national thrift and economy. "Serve by giving" is the board's motto. It should be the motto of the country. Expenditures should be cut to a minimum. Waste should be regarded as an offence against the State; luxuries as a crime.

The country's dollars are needed for war work. By the practise of thrift by every man and woman in the Dominion millions can be saved for investment in government war savings certificates. Those millions must be saved and invested if the country is to be worthy of its soldiers.

CANADA'S EXPORTS INCREASE

Canada's total trade for May amounted to $256,653,615, and for May, 1916, was $164,350,950. For the two months of the fiscal year which have elapsed the total trade of Canada was $408,606,873, compared with $269,590,815 for the same period last year. The customs revenue for May was $17,082,823, an increase of $4,000,000 over May of last year. The value of Canadian imports during May was $107,596,379, of which $56,479,482 were dutiable goods and $51,116,897 were free goods. The increase in imports for the month amounted to $38,000,000. For the first two months of the fiscal year the total imports amounted to $194,404,188 and for the first two months of the last fiscal year $119,845,642.

Exports for May totalled $149,057,236 and for the same month last year $94,653,138. For the two months the total exports were valued at $214,202,685 and for the corresponding months last year $149,745,173. All classes of exports show considerable increases, but this was most marked in agricultural products, animals and their produce and manufactures. The value of animals and their produce exported in May was $11,376,808, and in May, 1916, was $6,287,620; agricultural products, $71,793,023, compared with $47,433,750; manufactures, $52,949,623, compared with $27,734,477.

MANY WAR SAVINGS CERTIFICATES SOLD

Eight million dollars had been received up to June 27th by the finance minister from the sale of war savings certificates. The total number of certificates sold through the banks and post offices is 118,000.

CANADA FACED WITH COAL SHORTAGE

"Canada is faced with a coal shortage of very alarming proportions, and by next winter, if conditions do not change, a great many industrial concerns and householders will be unable to supply themselves with sufficient coal to carry them through the cold weather." Such is the gist of a statement made in Montreal by Mr. A. D. MacTier, general manager of the eastern lines of the Canadian Pacific Railway. He continued as follows: "The present and prospective difficulties in the way of bringing coal into eastern Canada may be attributed to a number of causes, principal amongst which are dearth of mining labor and shortage of coal-carrying equipment at the mines. The situation in some of the mining territories at the present time is that, even with the labor shortage, mine operators are able to turn out coal at a greater rate than they can obtain cars to carry it away. It, therefore, naturally follows that more coal can be brought into Canada if the car supply is increased.

"Unfortunately, it is out of the question to obtain any number of new cars at this time, and the situation can be met only by obtaining more service from the present rolling stock. To do this, cars must be moved promptly between the mines and destination, and must be unloaded as soon as they reach consignees."

CANADIAN BANKER PREDICTS FIRM MONEY

Speaking on money conditions and the interest value of money in New York, Mr. Forrest L. Appleby, of the Union Bank of Canada, in an interview with Dow, Jones and Company, said: "For the last month 'call money' in New York has been consistently firm, averaging for the earlier part 4 per cent., and for the last two weeks 6 per cent.

"Owing to the scarcity of money, the large national banks availed themselves of re-discount facilities with the Federal Reserve Bank, both for long bills and for temporary borrowings of a few days; but in spite of this their supplies were still unequal to the demand. While certain banks strengthened their own individual positions by the sale of their sterling balances, this, of course, did not ease the situation as a whole.

"It is frequently stated that the present stringency is only temporary, and that money rates will ease the moment the amounts collected on the initial payments of the Liberty Loan are re-deposited with the banks. While agreeing that 6 per cent. will not hold, it is my opinion that we shall not see any 3 per cent. renewal rate during the next three months. I look for an average rate of from 3½ per cent. to 4 per cent. Time money has also been and still is consistently in demand at 5½ per cent. for large amounts. Consequently, I do not anticipate much ease in time money rates.

"The underlying causes of this situation are that since the entry of the United States into the war, the manufacturers, merchants, retailers, and consumers have not abated their endeavor to either increase their earnings or prevent them from falling off. Also, in view of the anticipated government control of both imports and exports, firms generally are carrying much larger stocks than customary, which coupled with the enhancement of values, has required far greater sums than usual to finance. I am firmly of the opinion that until the corporation and the individual sink their desire for personal gain, and direct their energies as instructed by the government, trade will not fall off as rapidly as it did in Great Britain and Canada; and although to an extent, particularly in the automobile industry, trade is falling off, there was such an over-expansion that the effects will not be felt in the money market to any great extent for some time. The only possibility which occurs to me as affecting my estimate would be for the United States government, within the next few weeks, to arrive at a decision regarding essential and non-essential industries, and then enforce that decision. I do not think it can be done in the time."

AMERICAN COMPANY ESTABLISHES AT TORONTO

A Canadian factory and office of the Standard Snap Button and Fastener Company has been established at 334 King Street East, Toronto. The company's factory and office in the United States is at Newark, N.J. The Standard Metal Manufacturing Company, of Newark, is associated with the financing of the United States and Canadian factories. The Toronto establishment has just commenced operations.

Why Burden Your Wife?

If you wish to appoint your wife as executrix or trustee under your will, why not assist her to carry the heavy burden by appointing this Corporation as co-executor?

Your estate will thus have the advantage of the personal direction which she can give, and she will be relieved of the burdensome details necessarily involved in the management of any estate. Also she will receive invaluable assistance in regard to investments.

Our officers will be glad to confer with you in regard to the making of your will or any trust business you may have in mind.

PUBLICATIONS RECEIVED

Toronto.—Year Book, 1917, of the Toronto Board of Trade.

Trust Companies.—A pamphlet issued by the Eastern Trust Company, containing a general review of its work and business aims.

Calgary.—Annual financial statement as audited by Messrs. Macintosh & Hyde. Issued by Comptroller W. C. Wood, Calgary.

British Columbia Lumber.—Annual report on the Pacific Coast lumber industry. Issued by the Forest Branch, Department of Lands, Victoria, B.C.

Building and Ornamental Stones, Report on; Vol. IV., Manitoba, Saskatchewan and Alberta. Issued by the Department of Mines, Ottawa.

British War Finance.—Prospectuses of the three war loans of the United Kingdom. Issued in pamphlet form by the National Bank of Commerce, New York.

Public Utilities.—Fifth annual report of the Manitoba Public Utilities Commission for the year 1916. Issued by the Commission, Parliament Buildings, Winnipeg.

Municipal Finance.—Twentieth Annual Report of the Provincial Municipal Auditor for 1916. Issued by J. W. Sharpe, provincial municipal auditor of Ontario.

Educational Statistics.—Annual report of the provincial secretary of Quebec, for the year 1914-15. Issued by the Provincial Secretary, Parliament Buildings, Quebec.

Mineral Production.—Annual report for 1915; by John McLeish, B.A., chief of the division of mineral resources and statistics. Issued by the Department of Mines, Ottawa.

School Finance.—Financial Statement of School Corporations. Annual report of the provincial secretary of Quebec for the year 1915. Issued by the Provincial Secretary, Parliament Buildings, Quebec.

Malaria.—A plea and a plan for the eradication of malaria throughout the western hemisphere; by Frederick L. Hoffman, LL.D., statistician. Issued by the Prudential Insurance Company of America, Newark, N.J.

War Taxation.—United States War Tax Bill, by Edwin R. A. Seligman, Professor of Political Economy, Columbia. A constructive criticism of the policy of taxation. Issued by the National Bank of Commerce, New York.

Life Insurance.—American Life Insurance and American Railroads. A pamphlet dealing with the policy of life insurance in relation to American railroads, by Darwin P. Kingsley. Issued by the New York Life Insurance Company.

Trust Companies.—What does a trust company charge for administering an estate? A pamphlet dealing with the fixing of charges of a trust company acting as executors of an estate. Issued by the National Trust Company, Limited, Toronto.

Excess Profits.—Official text of the Excess Profits Tax Law of the United States (passed March 3rd, 1917), together with the relating sections of the Federal Income Tax Law. Issued by the Service Department, National Bank of Commerce, New York.

Grain Statistics.—Part V. of the annual report of the Department of Trade and Commerce. The compilation of the inspection branch and the report of the board of grain commissioners. Price 25 cents. Issued by the Department of Trade and Commerce, Ottawa.

Legislation in Ontario.—Following the example of Alberta, Ontario, has issued a synopsis of the more important acts passed at its recent legislative session. This is published in the May issue of the Public Service Bulletin, issued from the Parliament Buildings, Toronto.

Law of Bankruptcy.—By Charles W. Gerstenberg. Answers to problems to accompany the law of bankruptcy, a text for business men and students of business, with copies of the national bankruptcy act, general orders of the supreme court and the official forms, with problems. Published by Prentice Hall, Inc., 1 University Place, New York.

Assessment Insurance.—The Bulletin Assessment Life Insurance Chart of the friendly societies transacting business in Canada, showing the business done, death claims, number of Assessments made, income, expenses, assets, etc., of the leading assessment life associations and friendly societies licensed to do business in Canada. Published by the Bulletin Publishing Company of Toronto, Canada.

Live Stock.—The annual report of the live stock branch of the Ontario Department of Agriculture contains the financial statement of the Ontario Provincial Winter Fair; lectures delivered at the Ontario Provincial Winter Fair; Ottawa Winter Fair, 1917; financial statement and list of officers of the live stock associations; report of co-operative shipment of live stock, and list of members of the Ontario live stock associations. Issued by the Ontario Department of Agriculture, Toronto.

Poor's Manual of Public Utilities.—"What is the risk involved?" The banker's first question before making an investment, is ably answered in this manual, its principal feature being the "Margin of Safety" over interest or dividend requirements of individual stocks and bonds. Complete and up-to-date financial statements practically of every public utility company in the United States and Canada in which there is public interest are presented. The book devotes 2,500 pages of text to the subject and is by far the largest and most comprehensive work of the kind published. The Manual gives general information revised to May 15th, 1917; income accounts and balance sheets as of December 31st, 1916, and some as late as April 30th, 1917.

Poor's Manual of Public Utilities.—Price $12, published by Poor's Manual Company, 80 Lafayette Street, New York.

Improved Farms in Eastern Canada.—The colonization and development department of the Canadian Pacific Railway Company has issued a handbook, "Improved Farms in Eastern Canada," for the information of those seeking farms in the eastern provinces. The Canadian Pacific has no pecuniary interest in any of the farms described in the handbook, the information being obtained from various reliable resources and with the sole object of arousing interest in the many fine farms open for settlement in the east as well as to provide a reliable guide for the homeseeker as to farm values in the older provinces of the Dominion. A preliminary edition of ten thousand copies has been printed for distribution throughout the company's many offices and agencies in Canada, Great Britain, the United States and other countries. Mr. J. S. Dennis is chief commissioner of the company's colonization and development department.

BRITISH INVESTORS TRUST DOMINION

"The Canadian railway problem continues to arouse much discussion in financial circles in this country," says "Canada," of London, England, "and it is well that it should be known in the Dominion that much criticism has been levelled at the scheme. The financial editor of the Observer, in referring to the subject, considered it 'extremely unlikely that the Canadian government would deliberately injure its own interests, as it would do if anything approaching a confiscatory policy were adopted,' and said that 'the more the majority report . . . was examined the more remarkable it appeared to be.' This writer, who is a scrupulously fair critic, and may be regarded as reflecting well-informed financial opinion in this country, said he 'had noticed a disposition in the market and elsewhere to take a less pessimistic view of the report, and to assume that at present prices everything probably adverse had been discounted.' In so far as the Grand Trunk Company is concerned, it is certainly significant that the poor return for April was almost negligible from a market point of view. It is recognized that the Canadian railway companies are now suffering from serious disabilities due to the war, and it is this very abnormality that has aroused most comment in connection with the majority report of the commissioners, it being considered unreasonable that an attempt should be made to assess the present or future values of the different companies' potentialities under such choatic financial and economic conditions as now exist. Whilst, however, it is incumbent upon us to record this hostility to the majority report, we have no doubt whatever that nothing will be done by the Ottawa government that can be construed in any way as 'a confiscatory policy,' or that would tend to alienate British investors, or imperil their justifiable confidence in the safety of British capital invested in the Dominion."

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brant, Ont.—June 26—Frederick Harnock's barn, containing 1,500 bushels of wheat. Cause, lightning. Insurance carried $2,500.

Coggins Siding, N.B.—June 28—S. H. White Company's saw mill totally destroyed; also carload and 75,000 feet of lumber piled near mill. Estimated loss, $3,000; insurance carried, $1,000.

Douglas, N.B.—June 27—Mr. William Seymour's barn. Cause, electric storm. Insurance against lightning carried.

Erieau, Ont.—June 26—Erie Ice Company, Limited. Ice house. Total loss, $23,000. Cause, lightning.

Calgary, Alta.—June 10—Recent information received with reference to the fire at the city's car barns shows one car body destroyed. Estimated damage, $1,000. The loss was covered by the accident and damage account carried by the civic street department not in the car barn.

NEW MANAGING DIRECTOR, MR. C. A. WITHERS

Mr. C. A. Withers has been elected managing director of the Dominion of Canada Guarantee & Accident Insurance Company, Toronto. Mr. Withers has been acting as manager of the company for many years, and is one of the best known casualty insurance men in Canada. He has a quiet, unassuming manner, an attractive personality. Regarded as one of the best men in the business, he has expert knowledge of Canadian underwriting conditions, and has acquired valuable experience in the casualty insurance field. His many friends wish him well in the new and responsible duties he has assumed. The appointment as the company's managing director is a highly deserved tribute to his ability and conscientious service.

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

WANTED.—By a strong Canadian Loan Company, an energetic and experienced salesman to take charge of an important territory in the sale of the Company's short-term debentures. A good salary and expenses for the right man. Apply, stating age, experience, etc., to Box 75, *Monetary Times*, Toronto.

CHARTERED ACCOUNTANT desires engagement—Professional, Commercial or Financial. Discharged from Military Service. Address Box 77, *Monetary Times* Office, 62 Church Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

WANTED BY YOUNG MAN, experienced fire insurance inspector, controlling considerable volume of premium, general agency of good fire company, or position of inspector. Box 83, *The Monetary Times*, Toronto.

MR. MANUFACTURER.—Are you represented in the States? Have you a meritorious product for the New York market, and are you equipped to handle American business? If so a responsible and live New York firm would market your product on a nation-wide basis. Interview by mail only. Caravel, c/o Queen's Hotel, Toronto.

BOY WANTS POSITION for the summer with bond or financial house. Fifteen years old, high school graduate. Good references. Has passed University entrance exams. Box 81, *The Monetary Times*, Toronto.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

25 West Broadway New York, N.Y.

NEW INCORPORATIONS

Twenty-eight New Companies, Including One With Capital of $10,000,000, Incorporated this Week

Canada's new companies incorporated this week number 28. The head offices of these companies are located in four provinces. The total capitalization amounts to $17,525,000.

The largest companies are:—

Fraser Companies, Limited	$10,000,000
Maritime Electric Company, Limited	1,000,000
Paragon-Hitchcock Mines, Limited	2,000,000
Peribonka Company, Limited	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	18	$4,005,000
Quebec	7	2,270,000
Manitoba	1	250,000
New Brunswick	2	11,000,000
	28	$17,525,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Plaster Rock, N.B.—Fraser Companies, Limited, $10,000,000. W. Matheson, A. W. Brebner, J. F. Boyd.

St. Thomas, Ont.—Short's Canadian Company, Limited, $50,000. G. G. Hopkins, P. H. Short, H. E. Short.

Collingwood, Ont.—Paragon-Hitchcock Mines, Limited, $2,000,000. C. W. Pitt, D. McKay, A. G. McKean.

Fredericton, N.B.—Maritime Electric Company, Limited, $1,000,000. J. J. F. Winslow, J. J. McCaffrey, E. A. McKay.

Hamilton, Ont.—The Clemens Electrical Corporation of Canada, Limited, $50,000. H. N. Kittson, A. Metherell, W. C. Metherell; Globe Engineering Company, Limited, $100,000. I. D. Lewis, W. F. Coote, R. W. Treleaven; Canadian Fasteners, Limited, $50,000. G. W. Ballard, W. Morrison, Muriel Martin; Structomode, Limited, $5,000. G. W. Ballard, W. Morrison, Muriel Martin; Fox Chain Company of Canada, Limited, $200,000. C. V. Langs, E. G. Binkley, Nellie Moore.

Montreal, Que.—Beaver Steamship Company, Limited, $100,000. R. C. Smith, F. H. Markey, W. G. Pugsley; Eastern Distributors, Limited, $1,000,000. W. F. Chipman, W. R. L. Shanks, G. A. Coughlin; Power Development Company, Limited, $500,000. F. G. Bush, G. R. Drennan, A. G. Yeoman; the Lynn Rubber Manufacturing Company of Canada, Limited, $10,000. G. Derome, J. Bruneau, J. Ducharme; Peribonka Company, Limited, $1,000,000. R. S. Finn, H. L. Horsey, N. F. MacNeill; Pontiac Development Company, Limited, $40,000. G. V. Cousins, N. R. Curry, W. K. Gillespie; Standard Doll, Toy and Novelty Manufacturing Company, $20,000. L. W. Jacob, J. Miller, B. Florin.

Toronto, Ont.—Atlas Films of Canada, Limited, $75,000. F. Regan, J. Callahan, D. P. Kelly; Goldyn Pictures, Limited, $40,000. G. H. Sedgewick, J. Aitchison, A. B. Nind; Canadian Sprinkler Equipment Company, Limited, $50,000. G. G. Beckett, J. A. Kent, E. G. McMillan; Eastern Investment and Land Company, Limited, $40,000. G. Ruel, R. H. M. Temple, W. Bowler; William Brokerage Company, Limited, $50,000. J. M. Bullen, H. L. Steele, W. Osborne; H. P. R. Ranch, Limited, $40,000. G. H. Sedgewick, J. Aitchison, A. B. Nind; C. A. Ward, Limited, $500,000. F. J. Hughes, D. P. J. Kelly, Violet Stewart; the Canadian Wool Company, Limited, $250,000. Helen B. Palen, Isabel McIvor, Nellie Sales; Arrow Optical Company, Limited, $40,000. E. Deuber, T. E. Wilan, J. Brisacher.

Save the Food and Serve the Empire !

The Average Canadian Family Wastes Enough to Feed a Soldier

"The Kitchen must help as well as the Workshop and the Trenches"
Lloyd George.

INTELLIGENT economy in the kitchen can do much to prevent the threatened world famine—can counteract the effect of high prices—and can replace growing debt with systematic saving.

Careful investigations show that before the war the average British family wasted 25% of their food—and we Canadians were even more extravagant.

This waste is not in a few big things, but in many little ones, each, we used to think, too small to bother about—such as careless peeling of vegetables and fruit—failure to make good use of dripping and "left-overs"—and such others as will occur to every thrifty housekeeper.

For the Empire's sake as well as your own, hunt up and cut out these leaks ! You'll be helping to relieve the food shortage—saving your own money—and putting yourself in a position to buy Canadian War Savings Certificates and help win the war.

War Savings Certificates are issued in denominations of $25, $50 and $100, to be repaid in three years at full face value. They cost $21.50, $43 and $86 respectively, at all Money Order Post-Offices and Banks, thus yielding over 5% Interest. Should you need it, you can get your money back at any time. 19

All with profit policies affected prior to the 31st December will rank for a full year's reversionary bonus at that date.

AGENTS' ATTENTION

The Western Life Assurance Company

have made the following increases for the quarter ending March 31st, over the corresponding period of last year:

NEW BUSINESS ...	280%
CASH RECEIPTS ...	140%
— and —	
INVESTED ASSETS have increased during the quarter by ...	83%

Work for a PROGRESSIVE COMPANY. We want two more District Agents for the West. If you are an up-to-date Agent, write at once to the Head Office of the Company,

WINNIPEG .. .. MANITOBA

Prudential Efficiency

Founded by JOHN F. DRYDEN
Pioneer of Industrial Insurance in America

The Prudential has always aimed at the best possible service for its policyholders and agents. And the best possible service is the result of efficiency. Simplification of working and accounting methods, constant improvement of policy forms, promptness in payment of claims, steady reduction of expense rate and practical helps for agents are a few of the Prudential's greater efficiency achievements.

Write for particulars of attractive agency contract.

The Prudential Insurance Co. of America

Incorporated under the laws of the State of New Jersey.

FORREST F. DRYDEN, President. Home Office, NEWARK, N.J.

CANADIAN SECURITIES IN LONDON

The following record of transactions on the London Stock Exchange in Canadian securities during the week ended June [illegible] is compiled by the Canadian Gazette from the Official Lists, and consists of the first and last "markings" and the highest and lowest intermediate markings, unless there is a repetition. The asterisk implies the last recorded transaction where no business has taken place during the week.

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

CANADA LIFE
ASSURANCE CO.
Head Office, Toronto
Established 1847

New Records

Results secured during the past year re-affirm the position of the Sun Life of Canada as the leading life assurance organization of the Dominion.

It leads all Canadian Companies in annual New Business, Total Business in Force, Assets, Surplus Earnings, Net Surplus, Premium Income, Total Income and Payments to Policyholders.

Fair-dealing and progressive business methods are the foundations for the Company's phenomenal growth.

ALGOMA CENTRAL RAILWAY

Promising Report of the Committee to the Bondholders of the Railway

The bondholders' committee report to the holders of Algoma Central and Hudson Bay Railway Company five per cent. first mortgage fifty-year gold bonds and holders of Algoma Central Terminals, Limited, five per cent. first mortgage fifty-year gold bonds that the committee are in a position to inform the bondholders that the scheme of arrangement has been made effective. The accounts show that during the period of about 21 months covered by the receivership the net income of the companies, including deposit and other interest, but before charging bond interest, terminals rent, or providing for depreciation, was $830,007. From this must be deducted interest on the equipment, trust bonds, payable in full under the scheme of $56,323, leaving $773,684, or, say, £155,000.

Deducting £31,000, being the 3 per cent. interest payable to the bondholders of the Terminals Company for the year ended August 1st, 1915, in terms of clause 3 of the scheme, there remains a balance of £124,000, subject to provision for depreciation and contingencies.

The committee consider that the whole of the balance should be held available in Canada to provide for depreciation, renewals, repairs and contingencies, and that no further payment on account of interest should be made at present on the bonds of the Terminals Company or upon the bonds of the railway company. The accounts of the companies, as hitherto, will be made up as at June 30th in each year. So soon as the accounts for the period to June 30th, 1917, are available the committee will advise the bondholders whether any distribution is possible.

Board of Directors Appointed.

On the discharge of the receivers a new board of directors was appointed in Canada, consisting of the following: Mr. R. Home Smith, president, Toronto; Mr. G. A. Montgomery, general manager, Sault Ste. Marie; Mr. I. L. Godfrey, comptroller, Sault Ste. Marie; Mr. R. S. McCormick, resident engineer, Sault Ste. Marie; Mr. W. J. McCormack, steamship agent, Sault Ste. Marie; Mr. E. B. Barber, treasurer, Sault Ste. Marie; Mr. Alex. Taylor, secretary, Toronto.

It will be recollected that a sum of $983,700 was on deposit in Canada, representing the unexpended balance of the proceeds of the last Terminals bonds issue. This fund, with accumulated interest, amounts to $1,002,260. Under the scheme of arrangement this money is available for the development of the properties of the railway company and the Terminals Company, but, as it is inadvisable to embark on any development under the present conditions, it has been temporarily invested in high-class securities. The scheme provides that interest at the rate of 3 per cent. per annum shall be remitted and paid to the Terminals bondholders for the year ended August 1st, 1915. Notice has been published that this payment will be made on presentation of the Terminal bonds at the office of the Trust Company in New York or at the Bank of Montreal in London.

Lake Superior Corporation Guarantee.

The committee have taken into careful consideration the liability of the Lake Superior Corporation upon its guarantee of the principal and interest of the bonds, and negotiations are now proceeding with the corporation. Should these negotiations be successfully concluded the committee think that it would be advisable to continue to defer taking any steps to require payment from the corporation under its guarantee.

There have been allotted to the committee, pursuant to the scheme, $3,000,000 of preferred stock in the railway company. This stock the committee do not propose to distribute amongst the bondholders, as they think that it should be retained in one hand for voting purposes. The committee have, therefore, executed pursuant to the scheme a voting trust agreement (a copy of which can be seen at the office), providing for the issue to the bondholders of the terminals and railway companies of voting trust certificates representing the proportion of the above stock to which each bondholder will become entitled when a distribution is made.

The Lake Superior Corporation have requested that steps be taken to sub-divide the common shares in the railway company, now having a nominal value of $100 each, into shares of $40 each, so that the preferred and common shares may be of the same denomination and carry identical voting rights. [illegible] especially as the whole of the common shares will, in the terms of the scheme, be held by the committee until the bonds have been repaid, and the committee propose, therefore, to agree to this suggestion if the Lake Superior Corporation think it worth while to take the steps necessary to bring about such a sub-division.

Prospects Look Good.

The business of the Algoma Steel Corporation, in which the Lake Superior Corporation is heavily interested, has improved in a marked degree, and the railway is transporting an increased tonnage of its products. The earnings of the steamers belonging to the railway company show a considerable improvement. The companies' undertakings require very careful handling and nursing, and, in the opinion of the committee, the next year or two should be devoted to reorganizing the concerns and putting them into a condition to make the best of their opportunities. This reorganization is proceeding, but it cannot be completed, nor can serious development be undertaken and largely increased traffics expected until the war is ended. It is obvious, therefore, that your cash resources [illegible]

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first three weeks of June:—

Canadian Pacific Railway.

	[illegible]	[illegible]	[illegible]
June 7	$2,[illegible]	$2,[illegible]	+ $253,000
June 14	[illegible]	[illegible]	+ [illegible]
June 21	[illegible]	[illegible]	+ [illegible]
June 30	[illegible]	[illegible]	+ [illegible]

Grand Trunk Railway.

June 7	$1,[illegible]	$1,[illegible]	+ $2[illegible]
June 14	1,1[illegible]	1,[illegible]	+ [illegible]
June 21	1,152,[illegible]	1,441,[illegible]	+ [illegible]
June 30	1,7[illegible]	2,[illegible]	+ [illegible]

Canadian Northern Railway.

June 7	$ [illegible]	$ [illegible]	+ $[illegible]
June 14	[illegible]	[illegible]	+ [illegible]
June 21	7[illegible]	[illegible]	+ [illegible]
June 30	1,1[illegible]	1,[illegible]	+ [illegible]

Gross earnings of the Grand Trunk Railway Company for the week ending June 21 were reported as $1,441,424, which is the largest total during the last 12 months, exceeding the previous high figures of $1,424,534 for the seven days ending May 21 by nearly $16,000.

The Canadian Northern Railway Company's statement of earnings and expenses for May is as follows:—

	1917.	1916.	Increase.
Total gross earnings	$ 3,[illegible]	$ 3,[illegible]	$ 695,[illegible]
Operating expenses	2,[illegible]	2,[illegible]	[illegible]
Net earnings	1,[illegible]	727,[illegible]	[illegible]
Aggregate gross earnings from July 1	[illegible]	[illegible]	7,[illegible]
Aggregate net earnings from July 1	[illegible]	[illegible]	1,[illegible]

The Canadian Pacific Railway Company's statement of May earnings is as follows: Gross earnings, $14,355,149.63; expenses, $9,803,429.84; net, $4,551,719.79; increase, $179,436.88; increase in gross, $1,882,082.11.

For the five months the company's gain in gross earnings over the corresponding period a year ago equals 13.1 per cent., and the gain in net 7.4 per cent. Comparative figures for the five months, again showing that the 1917 performance both in gross and net constitutes a new record, follow:—

Five months.	Gross.	Net.
1917	$[illegible]	$[illegible]
1916	[illegible]	15,[illegible]
1915	[illegible]	[illegible]

Montreal, 25th June, 1917.

MARCUS LOEW'S THEATRES, LIMITED

NOTICE is hereby given that a dividend of 1¾ per cent. for the quarter ending 30th June, 1917, being at the rate of seven per cent. per annum, on the preference and common shares of Marcus Loew's Theatres, Limited, has been declared payable on 16th July, 1917, to shareholders of record on 30th June, 1917.

By order of the Board.

SAMUEL D. FOWLER,
Secretary.

Toronto, 30th June, 1917.

CHARTERED 1892.

The Peoples Loan Savings Corporation

Head Office: - LONDON, Ont
Branch Office: - WINDSOR, Ont.

The Corporation paid, on July 2nd, 1917, the 44th consecutive half-yearly dividend at the rate of Six per cent. on the capital stock.

Parties desiring a permanent dividend paying investment should secure a block of this Stock.

CORRESPONDENCE INVITED

LEGAL NOTICE

THE THOMAS WARREN KNITTING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 21st day of June, 1917, incorporating Alfred Geoffrey Edwards, Theophilus James Macnamara, Thomas Paterson Geggie, John Smith Masson and William Fostus Alexander Hill, all of the City of Toronto, in the Province of Ontario, accountants, for the following purposes, viz.:—(a) To buy, sell, manufacture and deal in woollen and other fibres and yarns and the products thereof throughout the Dominion of Canada; (b) To acquire the business and good-will of Thomas Warren, manufacturer of knitted goods doing business in the City of Toronto. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Thomas Warren Knitting Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 21st day of June, 1917.

THOMAS MULVEY,
Under-Secretary of State.

52-2

ARRANGEMENTS TO SELL WINNIPEG WATER BONDS

Mayor Davidson, of Winnipeg, and Commissioners R. D. Waugh and J. H. Ashdown, of the Greater Winnipeg Water District, have just returned to Winnipeg from a visit to Montreal and Toronto, during which they were successful in completing arrangements for the continued financing of the Winnipeg Water District. *The Monetary Times* is informed that the syndicate having charge of the matter has been arranged by the Bank of Montreal, and includes Messrs. Wood, Gundy & Company, Toronto; the Dominion Securities Corporation, Toronto; Messrs. C. Meredith & Company, Montreal, and a number of other important investment houses. Arrangements are under way for a public offering of the bonds in the near future. Already, however, a substantial portion of the issue has been sold.

The Winnipeg Water District was created in 1913 to provide a suitable water supply for the city of Winnipeg and surrounding suburbs. The District has an area of 91.79 square miles, with an assessment of $226,492,739, and a population of 220,426. The bonds are secured by a direct charge on all of the land in the District, including the entire city of Winnipeg. The term of the bonds is five years from the 1st of July, 1917.

Here Indeed Is a Garden Within A Garden

THE photograph was taken last Summer when there was a riot of growth in the outside garden. In the inside one, the roses and carnations were just starting to make their bloom growth. While one was just starting to wane, the other was taking its place.

It is this all-year-round garden of blooms, made possible by a greenhouse, that makes its possession such a distinct pleasure.

It takes the twinge out of Jack Frost's depredations, and causes long Winters to shorten.

And now is the time to build one.

Materials will not be lower for a long time to come, so why deprive yourself all that time.

High Yield Bonds

Returning Well Over Six Per Cent.

Several Corporations which have been doing a successful and profitable business for a number of years have outstanding bond issues marketed several years ago at rates to yield 6% or less. Some of these bonds, as well as bonds of newer issues of the same class, can now be purchased to yield about

6½%

We recommend these bonds to investors desiring a high yield with the protection afforded by established businesses with proven net earnings several times the amount of their bond interest.

Canada's Tariff Policy Analysed

If Consuming Public Be Called Upon to Pay For Protection, It Should Understand Why, For What Period, and For What Ultimate Purpose—A Plea For An Intelligent and Scientific Tariff.

THE object of a wise protective tariff system is not to bolster up inefficient management, worn-out plants and antiquated methods of production or marketing. Protective duty should be based only upon the ascertained needs of efficient producers. This statement is made by Mr. G. Frank Beer in a paper on national ideals in industry in "The New Era in Canada," a volume just published by J. M. Dent and Sons, Toronto. In his discussion of the Canadian tariff Mr. Beer says:—

Tariff policy has nominally divided Canadian political opinion, one party advocating import duties chiefly for purposes of "revenue," while the other has maintained the national importance of "protection." Since the same tariff for the most part served both parties, it is evident no serious effort was made to frame a tariff upon the principles underlying the policies advocated. One party was happy so long as no serious opposition developed in agricultural circles; the other was content to enjoy the approval of manufacturing interests. One party inclined towards a reduction of duties, while the other favored as a minimum the *status quo*. The present tariff is the result of political expediency. Political parties unite in their desire to use it for both revenue and protection, but without attempting to define the object and extent of the protection, and with apparent indifference to the fact that in the proportion the tariff affords protection its value for revenue purposes is lessened. Of equal or possibly greater importance is the fact that no adequate effort has been made to ascertain the effect of the tariff upon social well-being and national development.

Without attempting to exhaust the subject, one or two principles may be stated as illustrating a treatment of the tariff which might serve to advance national interests.

There is little room for party controversy in the statement that commodities should be easily and cheaply procurable in proportion as they are indispensable to life and health. If, under a "low" tariff, it is not possible to manufacture in Canada articles required by the least well-to-do citizens, such articles should not be made scarce or dear as a result of the tariff. Moreover, necessaries of life are indispensable to production, and commodities indispensable to production are not proper objects of heavy taxation. This is but an indirect way of stating that a "protective" tariff has natural limitations. It is a mere platitude to add that while Canada has to bear the present burden of national indebtedness luxuries should be heavily taxed, both by customs duties and otherwise. Tariff rates should increase proportionately with the cost and fineness of the commodities imported. For instance, in the case of floor coverings, some form of which is required in Canada owing to the climate, cheap and substantial carpeting should be admitted free or at a low duty, while higher grades should bear import duties in proportion to their costliness.

It is evident, moreover, that if the consuming public be called upon to pay for protection, it should be given to understand why, for what period, and for what ultimate purpose. An added cost to the consumer must be justified by some present or future national advantage. Possibly the period for which "protection" is granted should be definitely agreed upon, any extension being dependent upon comparative labor costs in production. Protected industries in this way would receive notice that they are expected to become self-dependent; that under special circumstances their "protection" may be continued; but that the industry must justify itself, since the purpose of the tariff is general and not individual advantage. The object is clearly not to ensure excessive profits for capital; the issue of watered stock by "protected" companies would therefore be considered as *prima facie* evidence of the necessity for tariff revision.

An argument frequently advanced for protective duties is that industry in Canada is handicapped since, owing to our smaller market, it is not possible to compete successfully with manufacturers whose market is a hundred millions of consumers instead of only eight millions. It must, of course, be admitted that there are economic units of production, and possibly eight million consumers do not in every case provide a sufficient market for such a unit. What shall we say, however, of industries which have multiplied until the factories engaged upon the same forms of production are numbered by the dozen or the score? If the economic unit of production referred to is ever to find its realization in Canada, will it be secured under the present system in which new capital is continually attracted to enterprises already established in order to share the profits of those who would have us believe that at least in their particular industry an economic unit of production is not in sight and the necessity for protective duties as urgent as ever?

One result of framing a tariff embodying a clearly defined policy would possibly be the weeding out of parasitic industries. If this is the result, it calls for no defence. The object of a wise protective system is not to bolster up inefficient management, worn-out plants and antiquated methods of production or marketing. Protective duties should be based only upon the ascertained needs of efficient producers.

Effect of Tariff on Export Trade.

The importance of export trade is referred to elsewhere. It is sufficient at present, therefore, to refer to the fact that we can produce for foreign markets only if we can sell our products profitably in competition with the world. Protective duties can find no justification if the direct or indirect results place Canadian exports at a disadvantage compared with competing products. Among the factors which govern this production are (1) the cost and availability of raw materials, (2) the price of necessary machinery, (3) labor efficiency, (4) wage rates. It is obvious that the market prices of living necessaries are reflected in the wage rates paid to labor. If these from any cause are increased, production for export trade will be handicapped unless greater labor efficiency, favorable trade treaties, advantageous freight rates, or other factors, offset the resulting disadvantages. The same is true in the case of raw materials and machinery. But there is an added factor which has not received sufficient attention from those affected. We should no longer consider personal or even provincial interests as of primary importance. World markets are essential to Canadian prosperity and the total cost of the various factors entering into products for export must not exceed that of our competitors. If, therefore, raw materials, necessaries of life, and other requirements for production, are made dear as a result of the tariff their increased cost will weigh with prejudicial effect upon the wage rates of Canadian labor. Conversely, the less the cost of the other factors entering into the products, the greater will be the margin available as payment for labor. It is, therefore, of importance to Canadian labor that the requisites of economic production should enter Canada free of duty, unless otherwise procurable at a cost which will not jeopardize production for export. If, however, revenue requirements render the collection of duties unavoidable, compensating measures should be taken to stimulate the productive efficiency of machinery and labor. There is constituted an urgent demand upon the Dominion government for the generous support of trade and agricultural and technical training. The use of labor-saving machinery should be greatly extended and the policy of scientific and industrial research already entered upon vigorously prosecuted in order that the increased market value of Canadian national production, either in quality or quantity—preferably in both—may offset the handicaps which otherwise may result from the operation of the federal tariff. For many years we have accepted a policy of protection without taking the measures necessary to develop its logical economic accompaniment—a highly organized and efficient system of production and marketing. It should be realized more fully that in the last analysis the protection which is secured to home industries by improved methods of production and marketing is the only sure and permanent protection.

As to Trade Balances.

Heretofore we have expected imports and exports to find a satisfactory adjustment by means of international trade. Whatever the merits of this method in the past, there is little reason to believe that it will serve equally well for the future. International trading will be seriously affected as an outcome of the war and will depend more than formerly upon trade alliances and an assured exchange of products. Large use will be made of tariffs as a means of economic rehabilitation, not necessarily as forms of reprisal, but to meet the necessities of the financial situation. A fiscal policy wholly justifiable and desirable when adopted by a creditor country, may prove little short of suicidal under other conditions. That an exchange of commodities between countries may prove of advantage to each is not disputed; the fact remains that Canadian exports must for many years vastly exceed Canadian imports, owing to our past heavy borrowings, private as well as public. The Canadian tariff, therefore, must be made more manifestly a means of bartering products for products as the minimum of our economic requirements. Great Britain being the largest and most certain market for Canadian products, it may pay us better as a nation to purchase our foreign requirements there even at a slightly greater money cost. We may be able to buy, for instance, in the United States some commodities at a less immediate cost, but it does not follow that such purchases will bear the same ultimate cost. Great Britain will in future be less of a creditor nation than formerly. To the extent, therefore, that we direct our purchases to British markets we ensure the sale of home products and stimulate their production. This sale and stimulus may well repay substantial tariff preferences; for trade balances should not be left in future to find as they can a satisfactory adjustment.

A Board of Industry.

As a first step toward the reforms advocated it appears desirable that provision should be made for the consideration of the tariff solely from the standpoint of fiscal requirements and national interests. It may be found necessary for the federal government to appoint a permanent board of industry, whose duty it will be to study the relation and balance which should exist amongst our productive activities, having regard to the necessity for an accepted policy which will secure for Canada the largest available dividend. The necessity for the appointment of such a board will be apparent when it is realized that irreconcilable differences exist between East and West and between different classes of producers which may have serious results unless reasonable compromises are brought about as a result of better understanding the problems common to each in connection with production and marketing. Intelligent public opinion can be united if the issues are not obscured by party catch-words and misrepresented because of inadequate and misleading information.

A protective tariff wisely designed may be made to strengthen the national structure, to enlarge opportunity and diversify employment. But protection is a narcotic as well as a stimulant. If not carefully restricted to national ends, it may be made to enrich individuals at the expense of the State, to weaken initiative and efficiency in industry, and to corrupt politics by the sacrifice of principles to party expediency. The present haphazard system of protection can not and should not remain as the national policy of Canada. Those who for patriotic reasons approve a protective tariff should unite in supporting measures to prevent its abuses and reform existing irregularities. Such measures may, and doubtless will, be the subject of controversy, but difficulties will disappear whenever the national purposes of a wise protective policy for Canada receive clear definition. Equality of talent and income, even if desirable, are not obtainable by state action, but equality of opportunity is an ideal of democracy for which the people of Canada may well sacrifice selfish interests and existing party divisions.

Overseas Trade Depends on Favorable Transportation

Special Canadian Trade Commission Recommends Government Survey of Freight Situation and Prompt Application of Remedial Measures—Suggests Imperial Scheme of Mobilization of Transportation Resources—Shipbuilding Industry.

IN their chapter on transportation, the special Canadian Trade Commission to Great Britain, France and Italy, state in their report that they were confronted at every point by the problem of ocean transportation. The report continues:—

Prior to the war regular lines were running between Great Britain and Canadian ports, namely: the Allan, Canadian Pacific Rialway, White Star, Dominion, Canadian Northern, Donaldson, Cunard, Manchester, La Compagnie Générale Transatlantique, La Navigazione Generale Italiana. Between France and Canada the only British line operating at the outbreak of hostilities, was the Allan line between Montreal and Havre. La Compagnie Générale Transatlantique established a line in 1912 between Montreal and Havre, and only ceased at the outbreak of hostilities. Communication between Italy and Canada was established by the Navigazione Generale Italiana, which company ran a regular steamship line Genoa-Canada. However, as soon as war was declared this line was suspended. The Canadian Pacific Railway also had a line running between Canada and Trieste, but naturally this service was immediately suspended on the declaration of war.

Not Given Service.

In taking a general view of the transportation between Canada and the Allied nations, it would appear that the established lines have not given that service in linking up Canada with other countries which might have been expected. It has been felt for some years that the rates of freight have been of such a character as to seriously impair their usefulness as a means of developing Canadian trade. Canada's ocean transportation will have to be completely reorganized if the Dominion is to derive the fullest benefit from her natural resources and manufactured products. The question is one of such serious importance to the Dominion that the commission feels that it calls for prompt and scientific treatment by the government.

It was suggested to the commission that greater use might be made of tramp steamers, but this class of vessel requires a cargo outward as well as home, and if encouraged to come to Canada, a steamer of this class is heavily penalized in the matter of insurance, particularly if the voyage is by the St. Lawrence route. As the tramp steamer forms by far the larger proportion of ocean cargo tonnage, it would appear that Imperial control centralized, say in London, might so adjust the employment of ships that the different needs of the Empire might be met as the requirements of the crop or season might demand. (Mr. Pauzé dissenting). If such a mobilization of Imperial transportation facilities could be achieved, it would lead to an adustment of freight carrying which would insure adequate return to the steamers and at the same time bring about a reduction of freight rates which would enormorsly assist transportation between Canada, the ports of Great Britain and the Allied nations.

In the opinion of the commission the question is too important to be left to the decision of private corporations, as the future of Canada in respect to overseas trade will depend almost entirely upon the securing of favorable service and freight rates. It is to be remembered that a great number of Canada's competitors are geographically in a much better position owing to their nearness to the markets of Great Britain and the Allies, and it will be necessary to overcome this drawback if Canada is to have an important share of European trade now so freely offered to her.

Direct Lines Urged.

At Havre, Bordeaux, Marseilles and Genoa, the establishment of direct lines was urged as a matter of supreme importance. In the opinion of the commission the service could be better rendered by the adoption of an Imperial scheme of mobilization of our transportation resources. While direct lines have their advantages, it was felt that many of the subsidized lines in the past had not rendered the service which might have been expected from them.

In the Italian conference which the commission held, it was pointed out that one of the assets which Italy boasted was surplus manual labor, which gave rise to the large emigration of recent years. While it is not likely that the emigration movement from Italy to Canada will assume pre-war proportions for some time to come, still, it may be reasonably expected that the movement of emigrants from Italy to Canada, would in a large measure compensate for any shortage of cargo from that country to Canada on the return voyage. It may be recognized that full cargoes from both France and Italy to Canada could not always be looked for, seeing that Canadian shipments were of large bulk as a rule—lumber, wheat, etc., whereas French and Italian cargoes consist of finer and less bulky goods.

All Sections Profit.

It may be claimed that governmental interest in transportation would encourage mainly a certain section of the community; but looked at broadly an ocean service is simply a sort of bridge between one country and another, and while the direct benefit which may be enjoyed by one section is manifest, all sections profit by the easier and cheaper means of transit.

As the conditions brought about by the war are abnormal, the commission does not wish to deal specifically with them as regards transportation. The question for the future will be the prevention of conditions which interfere with cheap and adequate distribution of Canada's products.

The commission ventures to suggest that the question of shipbuilding in Canada should receive the most careful attention of the government. It is convinced that the expansion of this industry would contribute much to the industrial welfare of Canada, and at the same time would help in some measure to provide the additional tonnage required to bring about a better condition in the matter of transportation.

The commission is strongly of opinion (Mr. Hatheway dissenting) that no subsidies, bounties or other concessions, should be granted to any steamship companies or to individual vessels until the whole question of transportation has been thoroughly studied, and not until the methods of moving our grain, etc., are based upon sound and scientific methods.

The commission on more than one occasion in Great Britain had the question of unsatisfactory bills of lading brought to their notice. The claim was put forward that bills of lading should be uniform, that a standard should be fixed which would be equitable to the shipper and to the shipping companies. The commission feels that this subject is one of great importance and merits the careful attention of the department of trade and commerce.

Should Appoint Transportation Expert.

It was suggested to the commission that an expert official should be employed by the department of trade and commerce to advise on shipping matters, to watch freight rates, movements of shipping, and to act as general adviser to exporters and importers on all matters connected with transportation of goods by sea.

The commission found at all shipping points in Great Britain, that there was a strong desire to encourage Canadian trade. This applies perhaps with special reference to Bristol, where the dock authorities have made special provision for handling Canadian produce and welcome every indication of increased trade with Canada. Cold storage plants of the most modern type, and grain warehouses have been erected, and the commission was assured that every possible encouragement would be given to merchandise coming from the Dominion.

Hull has also made special provision for Canadian trade, and would be disposed to give every possible facility for this development.

Manchester importers and exporters display the keenest interest in Canadian trade and desire that the traffic between that port and the Dominion should grow. The wonderful development of the Trafford Park Estate promises to place

Manchester in a unique position for handling and storing goods.

London, Liverpool, Glasgow and Belfast also encourage the development of Canadian imports and exports, and are prepared to encourage to the full any efforts which are made for its expansion.

Many Port Improvements.

In France the port authorities at Havre, Nantes, Bordeaux, Marseilles, all expressed the desire that trade between their ports and the Dominion should increase. At Havre, Bordeaux and Marseilles, the commission found that special provision had been made for handling cargoes such as Canada is prepared to send to France. In these ports extensive improvements were being carried out by the harbor commissioners for the purpose of extending the facilities of the ports, in the building of warehouses and providing mechanical appliances for loading and unloading vessels, so as to reduce to a minimum the time occupied in discharge and receipt of cargo.

Nantes was also visited by one of the commissioners and the same evidence of good-will and desire to foster the trade between Canada and France was manifest. The commissioners are now advised that a direct line has already been established between Canadian ports and Ste. Nazaire.

The main port of Italy, Genoa, was visited by the commission, which found that extensive improvements are being executed in the harbor and facilities were being provided for loading and unloading, which the port has not hitherto possessed.

Survey of Freight Situation.

The commission feels that it can only report conditions respecting freight rates as they find them, but they would reaffirm that they believe the question is a matter of such material importance to the country's export and import business, that it recommends as strongly as possible a complete governmental survey of the freight situation, and prompt application of such remedial measures as may be found necessary.

One of the most important factors that will have to be considered by the Canadian authorities in connection with the encouragement of vessels to use the St. Lawrence route, will be the question of an improved rate of insurance. Exactly how this is to be done does not come within the province of the commission, but undoubtedly until the high rate of insurance charged on vessels coming up the St. Lawrence is remedied, there will be reluctance on the part of the ship owners to send their vessels to Quebec and Montreal, as the difference in premium constitutes a serious charge on the vessel. It may, however, be suggested that the plan adopted by the British government for controlling marine insurance rates be seriously considered by the Canadian government. Some improvement is vital to the development of the St. Lawrence route, even if the Canadian government has to absorb the difference between the insurance rates to Quebec and Montreal, where they are higher than those to other North Atlantic ports.

The report is signed by Mr. J. W. Woods, chairman, Toronto; Mr. T. H. Wardleworth, vice-chairman, Montreal; Mr. H. E. Dupré, Quebec; Mr. W. F. Hatheway, St. John; Mr. F. Pauzé, Montreal, and Mr. G. W. Allan, Winnipeg. Mr. Roy Campbell, Montreal, acted as secretary to the commission.

DIAMOND DRILLING RECOMMENDED

The proving of property by diamond drilling was a development that particularly appealed to Hon. William Sloan, minister of mines for British Columbia, on a recent trip through the province. It is one of the features of the recently passed mineral survey and development act. Diamond drilling is in progress at several points and is a great aid to the prospector and miner. An exact diagram is thus secured of a property, eliminating waste effort and expense.

The Canada Weather Insurance Company, of Toronto, has ceased to transact business in Canada and has reinsured its liabilities under unexpired policies, in the Home Insurance Company, New York, through their Ontario general agency, 15 Wellington Street East, Toronto, and has applied to parliament for the release of its securities.

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks of July 7th, 1917, and July, 6th, 1916, respectively, with changes:

	Week ended July 7, '17.	Week ended July 6, '16.		Changes.
Montreal	$ [illegible]	$ [illegible]	—	$ [illegible]
Toronto	58,935,910	57,745,600	+	1,190,310
Winnipeg	[illegible]	[illegible]	+	[illegible]

CANADA'S COAL SUPPLY

Some years ago, Dr. George Otis Smith, director of the United States Geological Survey, commenting upon the world's supply of coal, and with particular reference to the reserves in his own country, said: "This glance at the world's reserves of coal shows plainly not only that the United States leads all other countries in production, our annual output being nearly 40 per cent. of the total, but also that it possesses the greatest reserves. Yet in respect to no mineral is there greater need to emphasize the folly of exporting the raw material. Let us keep our coal at home, and with it manufacture whatever the world needs." It is not without significance that advice to the United States to keep its coal at home and with it manufacture whatever the world needs should even be suggested. As Mr. Arthur V. White, a consulting engineer who for many years has made a study of this problem, recalled in *The Monetary Times Annual* in January, examples are not wanting to show that when countries have recognized the fact that certain of their natural resources were essential to their national welfare, policies have been adopted designed to stop or curtail the exportation of such natural commodities.

This week from Washington came the news of a proclamation of President Wilson requiring the licensing of exports, especially of coal. According to a Buffalo report, commencing midnight of next Sunday no coal will be sent into Canada except under special license, and for 60 days from that time there will be a rigid embargo against coal shipments to Canada. It has been stated frequently that the growing industrial and other needs of Canada require that there no longer be exportation of Canada's electrical energy to the United States, without acceptable *quid pro quo*. This policy of Canada's retaining her electrical energy for her own use, is that which stimulates one like the District Attorney who (in November, 1916, in charge of the investment at Buffalo respecting the coal situation), asked one of the witnesses the pertinent question: "If the Canadians put an embargo on power when there is a power shortage, should we not put an embargo on their getting coal when there is a shortage here?"

Ontario and Canada may yet require every unit of electrical energy just as much as the United States may yet require every pound of phosphate rock, or may find it expedient to retain every pound of coal. Mr. Arthur V. White, quoted above, has in these columns emphasized the fact that the people of Canada, and especially of Ontario, should understand and fully realize the extent to which they are dependent upon others for their coal supply, and understand also their increasingly great dependence upon hydro-electric power as well as its relationship to coal.

OUR COMING PROBLEMS

The duty of the government of Canada clearly is to take the initiative to call to their counsel representatives of the interests involved and to plan now with definiteness and in detail for the period of readjustment and reconstruction of industries, which inevitably must come soon. This is made clear in an exceptionally thoughtful and logical statement regarding national ideals in industry, by Mr. G. Frank Beer, in his contribution to the recently published volume, "The New Era in Canada." He points out that preparedness for such a time is not the work of days or weeks but will be the arduous and concentrated task of many months if it is to prove in any degree adequate. That we have trusted to haphazard solutions for problems of such importance and have pleaded the pressure of other problems as an excuse for inaction, is unfortunately true. This, says Mr. Beer, is not the part of wise statesmanship nor yet of shrewd business foresight. He adds: "As in time of war, the responsibility for success lies chiefly with those in the higher commands, so in the coming time of peace that responsibility must be borne by those who occupy positions of industrial and national leadership. Failure to meet the coming problems of employment will be paid for in disappearing profits and in social if not in national disintegration. What has been done generously and effectively by the few in time of war must be done by the many, assisted, and if necessary led, by the government if we are measurably to solve the problems of peace. For lack of preparedness where so much is involved public authorities and industrial leaders should in future be held to strict accountability."

The spreading movement toward State control of industrial and other services is one to which our industrial and financial leaders have given comparatively little thought. They have treated it like the persistent mosquito—"swatted" it without thought and with the nearest available weapon. This movement towards State control, however, is one which our industrial and financial men should consider seriously. The war has given to it a fillip which the period after the war is not likely to overcome. Mr. Beer, who writes with the experience of a captain of industry, says that the strength of the movement lies in the conviction of many that the present industrial system recognizes only the law of the jungle—power. "If it be true," he says, "that Canadian prices are fixed at 'all the traffic will bear,' which being interpreted means the maximum made possible by monopoly or a protective tariff; if the possession of power justifies, in the opinion of those who control industry, its exercise to secure labor at a price measured only by the necessity of workmen and workwomen; if profits have no moral measurement, then the present industrial system should and must be replaced by another which recognizes social and national responsibility. The dangers of industrial nationalization are great, indeed obvious, but the future well-being of 90 per cent. of the people justifies the adoption of measures necessary to secure ultimately a new and better standard of human relationship. Prophecy is always dangerous, but it requires little vision to become convinced that if other industrial standards are not accepted the movement toward State control during the ten years following the war will exceed that of all preceding years." This discussion of national ideals in industry is a notable contribution to the subject, and is made exceptionally valuable by its practical treatment. Mr. Beer's analysis of our faulty methods in framing tariffs, is printed on another page.

SOMETHING TO LEARN

The dominant note in the report of the special Canadian Trade Commission to Great Britain, France and Italy, is that we have much to learn about export trade. The report, a summary of which appeared in *The Monetary Times* last week, contains considerable detailed information of value to those Canadian producers who are anxious to market their products abroad. To sell a commodity in the domestic market, especially when frequently protected by an unscientific tariff, is considerably easier than to sell in a market in which many keen competitors are met. In discussing trade with France, for example, our Trade Commission points out that if Canadian manufacturers wish to secure business in accordance with French customs, they must look particularly to the specifications which are laid down. They must quote always in the customer's currency and at his own warehouse. They must go more than half-way towards making business between the two countries easy and mutually profitable.

Throughout the report, one finds substantial evidence that Canadian exporters have not commenced to study seriously the requirements of foreign markets. In the Manchester district, for example, there were inquiries for Canadian mica in powder. The statement was made that the Canadian article hitherto shipped had not been satisfactory and was not ground sufficiently fine. Criticism was offered also as to its quality. Some of the smaller shippers had forwarded goods which had not been properly graded and generally the article was in bad condition. Of our egg exports there are many complaints about breakages. The Canadian box shipped to the United Kingdom is greatly inferior to the much larger case in vogue in the British market. Canadian eggs are packed in cardboard fillers and are thus subject to movement. The Danes and other shippers pack the eggs in successive layers of excelsior, which makes a solid interior, incapable of suffering from shaking.

In the canned goods trade, more complaints of our careless export methods were heard. Our Trade Commission says in its report: "Canadian packers (of peaches) have sinned in many ways; they have packed the fruit when unripe, cut it into small, uneven pieces, in many instances over-processed the pack, making the fruit a bad color. While it is apparent that the nature of the fruit is against attractive packing, there is, nevertheless, a very obvious carelessness on the part of Canadian canners. If a trade is to be developed the matter of improved packing must have the serious attention of the canners." Pears have suffered in the same way. The director of the British Army Canteen Committee, supplying more than 2,000 canteens, on one occasion refused to purchase Canadian pears. A Canadian government official asked for an explanation. He was invited to visit the Committee's headquarters, where cans of Canadian pears were opened in his presence by experts. "The fruit was seen to be so inferior in quality," records our Trade Commission, "that he at once realized why the Committee had been unable to authorize the purchase." The quality of our evaporated apples and other fruits, too, is not considered altogether satisfactory in the British market. These are a few typical instances. They indicate that to obtain export trade we must study the requirements of foreign markets and meet the competition. Export business does not ripen from wishes. It comes only as a result of thought and hard work.

After the war, comparatively little foreign business will come of its own accord to Canadian factories. They will be compelled to seek their export business, to prepare and to organize for it, and to pay particular attention to quality and prices. The special Canadian Trade Commission properly points out that to go after export trade in a half-hearted way, or only when home trade drags, will never secure satisfactory results. The information gathered by our Trade Commission will prove of great value to Canadian producers. The report has been supplemented with a number of samples and lists of buyers in foreign markets, and these may be consulted at the department of trade and commerce, Ottawa.

WAR LOANS: SMALL INVESTORS

Sixty-five per cent. of the Liberty Loan was subscribed in amounts of $10,000 or less. Subscriptions exceeding $200,000 were about only 15 per cent. of the total. This is an excellent record for the small investors of the United States and compares favorably with the experience in other countries. The Liberty Loan results may be tabulated as follow:—

Subscribed, (Millions).	Subscription.	Allotted Amount, (Millions).	Per cent.
$1,296.7	$10,000 and less	$1,296.7	64.8
506.1	$10,000 to $100,000	336.1	16.8
220.5	$100,000 to $250,000 ...	99.2	5.0
601.5	$250,000 to $2,000,000 ..	184.4	9.2
234.5	$2,000,000 to $6,000,000.	58.7	2.9
46.7	$6,000,000 to $10,000,000	9.8	0.5
75.3	Over $10,000,000	15.1	0.8
$3,035.2		$2,000.0	100.0

There were approximately 4,000,000 subscribers to the Liberty Loan, the financial institutions and wealthy men representing comparatively few of that number. If small investors of the United States are properly attracted to buy bonds, their future war loan achievements should easily make, what the American dearly loves, a world's record. Already, the Alexander Hamilton Institute of New York predicts that in view of the success of the recent loan and the fact that the high wages now being paid all over the country will permit rapid accumulation of savings, it is reasonable to expect over 10,000,000 subscriptions to the next United States war bond issue. When the first war loan was offered in England in 1914, nearly four months after the outbreak of the war, the number of subscribers was only 100,000; and only 1,000,000 subscribed to the second loan in July, 1915. In Germany, 1,777,000 subscribed to the first loan in September, 1914. Small investors in the Allied countries have done well, but it should not be a difficult task for them to improve the record.

By order of the Board,

E. HAY, General Manager.

Toronto 20th June, 1917.

PERSONAL NOTES

Mr. T. Fred Aspden, Supervisor of the Canadian Bank of Commerce, Toronto, has been elected vice-president of the American Foreign Banking Corporation, New York. Mr. Aspden, who will shortly assume his new duties, is a very capable banker, and his new appointment is a tribute to his ability and to the Canadian banking system, which has produced many well qualified financial men, now holding important positions in the Dominion and elsewhere. Mr. Aspden was born in Manchester, England, in 1866, and served as a junior in the Merchants Bank, London, from 1881 to 1888. He then entered the First National Bank, Chicago, handling certain matters on their behalf throughout the United States, and representing them at various State and National bankers' conventions. Remaining with that institution for 15 years, he next became associated with the Canadian Bank of Commerce, at London, England. There he was engaged in special business for the bank, travelling on the European continent in connection with its foreign business. Four years later, he became Supervisor of the same bank and for seven years has been engaged in the important work of looking after its foreign accounts. Mr. Aspden married a daughter of Mr. George Masson, chief engineer of the Chicago and Grand Trunk Railway, Detroit, and has two sons. His recreation is golf. He is a member of the Toronto and Rosedale Golf Clubs, and also of the Toronto Hunt and National Clubs. Mr. Archibald Kains, who has been chosen as President of the American Foreign Bank Corporation, is also a Canadian Bank of Commerce man. He was manager of the bank's branch at San Francisco when he accepted the office unanimously tendered him as clearing house examiner of the San Francisco banks. Later he became Governor of the Federal Reserve Bank at San Francisco, which post he has relinquished for his new duties. In an interview with *The Monetary Times*, speaking of the purposes of the American Foreign Banking Corporation, Mr. Aspden said: "The principal functions of the American Foreign Banking Corporation will be the aiding and financing of international trade. The scope of the institution will be world wide, and it will serve a very definite purpose in the development of trade between the United States and foreign countries. Asked as to whether Canadian banks would become identified with the American Foreign Banking Corporation, Mr. Aspden said: "That may occur as a later development. Such a connection would benefit both Canadian interests and those of the corporation. There is a marked tendency to strengthen banking and commercial relations between the two countries that is mutually helpful. This continent is one of the biggest producers for foreign markets. Our corporation will have a special trade department which will gather information regarding opportunities in foreign markets, and which will place at the disposal of foreign markets information respecting trade opportunities in North America. Leading banks in practically every large city from New York to California are identified with the organization. These include the Merchants' National Bank, Boston; First National Bank, Cleveland; Philadelphia National Bank, Philadelphia; Canal Bank and Trust Company of New Orleans; National Bank of Commerce, St. Louis; Corn Exchange National Bank of Chicago; First and Security National Bank of Minneapolis; Fifty-Third National Bank of Cincinnati; Anglo and London Paris National Bank of San Francisco; First National Bank of Milwaukee, and Chase National Bank of New York." Mr. Hayden B. Harris, of New York, will act as a vice-president of the corporation, which will commence business in New York in September.

T. Fred Aspden, Toronto,
Appointed Vice-President American Banking Corporation, New York.

Mr. Alexander F. Sutherland has been appointed as inspector under the investment and loan societies act of British Columbia. He succeeds the late Mr. Wm. Skene.

Mr. J. A. L. Robinson has assumed the duties of district manager of the North American Life Assurance Company, at Napanee, Ont. This is Mr. Robinson's initial connection with life insurance. He is said, however, to have every qualification which is essential to his success.

Mr. Alexander N. Mouat, for the past four years city auditor of Edmonton, has been appointed comptroller-general of the province of British Columbia. Mr. Mouat has had wide experience with this special kind of work, being previously comptroller of the Hudson Bay Company, with which he was connected 20 years. He also established a comptroller's department at Edmonton, which proved most effective, his system being adopted by the Norris government in Manitoba. Under it the city saved in 1915 and 1916, $1,200,000 in controllable expenditure compared with 1914.

Mr. Herbert J. Daly, vice-president and managing director of the National Cash Register Company of Canada, Limited, president of the United Brass and Lead Company, Limited, and of the Beverley Wood Specialty Company, Limited, whose appointment as a director of the Home Bank of Canada was announced at the annual meeting, was born in Orillia in 1882. He has been identified with the Cash Register Company since 1904 in various capacities, assuming his present office last year. Mr. Daly is also a member of the Canadian Manufacturers' Association and the Toronto Board of Trade.

Mr. George B. Fraser has been elected to the vacancy on the board of directors of the Bank of Montreal, left by the death of Mr. E. B. Greenshields. Mr. Fraser is head of the large wholesale drygoods house of Greenshields, Limited, with which he has been identified as a partner for many years back. Following the death of Mr. E. B. Greenshields he became head of the firm. Mr. Fraser is a Scotsman by birth and came to Canada in 1875. He is an authority on the trade with which he has been associated for so many years and is held in high esteem in commercial circles. Mr. Fraser is a life governor of the Montreal General Hospital.

Colonel C. W. Rowley, Winnipeg manager of the Canadian Bank of Commerce, was one of the prominent speakers at a recent dinner at Minneapolis. The hosts were members of the Minneapolis Retailers' Association, the Minneapolis Real Estate Board and the Minneapolis Automobile Trade Association. The guests, all from Winnipeg, were Colonel Rowley, J. J. Moncrieff, managing editor of the Winnipeg Tribune, H. W. Markle, president of the Winnipeg Retailers' Association, and Alexander Leonard, sales manager of the Cadillac Motor Sales Company, of Winnipeg, representing the automobile dealers of that city. Colonel Rowley said in part: "We were ruled into the war without any warning and in our hurry to send men across to aid in the great conflict we neglected to prepare for the return of the lame, the halt, the blind and the maimed until they began coming back to us. You can and must begin making these preparations now. This is one of the heavy burdens which is on the shoulders of those who stay at home. You've got to have a job to offer these men. If they are not able to re-enter the line of work they performed before they left, you must prepare them for some other kind. You must care for them to the extreme limit. They must be cared for by the State, not by charity, and your pensions must be so fixed that these brave men who offer everything they have to save you and the ones dear to you can be properly cared for without the loss of their self-respect. Your pensions must be liberal enough to prevent them having to go out and beg in order to maintain life." He paid a high compliment to the Boy Scouts, stating their organization was the greatest in the world for making good citizens.

PAPER MAKERS AND RESTRAINT OF TRADE

Federal Commission of United States Makes Report—Suggests Canadian Government's Co-operation

Competition in the selling of newsprint paper in both the United States and Canada has been prevented by the allotment of customers or by the non-interference by members of the News Print Manufacturers' Association, with the customers of any other member. This statement is made in the report of the Federal Trade Commission of the United States on the newsprint paper industry, a copy of which has just been received by *The Monetary Times*. The commission state that substantial evidence in their possession tends to show violations of the federal anti-trust laws by certain newsprint manufacturers who are members of the voluntary association known as the News Print Manufacturers' Association, with headquarters at New York. Its membership includes practically all of the Canadian manufacturers as well as all the United States producers except one large and a few smaller ones. About 86 per cent. of the effective production of newsprint paper of the North American continent is included in the association. The five members of the executive committee of the association, who, with the secretary, manage its affairs, speak directly for more than one-third of the total newsprint tonnage of the continent.

No Written Minutes on Record.

The organization has no articles of association and no by-laws. Its expenses are defrayed by assessments of members on the basis of tonnage output. Neither it nor its executive committee keeps any written minutes or records.

Ostensibly the association is organized for the collection and dissemination of statistics. Actually, however, its principal energies have been diverted to other activities. The evidence in the hands of the commission (consisting largely of correspondence between the active parties and of interviews) tends to show that the acts of the association officers and members have transcended innocent purposes and resulted in substantial suppression of competition and restraint of trade.

It was elicited at the recent hearings before the commission that allotment of customers and business exists in the present organization of the trade.

Few Instances of Competition.

As a result, and as the evidence shows, except where newsprint mills have ceased to make newsprint paper and have thus left their customers in the open market, or where occasionally a mill not in the association has made a lower price to obtain a needed customer—there have been very few instances of competition in selling in the newsprint paper industry. In fact, so few are these cases that each is known and referred to by name in the trade. Such instances of competition of any size as did occur were either arbitrated or apologized for and promises of non-repetition demanded and made.

The effect of these practices appears to be the undue enhancement of prices to small publishers and a widening of the disparity in prices charged the customers of different mills.

By the surrender pro rata of customers to absorb the tonnage of new mills as it comes on the market, such new competitors have been prevented from selling any paper in open competition.

Suppression of Competition.

The power of the association entirely to suppress the threatened competition of new mills has been exercised in at least three instances. The Price Brothers' mill and the Abitibi mill, of Canada, are both large, new and efficient mills and therefore potentially powerful competitors. The customers required by them, in order to keep their production off the competitive market, were surrendered to them pro rata by members of the association, so that substantially no tonnage therefrom came into the market as competitive. Successful efforts were made to prevent competition from the tonnage of the Union Bag and Paper Company's new newsprint mill at Three Rivers, Quebec. Its tonnage is to be sold through the Canadian Export Paper Company.

It is apparent that there is no necessity for any price agreement under any scheme of allotment either of customers or of territory among the various producing units when such division of the [illegible] each producer is then at liberty to charge his customers whatever the traffic will bear without the restraining influence of competition. Particularly are such schemes effective when, as in the present situation, all overseas importation of paper is cut off.

Curtailment of Production.

In 1915 the association attempted the curtailment of the production of those engaged in the manufacture of newsprint paper. It has also endeavored to prevent existing producers from increasing their facilities for production.

On the latter point, although the secretary, at a meeting in Montreal in October, 1915, stated that:—

"We were on the verge of a revival of business such as has rarely before been experienced in this country."

and that—

"I stated to those who were assembled at the Montreal meeting that it appeared to me as if prosperity was knocking at our door,"

yet, notwithstanding such knowledge or prediction, efforts were continued throughout that month to prevent one company from putting in a new machine for the manufacture of newsprint, even to the extent of attempting to buy certain water power, "so as to stall his plans of putting a paper mill in there." This is the language of the person who made the attempt.

Canadian Joint Selling Agency.

The Federal Trade Commission report deals at some length with the Canadian joint selling agency, reference to which was made at the recent Canadian government investigation at Ottawa.

On August 15, 1916, a charter was granted to the Canadian Export Paper Company, of Montreal, with an authorized capital stock of $500,000. The form of contract for subscription to stock in that company shows that each paper-manufacturing company, by subscribing thereto, agrees to place in the hands of the Canadian Export Paper Company, the sale of all of its newsprint paper tonnage (except that sold in Canada) and that the proceeds of such sales should be prorated among the constituent concerns.

Five Canadian concerns, the Laurentide Company, Price Brothers, Belgo-Canadian, Donnacona and Brompton Pulp and Paper Company, are members of this export company. It is expected that other Canadian mills will become members or put their tonnage at its disposal, and the export company will sell "as though it were the product of one concern" the total export tonnage of its constituent members or principals, all of whom are normal competitors, and whose aggregate output comprises more than one-third of all the newsprint paper produced in Canada. In 1915 about 75 per cent. and in 1916 about 77 per cent. of the total Canadian output was imported into the United States.

One-Third of Canadian Tonnage.

The sales agents of the Export Paper Company have already been active in the United States. Through this joint agency that competition, if any, which previously may have existed or which might now normally exist between the member concerns in bidding for trade in the United States has been entirely suppressed.

The correspondence shows that the secretary of the association urged the formation of this company and that the constituent companies are also members of the News Print Manufacturers' Association, and that the Laurentide Company is represented on the executive committee of the association. The possible results of the control of one-third of the total Canadian tonnage through the executive committee of the News Print Manufacturers' Association in diverting such supplies from the United States and artificially starving the domestic market can easily be appreciated.

Substantial evidence of other activities tending to restraint of trade or in aid or furtherance of such restraint is also in the hands of the commission. This evidence may be summarized as follows:

Evidence of Trade Restraint.

(a) Two campaigns among the newsprint manufacturers were prosecuted through the secretary of the News Print Manufacturers' Association, urging that such manufacturers take steps to show general and large increases in costs as a justification for proposed sharp advance in prices. The first campaign, in the winter of 1915-16, apparently failed to make the desired showing. A number of mills answered that there had been no particular increase in costs or that if slight

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

increases had occurred they had been offset by certain savings. The second campaign occurred in May and June, 1916. It was then emphatically impressed upon the mills that in their cost statements all materials used should, regardless of actual costs, be figured as though bought in the current open market, when such was not the case.

Do not Bid Against Each Other.

(b) Substantially all paper sold to publishers is sold on the condition that it be used only by the purchaser. This practice results in closer control of the supply of paper and prevents any accumulation of stocks which might be offered in competition with the supply from the mills.

(c) Some mills, which buy pulp wood, have made and generally respect a division of territory and do not bid against each other in the purchase of such wood.

(d) The business of most of the smaller publishers is now divided among jobbers and distributing agencies. Indications are that in certain states or sections the smaller publishers are unable to obtain quotations except from the specific jobbers to whom their district is apparently assigned. The fact that, as a rule, mills will not quote to these smaller publishers also indicates close relationship between mills and distributing agencies in such division of territory.

The Federal Trade Commission of the United States has decided to recommend as a war emergency measure that Congress by appropriate legislation, provide:—

Recommendations of Commission.

(1) That all mills producing and all agencies distributing print paper and mechanical and chemical pulp in the United States be operated on government account; that these products be pooled in the hands of a government agency and equitably distributed at a price based upon the cost of production and distribution, plus a fair profit per ton.

(2) That pursuant thereto some Federal agency be empowered and directed to assume the supervision and control thereof during the pendency of the war

(3) That, by reason of the fact that approximately 75 per cent. of the production of newsprint paper in Canada comes into the United States, proper action be taken to secure the co-operation of the Canadian government in the creation of a similar governmental agency for the same function, which shall be clothed with power and authority to act jointly with the governmental agency of the United States for the protection of the consumers and manufacturers of print paper and the public of the United States and Canada.

(4) That in case the Canadian government shall not join in such a co-operative enterprise, then importation of paper and mechanical and chemical pulp into the United States shall be made only on government account to or through the Federal agency charged with such supervision and distribution.

FREIGHT CARS ORDERED

An order for 1,000 freight cars has been placed by the Canadian government railways with the National Steel Car Company at Hamilton, Ont. These cars will be used chiefly to haul the grain crop.

MONEY MARKETS

Rates in New York, sterling demand, $4.75.55.

Bank of England rate, 5 per cent.

The directors of the Teck-Hughes Gold Mines, Limited, are offering the company's shareholders $100,000 five-year 7 per cent. gold bonds in denominations of $1,000 each at 85 and accured interest, from April 1st, 1917. Interest is payable half-yearly.

COPY OF MONETARY TIMES WANTED

Any reader, not keeping copies of *The Monetary Times* for binding, who will send in the issue dated June 22nd to the head office, 62 Church Street, Toronto, will be granted a month's extension of subscription.

WAR ORDERS FROM UNITED STATES

Orders for $1,[illegible] worth of blankets have been placed among Canadian manufacturers by the United States government for army purposes, according to the head of one of the largest industrial corporations in Canada. Orders have been distributed with Penmans, Limited, Toronto Carpet Company, and the Smart-Woods Company has been awarded a large contract for tents. The specifications were submitted to Canadian mills with prices fixed by the United States authorities.

FARM LOANS IN DEMAND

Although the Saskatchewan Farm Loans Board has only been in operation for the receiving of applications for loans for a week, thirty applications have already been received from farmers varying in amounts from $600 to $5,000.

Colin Fraser, chairman of the board, states that the larger amounts are for the most part asked in cases where purchase money is still due. The terms of the act do not allow the board to take any second mortgages, so that all previous loans have to be paid off before money can be secured from the board.

"SCOTIA'S" FIRST STEEL SHIP LAUNCHED

The S.S. War Wasp, the first steel ocean-going steamer built in Nova Scotia, was successfully launched on Monday by the Nova Scotia Steel Company. Work on this vessel was commenced in October last. The boat has a carrying capacity of about 2,000 tons, a displacement when loaded of 2,870 tons and a speed of eleven knots per hour. The dimensions are as follows: Length, between perpendiculars, 22 feet; moulded depth, 20 feet, and beam, 35 feet.

The War Wasp has been sold to the British governmen A second vessel, about 25 per cent. larger, is under construction, and a third vessel will occupy the berth vacated by the War Wasp.

ROYAL BANK'S NEW YORK INTERESTS.

Stockholders of the Merchants' National Bank met in New York yesterday, when new directors were elected, several of whom represent the interests connected with the Royal Bank of Canada, who recently secured control of the stock of the United States bank. Mr. R. E. Jones, who has been one of the agents of the Royal Bank in New York city, is now a director of the Merchants National Bank.

In this connection it is stated that the syndicate which recently acquired the majority interest in the stock, or 20,001 out of a total of 40,000 shares outstanding, has started to distribute its holdings.

Thus far, it is stated 5,000 shares have been apportioned to Montreal interests, who paid $725,000, or $145 a share. Interests identified with the Royal Bank have taken 8,000 shares, while the balance of 7,001 shares is understood to be still in the hands of the syndicate, says a Montreal despatch.

It is expected that the new Canadian interests will be represented by at least ten out of fifteen directors of the institution. The control of the bank will give the Royal an advantage in New York, owing to the fact that the foreign corporations are not permitted to accept deposits. The Merchants' National will be able to accept the accounts of the Canadian institutions which do business in New York.

The following companies have increased the number of their directors: Chambers, McQuigge and McCaffrey and Company, Limited, from five to seven; Port Arthur Construction Company, Limited, from three to seven; Dominion Foundries and Steel, Limited, from six to ten.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Transportation Building Company.—Bondholders met on July 12 to consider a proposal for six years' delay in the operation of the bond redemption provisions of the deed of trust. Sinking fund provisions are due to commence November 1 next and it is proposed to put the date forward to November 1, 1923.

William A. Rogers Company.—The company announce that the July dividend will not be paid owing to the increased amount in working capital required. The dividend on Rogers common in the last two years was at the rate of 6 per cent. It was 8 per cent. in 1914, and 12 per cent. in 1912 and 1913. The 1916 statement, issued not long ago, showed net profits over $50,000 in excess of those earned in 1915.

Dominion Steel Corporation.—Mr. Workman, president, who has recently returned from an inspection trip, reported that satisfactory progress was being made with the extensions and improvements now under way at the steel properties. The new blast furnace would be ready in two to three months. The first of the new batteries of by-product coke ovens should be operating during the winter and the second in the early summer.

Howard-Smith Paper Company.—The company have declared an initial quarterly dividend of 2 per cent. on the common stock, placing it on an 8 per cent. basis, as has been expected for some time, and also declaring the regular quarterly 1¾ per cent. on the preferred. The dividends are for the three months ended June 30. The common dividend is payable August 1 to stock record of July 20, and that on the preferred is payable July 20, to record of July 13.

National Portland Cement Company.—Mr. R. H. McWilliams, the company's new manager, tells *The Monetary Times* that the experiments under the former management in connection with the production of potash, have proved a failure and have cost the company about $20,000. The company's management was reorganized on May 1st. The plant is being changed into a rock plant and the company hope to be in a position to manufacture cement by August 1st, with the mill entirely overhauled.

Brazilian Traction Company.—The net earnings of the company in the month of May were 4,289,000 milreis. This is a high record for the company, exceeding the previous record made in March, when earnings were 4,151,000 milreis. The improvement in the position of the company has been so marked that its floating liabilities in the shape of advances from banks have been practically entirely wiped out, and its immediate liabilities are represented only by interest and dividends payable on its securities in Europe. The gross earnings are showing material increases. In May they were 7,864,000 milreis, an increase of 300,000 over March, the record month to date, and of 560,000 milreis over May of last year.

Shawinigan Water and Power Company.—The company has contracted to supply 20,000 h.p. to the Canadian Aloxite Company, which is a subsidiary of the big Carborundum Company, of Niagara Falls, N.Y. Presumably some benefit will be derived from the new power contract by the Laurentide Power Company. The company's power sales in June were the largest in its history, exceeding the previous record, established in May. As a result of the large demand the Shawinigan Company, which markets the output of the Laurentide Power, is taking considerably more power from the latter company than is called for under the contract entered into about two years ago. The new contract between the Canadian Aloxite Company and Shawinigan presumes a further call for power from the Laurentide Company.

William A. Rogers Company.—The circular sent to shareholders by Secretary Baker, announcing that the dividend due July 3 would not be paid, says: "During the past two years the amount of working capital required in connection with the company's operations has greatly increased, due to the rise in costs and the necessity for carrying extra stocks of raw materials as a protection against uncertain delivery and perfect embargoes. After careful consideration the directors believe that, while these heavy requirements continue, or until conditions become favorable for providing the company with an increased amount of working capital, dividend payments on the ordinary shares should be suspended." The dividend on Rogers common in the last two years was at the 6 per cent. rate. It was 8 per cent. in 1914 and 12 per cent. in 1912 and 1913. The 1916 statement issued not long ago showed net profits over $50,000 in excess of those earned in 1915.

Nova Scotia Steel and Coal Company.—The Montreal and New York Stock Exchanges have admitted the company's "rights" to dealings. Under ordinary circumstances, with "Scotia" selling below par while the new stock is to be issued at par, there could be no such entity as a marketable "right," and it is claimed that the so-called "rights" are, in reality, "calls" on the stock. These would be valuable if the stock later on went above par, as it would give the buyer of a "right" a "call" on a certain number of shares at par, failing which the call purchased would be valueless.

The new stock was issued to shareholders of record on Saturday, June 30, so that stock bought after that date will be ex-rights. The 2½ per cent. dividend goes to stockholders of the same date, so that it will be both ex-rights and ex-dividend the same day. Payment for the new stock is spread over to November 15. After this has been completed, a stock dividend of 20 per cent. on the outstanding common shares ($12,500,000) will be paid to shareholders of record of November 20. This stock distribution will amount to $2,500,000, thus bringing the issued capital up to the authorized amount of $15,000,000.

Hollinger Consolidated.—"Labor conditions, instead of showing any improvement, have been gradually drifting into a state of uncertainty," said President N. A. Timmins, in a recent statement, "which is most embarrassing to the management and seriously interferes with the carrying on of operations. The main difficulty is to secure a sufficient number of muckers and trammers for work underground, without which it is impossible to raise sufficient ore to feed the mill and thus enable the company to both pay running expenses and maintain dividend.

"The company is operating under the most up-to-date conditions and is more than satisfying the strict requirements for the protection of the men exacted by the Ontario Mining Act. As to wages, the amount paid by the Hollinger Company exceeds in the aggregate the demands of those who are responsible for the present agitation. The men in the company's employment are well satisfied not only with the working conditions but also with the wages paid and are taking no part in the present agitation.

"The directors have no intention to close the mine. Operations will be continued as long as a sufficient number of workmen can be secured to carry them on, and as long as the company receives adequate protection from the authorities. The mine is in excellent condition; the ore reserves have been materially added to since the beginning of the year, and in my opinion it would be unwise for shareholders to part with their stock at the present market price."

Dominion Steel Corporation, Limited.—The company's net earnings for the year were $12,067,874. From this amount there has been reserved for depreciation of plants and properties, sinking funds, etc., the sum of $1,859,595. This is in excess of the amounts reserved for similar purposes in past years, but is rendered necessary by prevailing conditions. The amount required for bond interest in the year was $1,230,203. In comparison with previous years there was no other charge for interest. On the contrary, the revenues of the corporation include a moderate sum derived from the investment of surplus funds. The net improvement in respect to interest amounted to $421,264 over the year ended March 31st, 1916, and to $482,701 over the year ended March 31st, 1915.

In addition to $350,000 balance of arrears of dividends on the preferred stock of the Dominion Iron and Steel Company,

OFFICERS OF THE BANK

R. Campbell, General Manager
J. P. Roberts, Supt. B.C. Branches
V. F. Cronyn, Supt. Eastern Branches

Limited, paid July 1st, 1916, regular dividends have been paid on the preference shares of the corporation and on the preferred stocks of the Dominion Coal Company and Dominion Iron and Steel Company. On March 23rd last a dividend of 1 per cent. on the common shares of the corporation was declared, payable on April 16th. After making due provision for bond interest and preferred dividends paid and accrued, the balance to be carried to surplus account is $8,571,165.

The entire issue of the six per cent. five-year notes of the corporation maturing December 1st, 1918, amounting to $3,406,666, was called for payment on December 1st, 1916, and up to the time the accounts for the year were closed, all but $484,233 had been redeemed. These had not been presented for payment. The aggregate reduction in the funded and mortgage debts of the corporation and the constituent companies during the year was $3,501,709. The proportion of current assets to current liabilities, which a year ago was four to one, is now about seven to one. The directors have considered it advisable to devote a portion of the past year's earnings to the extinction of the item discount and premiums on securities, which has hitherto been carried on the balance sheet under the heading of assets. The sum of $2,899,395 has accordingly been appropriated to this purpose.

In pursuance of the policy approved by the shareholders at the last annual general meeting, they have undertaken measures for the extension and improvement of the properties, more particularly those of the Dominion Iron and Steel Company, Limited. The most important of these are the construction of two batteries of Koppers by-product coke ovens and extensive development of the iron ore mines in Newfoundland, both of which will strengthen the position of the corporation in respect to the output of iron and steel. The whole cost of these undertakings and of others that have been authorized will not be expended during the current year, but the directors have reserved on this account and for other contingencies the sum of $3,000,000.

The directors were elected as follows: Sir H. Montagu Allan, Geo. Caverhill, Hon. R. Dandurand, Hector McInnes, K.C., M.P.P., Sir Wm. Mackenzie, Wm. McMaster, Brig.-Gen. the Hon. James Mason, Lieut.-Col. the Hon. Frederic Nicholls, Brig.-Gen. Sir H. M. Pellatt, C.V.O., J. H. Plummer, D.C.L., Sir Wm. D. Reed, W. G. Ross, Lieut. J. K. L. Ross, R.N.C.V.R., E. R. Wood, Mark Workman.

ATTRACTIVE BOND OFFERING

An offering of $2,000,000 Greater Winnipeg Water District 5 per cent. five-year gold bonds is being made by a syndicate of Canadian investment houses. The issue is being made at 94.70 and interest, yielding the investor 6¼ per cent. The fact that the United States market is not open to any great extent for Canadian securities at this time, has enabled the offering to be made on this exceptionally attractive basis. These securities have never before been sold at comparatively so low a price. On purchases of $25,000 or over, a further concession of ¼ per cent. will be made and on purchases of $50,000 or over a discount of ½ per cent.

The bonds are a direct obligation of the Greater Winnipeg Water District, a corporation constituted by special act of the Manitoba legislature, with powers to construct and operate a waterworks system to serve Greater Winnipeg. The district comprises the city of Winnipeg and its more important suburbs, with a total area of 91.79 square miles and a combined population of, approximately, 220,000. The bonds are a direct charge on all the taxable land within the district, the assessed valuation being in excess of $226,000,000. The taxes levied by the district rank equally with all taxes raised for other municipal purposes, and are collected at the same time and in the same manner.

The bonds are additionally secured by the hypothecation with the Bank of Montreal of $2,500,000 (£513,699) long-term sinking fund securities of the district, which are a first charge on the entire waterworks system and properties of the district. The proceeds from the sale of these securities must be held to retire this issue at maturity. The total outstanding debenture debt of the district including the present issue is only $7,783,112.

The Westbourne Rural Credit Society has been incorporated with Manitoba charter, head office at Langruth, Man., and capital stock of $20,000.

HOME SAVINGS BANKS

Thousands of boys and girls all over Canada are daily appealing for an opportunity to do war work. Some are on the farm. Others are acting as Boy or Girls Scouts and helping to win the war. Still others are engaged in other forms of service. Many of them are making money. Some boys have enlisted and more than one has succeeded, although under age, in reaching the firing line. Where it is not being so used, the temper of such young Canadians can be employed in direct war service. Every dollar saved is a dollar for the country. When Great Britain was in the middle of its first great thrift campaign, Savings Banks for every home were advocated. With the help of the father and the mother, by the practice of strict household economy, and through the united savings of the family, it was urged that great sums could be secured for investment in government loans. Such sums can be secured in Canada. Family co-operation would raise more money than the Dominion has ever imagined. Such co-operation would result in increased and valuable investment in war savings certificates.

AMES-HOLDEN-McCREADY'S REPORT

The favorable effects of the company's new policies in production and distribution are reflected in the annual statement of Ames-Holden-McCready, Limited, for the year ended April 30th. Expenses have been reduced, net profits increased and the general efficiency of the organization improved. These results are due largely to the work of Mr. N. R. Feltes, vice-president and general manager, and to Mr. D. Lorne McGibbon, president, both of whom take a very active interest in the company's affairs. Mr. Feltes has the knack of picking capable assistants and has consequently surrounded himself with an efficient staff. As Mr. McGibbon pointed out at the recent annual meeting, one of the most important things accomplished by the company last year was the consolidation of numbers one and two factories in the latter plant and the leasing of the Inspector Street property for a term of three years. "This move not only eliminates a substantial item of overhead expense in plant maintenance," he said, "but materially improves the factory facilities and centralizes the production in a manner that will further reduce factory overhead and greatly increase efficiency in the buying and handling of materials, make possible better control and improvement of the product and remove many small weaknesses of a scattered organization. The company is equipped to produce all the shoes required for present domestic business, with a good margin to spare for future growth."

The balance sheet shows a strong financial position, the figures being especially significant when it is remembered that the inventories of materials and manufactured stock at factories and branches have been taken at cost, which is below present market value; that additions to plant and equipment, with the exception of improvements owing to the combination of numbers one and two plants, have been kept at a low figure; that credits and collections during the past year have received most careful attention, a credit department having been established in the general office to supervise and control branch credits; and that all bad accounts have been written off and an ample reserve set up for future losses. The profits for the past year amounted to $720,242, an increase over the previous year of $398,450. From the profits have been deducted $61,245 for interest on bonds, $22,500 for interest on debentures, $118,885 for interest to banks less interest received, $57.758 for bad debts and reserve, $237,549 for depreciation and balance of organization expenses and $25,000 for contingencies, leaving a net profit for the year of $197.303. The balance of $9,038 brought forward from last year, added to the above, makes a total of $206,342 at the credit of profit and loss account.

The total sales for the year were $5,880,840 (an increase of 14.25 per cent. over the previous year), of which $1,094,111 was army business. The domestic business of the company showed an increase of $978,465 or 30,59 per cent. over the previous year. Net current assets show an increase over the previous year of $1,192,182; bank loans show a decrease of $778,500; accounts and bills payable show a decrease of $448,477. This improved condition in the company's finances has been brought about by the sale of $250,000 of first mortgage bonds, $500.000 of debentures and over $440,000 from the year's operations. The report is very satisfactory.

CRITICISM OF DRAYTON-ACWORTH REPORT

Secretary Moore of the Canadian Northern Discusses the Proposed Plan

"Surely to have grown rich and powerful on cash and land subsidies is no more virtuous than to have grown poor paying interest on bonds guaranteed by the government." This is the opinion of Mr. William H. Moore, secretary of the Canadian Northern Railway, in a reference to the views expressed in their report by Commissioners Drayton and Acworth in regard to the Canadian Pacific Railway. "We think," say the commissioners, "that it is in the interest of the country that this company should be rich and prosperous, for such companies can be expected not only to give the best service, but to be best able to provide in time to meet new developments as they arise.

"Here, in a nutshell, you have the regard in which Commissioners Drayton and Acworth hold the Canadian Pacific Railway. Lord Shaughnessy, himself, would have said no more, and could have said it no better. The reader may guess that Sir Henry and Mr. Acworth have treated the Canadian Pacific in a kindly spirit. If he does not, the reader is a bad guesser. I find that they have said no such thing of the Grand Trunk Grand Trunk Pacific or the Canadian Northern. Surely what is sauce for the goose is sauce for the ganders. Surely to have grown rich and powerful on cash and land subsidies is no more virtuous than to have grown poor paying interest on bonds guaranteed by the government."

Weakness of Government Ownership.

In a little volume of 70 pages, "The Irresponsible Five: a New Family Compact," published by McClelland, Goodchild and Stewart, Toronto, Mr. Moore records some criticisms of the Drayton-Acworth report which are worthy of consideration. The strength of his arguments are somewhat marred by his criticism of the Canadian Pacific Railway, but aside from that, he finds several weaknesses in the proposed government ownership plan and some inaccuracies in the statistics and assertions contained in the railway inquiry report.

"It is sad to find the Drayton-Acworth report begins in error. But think not that there is only one error in its first pages. There are, in fact, more than a few. On the second page a comparison is made between the population per mile in Canada and the population per mile in the United States, the United Kingdom, Russia, Australia and Argentina. Then the commissioners say: 'And Canada has what none of these other countries have to a comparable degree, a magnificent internal system of natural waterways, which must always, so far as can now be foreseen, carry a very large proportion of the total traffic.'

"If this statement is intended to be anything more than the trite remark that Canada's navigation is mainly on fresh water; if it is intended to have a bearing on the traffic situation, it means that water competition bears more hardly upon the railways of Canada than upon the railways of the other countries mentioned.

One for Commissioner Acworth.

"Has Commissioner Acworth been so long away from England that he has forgotten when he left it was an island, with practically every one of its important cities connected by water transportation? Water transportation may not be particularly safe along the coasts of England just now, but surely the commissioners did not have this in mind when they attempted their comparison.

"The waterways of England, Australia and Argentina are open the year round. Have the commissioners forgotten that he who is solely dependent upon Canada's waterways must close his business for four winter months and sit idly by until spring freshets wash the ice away?"

Very sarcastic is Mr. Moore's reference to the commissioners' conclusion regarding the Grand Trunk. They say: "The Grand Trunk Company's board of directors is 3,000 miles away. We cannot think that the state of affairs which our investigation has disclosed could have arisen had the board been on the spot." Whereupon Mr. Moore says: "Too much reliance upon the efficacy of absent treatment is the commissioners' conclusion. This is the main cause of the Grand Trunk break-down. A man cannot decide things properly without being on the spot: that's the idea. It sounds reasonable, but I would have hardly expected Mr. Acworth to have signed his name to it, for he, too, lives three thousand miles away, has spent only a few months in this country, and in those few months has not been west of the Great Lakes in Canada. One would have thought this desirable—nay, necessary—for a man reporting on the Grand Trunk Pacific, for it lies wholly west of the Great Lakes. I wonder if the inaccuracies which an analysis of the commissioners' report discloses could have arisen if Mr. Acworth had made even a half investigation of his subject on the 'spot.' However, few men practise what they preach, and it may be that Mr. Acworth feels himself more gifted in the science of absent treatment than the Grand Trunk directors. The Canadian Northern has been dealt with less severely in comment than the Grand Trunk, and less favorably in conclusion."

Matter for the United States.

That the three great Canadian railways amongst them either own, lease or control no less than 7,000 miles of railway situated in the United States, is considered by Mr. Moore a strong and fatal objection to the Drayton-Acworth plan. "In other words," says Mr. Moore, "the Dominion Railway Company is to be an alias for government operation. It is to stalk incognito for over two thousand miles through the United States—if a railway can stalk.

"For the success of the scheme, it is essential that secrecy shall be preserved; for one can well imagine what Uncle Sam would say if he knew the real nature of the Dominion Railway Company; if he knew that the Canadian government owned and operated a huge railway mileage within his boundaries! And you can't blame him much. But the fat is already in the fire! While the commissioners are saying that one of the reasons that 'government ownership and operation be not entertained' is to avoid international complications, the newspapers are announcing, in voices so loud they must have carried across the border, that the scheme put forward by the Drayton-Acworth report is in reality government ownership and operation.

As to Nepotism.

"What would Canada say if the United States were to attempt to own and operate a railway stretching from the boundary line near Quebec to Winnipeg? Would we take to the idea more kindly because Theodore Roosevelt, William Howard Taft, Champ Clark, William Jennings Bryan and Jess Willard held the stock in their own names and administered the property as trustees for the United States government?"

In his chapter on nepotism Mr. Moore says:

"It is impossible to devise legislation that will prevent nepotism under irresponsible government. Surely we learned that lesson long, long ago Against nepotism there is only one safeguard—public opinion exercisable through responsible government. To destroy nepotism was one of the reasons for the introduction of responsible government. We may damn and double-damn patronage, the child of party government; but, after all, it is infinitely to be preferred to nepotism, the legitimate offspring of irresponsible government."

CASUALTY INSURANCE PLAN FOR SOLDIERS

The United States government proposes to abolish the system of pensions for wounded soldiers and for the surviving kin of soldiers killed in battle and to substitute therefore a casualty insurance plan, according to dispatches from Washington. A committee of officers of some of the largest life insurance companies in the country will begin a series of conferences with secretary of the treasury McAdoo this week on the formulation of the proposed legislation. The tentative proposals are: A minimum compensation of $1,500 for the death of an enlisted man. A maximum compensation of $1,500 for total disability. A maximum compensation of $5,000 for the death or total disability of an officer. It is proposed to pay this compensation not in a lump sum, but in a series of instalments extending over a period of years.

Two plans are under consideration. One provides that the government shall insure its soldiers against death and injury with the insurance companies which accept the business at the high rates which would be charged for war risks. The other provides that the government shall undertake the whole obligation, Congress appropriating sufficient funds to cover the death and injury benefits. If the latter plan should be adopted it would be a system not of insurance but of limited pensions.

Investment vs. Speculation

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

Ames-Holden-McCready
Limited

President's Report and Balance Sheet As at April 30th, 1917.

To the Shareholders,

Ames-Holden-McCready, Limited.

Your Directors have pleasure in presenting herewith the annual statement of the Company for the year ending April 30th, 1917.

The profits for the period under review, as you will see from the Profit and Loss Account submitted, amount to $720,242.60, an increase over the previous year of $398,450.76. From the profits have been deducted $61,245 for interest on Bonds, $22,500 for interest on Debentures, $118,885.23 for interest to Banks less interest received, $57,758.88 for Bad Debts and Reserve, $237,549.75 for Depreciation and balance of Organization Expenses, and $25,000 for Contingencies, leaving a net profit for the year of $197,303.74. The balance of $9,038.94 brought forward from last year, added to the above, makes a total of $206,342.68 at the credit of Profit and Loss Account.

The total sales for the year were $5,880,840.04 (an increase of 14.25 per cent. over the previous year), of which $1,094,111.80 was army business. The domestic business of the Company showed an increase of $978,465.91 or 30.59 per cent. over the previous year.

Net Current Assets show an increase over the previous year of $1,192,182.39; Bank Loans show a decrease of $778,500; Accounts and Bills Payable show a decrease of $448,477.72. This improved condition in the Company's finances has been brought about by the sale of $250,000 of First Mortgage Bonds, $500,000 of Debentures, and over $440,000 from the year's operations.

During the year considerable progress has been made in carrying out new policies in production and distribution, designed to increase the efficiency of the organization, reduce expenses and increase not profits. One of the most important things accomplished was the consolidation of Numbers One and Two factories in the latter plant and the leasing of the Inspector Street property for a term of three years. This move not only eliminates a substantial item of overhead expense in plant maintenance, but materially improves the factory facilities and centralizes the production in a manner that will further reduce factory overhead and greatly increase efficiency in the buying and handling of materials, make possible better control and improvement of the product and remove many small weaknesses of a scattered organization. The Company is equipped to produce all the shoes required for present domestic business, with a good margin to spare for future growth.

The inventories of materials and manufactured stock at factories and branches have been taken at cost, which is below present market value. All stocks have been carefully examined and reported to be in excellent condition.

Additions to plant and equipment, with the exception of improvements owing to the combination of Numbers One and Two plants, have been kept at a low figure, and this policy of conserving current assets will be continued.

Credits and collections during the past year have received most careful attention. A credit department has been established in the general office to supervise and control branch credits. The improvement in this respect owing to this supervision has been most apparent. All bad accounts have been written off and an ample reserve set up for future losses.

During the coming year the Company expects to reduce materially stocks of raw materials and manufactured stock which will, in turn, reduce Bank Loans. The high cost of leather and other raw materials and the difficulty of getting materials when wanted have necessitated the carrying of a larger stock than usual, and your officers feel that the present costs of materials in the inventories are sufficiently below current market prices to safely guard the Company, except in case of an exceedingly serious setback to general business.

Your Directors feel that the organization of the Company is to-day so constituted that the Company can operate at a minimum expense, and the prospects for the coming year indicate the maintenance of at least the volume of the year just closed.

Your Directors wish, before closing their report, to record their appreciation of the services of Mr. N. R. Feltes, Vice-President and General Manager, who has so ably perfected the organization of the Company and surrounded himself with a staff of efficient, capable and energetic assistants.

Respectfully submitted,

D. LORNE McGIBBON,
President.

WILL TEST THE MONEY MARKET

July Will Provide Most Interesting Trial During the War Period—Will Market Revive?

That July will provide the most interesting money market test that has been witnessed in the United States during the European war period, is the advice received by *The Monetary Times* from the National and City Bank, Chicago. This is, because the total obligations financed during the last three weeks have been unprecedented for this period of the year. They include the $300,000,000 payment for semi-annual interest and dividend account, the $400,000,000 Liberty loan payments, covering the first and second instalments, the $100,000,000 raised for Red Cross work, the large payments to the government for income tax obligations and the paying off of various corporation and other note issues which mature about this time.

Readjustment of Balances.

Besides these payments, there is also the readjustment of the reserve balances by the country's national banks to consider as a consequence of the new requirements of the amended Federal Reserve act, just provided by Congress. The country's bank position, however, is exceptionally strong and with the aid of the rediscount facilities of the Federal Reserve banks—to which recourse is being made to a greater extent than ever before—the semi-annual settlement will be adjusted with little, if any, difficulty. Taking $1,000,000,000 as the probable sum of these unprecedented payments, one has only to recall the disordered June 30th money markets of other years to appreciate the changes that have taken place, since the introduction of the centralized banking system made possible the mobilization of the country's gold reserve. Were the banks forced to provide for these record July payments under the old system of unrelated reserves at a time when the United States was engaged in a great war, the resultant disturbance might have had far-reaching consequences.

Factor of Patriotism.

Under no other factor than patriotism could $3,035,226,850 be placed at par with 4,000,000 subscribers on a 3½ per cent. basis is the opinion of Messrs. Spencer, Trask and Company, New York, discussing the Liberty loan result and the money market situation. "A yield of 3½ per cent., even allowing for certain tax exempt features, should in no sense be considered as indicative of easy money, or be used as a yard-stick for present investment conditions," says this firm. "Unless some great change occurs in the meantime, the next government loan will have to bear a higher rate of interest. The great and incessant demands which have been made on American investment funds during these two and more years, have by now made a definite impression, and it is consequently a cause for no surprise that rates for call and time money are distinctly firm. Call money, which is one of the best indices of monetary conditions in the country, has tripled since early this year, and time money has advanced by more than half. These advances are not due to the direct effects of the Liberty loan to any such degree as is generally thought, for, aside from the fact that the government is returning a large share of the subscriptions to the banks, it must be remembered that almost a billion dollars had already been taken by financial institutions since our entry into the war in the shape of short-term treasury bills, which will now be paid back out of the loan. It is inevitable that in the process of redistributing these funds there should be a certain disturbance in the money market, but we are very much inclined to believe that the heavy drain on investment funds to which we have already referred, the heavy income tax payments during May and June, and the speculation that has been taking place in commodities at ruling high prices, are more directly responsible for the firm tone in the money market. In addition, July 1st is one of the heaviest dividend months of the year."

Will Market Revive?

A reviving and broadening bond market is predicted by E. H. Rollins and Sons, a Boston investment house. Although all the bond houses are not in agreement on that point, this Boston house contends that there is every reason, as there was in the fall of 1914, to buy bonds at an attractive level of prices before the investment requirements of the United States large national earning capacity force high-grade securities to a higher level

"Many attractive investment opportunities have been accumulating during this period when investment banking has been suspended. Municipal bonds are available on a higher income yield than has prevailed for a long time. The fact that municipals are exempt from federal income tax in the United States will not be overlooked by investors subject to heavy surtax and this buying impetus should soon reflect itself in prices. Public service companies have repeatedly demonstrated the remarkable stability of their earning power, and public service bonds should continue to enhance in popular favor. Many seasoned issues which have not been on the market for a long time are temporarily available at attractive prices."

BRITISH COLUMBIA'S SHIPBUILDING DEVELOPMENT

"The shipbuilding industry is rapidly developing on this coast," said Mr. White, assistant chairman of the Canadian Commission of Conservation, speaking at Victoria recently. "Following the preliminary operations at the Wallace Shipyards, North Vancouver, and the yards of the Cameron Genoa Mills Shipbuilding Company, Victoria, the Foundation Company is preparing for the construction of five vessels at Victoria, the Peter Lyall Company, of Montreal, has taken over the No. 2 yards of the Wallace Shipyards and has several contracts on hand; and negotiations are proceeding for the taking over of the shipbuilding yards of the Grand Trunk Pacific Railway at Prince Rupert by the Union Iron Works, of San Francisco, of the big marine firms on the American Pacific Coast. At present about 40 boats will be built. This industrial activity is important to the welfare of the province.

"Shipbuilding has a direct and favorable bearing on trade and is a favorable factor in provincial development. Only recently British Columbia mills were unable to ship lumber overseas for the lack of bottoms. Construction of ships was started and to date seven have been completed. Most of these are already on the high seas with 1,500,000 feet of lumber each, while the others are either taking on cargo or preparing to do so. Just that much more lumber can be manufactured and shipped, for the business is available if there are transportation facilities."

CANADIAN NORTHERN RAILWAY NOTES OFFERED

An offering of $2,700,000 Canadian Northern Railway one-year 6 per cent. secured gold notes is being made by William A. Read and Company, New York, at 99¼, to yield over 6¾ per cent. These notes are the direct obligation of the Canadian Northern Railway Company, specifically secured by pledge with the trustee in New York, of $4,557,629, par value of Canadian Northern Railway System underlying first mortgage securities unconditionally guaranteed as to both principal and interest by the Dominion of Canada, the province of Saskatchewan or the province of British Columbia. The collateral pledged with the trustee is as follows: $1,784,996 Canadian Northern Alberta Railway Company, 3½ per cent 50-year debenture stock, due April 1, 1962, principal and interest guaranteed by the Dominion of Canada; $770,000 Canadian Northern Ontario Railway Company 3½ per cent. 50-year debenture stock, due May 19, 1961, principal and interest guaranteed by the Dominion of Canada; $987,933 Canadian Northern Railway Company 4 per cent. debenture stock, due January 23, 1939, principal and interest guaranteed by the province of Saskatchewan; $1,014,700 Canadian Northern Pacific Railway Company 4½ per cent. debenture stock, due April 2, 1950, principal and interest guaranteed by the province of British Columbia; total par value, $4,557,629. The securities pledged as collateral for these notes have liens prior to the following outstanding issues aggregating $146,789,000: $61,789,000 4 per cent. perpetual consolidated debenture stock; $25,000,000 5 per cent. income bonds; $45,000,000 4 per cent. general mortgage bonds, guaranteed by the Dominion of Canada; $15,000,000 cash advanced by Dominion of Canada, secured by mortgage for that amount.

The Dominion owns $40,000,000 of the outstanding $100,000,000 Canadian Northern Railway capital stock and has guaranteed bonds of the system to the extent of about $105,000,000. In addition various provinces of Canada have guaranteed over $107,000,000 of the railway bonds.

The circular, issued in the United States, describing this offering, adds: "The Dominion government investment and interest in the Canadian Northern system is thus so paramount that its continuance may be regarded as assured."

New Bond List

For those who are considering the investment of their July dividends, maturing principal or other funds, our new Bond List, now ready for distribution, contains particulars of a number of high-grade Canadian Government and Municipal Bonds from which to make a selection, yielding from

LIFE INSURANCE IS NATION'S SAFEGUARD

Gives Material Aid to Country's Prosperity—Two Beneficiaries to Every Policy

That there are always two beneficiaries to every policy of a legal reserve life insurance company, the person named and the country where the company is located, was one of the statements made by Mr. Alfred Hurrell, associate general solicitor of the Prudential Insurance Company of America, at the fourth annual congress of the New England Life Underwriters' Associations, at the Hartford Club, Hartford, Conn.

"Tested by constructive results," said Mr. Hurrell, "life insurance, as a business, presents an inspiring record of accomplishments which have strengthened and matured this nation. The stress and strain of war is now on. The resources of this country are to be put to proof. From the first it has been conceded that the entry of the United States would decide the fate of the war in favor of it and its allies, because of the volume of its developed wealth.

A Mighty Financial Current.

"The institutions then, which for the past years have conserved this wealth, have served America best. Life insurance is entitled to first rank among such institutions as its functions are two-fold in such conservation. By reason of its contract with the policyholder, it protects his family from financial loss which otherwise would result from his death, thus permitting one generation to effectively finance the next, and in doing this, it induces and co-ordinates the savings of millions of citizens of average or less than average means. These small contributions made in the way of premium payments have become a mighty financial current, which has flowed for years with increasing volume, resulting in permanent improvements to our counties and municipalities, development of our agriculture, the growth of our industrial centres and the expansion of the vast transportation systems of the country.

"There are always two beneficiaries to every policy of a legal reserve life insurance company," he continued. "The person named in the policy is one, the other is the country where the company is located. When the policy matures, the individual, in whose behalf it was taken out, receives the contemplated benefit, but from the time the first premium is paid, the good to the community is apparent. The company must begin to invest the policyholder's money as soon as it is received, so that it will increase at the assumed rate or better. Interest must be earned. When interest is being earned, constructive work is going on. When constructive work is going on, wealth is being created, development is taking place and the nation benefits by the added stability which follows this progressive conservation of the people's earnings.

Our Brother's Keeper.

"The militant spreading of the life insurance gospel for generations has helped to implant the homely virtues among the men who will compose that army. It is not an accident that we are in this war to help others and not for selfish interests. The declared purpose of the nation in this conflict is but the expression of the attained morality of the mass of the people. The obligation of being our brother's keeper first expressed in the Spanish-American war has again received official national recognition. The people agree with this policy. They have risen to it. Now this altruistic ideal is one of the primal forces which has crowned life insurance with its success. It is with gratitude, therefore, we recognize, that the steady expansion of our business has had its definite part in preparing the people of this country for their determined entry into a war which is to make the 'world safe for democracy.' And besides this, our practical sense must lead us to find comfort in the knowledge that along with this development of national character, for which it is partly responsible, life insurance has helped the nation in its material progress, so that there now exists ample means to sustain the armies which will go forth.

"George Washington," said Mr. Hurrell in conclusion, "in the trying days of the first great struggle for liberty in which America engaged, told his patriot soldiers to 'trust in God and keep your powder dry.' Applying the thought to the work of the life insurance men for the past five decades, we may say, perhaps, without undue satisfaction, that while they have been assisting our citizens to adopt higher ideals, on the practical side they have been keeping the powder of the nation dry. This is why life insurance can claim for itself a fair share of patriotic achievement."

NICKEL PLANT IN NEW ONTARIO

With the direct purpose of preventing nickel reaching Germany, the British government has formed the British-America Nickel Corporation, a $20,000,000 concern, and will produce nickel in Canada. It has been decided to erect a seven million dollar plant to start. The plant and smelter will be located near Sudbury, says Mr. E. P. Mathewson, general manager.

Diamond drilling has revealed that instead of 13,000,000 they had 18,000,000 tons of ore. Mr. Mathewson is now considering the erection of a much larger plant.

TEN MILLION DOLLAR PAPER COMPANY

Speaking before the Victoria and Vancouver Canadian Clubs, Mr. James White, assistant chairman of the Canadian Commission of Conservation, spoke of the relation of the pulp woods of British Columbia to the future of the pulp and paper industry. He referred to the exhaustion of the Eastern forests and how this province ultimately would have to furnish the bulk of the pulp supply. He placed the available supply at 250,000,000 cords, stating if proper regulations were enforced, this province could easily supply six million cords annually for an indefinite period.

"An important incorporation," said Mr. White, "is the Whalen Pulp and Paper Mills, Limited, with a capital of $10,000,000 to take over and centralize established interests. These include the British Columbia Sulphite Fibre Company, which has been successfully operating a large chemical pulp mill at Mill Bay, head of Howe Sound, about 25 miles from Vancouver, the Empire Pulp and Paper Mills, Limited, which recently took over the pulp plant at Swanson Bay and the Colonial Lumber and Paper Mills, which is establishing a pulp and paper plant at Quatsino, west coast of Vancouver Island.

"The big pulp and paper plant at Ocean Falls," he concluded, "has started its first unit, with an output of 75 tons of newsprint per day. It is expected that other units will be completed this year which will bring the output to about 200 tons per day."

FUTURE CANADIAN WAR LOANS

If the United States decides that all of its lending power should be given to the European Allies on the ground that Canada's position as a seller of supplies to the Allies is similar to its own, Canada will be deprived of its usual source of borrowings and added necessity for a rigorous conservation of our investing power will be faced. This will necessitate more drastic steps for the checking of unnecessary consumption and expenditure and a more energetic effort to promote individual saving and investment in order that future war loans will be subscribed, says the monthly market letter of Greenshields and Company, Montreal.

The first two war loans were readily subscribed, first because the security and interest rate were excellent, and second, because the available funds awaiting investment were large. The war loans did not have to be sold; they were bought. No extensive propaganda for the arousing of individual small investors throughout the country was undertaken by the government as none was deemed necessary. As a result, the third war loan, although over-subscribed, is now selling at a discount because it was not properly distributed. Too much of it was taken in large blocks for resale, not enough was placed in small amounts with the ultimate consumer to be held to maturity.

It is evident that future loans, to be properly distributed, will require a far greater effort and a campaign of advertising and salesmanship such as England long ago and the United States last month found necessary. The actual work of distribution cannot be left to the security houses, backed by a mere announcement on the part of the government.

UNLICENSED INSURANCE IS UNFAIR

Premiums Paid Unlicensed Companies Here Do Not Pay Taxes Anywhere, Says T. L. Morrisey

Editor, *The Monetary Times.*

Sir,—I had hoped during this time of national stress, all classes in the community would recognize the littleness of all internal differences, sink their petty squabbling and bickerings, and see the necessity of presenting a united front to the common enemy which threatens the very existence of our country. Unfortunately, however, this is not to be, since we find one class—and that one, singularly enough, the one which arrogates to itself pre-eminence in the possession of the virtues of loyalty and patriotism, the Canadian Manufacturers' Association—flinging down the gauntlet in a most brazen fashion.

Your last issue contains the report of the insurance committee of that body, and also a statement of the case by the managers of their insurance department, Willis, Faber & Company. The similarity between the two is so marked that one can see the fine Italian hand of the manager running through the report. I think, therefore, and I would fain believe, that the great majority of the members of the Manufacturers' Association may be absolved from the charge of associating themselves with the enunciation of principles so utterly at variance with what they stand for in their own business; so manifestly unfair and unreasonable, if not reprehensible.

Must Conform to Laws.

It is claimed that the manufacturers are inconsistent in demanding "protection" in their own business and "free trade" in insurance. Their answer is: "Why accord protection to insurance and deny it to banking?" Why compare two things that are unlike? I have endeavored, and I must confess my inability, to trace any analogy. The essential difference lies in the fact that the government of this country, and in the interest of the people of this country, says that before an insurance company may do business in Canada it must conform to the laws of Canada. There is no law to prevent a citizen of Canada borrowing money outside the country, nor is such law necessary. They clinch the argument by asking: "Would it be proper to suggest that a joint stock company, that sells a bond issue in New York, should be taxed thereon?" No one, that I have ever heard, has suggested that a manufacturer should be taxed when he sells the product of his factory in New York, thereby—"engaged in the patriotic work of bringing in outside capital to help build up the country."

Their insurance manager betrays a woeful ignorance of his business if he believes what he states in regard to deposits. The licensed company has to maintain deposits at Ottawa; the unlicensed company has similar deposits *somewhere?* A funny argument if based on fact; but it is not based on fact. When an assured pays $100 premium to a licensed company that company has to keep on deposit at Ottawa against that premium about $60. When he pays $100 premium to an unlicensed company no part of that premium is placed on deposit at Ottawa *or elsewhere* for the protection of the policyholder.

Do Not Pay Taxes Anywhere.

It is grudgingly admitted the licensed companies make out a plausible case when they cite taxes. Thanks for small favors. But the unlicensed companies have to pay taxes to their own governments! Dangerous ground, Mr. Protected Manufacturer. Dangerous ground! What becomes of your claim to special privilege if that argument were allowed to prevail? There seems to be a lack of co-ordination here between the insurance committee and the fiscal committee. But let me supply a little piece of information. Premiums paid to unlicensed companies in Canada do not pay taxes anywhere. If the sovereign State of New York imposes a tax on insurance premiums it is a tax on premiums collected in the State of New York, and you may rest assured such premiums as referred to would be treated as collected in Canada, not New York, so that they have not even the poor solace of knowing that though denying their own country the benefit they are upholding an ally.

Now we come to another peculiar obsession; the licensed companies possess an advantage over the unlicensed that is well worth the price! If not, why do not they all withdraw and operate as unlicensed? The Canadian Manufacturers do themselves an injustice in making the suggestion. There are two broad classes of companies. First, the companies that will only do business in any country in strict accordance with the laws of that country; second, the companies that are not averse to doing a piratical business. The companies operating in Canada under a license belong to the first class. But if there be anything in the claim that a licensed company has any such advantage, what stands in the way of the pirate adopting decent methods and taking out a license? Surely the converse holds true.

Companies Proved Worthless.

I fear I have already encroached upon your good nature, but before closing I would like to make one or two observations upon the learned dissertations as to form, rates, competition, etc., put forward by the insurance manager. What are these forms he talks of? Possibly putting on a straight insurance for a small proportion of value, then a first excess at a lower rate, second excess at a still lower rate and so on. That is gambling, not underwriting. It is objectionable, too, in that it results in some being able to obtain more favored terms than others. The most striking illustration of a fancy form was that of an obstinate manufacturer who gave up a million of perfectly good insurance to take a blanket form for $100,000. The plant burned and the concern was out over $900,000 because some of companies writing the fancy form proved to be worthless.

The gentleman animadverts very strongly against the high rates charged by the Associated Companies, claiming that the reduction obtained by placing insurance abroad runs to 30 per cent. He knows, if he will only admit it, that the tariff is as the breath of life to his nostrils, and that his rates are made by the necessities of each case, i.e., what cut is necessary to switch the business?

Story of a 30 Per Cent. Cut.

Let us take a concrete example: a cold storage plant in a certain Ontario town had been written all along at what was considered a fair rate to both parties. The advocate of unlicensed competition appears upon the scene and was able to persuade the assured that he was being ground under the iron heel of an "absolute monopoly," and that a 30 per cent. cut would afford the necessary relief. This appealed to the assured—especially the 30 per cent. cut—and he switched the business. It was the irony of fate that a fire should happen almost immediately, and the plant was wiped out with a loss of about $200,000, which prompts me to paraphrase the dictum of this authority: "There is no reason why a rate which is unprofitable to an unlicensed company should be profitable to a licensed company."

Just one other point and I have done: recently representations were made to Ottawa that a war tax of 75 per cent. of all profits in excess of 20 per cent. would paralyze the industries of the country, and it was suggested as an alternative that the tax be 25 per cent. of profits in excess of 20 per cent up to 50 per cent.; 50 per cent. of profit in excess of 50 per cent. up to 75 per cent., and 75 per cent. of all profits over 75 per cent. Now presumably these profits are being made, otherwise the putting forward of these representations would be simply an attempt to fool the government.

Think of it, ye fathers of families—professional men, shopkeepers, clerks, laborers—all struggling with the problem of how to make both ends meet. Let it sink deep into your minds—profits 75 per cent. and over! What bearing has this on high cost of living "Those whom the gods would destroy they first make mad."

Yours, etc.,
T. L. Morrisey.

Montreal, July 9th.

TRUSTS AND GUARANTEE BUILDING

The Trusts and Guarantee Company, Toronto, has moved into its new building at 120 Bay Street. The building is now seven stories and basement in height, and is a notable addition to Toronto's business section. When the other five stories are completed it will be one of the finest office buildings in Canada. This building has accommodation for the company's officers and staff on the four lower floors. The main banking room is planned in the new open style, furnishing the maximum amount of light and working space. The building is supported by special trusses, which leaves the main floor free of columns. The Wm. F. Sparling Company are the architects.

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

COMMERCIAL UNION ASSURANCE COMPANY

Established in London, England, in 1861, the Commercial Union Assurance Company, Limited, commenced to write fire insurance in Canada on September 11th, 1863. It is therefore one of the few strong British underwriting corporations which opened offices here prior to Confederation. While the company does fire, marine, life and accident business elsewhere, it writes only fire insurance in Canada. An idea of the extent of its business here and of the confidence which insurers place in the company's straightforward methods, is gathered from the fact that at the end of 1916, the Commercial Union had a net amount at risk of $128,953,000, the gross amount of policies new and renewed being $141,666,000. Last year, the company paid losses in Canada of $639,752. It received net cash of $1,013,000 for premiums; $379,831 represented reinsurance and return premiums. The Commercial Union has substantial assets in Canada, amounting at the end of the year to $1,376,530. The principal item is $793,674 made up of bonds and debentures. Real estate accounts for $325,000 of the assets and loans on real estate for $20,000. The company carries a substantial amount of cash on hand and in banks—namely, $69,212. The Canadian office is in charge of Mr. J. McGregor, chief agent in Canada, with headquarters at Montreal. Under his careful direction and management, and that of Mr. W. S. Jopling, assistant manager, the success of the Commercial Union in Canada is largely due. The company has a good organization in all parts of the country. Mr. George R. Hargraft is the general agent in Toronto; Mr. John Holroyd is branch manager Winnipeg; and Mr. Andrew W. Ross is branch manager at Vancouver. The company has its own Canadian head office building at Montreal—one of the landmarks of that city.

The Commercial Union is one of the substantial British underwriting corporations which does business on the five continents. According to the report submitted to the shareholders at the 55th annual meeting held in London recently, the net premiums of the fire department for 1916 amounted to about $20,129,000, being an increase of $1,350,000 as compared with 1915 and the claims paid and outstanding to $10,405,000, or 51.7 per cent. of the premium income. From the profits of this department $1,000,000 has been carried to profit and loss, leaving the fire insurance fund at $21,155,000 The balance sheet shows the company in an exceptionally strong financial position.

ELECTRIC RAILWAY WOULD SELL

The British Columbia Electric Railway have offered to sell their holdings, Mayor McBeath, of Vancouver, said recently. It is said that the company would be willing to accept in payment provincial bonds, bearing interest at a reasonable rate, the provincial government to take over the interurban lines and operate them and the different cities, such as Victoria, Vancouver and New Westminster, to take over the lines within their borders and running out to the suburbs beyond the city limits. The government would take over the light and power plants, supplying power at a fixed rate to the different cities.

Professor Adam Shortt, who will go into the transportation problem as a commission of one, appointed by the provincial government, is expected to reach Victoria this week.

The number of directors of the Alabama Traction, Light and Power Company has been increased from five to twelve.

FOURTH CANADIAN WAR LOAN

It May Be Issued in September—Conversion Privilege Extended—Savings and Income Tax

The fourth Canadian war loan will probably be issued early in September, perhaps before the second offering ($3,000,000,000) of the Liberty loan in the United States. It seems certain that Canada will itself be required to subscribe its next war loan, with the help, say, of $25,000,000 United States subscriptions. A canvass of the situation indicates good prospects for the loan, if the government, the banks, the bond houses, the press and the people, particularly, will co-operate to oversubscribe another loan. There is a strong opinion, however, that steps should be taken this time to attract new subscribers, to cover new ground. The task of the finance department is admittedly a heavy one, and it will require their best efforts and the most substantial assistance of various interests to make the next loan a success.

Conversion of Previous Loans.

The way for the loan is being prepared. This week, it was announced, in connection with the improved position of Dominion war loan securities upon the market, it is probable that holders of the last two issues of Dominion war loan securities—namely, those maturing in 1931 and 1937, will be allowed to convert their holdings at the original issue price and accrued interest into any issue which may in the future be made with a maturity of 20 years or more. It is the desire of the finance minister that those who have been patriotic enough to subscribe to these issues, which had no right of conversion, shall be placed in as good a position as others who may subscribe to war loan issues in the future.

Savings and Income Tax.

The finance minister announced this week that saving is still to be encouraged and that any proposed income tax is not likely to touch the small investor. His statement is as follows:—

"It has been officially drawn to the attention of the government that the use of the expression 'conscription of wealth' in the debates in parliament and by public and other bodies outside of parliament, and by the press in its news reports, has caused a certain uneasiness among those whose savings constitute a vital factor in the business and industrial life of the Dominion, and are so essential to the credit and prosperity upon which our efforts in the continued prosecution of the war must largely depend. I desire to say on behalf of the government that there need exist no apprehension on the part of the public that any action of a detrimental character will at any time be taken with respect to the savings of the Canadian public. On the contrary, it will be the policy of the government in the future, as in the past, to encourage in every way possible the exercise of the thrift and economy resulting in national savings which have enabled Canada to maintain her credit and improve her economic position during the war.

Income Tax not Precluded.

"Any taxation to which it may be necessary for the government to resort from time to time will be in accordance with legitimate and established forms of taxation sanctioned by the traditions and experience of British self-governing communities. This statement, therefore, must not be understood as precluding legislation providing for income taxation upon those whose incomes are such as to make it just and equitable that they should contribute a share of the war expenditure of the Dominion."

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental railways during July:—

	1916.	1917.	Increase.
Canadian Pacific Railway.			
July 7	$2,616,000	$3,101,000	+ $485,000
Grand Trunk Railway.			
July 7	$1,145,029	$1,207,003	+ $141,974
Canadian Northern Railway.			
July 7	$ 885,100	$ 902,300	+ $ 17,200

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over **$5,000.00, and** he has built up a future income of over **$3,000.00 a year on** business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

WANTED.—By a strong Canadian Loan Company, an energetic and experienced salesman to take charge of an important territory in the sale of the Company's short-term debentures. A good salary and expenses for the right man. Apply, stating age, experience, etc., to Box 75, *Monetary Times*, Toronto.

CHARTERED ACCOUNTANT desires engagement—Professional, Commercial or Financial. Discharged from Military Service. Address Box 77, *Monetary Times* Office, 62 Church Street, Toronto.

WANTED BY YOUNG MAN, experienced fire insurance inspector, controlling considerable volume of premium, general agency of good fire company, or position of inspector. Box 83, *The Monetary Times*, Toronto.

MR. MANUFACTURER.—Are you represented in the States? Have you a meritorious product for the New York market, and are you equipped to handle American business? If so a responsible and live New York firm would market your product on a nation-wide basis. Interview by mail only. Caravel, c/o Queen's Hotel, Toronto.

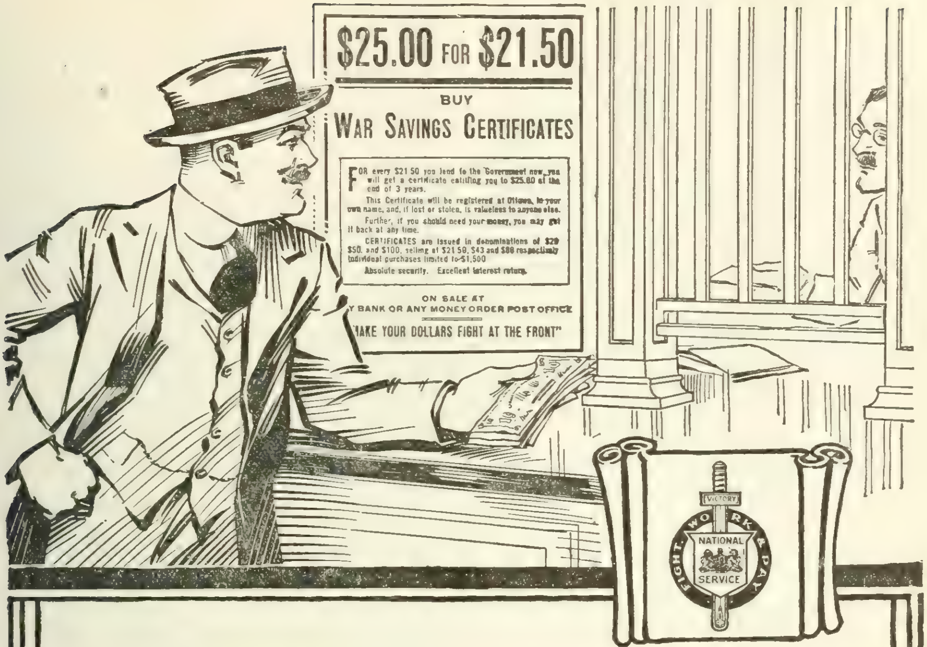
BOY WANTS POSITION for the summer with bond or financial house. Fifteen years old, high school graduate. Good references. Has passed University entrance exams. Box 81, *The Monetary Times*, Toronto.

WANTED.—Experienced manager for Western Fire Insurance Agency. Must be capable of holding and extending an established business. Married man preferred. In first letter give experience, references, when available and salary desired. Correspondence confidential. Apply in first instance to "Western," Box 73, *Monetary Times*, Toronto.

ADVERTISER, having first-class record in the making and inspection of mortgage investments and collections for a large western financial corporation, desires to find position as manager of Investment Department of a Loan, Trust or Insurance Company. Twelve years' active experience of the work in town and country. Absolute integrity. Highest references. Write Box No. 87, *Monetary Times*, Toronto.

WANTED.—Fire Insurance Inspector, principally for Ontario Province, for a tariff Fire Insurance Company Must be experienced and well recommended. All applications strictly confidential. Apply Box 85, *Monetary Times*, Toronto.

EX-MAJOR C.E.F., also served S.A. war, wishes appointment. Late position not vacant owing to war conditions Good business and office experience. Trained engineer; age 33; married. Would take position in any business offering good prospects to energetic and capable worker. Box 89, *Monetary Times*, Toronto.



$25.00 FOR $21.50
BUY

CANADIAN SECURITIES IN LONDON

The following record of transactions on the London Stock Exchange in Canadian securities during the week ended June [illegible] is compiled by the Canadian Gazette from the Official Lists, and consists of the first and last "markings" and the highest and lowest intervening markings unless there is a repetition. The asterisk implies the last recorded transaction where no business has taken place during the week.

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Barton, Ont.—Tenders will be called shortly for an issue of $30,000 school debentures.

Lambton, Ont.—Tenders are invited up to July 20 for $54,000 5½ per cent. 4-year bonds. H. Ingram, county treasurer, Sarnia, Ont.

Simcoe, Ont.—More than half of the town's $39,477 5½ per cent. 20 and 30-year bonds have been sold to local investors to net 98.

New Toronto, Ont.—The village is inviting tenders for $50,000 30-year 6 per cent. waterworks bonds. (See official advertisement on another page).

Stellarton, N.S.—Tenders were to be received until noon, July 9th, for $3,000 5 per cent. 30-year debentures payable half-yearly. C. W. Dickson, deputy town clerk.

Thorold, Ont.—The issue of $40,400 6 per cent. 30-instalment debentures, was awarded to Wood, Gundy & Company, and the Royal Bank, on joint account, at 99.

St. John, N.B.—Tenders will be received up to July 2 for $20,000 5 per cent. 25-year debentures. A. Gordon Leavitt, secretary, board of school trustees, St. John, N.B.

Shawinigan Falls, Que.—Tenders will be received up to July 16 for the purchase of $25,000 10-year 6 per cent. debentures. A. J. Meunier, secretary-treasurer, Shawinigan Falls.

New Westminster, B.C.—The city council has passed the annual loan by-law 1917 "A," which provides for borrowing $126,000 to meet payment of interest on bond issues. The city this year is paying 5½ per cent. on money borrowed from the bank.

Red Deer, Alta.—Mr. A. T. Stephenson, secretary-treasurer, informs *The Monetary Times* that the $30,000 treasury bills were sold to W. L. Slayton & Company, Toledo, Ohio, for 94. The only other tender received was from Terry Briggs & Company, for 92.

St. Thomas, Ont.—A by-law authorizing the issue of $39,700 ten-year debentures has been passed by the city council. The amount is made up as follows:—Canadian Patriotic Fund, $36,000; sailors' relief, $2,000; incidentals for recruiting purposes and barracks, $1,700.

Trenton, N.S.—Tenders are called up to noon, July 20, for $35,000 20-year 5 per cent. debentures as follows: $15,000 paving debentures; $10,000 sidewalk debentures; $5,000 fire department debentures; $5,000 water extension debentures. William Fraser, town clerk, Trenton, N.S.

Grand Mere, Que.—Tenders will be received up to July 18th, for the purchase of $30,000 5½ per cent. thirty-year debentures payable half-yearly. According to the by-law authorizing this loan, the capital and interests are payable at La Banque Nationale, at Montreal; but the town council is willing to pass a resolution to make the payments at New York, at the purchaser's request.

Sherbrooke, Que.—The ratepayers have authorized the borrowing of $150,000 for the construction of a transmission line from Weedon to Sherbrooke, and for the erection of a sub-station at Sherbrooke. The ratepayers recently approved of a by-law for the purchase of the Two Miles Falls power plant for $375,000, but an additional by-law was necessary to provide for the transmission line and sub-station. The authorized expenditure to date is therefore $525,000.

Victoria, B.C.—The city will endeavor to sell its bonds to local investors. The first offering will be $53,813 of 5 per cent. ten-year serial bonds issued under by-law 1960, to be priced to yield the purchaser 6 per cent. a year. The sale of these will be confined strictly to residents of Victoria and the municipalities of Oak Bay, Saanich, Esquimalt and adjoining districts. A commission of one-quarter of 1 per cent. will be allowed to Victoria brokers for selling the bonds. Up to July 6 $25,000 had been sold.

Toronto Township, Ont.—Ten bids were received for the issue of $15,000 5½ per cent. twenty-instalment bonds, which were awarded to Macneill and Young for $14,605. The other bids are as follow:—

W. A. Mackenzie & Company	$14,588
Brent, Noxon & Company	14,563
Macdonald, Bullock & Company	14,490
Imperial Bank	14,442
Wood, Gundy & Company	14,402
G. A. Stimson & Company	14,401
Canada Bond	14,364
A. E. Ames & Company	14,161
C. H. Burgess & Company	14,010

Verdun, Que.—The city council has decided to proceed with the underground conduit system, for which there is an authorized loan of $225,000. The bankers who advised that it was not a good time to go ahead with works that were not a matter of absolute necessity were changed, and a bank which the council considered was giving better terms was named as the official bank of the city of Verdun. The change is from the Hochelaga Bank to the Home Bank of Canada. The city was offered a loan of $160,000, in instalments of $40,000, by the Bank of Hochelaga, the bank to hold the $225,000 bond issue as collateral, and loan the money for three months, it being felt that the present was not the time to float the bonds. Not satisfied with this offer, the special committee sought further, and secured an offer from the Home Bank of the same amount for a period of six months and with but $200,000 of the bonds to be turned over as collateral.

Alberta.—Sealed tenders will be received by the debenture branch of the department of education until 4 o'clock, July 19th, on eight blocks of school district debentures amounting to $20,800. Separate tenders are to be made on each block: (1) Viking S.D., $2,500 20-years 6½ per cent.; (2) Canmore S.D., $6,500 10-years 6 per cent.; (3) Hackberry S.D., $600 10-years 7 per cent.; (4) Trinity S.D., $1,200 10-years 7 per cent.; (5) Birdsview S.D., $1,200 10-years 7 per cent.; (6) Halcourt S.D., $900 5-years 7 per cent.; (7) North Hampton S.D., $1,500 10-years 7 per cent., Big Timber S.D., $1,200 10-years 7 per cent. Ingram S.D., $600 10-years 7 per cent., Hainstock S.D., $400 10-years 7 per cent.—$3,700; (8) Percy S.D., $1,200 10-years 7 per cent., Pegan S.D., $1,500 10-years 7 per cent., Grasswold S.D., $1,500 10-years 7 per cent.—$4,200. All information required in connection with the

READY JULY 15th

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—July 5—Automobile garage, property of Victoria Hotel. Interior gutted. Loss about $1,500, covered by insurance.

Belmont, Man.—July 4—Property belonging to R. H. Drummond-Hay, Cannon and Houghton, and Fargries Smith burned to the ground. All buildings partly insured.

Brockville, Ont.—July 8—Pavilion, owned by Canadian Northern Railway at Beverley Lake Park, destroyed.

Brockville, Ont.—July 10—Three buildings burned. Loss, $2,500.

Brussels, Ont.—July 9—Mr. Wm. Armstrong's barn.

Campbellton, N.B.—July 3—L. and A. Malenfant's mill at Arsereau Siding entirely destroyed, including a quantity of lumber and pulpwood. One workman lost his life. Mill valued at $10,000; insured for $3,000; value of lumber $5,000, covered by insurance. A quantity of pulpwood, the property of the Meigs Pulpwood Company, was also destroyed.

Chatham, Ont.—July 5—Stable, property of Mrs. Hackey, destroyed.

Dover Township, Ont.—July 7—One farm, large barn, shed and granary, the property of Miss Angus, completely destroyed. Loss partly covered by insurance. Cause, lightning.

Gilbert Plains, Man.—July 3—Two large stables, with feed and seven valuable horses burned to the ground, property of Mr. Jas. Dewitt. Loss covered by insurance, carried in Farmers' Mutual Fire Insurance Company.

Lethbridge, Alta.—July 7—Barn and sheds at rear of 443 18th Street North, completely destroyed. Owner, S. Trew. Cause, children playing with matches.

Niagara Falls, Ont.—July 1—Alderman W. P. Dixon's ice-house. Loss on building, $3,000; to stock, $3,000. Insurance, $1,000. Cause, lightning.

North Vancouver, B.C.—July 7—Saw-mill, property of North Shore Lumber and Shingle Company, burned to the ground; few piles of lumber in yard saved. Fire started in boiler room. Estimated loss, $10,000. No insurance carried.

Petawawa, Ont.—July 4—Fire at camp, one building and valuable instruments destroyed.

Preston, Ont.—July 5—G. Emerson's electrical store. Damage to stock, chiefly by smoke and water, estimated at $1,000. Mostly covered by insurance.

Retlaw, Alta.—July 7—National Company's elevator, containing 10,000 bushels of grain, various other damage done to coal shed and warehouse.

Seven Persons, Alta.—July 2—Property destroyed: Seven Persons Farmers' Co-operative Association, Bish's hardware, Smith's pool-room, Harris' grocery, Hunt's garage, Pocum's implement warehouse and the post-office. All carried insurance, with the exception of Mr. Harris. Estimated loss, $75,000.

St. Jacques L'Archigan, Que.—July 4—Parish church damaged. Estimated loss, $50,000.

St. Thomas, Ont.—July 5—Mr. W. Vair's barn and Mr. F. M. Griffin's icehouse totally destroyed. Barn damaged to the amount of $400, not entirely covered by insurance. Mr. Griffin's icehouse, containing 500 tons of ice was all insured; insurance on icehouse amounts to $1,200, and the estimated loss is calculated at $700.

Taymouth, N.B.—July 6—Mr. Jas. T. Cowperthwaite's barns totally destroyed. Estimated loss, several thousand dollars. Cause, lightning.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Lanark, Ont.—June 21—The following companies were interested in the Clyde Woolen Mills (Boyd, Caldwell and Company, Limited) fire: Phœnix of London, $25,000; North British and Mercantile, $8,500; Guardian, $5,500; Hartford, $5,000; Western, $4,500; Northern, $2,500. Insurance loss, $51,000. Property loss, $78,880. The property was underinsured to the extent of [illegible]

Montreal, Que. [illegible] interested in the W. Rutherford and Company, lumber merchants', fire: Phœnix of London, $21,000; Hartford, $5,000; [illegible] Loss reported total.

Regina, Sask.—June 11—Regina Storage and Forwarding warehouse, in which the following companies are interested: Stored goods, Northwestern National, $5,000; Fidelity-Phenix, $4,000; General of Perth, $1,300; British Crown, $550; National of Hartford, $1,000; National Union, $1,500; Occidental, $1,000; Scottish Union and National, $1,000; Sun, $2,500; total, $17,850. Loss, total. On building, Dominion, $4,000; Springfield, $2,000; Northwestern National, $2,000; Continental of New York, $2,000; total, $10,000. Loss, total. On refrigerating plant, Scottish Union and National, $1,500; Continental, $1,000; total, $2,500. Loss, total.

Saskatoon, Sask.—Fire Chief Thos. E. Heath makes the following report of June fires to *The Monetary Times*:—

June 5—Dwelling house, occupant P. Muhywayko, owner, Mr. W. Puree, Alston, Sask.; damage to building, $75; to stock, $75.

June 9—Mr. Hughes' dwelling house, owner Mr. La Brasse; damage to building, $25. Cause, gasoline explosion.

June 16—Garage, property of Mr. A. E. Bence; damage to building, $250. Cause, children playing with matches.

June 17—Cafe, owner, Mr. A. Smith, occupant, Yee Ly; damage to building, $50. Insurance carried in Mercantile Insurance Company, total amount, $2,500. Cause, woodwork too close to stove.

June 20—Dry cleaners' cleaning department, occupants, Mr. A. Rose, owner, Standard Trust Company; damage to stock, $171. Total insurance, $3,300, carried in Canadian National and Merchants Mutual. Cause, gasoline explosion.

June 28—Coal and wood yard, property of Mr. Simmons, damage to stock, $85. Cause, children closed switch, causing short circuit motor.

Simcoe, Ont.—The Ontario fire marshal reports the following: The loss upon the plant of the Dominion Canners at Simcoe (Norfolk County), has turned out very much less than the estimate included in the figures for that month. The estimate was $525,000, the actual loss has been adjusted at $220,100. We are therefore correcting the total loss for the month of April by deducting the sum of $304,900, the amount of the over-estimate.

Sorel, Que.—June 19—Canada Steamships' workshops in which the following companies are interested: New York Underwriters, $2,000; Strathcona, $5,500; Phœnix of London, $600; British-America, $2,500; Royal, $14,000; Queen, $1,400; Atlas, $4,000; total, $30,000.

Victoria, B.C.—The following is the June report of Fire Chief T. Davis: Loss, buildings, $8,443; contents, $112,430; total loss [illegible]ance, buildings, $29,850; contents, $52,400; total insurance on buildings and contents, $82,250; property at risk, $249.95

Cameron Company's mill fire loss, buildings, $8,364; contents, $112,430; total loss of buildings and contents, $12[illegible]

JUNE FIRES

Annapolis, N.S.—June 29—Tenement house on George Street, occupied by A. L. Robertson, owner, Rufus Mardwick. Building insured in the Nova Scotia Insurance Company, of Halifax.

Carmangay, Alta. [illegible] containing [illegible] bushels of wheat.

Edmonton, Alta.—June [illegible]—Mrs. Reid's house, 81st Street, Grove Park, totally destroyed. Estimated loss, $2,000.

North Vancouver, B.C.—June 30—Campbell and Barton's saw-mill at Mosquito Creek burned out. Fire started in boiler room. Damage estimated at $6,500.

Oak Lake, Man.—[illegible] F. G. [illegible] barn, containing several valuable implements, ten tons of hay and a quantity of oats and wheat, totally destroyed. Loss, $15,000, partly covered by insurance. Cause, lightning.

Rossland, B.C.—June 23—Central school building completely destroyed. Insurance carried, $7,500.

St. Thomas, Ont.—June 29—Cattanach Brothers' barn building and silo completely destroyed. Loss, $2,000, with partial insurance.

Winnipeg, Man.—June 29—Roof of the power-house in the Canadian Northern Railway yards, Fort Rouge. Damage, $1,000. Cause, lightning striking vista rods.

C. Meredith & Company, Montreal, 92.51 for. $76,000

LEGAL NOTICE

THE THOMAS WARREN KNITTING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 21st day of June, 1917, incorporating Alfred Geoffrey Edwards, Theophilus James Macnamara, Thomas Paterson Geggie, John Smith Masson and William Fostus Alexander Hill, all of the City of Toronto, in the Province of Ontario, accountants, for the following purposes, viz.:—(a) To buy, sell, manufacture and deal in woollen and other fibres and yarns and the products thereof throughout the Dominion of Canada; (b) To acquire the business and good-will of Thomas Warren, manufacturer of knitted goods doing business in the City of Toronto. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Thomas Warren Knitting Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 21st day of June, 1917.

THOMAS MULVEY,

52-2 Under-Secretary of State.

FURTHER FIRE REPORTS

Amherst, N.S.—[illegible] International Engineering Works. Pattern storage room destroyed. Estimated damage, $75,000, partly insured.

Restigouche, N.B.—Arsenault Siding Company's sawmill, owner L. and A. Malenfant. Property destroyed, machines for saw-mill, estimated at $14,000. Damage to stock, $6,000; to buildings, $1,000. Insurance, $9,000, carried in the Queen and North American.

South Lancaster, Ont.—July 11—Saw-mills of the St. Lawrence Lumber and Box Company. Saw-mills suffered little damage, being confined to lumber estimated at $3,000.

NEW INCORPORATIONS

Canada's new companies incorporated this week number 57. The head offices of these companies are located in six provinces. The total capitalization amounts to $6,227,000.

The largest companies are:—

A. S. King Silk Company, Limited	$1,000,000
Western Provinces Mortgage Company, Limited	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	16	$2,585,000
Quebec	5	167,000
Saskatchewan	9	251,500
Alberta	5	370,000
Manitoba	11	1,970,000
British Columbia	11	884,000
	57	$6,227,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Winnipeg, Man.—The Standard Woodworking Company, Limited, $5,000. A. Freedman, H. Hirsh, M. Freedman; Winnipeg Motor Exchange, Limited, $200,000. W. A. Robinson, W. A. Deacon, R. E. Forde; Victoria Talking Machine Company, Limited, $20,000. J. Horn, J. T. Maloney, May C. Smith; Detroit Holding Company, Limited, $60,000. A. E. Wilkes, A. N. Charters, A. K. Dysart; Standard Fur Manufacturing Company, Limited, $20,000. M. Portigal, A. C. Simmons, S. H. Green; Smith and Company, Limited, $5,000. A. Smith, M. Rady, S. Serebrin; Exchange Bond and Securities Company, Limited, $300,000. E. G. Trick, W. S. Boyd, A. V. Darrach; Canadian Commission Company, Limited, $40,000; Western Provinces Mortgage Company, Limited, $1,[illegible]

Toronto, Ont.—The Abell Mercantile Corporation, Limited, $40,000. W. H. Malo, E. F. Abell, G. P. Yeo; Hosmer Stamping and Die Works, Limited, $10,000. W. Seward, T. W. Slattery, G. Hart; Allied Chemicals, Limited, $40,000. B. Walton, A. W. Crouch, C. E. A. Carr; Premier Tailoring Company, Limited, $40,000. P. Levi, A. Delgoff, D. Richardson; Auto Top and Equipment Company, Limited, $40,000. D. Henderson, W. H. McGuire, G. F. Rooney; A. S. King Silk Company, Limited, $1,000,000. D. Henderson, W. H. McGuire, G. F. Rooney; Strand Theatre, Limited, $75,000. J. M. Bullen, H. L. Steele, W. Osborne; Hall Brothers, Limited, $20,000. S. E. Hall, J. M. Hall, T. G. Hall; the W. C. D. Boyd Company Limited, $150,000. T. W. C. Boyd, C. E. H. Clement, T. Stewart.

MANITOBA FARM LOANS SCHEME

Are Lending Companies Being Given a Square Deal by Government?

"Events have shown that the province of Manitoba can borrow money on the markets of the world only at 5¾ per cent.," says Mr. A. L. Crossin, of Oldfield, Kirby & Gardner, Winnipeg, in a letter to the Manitoba Free Press on the provincial government's farm loans scheme. "The remarks of 'Finance' (the writer of several letters on the subject), on the farm loan scheme of the government are interesting and instructive. It is such criticism as this which our public questions so sadly lack," says Mr. Crossin. "There are points of agreement between us. First, that the association will be unable to pay its members a dividend. Secondly, that the enterprise is being bonused by the government, which 'Finance' approves. Will the taxpayers of the province so cheerfully acquiesce? The act distinctly contemplates further like grants. 'Finance' and I must differ on the selling value of the securities of the Farm Loans Association. Never has a guaranteed security sold higher than the direct liability of the province. The latter has behind it all the wealth of the province, including the landed security which only bulks largely in 'Finance's' vision because a specific mortgage exists. Usually a provincial guaranteed security brings from one to two points less than the issues of the province because of the formalities required to realize upon the guarantee.

Low Rates of Interest.

"The discussion of anticipated low rates of interest in the future is rather beside the mark," continued Mr. Crossin. "When conditions warranted, lending companies were able to give the farmers of this province 6 per cent. Fifteen years ago large sums were advanced to our farmers at 6 per cent. and 6½ per cent. The cost of management offers a wide sphere for controversy. Lending companies are not able to reduce the expense below 1 per cent. If the government can show a greater degree of efficiency and economy in the conduct of this enterprise than the shrewd business man in his own affairs, it is the first time in the history of government in Canada at least that such results have been witnessed.

"Then, Mr. Tomlinson has been put up to deal with my criticisms. His statement is chiefly a repetition of the irresponsible chatter of platform orators, and it would be interesting to know to what degree the government will support his bald and astonishing assertions. To declare, as Mr. Tomlinson does, that the average rate of interest being paid by the farmers of this province on their mortgage loans is over 8 per cent., that the cost of management of existing companies is less than ¾ of 1 per cent. per annum, or to compare the expenses of carrying on business in the compact areas of Germany and its thrifty people with this province of vast distances and its standard of living is to discredit all argument in behalf of the plan.

Paying Less Than 5 Per Cent.

"There is a significant disclosure in Mr. Tomlinson's statement that the Farm Loans Association is paying the government less than 5 per cent. for the use of the trust funds which the government is employing in this way to bolster up an unsound scheme. Events having shown that the province of Manitoba can only borrow money on the markets of the world at 5¾ per cent., the government loans its trust funds to the Farm Loans Association at less than 5 per cent. Again, the inquiry is a pertinent one. What have the taxpayers of the province to say to this system of finance?

"No reference," says Mr. Crossin in conclusion, "has been made by either of my critics to the exemption of the government scheme from the burden of taxation borne by the present lending companies. If government displaces present agencies which contribute to Imperial, Dominion and provincial revenues, the loss must be made up by other forms of taxation."

A meeting of the shareholders of the Electric Steel and Engineering Company, Limited, Welland, recently incorporated with a capital of $2,000,000, was held last week in Toronto. Directors were elected as follows: E. Carnegie, Welland; Colonel Leonard, St. Catharines; A. J. Young, of North Bay and Toronto; Alex. Longwell, Toronto; E. Bourne, Cobalt.

Office Organization and Management.—A valuable volume for the business man, dealing with the general running, laying out and organization of an office. Prepared by Carl C. Parsons, Manager of Shaw-Walker Company, New York. Published by La Salle Extension University, Chicago.

Financial Suggestions to Municipalities.—A booklet containing ready references for Municipal Officials, outlining the elements of municipal finance. Issued by A. E. Ames and Company, Transportation Building, Montreal, or Union Bank Building, Toronto. Prepared by J. B. How, manager of Montreal office.

Provincial Legislation and Executive Action in Canada.—A document stating with some fulness the economic as well as the legal and constitutional arguments against the legislation, with special reference to the Niagara question in the Ontario Legislature. Published by McCarthy and McCarthy, Canada Life Building, 46 King Street West, Toronto.

BRITISH COLUMBIA WILL ISSUE $2,000,000 LOAN

The British Columbia government will shortly issue a $2,000,000 loan for agricultural credits under the new farm settlements board. The government has received reports that with the over-subscribing of the Liberty loan in the United States and the hearty reception given to the Canadian war loans, money will be obtainable for this particular flotation, although some weeks ago it was informed that long-term bonds could not be profitably sold at this time as they would cost at least 5.80. With the additional handling charge of 1½ per cent., the money would thus cost the farmers too much.

The Allied Chemicals, Limited, have been incorporated with Ontario charter, head office at Toronto and capital stock of $40,000.

War Created Purchasing Organization for Products

CANADIAN *Factories for the Most Part Were Like Young Robins With Open Mouths into Which Munitions Board Dropped Orders Averaging $1,000,000 a Day—How Can We Prepare for the Time When These Activities Cease?*

WE talk glibly as to the export trade we will get after the war and how it will help to solve our national problems. But we have a great deal to learn as to placing our merchandise in foreign markets in competition with countries which have made a study of export trade and have done it successfully for many years. In his paper on national ideals in industry, in the recent volume, "The New Era in Canada," published by J. M. Dent & Sons, Toronto, Mr. G. Frank Beer says that, paradoxical as it may appear, the crux of production lies in marketing. In a clear analysis of the employment, production and marketing problems, he points the way to action by our manufacturers, bankers and government authorities particularly, in order to mitigate the adverse effects of post-bellum conditions and to meet intelligently the new elements in national and business life which have been quickened by the war. Mr. Beer contends that an efficient selling system is the surest and speediest way to increase production and that a reduction in the cost of selling is a direct road to foreign trade. He continues:—

"Without a too fine weighing of words, it may truthfully be said that under modern conditions marketing ability governs employment. This means something more, and something more immediately important, than that supply is governed by demand. The object of this paper is not to discuss abstract truths. The 'supply' with which we are concerned is the portion produced in our own country, and the 'demand' which interests us is the proportion of world demand which can be diverted to Canadian products. We are considering the case of a country which must export $175,000,000 of products annually in excess of imports to pay interest charges. We are discussing production and marketing for which we and not others are responsible.

"Canadian salesmanship has not in the past kept pace with Canada's power to produce. It is doubtful if even during the period of greatest activity prior to the war we were producing more than three-quarters of our factory capacity. From the census returns of 1911 it would appear that in proportion to output Canada had an industrial plant $200,000,000 in excess of productive requirements. Irregularity of factory employment and idle plant were accepted almost heedlessly as the inevitable concomitants of an industrial system. Nor did employers generally acknowledge any responsibility for the under-employment or unemployment of men and machinery. As a solution of this problem export trade was under-valued, and even those regarded as industrial leaders expressed a doubt as to the necessity for such trade in the case of factory products. The opinion broadly held was that Canadian agriculturists should supply the exports and Canadian manufacturers should confine their attention to the resulting home market. Under present conditions no fallacy could be more harmful or prove ultimately more disastrous.

"Fortunately this view was not universally held; some of our more efficient industrial organizations established a world market. Nevertheless, out of the total export trade of 1913-14, manufactures contributed only $57,000,000, or 13 per cent. For the twelve months ending December 31st, 1916, these exports increased to $440,477,143.

"The causes which led to this phenomenal speeding up of factory production are familiar, but the determining factor has not received sufficiently clear recognition. After making due allowance for the desire to aid in the war, and the effect of high prices, the outstanding explanation is found in the fact that a purchasing organization for Canadian products had been created as a result of the war; that the problem had been narrowed to one of production; that the selling having been all attended to there was no lack of capital to oil the wheels of industry and ensure that goal of industrial experts—capacity production.

"It cannot be too clearly recognized that this has not been the result of Canadian sales efficiency, but was the distinct and obvious consequence of an Imperial purchasing organization. Canadian factories for the most part were like young robins with open mouths into which the Munitions Board dropped orders averaging a million dollars a day. The problem requiring the attention of government and industrial leaders alike is how and where to find some agency which will replace the Munitions Board when its activities cease. If this can be found Canada's prosperity will continue, but if not it is not too soon to think about the consequences. In view of the new efficiency which is being planned and to a large degree practised in Great Britain, the United States of America, and elsewhere, a return to former methods of marketing would mean the surrender of all that has been won."

Discussing at length the coming problem of employment—a matter for serious consideration—Mr. Beer emphasizes the fact that palliatives for general unemployment are worthless. He is convinced, and the majority will agree, that if other than present industrial standards are not accepted, the movement towards state control during the ten years following the war will exceed that of all preceding years. "The practice heretofore has been to capitalize profits and profit-earning power. Under the new system, these would be humanized and democratized instead of capitalized. Such a system involves no injustice to capital, but simply reverses the order of precedence."

Returning particularly to production and marketing, Mr. Beer points out that production and employment are national as well as individual problems. He continues: "In proportion as trade becomes international it calls for guidance and assistance from national authorities. This responsibility is already recognized in the creation of a department of labor and in the appointment of trade commissioners. The department of trade and commerce has also made arrangement with His Majesty's government by which Canadians are privileged to consult any of His Majesty's consuls in foreign countries on matters of trade. Responsibility for trade treaties and for adequate shipping facilities rests with federal authorities. There remains, however, need for further progressive action.

"Reliance upon chance or upon the business activities of other countries for the performance of necessary trade functions is an invitation to failure. And of all these functions salesmanship is the one indispensable service which we must provide for ourselves. Other nations may finance our purchases, transport our products and insure their safe delivery, but to no other nation can we look for a satisfactory selling organization. Private organization to do this effectively is within the power only of the strongest manufacturing companies. Such an organization calls for men of high character and thorough business training who are equipped with a knowledge of the language and business customs of the country to which they are assigned. Specific reports on the demand for individual products, particulars of tariff regulations and restrictions, competitive market methods and credit ratings, must all be available. An efficient central selling organization can supply these services most economically, and only through such an organization can hundreds and possibly thousands of smaller manufacturers secure any share in the trade of foreign countries. The marketing of food products and materials for manufacture, as has been pointed out by the United States Federal Trade Commission, differs widely from the marketing of finished manufactured articles. 'The former will sell themselves at some price, usually at a price broadly established in competitive world markets, but for factory products, both staple and special, the manufacturer must often create the demand for his particular goods.' Demand does not operate automatically and from within, but can be both stimulated and guided from without. It is this which constitutes the necessity for a strong selling organization.

"Organized selling alone can meet the competition of the already established sources of supply and bear the initial expense of securing a firm foothold in foreign markets. The experience of Europe would seem to prove that some form of combination of producers and dealers may be made to facilitate greatly such trade. In Germany combinations of manufacturers and distributors are the rule. Cartels, syndicates, interlocking relationships, and price agreements are found in a large proportion of the industries. In France similar combinations have been organized in many industries. In England amalgamations and combinations of competitors are of frequent occurrence. In Belgium and in Austria-Hungary, before the war, the entire industrial system, as in Germany, was organized in cartels, syndicates, and price agreements. In Italy, Switzerland, Holland, Sweden, Russia and Japan similar conditions exist to a less degree. The formation of corresponding combinations has been strongly recommended in the United States. The organization of each separate American industry for export trade is the object of a trade commission now sitting permanently at Washington.

"The form which such an organization should take to meet Canadian requirements can not be decided upon without a most careful and thorough enquiry, and such an enquiry should be engaged in at once by the federal labor department, the department of trade and commerce, or other government authority in co-operation with a carefully selected committee of industrial leaders and labor representatives.

"Reference has already been made to the important functions which a competent board of industry might exercise in connection with national production. Service of equal value should be provided for in connection with the problems of marketing. An effort has been made to show that only by the consideration of production and marketing, as constituting one problem, can the problems of each be adequately dealt with. The experience of the past two years has demonstrated the desirability, and indeed the necessity, of enlisting the services of successful and practical business men to control and administer work of this nature. A nucleus for the board of industry proposed lies within the personnel of the present Imperial Munitions Board. To a board of this character might with safety be assigned the task of co-ordinating and strengthening the work of all government departments now having to do with export trade. It may be found desirable to bring under one control work now handicapped by division and subdivision of authority. Careful investigation may prove the need for a reorganization of the work of our foreign trade representatives to bring them and Canadian producers into closer and more effective co-operation. Powers equalling the great responsibilities involved would necessarily have to be given the members of the board; but to men of affairs, experienced in industry, commerce and finance, and actuated by the desire 'to serve,' such powers may most safely be entrusted. It may be found of advantage to leave the negotiation of trade treaties, and the provision of adequate shipping facilities, in their charge, for these are inseparable and basic constituents of marketing. Through their effort and influence, the producing and distributing forces of Canada may be successfully harmonized to secure 'national' advancement. Half-hearted and unrelated measures can not adequately deal with the situation already created by the war or find a solution for post-war problems. The task is a great one, the greatest ever presented for the consideration of Canadian industrial leaders, but the leadership which can be given by the members of such a board would meet with a response from west to east which would surmount all difficulties. The heart of Canada is sound, materialism is not dominant, public opinion is wholesome and may be mobilized for the advancement of a great national ideal.

"But whether by these or other means, the duty of the government of Canada clearly is to take the initiative, to call to their counsel representatives of the interests involved, and to plan now with definiteness and in detail for the period of readjustment and reconstruction of industry which inevitably must come soon. Preparedness for such a time is not the work of days or weeks, but will be the arduous and concentrated task of many months if it is to prove in any degree adequate. It is not the part of wise statesmanship, nor yet of shrewd business foresight, to trust to haphazard solutions for problems of such importance, or to plead the pressure of other problems as an excuse for inaction. The whole teaching of the war is to this end."

LIFE INSURANCE STOCK AS AN INVESTMENT

Average Present Return is Over 14 Per Cent.—Analysis of Recent Figures

BY GEORGE BOYD WICKES.

In *The Monetary Times* of September 20th, 1913, the writer drew attention to the value of life insurance stock as an investment, as proved by government records. In the few years that have passed since the article appeared there has been considerable progress both in appreciation of capital stock values from profits, and in actual increases of dividends declared. The younger companies have shared the improvement with their older competitors and this bears out the writer's conclusion in the article that whether in the initial stage or at maturity, life insurance stock goes far to meet the ideal of an investor.

For the purpose of comparing the companies' progress in this connection, is appended the following table which appeared in the previous article, and which was compiled from the then last report of the superintendent of insurance issued in 1912 in respect of the year ended December, 1911, and which referred to such companies as were then paying dividends on their capital stock:—

	Paid-up capital.	Amount of dividends paid.	% of paid-up capital.
Canada	$1,000,000	$ 80,000	8
Confederation	100,000	20,000	20
Continental	200,000	11,4[illegible]7	6
Crown	100,055	11,1[illegible]	11
Dominion	100,000	11,000	11
Excelsior	75,000	5,000	8
Federal	130,000	13,000	10
Great-West	548,500	76,618	14
Imperial	450,000	45,000	10
London	50,000	4,000	8
Manufacturers'	300,000	24,000	8
National	225,000	20,250	9
North American	60,000	6,000	10
Northern	450,781	30,140	6
Sovereign	200,095	12,600	6
Sun	250,000	37,500	15
	$4,198,331	$408,378	(Average) 9.7

Value of Stock.

Many investors are probably unaware of the great inherent value of life insurance stock as an investment and the excellent return to the present as well as the original investor. The inherent value is due to the uncalled capital which enables the companies to declare capital increases from their profits by way of bonuses, thus giving the shareholders a much greater percentage return on the original investment than appears on the surface. Owing to capital increases being paid out of profits or bonus the return to the original investor really represents in some cases more than 100 per cent. per annum whilst forty or fifty per cent is quite a usual return in the case of the older companies.

All companies have not pursued this policy. Some companies instead of giving their shareholders a capital increase in addition to the usual dividend, give their shareholders a cash bonus. For example, the Imperial Life in 1914 distributed a cash bonus dividend of $125,000 in this way in addition to the regular dividend of 10 per cent. Other companies are content with the present return. For example, the Confederation Life having doubled its capital from profits in the early eighties has for many years been satisfied with 20 per cent. per annum. One year it made a present to its policyholders of $38,148 from its shareholders' surplus account, which is equal to 76 per cent. of its original capital. Nevertheless it is now paying the original investor 42 per cent. per annum.

Value in Uncalled Capital.

But the company that pursues the policy of declaring increases of stock capital from profits makes for its shareholders a great inherent value in its uncalled capital. It can be seen from the undermentioned table what has been done just in the past four years in this way. During the years 1912-1915 inclusive the Great-West Life increased its capital by bonus profits from $548,500 to $933,803. In these few years it thus increased its capital from profits by no less a sum than $385,303 whilst in addition it distributed dividends in cash of $130,722 to the shareholders. To-day (1917) the capital is $1,000,000 fully paid up, and its regular 14 per cent. per annum nets 56 per cent. per annum to the original investors. In the same period from bonus profits the Dominion Life increased its capital 25 per cent., and the Sun Life a round hundred thousand dollars.

Altogether during the period 1912-15 fourteen companies who were on a dividend basis in 1912 and whose capital was not fully paid, declared in addition to regular dividends special bonuses or capital increases amounting to $698,314 on their 1912 capital of $3,198,371, whilst the fifteenth whose capital was fully paid, increased its dividend from 8 per cent. to 20 per cent. In four years the total dividends distributed amongst the fifteen companies were $2,205,912 on a capital which stood in 1912 at $4,198,331.

At the foot of the page, the companies' progress during the four years under review is presented in tabular form:—

Synopsis of Reports.

The following is a synopsis of the above-mentioned blue book reports regarding certain companies: Canada Life—1916 report. Dividend raised to 20 per cent. on present capital. The dividend of $200,000, is but a fraction of its total income of $[illegible], but it represents [illegible] per cent. on the 1866-1900 capital, of which one-half was paid out of profits according to the Royal Commission

Dominion Life 1912 report. Capital increased $25,000, or 25 per cent. out of bonus or profits. The last blue books

Company.	Paid-up capital, 1915.	% paid-up capital, 1915.	Amount of dividends paid, 1915.	Amount of dividends paid, 1912-1915, inclusive.	Capital increases or special bonus from profits, 1912-1915.	Shareholders' surplus in addition to capital, Dec. 31st, 1915.
Canada	$1,000,000	20	$200,000	$ 440,000	...	$ 223,186
Confederation	100,000	21	21,000	82,000		52,689
Continental	200,000	7	14,000	53,007	...	36,874
Crown	101,72[illegible]	7	7,094	30,290	$ 1,665	17,706
Dominion	125,000	12	14,0[illegible]	84,246	25,000	53,704
Excelsior	90,000	13.5	12,200	41,400	15,000	17,630
Great West	933,803	14	130,722	403,500	385,303	153,415
Imperial	450,000	10	45,000	305,000	125,000	131,404
London	50,000	8	4,000	16,000	..	10,008
Manufacturers'	300,000	8	24,000	96,000	...	132,095
National	250,000	9	20,000	103,000	25,000	55,448
North American	60,000	10	6,000	24,000	.....	(Guarantee Co.)
Northern	481,127	6	31,321	122,282	21,346	1,607
Sovereign	200,095	7	14,699	56,697	....	1,500
Sun	350,000	41	145,000	257,500	100,000	38,188
	$4,701,645	(Average) 14.5	$690,034	$2,205,912	$698,314	$1,084,754

It will be seen that in four years over 53 per cent. has been paid out in cash dividends on the 1911 capital, whilst the total annual dividend payments increased from $408,378 to $690,034.

show dividend payments at the rate of 12 per cent. per annum on the increased capital. In the shareholders' surplus account the company not only has in hand the premium received by the company on its stock subscriptions, but a surplus in addition of over $35,000. Excelsior Life—1914-16 reports. Capital increased $15,000 out of bonus or profits whilst dividends are maintained at 8 per cent. per annum on increased capital.

Great West Life—1912-16 reports. Reports show that the shareholders received $493,500 in cash dividends, of which amount $385,303 was applied towards increase of the company's capital stock. The 1916 report shows the original capital stock of $250,000 increased to $933,803. In the shareholders' surplus account the company has in hand $98,000 over and above the premium received on the sale of its stock. The revenue belonging to the shareholders from the capital stock and surplus fund was over $71,000 for the year.

Imperial Life—1914 report. Report shows a cash bonus of $125,000 paid to shareholders in addition to payment of usual 10 per cent. dividend on paid-up capital, $450,000. The company appears to favour giving its shareholders a cash distribution to a capital increase. The 1916 report shows $131,400 to the credit of the shareholders' surplus account, after payment of the usual $45,000 in dividends to the shareholders. It is interesting to note that this company was organized just 20 years ago as it commenced business on October 1st, 1897, and it was the first company to issue its stock at a premium so that the company could commence business without impairment of its capital. The stock was issued at $125 per share and its premium of $112,500 still stands to the shareholders' credit in their surplus account, in addition to a further $20,000.

Sun Life—1916 report. Report shows $100,000 applied to increase of capital and $45,000 dividends paid to shareholders being 15 per cent. on the increased capital. For many years the company has been content with dividends of $37,500 per annum, or 15 per cent. on $250,000. As in the case of the Canada Life, the $145,000 just paid out is but a small fraction of its income of $16,072,645. Nevertheless the course now adopted shows the ease with which an established life assurance company can convert its uncalled capital into a ready asset entitling it to receive a greater interest return. The $145,000 paid the shareholders represents a return of 232 per cent. to the original investor, as the Royal Commission says the whole cash, apart from profits necessarily put up by its shareholders, was $62,500.

As we have shown, the percentage return to the investor depends on the policy pursued by the directors in regard to the declaration of dividends or bonuses.

Average Return of 14 Per Cent.

The average present return of over 14 per cent. per annum is not only well assured but bound to steadily increase in the future. Approximately one-half is actually earned by the interest received from the investment of the shareholders own capital stock and surplus fund. The surplus fund belongs to the shareholders apart from the policyholders, and in the case of some of the younger companies was established by the shareholders themselves by their paying to the company a premium on their stock.

The other half is derived from a limited percentage of the profits derived from the companies' participating business and the whole of the profits from their non-participating business. It is usually allocated to the shareholders when the profits are declared and paid to the policyholders. As the various companies' surpluses of these fifteen companies amounted in 1915 to over twenty-six and a half million dollars, it can readily be seen how well the continuity and increase of the dividends are assured and secured.

Trust and Government Securities.

When it is considered that the dividends are all paid from the interest earnings of unimpeachable trust and government securities, and that future dividends must as surely increase as the yearly increasing profits are declared and paid by the companies: that such profits are derived from interest compounded and to be received from the same unimpeachable securities, already held in the vaults of the companies as a guarantee that they will be duly paid when declared, it can well be seen how great are the inherent and potential values of life insurance stock as an investment. Values that are apt to be overlooked and not realized by the investor of to-day owing to the general lack of information on the subject.

The opinion of the late Senator Geo. A. Cox in this connection is worth quoting. His reply to Mr. Shepley, counsel for Royal Commission, on being asked as to whether he was interested in companies other than the Canada Life or Imperial Life was: "I am interested in life insurance companies: wherever I get a chance to buy a little stock in a life insurance company, I buy it."

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks ended July [illegible], 1916, and July [illegible], 1917, respectively, with changes.

Totals	$264,383,615	$211,464,319	+	$52,919,296

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first two weeks in July:—

Canadian Pacific Railway.

	1916.	1917.	Increase.
July 7	$2,616,000	$3,101,000	+ $485,000
July 14 ..	2,7[illegible]	2,8[illegible]	+ 12[illegible]

Grand Trunk Railway.

July 7	$1,145,020	$1,2[illegible]	+ $141,074
July 14	1,211,[illegible]	1,3[illegible]	+ 1[illegible]

Canadian Northern Railway.

July 7 .	$ [illegible]	$ [illegible]	+ $ 17,2[illegible]
July 14	[illegible]	[illegible]	+ [illegible]

Gross earnings of the three principal Canadian railroads in the first six months of the year were $15,080,876 in excess of the former record for the period, a gain of 14.4 per cent.

From the low point of the early war depression, the figures for the first half of the current year show a spectacular recovery of 60 per cent., the first six months of 1915 having yielded a gross business of only $74,835,067 for the three roads, nearly $45,000,000 less than the total now reported for 1917.

All three roads shared in the increased traffic, the percentage gains for the six months varying from 11.8 per cent., in the case of Grand Trunk, to 22 per cent. in the case of Canadian Northern. By companies the six months' results as given in the preliminary weekly returns, with the increases over a year ago:—

Road.	Six month's gross.	Increase.	Per cent.
Canadian Pacific Railway ..	$ 69,575,000	$ 8,323,000	13.6
Grand Trunk Railway ..	[illegible],504	3,218,17[illegible]	11.8
Canadian Northern Railway..	19,612,500	3,539,700	22.0
Totals	$110,[illegible]	$15,080,876	14.4

OUR NEXT WAR LOAN

The results of Sir Thomas White's conferences this week with Mr. McAdoo, secretary of the United States treasury, are being awaited here with considerable interest. There is a strong feeling that so far as war loans are concerned, the Canadian market well deserves a rest. We have oversubscribed such loans aggregating $350,000,000. A short six months' period separated the second and third loans. By the time the fourth loan is due, another six months will have elapsed. This is a comparatively brief period, considering that the third loan is only just about properly distributed. We have not large accumulated funds for investment as in older and wealthier countries.

That the third war loan should be issued simultaneously in Canada and the United States was suggested to the finance minister in March. After various conferences, it was decided that a domestic issue should be made. That was done and with great success. It can be done again, if absolutely necessary. But with the heavy trade balance against us, so far as the United States is concerned, and the prevailing conditions in the Canadian investment market, a well-deserved respite would be given, could arrangements be made to finance our next war loan in the United States.

We are one of the best customers of the neighboring republic. Our purchases there during the ten months ended April 30th were valued at $602,209,543, while their sales to this country during the same period were valued at $236,829,775, leaving a balance of trade against us of $365,377,768. This unfavorable trade balance has been redressed to a considerable extent by Canadian borrowings in New York by the sale of Canadian securities, as well as by our favorable trade balance with European countries. We can continue to purchase in such large measure from the United States only if a reasonable degree of borrowing there is allowed our governments and municipalities. Sentiment in both countries is in favor of this financial assistance. The business situation makes it desirable. Money market conditions here, in New York and in London, appear to make it the proper thing at the present time.

COLD STORAGE PROFITS

Until the complete report of Cost-of-Living Commissioner O'Connor is available it is not possible to analyze fairly its statements. In the meantime, press synopses from Ottawa have stated that the big packing establishments "profiting by war-time conditions, made huge profits," and sums in millions were mentioned. In a telegram on Monday to the Montreal Star, Mr. O'Connor said that "much confusion has resulted from inaccurate and necessarily incomplete newspaper summarizations of a hundred-page document which is practically half statistics." He added: "While I have no doubt that excessive profits have been levied, and so find, my report does not even mention the figures of profit as quoted in the press."

Opinion is practically unanimous that, in war time especially, undue profits should not be made on the sale of foodstuffs and other necessities of life. The packing companies which buy in the open market and perform a work of distribution which no other organization is doing, will probably be found to take the same view. A certain amount of capital has been invested in the business. The shareholder expects to obtain a fair interest return upon his invested funds, just as the wage-earner expects a fair price for his labor. While we have not before us the O'Connor report, the telegraphic extracts seem to indicate that the commissioner has used in his report many phrases which will strike the popular ear. Regarding a butter transaction in the West, he says it was not illegal but he does not consider it respectable. He asks whether the transaction is a respectable way of doing business, and adds: "Mine may be a voice of one crying in the wilderness, but I have to register in the negative." If Mr. O'Connor's facts and figures are correct, then his conclusions may be also. One packing company says that the statement (press or otherwise) that it made profits in 1916 on bacon of five cents per pound is untrue. Its manager states that the company's actual profits were two-thirds of a cent per pound. This company, the William Davies Company, Limited, frankly admits that it "does not challenge either the legal or moral right of the government to investigate business enterprises when public interest directs such an investigation should be made," and adds: "If an investigation of the packing and meat business is ordered, the company will place at the disposal of the government not only the data it would be required to supply under order-in-council directing that inquiry be made, but will place the experience of its officers at the disposal of the investigating committee, if it is considered they can render any service which will be of value. The company has not now—nor at any time during the fifty years of its operation—anything to conceal in method or practice of carrying on its business. It does, however, claim the right to conduct its export business without abusive comment from government civil servants—especially when the conclusions drawn from the data asked for are improper and false."

Whatever the technical wording of the O'Connor report is, the effect of the telegraphed synopses has been to lead the public to believe that millions of dollars of profit have improperly been made by the packing houses. No attention was paid in the early despatches to the item of overhead expenses, which must be deducted from the "margin" or gross profits, to know what is the net profit. A small profit per pound on these products amounts to a large sum when the volume of business is as large as that of the packing concerns. When it is said that such and such a company "made millions of dollars," one must figure also what is its invested capital, its operating costs and overhead expenses generally, and its volume of business. Profiteering has no defence. In our efforts to stop any such tendency, however, we must not forget that capital has the right to be paid an honest profit for the service it performs, as much as the wage-earner has the right to purchase foodstuffs at a price uninflated by undue profits.

FAIR TREATMENT OF CAPITAL

The recent statement of Mr. Alfred W. Smithers, chairman of the Grand Trunk Railway, is a plea for fair treatment which the Canadian government cannot afford to ignore. For sixty-five years the Grand Trunk Railway has served Canada and has received only $28,000,000 assistance from the government, of which about $12,000,000 represents bonuses given by municipalities to aid the construction of lines subsequently acquired by the Grand Trunk and of which that company really never got the benefit. This compares with the grand total of $759,000,000 of assistance, according to the majority report of the Railroad Inquiry Commission, to the Canadian Pacific, Canadian Northern and Grand Trunk Pacific Railways.

The Drayton-Acworth report proposes that in consideration of the Grand Trunk Pacific being taken over by the government, the old Grand Trunk, as one of the parties to the construction of the Grand Trunk Pacific, should be surrendered to the government on terms amounting to the semi-confiscation of the rights of British stockholders. "In other words," says Mr. Smithers, "they suggest that the railway which out of its own resources has rendered far more service to Canada than any other railway, should be the only railway to be treated in this unjust way, a way certainly unprecedented in the history of Canada."

In the 65 years of the company's existence it has never defaulted on its fixed charges, notwithstanding that in that period a great number of the American railways have several times been in bankruptcy, and that in 1895 when the present board took office, nearly half of the American roads were then in the hands of receivers; it has maintained its standing on the London market, thus being able to finance on its own credit the many and various requirements demanded by the people of Canada. That the credit of the Grand Trunk Company stands high in the London market may be gathered from the fact that it was able, with the consent of the British Treasury, to raise in June, 1915, in the midst of war, on unaided Grand Trunk credit, the sum of twelve million five hundred thousand dollars in five hours, and that, on the day on which that operation was carried out, the Germans were bombarding Scarboro on the Yorkshire coast, and telegraphic communication was stopped for several hours between London and the North of England. With regard to the criticism as to undue payment of dividends, Mr. Smithers reminds us that the Grand Trunk common stock, of which over $30,000,000 represents actual cash, has never received a dividend, and its preference stocks have only had their dividends paid intermittently from year to year, as the earnings justified. Whatever action parliament takes upon the railroad inquiry report, they cannot afford to treat unfairly the capital which has been placed in Canadian railroads. We need much more capital from London and New York for our future development.

MANITOBA FARM LOANS SCHEME

In the discussion in these columns regarding the Manitoba farm loans scheme, a statement prepared by Mr. W. C. Alderson, and reprinted from The Manitoba Free Press, indicated that the provincial government would obtain "return from annuity, $1,667.94." Mr. Alderson assumes that after paying interest on the principal of $1,000 the Farm Loan Association would have left on its hands $22.65, part of a total payment per annum of $72.65. He overlooks the fact that after paying $50 interest and taking care of expenses at the rate of 1 per cent. on the principal, which amounts to $10, only $12.65 would be available for sinking fund purposes, to retire the principal at the end of 30 years. The sum of $12.65 reinvested annually and compounded at 6 per cent, would, in 30 years, provide $1,000, the amount of principal to be repaid. The following table summarizes these figures:

Loan, $1,000. To be Repaid in 30 Annual Instalments of $72.65 Each. Interest at 6 Per Cent.

Received from borrower, 30 x $72.65			$2,179.50
Government applies this as under—			
For expenses ...	$10.00 x 30 =	$ 300.00	
For interest	50.00 x 30 =	1,500.00	
For reinvestment	12.65 x 30 =	379.50	
	$72.65		— $2,179.50
Sinking fund, 30 x $12.65, compounded @ 6%			$1,000.00
Principal repaid at end of 30 years			1,000.00

In the above statement, it will be noted that expenses, $10 per year, amount to $300, which is the only sum available out of which it is possible to make a profit. The rest of the moneys received from the borrower must be applied as interest or as sinking fund. "The goodly profit" which Mr. Alderson calculates, therefore, seems to be an impossibility.

BOND ISSUES AWARDED

Halton County, Ont.—Messrs. Macdonald, Bullock and Company have purchased $74,000 5 per cent. 20-year good roads bonds.

Prescott and Russell County, Ont.—Messrs. A. E. Ames and Company, Toronto, have purchased $50,000 6 per cent. 20-year good roads bonds.

Essex County, Ont.—A purchase of $60,000 5½ per cent. 10-year bonds for patriotic purposes has been made by Messrs. Macneill and Young, Toronto.

Lindsay, Ont.—An issue of $60,000 6 per cent. 20-year waterworks bonds has been purchased by Messrs. W. A. Mackenzie and Company, Toronto.

Burlington, Ont.—An issue of $45,000 6 per cent. 30-year local improvement bonds has been purchased by Messrs. A. E. Ames and Company, Toronto.

Mimico, Ont.—Messrs. C. H. Burgess and Company, Toronto, have purchased $[illegible] 6 per cent. [illegible]-year waterworks and sewer bonds. The price paid [illegible].

Sudbury, Ont.—An issue of $[illegible] 5 per cent. [illegible]-years good roads bonds has been purchased by negotiation, by Messrs. Macdonald, Bullock and Company, Toronto.

New Toronto, Ont.—Messrs. C. H. Burgess and Company, Toronto, have purchased $[illegible] 5½ per cent. [illegible]-year incinerator plant bonds and $25,000 5½ per cent. 20-year school bonds. The price paid for these issues was 94. Another $50,000 6 per cent. 20-year waterworks bonds issue will shortly be offered by the municipality.

DIVIDEND No. 108.

Notice is hereby given that a Dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1917, and that the same will be payable at the Head Office and Branches on and after Wednesday, the first day of August next.

The transfer books will be closed from the 17th to the 31st July, 1917, both days inclusive.

By order of the Board,

E. HAY, General Manager.

Toronto 20th June, 1917.

PERSONAL NOTES

Dr. W. W. Amos, late Deputy Commissioner of Saskatchewan Liquor Stores, has been appointed Deputy Provincial Secretary and Registrar of Joint Stock Companies.

Mr. George Chipman, editor of the Grain Growers' Guide, has been named by Premier Norris as Manitoba's representative on the advisory board to assist Food Controller Hanna.

Dr. Robert Magill, M.A., who has been appointed chairman of the Grain Board of Canada, a position requiring a keen, far-seeing and calculating mind, is well fitted for the post, having had a wide experience with labor and agricultural problems. He was born in County Down, Ireland, and educated at Queen's University, Belfast, and the University of Jena. He became Professor of the Halifax Presbyterian College in 1903 and Principal in 1907. In 1908 he was elected Professor of Dalhousie University, and at the same time chairman of the Royal Commission to enquire into regulation of the hours of labor in Nova Scotia. In 1910 he was delegated to investigate the grain elevator problem in Saskatchewan, and chairman of the conciliation board re strikes in Port Morien Coal Mine disputes in 1911; also a delegate to the Imperial Conference on education, and was made chairman of the Board of Grain Commissioners for Canada in 1912. Dr. Magill is one of our able men, fully posted as to the problems of the West, and an expert in the grain trade. The members of the Grain Board are Dr. Robert Magill, chairman; J. C. Gage, president of the Winnipeg Grain Exchange; T. A. Crerar, representing the Manitoba Grain Growers; W. R. Bawlf, vice-president of the Winnipeg Grain Exchange; H. W. Wood, president of the Canadian Council of Agriculture and of the United Farmers of Alberta; W. A. Matheson, to represent Canadian millers; S. K. Rathwell, representing Saskatchewan Grain Growers; James Stewart, Allied government buyer; Lionel Clarke, Toronto harbor commissioner; Controller Ainey, of Montreal, labor man; and W. A. Best, parliamentary representative of the Brotherhood of Locomotive Firemen.

International Press Photo.

Dr. Robert Magill, M.A.

Mr. G. Frank Beer, with **Mr. R. Y. Eaton**, Toronto, and **Mr. F. S. Wiley**, Port Arthur, have been appointed a committee by Hon. W. J. Hanna, food controller, to deal with the Canadian fish problem. Mr. Beer has been active for many years in improving living conditions and appreciates the difficulties of the wage earner. He is a keen and practical student of political economy and is the type of citizen whom governments may, with great advantage, especially in these days of war, call to their councils. Mr. Beer is chairman of the Toronto Housing Commission and secretary of the Toronto and Hamilton Highway Commission. He was also a member of the Commission on Unemployment, appointed by the Ontario government. Mr. R. Y. Eaton, who is a member of the firm of the T. Eaton Company, Limited, Toronto, is an expert on transportation rates and storage problems generally. Mr. F. S. Wiley is a practical fisherman. He has been engaged all his life in the fish business, and is familiar with the whole process of the fish industry from the standpoint of the fisherman and the handler.

Mr. J. W. Burgess, [illegible] of the Toronto General Trusts Company at Winnipeg, has been transferred to the Toronto head office, as assistant secretary.

Mr. J. J. Har[illegible], of [illegible], and **Mr. W. J. Gear**, of Montreal, have been elected directors of the Wabasso Cotton Company, Limited. The elections fill two vacancies of some standing.

Mr. A. C. Harris, formerly with the Great-West Life Assurance Company, Calgary, has been appointed provincial manager of the Sovereign Life Assurance Company at Calgary. Mr. Harris has had considerable experience in the business.

Hon. L. W. Shatford, M.P.P., a prominent financier of Vancouver, has been appointed to the Dominion Senate. Mr. Shatford has been associated with the Bank of Vancouver, the British Columbia Life Assurance Company and many other enterprises in our Pacific Coast province.

Mr. Graham Drinkwater has been elected to fill the vacancy on the board of directors of Greenshields, Limited, caused by the death of Mr. E. B. Greenshields. Mr. E. C. B. Fetherstonhaugh, who had been acting president, has been appointed president, and Mr. J. H. Armstrong, secretary-treasurer.

Mr. Frank H. Crockard, the new president and general manager of the Nova Scotia Steel and Coal Company, was introduced to the heads of the various departments at a recent meeting of the company's directors. He also paid a visit to the steel plant, the car works, and the new steamship, "War Wasp." The directors' meeting was presided over by Col. Cantley, chairman of the board.

Mr. H. C. Cox, president Canada Life Assurance Company, has been elected president of the Insurance Institute of Toronto. The other officers are: Hon. president, Mr. W. H. Hall, general manager Canadian Surety; vice-president, Mr. H. W. Crossin, Employers' Liability; secretary-treasurer, Mr. Clifford Elvins, Imperial Life. Mr. J. R. Stewart, of the Aetna, was elected a member of the council. Membership now totals 458.

Mr. Harry H. Goss has become associated with Messrs. Macdonald, Bullock and Company, investment bankers, Toronto Stock Exchange Building, Toronto. Mr. Goss was connected with the bond department of Æmilius Jarvis and Company for seven years, representing that firm at various times in Western and Eastern Ontario, also being in their New York office for a considerable period. Mr. Goss will be office manager, and in addition will look after sales in Toronto.

Hon. Frank H. Phippen, K.C., of Toronto, who has been elected a director of Tooke Brothers, Limited, is a well-known corporation lawyer and capitalist. Born at Belleville, Ont., in 1862, he received his education at Albert College, and was called to the Bar of Ontario in 1885, and later to the Bar of Manitoba. He was associated with the Macdonald, Tupper law firm for a long period and appeared in many important cases, pleading frequently before the Privy Council of Great Britain. In 1906 he was appointed a judge of the Court of Appeal in Manitoba, but three years later he resigned from the Bench to become general counsel for the Canadian Northern Railway, a position he still holds. He is a director of Brazilian Traction, National Trust Company, the Columbia River Lumber Company, Kaministiquia Power, Canadian Collieries, Limited, and others.

Mr. H. W. Beauclerk, who succeeds to the vacancy on the directorate of the Bank of Montreal, left by the death of Sir Wm. C. Macdonald, is one of the younger group of Canadian financiers who has become prominent in recent years. The Belgo-Canadian Realty Company, Limited, of which he is vice-president, was one of his early interests. He was identified with the group which built the Transportation Building on St. James St., and is managing director of the company which owns that property. More latterly he was associated with the refinancing of the Brompton Pulp and Paper Company [illegible] bought out the original holders last autumn. He is also a director of Peter Lyall and Sons Construction Company, Limited. Mr. Beauclerk is an Irishman by birth and was born in County Down. [illegible] Chicago [illegible] completing his education in Europe, and settled in Montreal about ten years ago. He is a son-in-law of Lord Shaughnessy.

Established in 1836. Incorporated by Royal Charter in 1840.

COLD STORAGE INVESTIGATOR HOLDS FIRM

Says Whatever is Stated in His Report, He Can Substantiate

Although he finds that there is no "food trust" in Canada, Mr. W. F. O'Connor, the Cost of Living Commissioner, voices the opinion in a report tabled in the Commons that a few cold-storage companies in Canada "have so controlled the business in certain lines, that as respects particular commodities, particular companies are able to exercise a practical monopoly, especially of export business." In some instances, he says, this practical monopoly has been fairly administered, but he asserts that there were "two individual cases of profiteering in 1916." These were the sales of 97,000,000 pounds of bacon at a "margin" of 5.05 cents a pound and of 500,000 dozen of eggs by company No. 9 in the report. Mr. O'Connor is careful to explain that by "margin," he means gross profits, the difference between the cost of the commodity laid down with all expenses paid at the storage warehouse and the price at which the same commodity is sold.

Exercise Practical Monopoly.

According to telegraphed summaries from Ottawa, Commissioner O'Connor says in his report: "My enquiries enable me to pronounce with emphasis, that there is no food trust, and I have failed to discover any instance of the destruction of fit food. Again, there is nothing like combination among the various companies. There is lively competition instead. A few of the cold storage companies, however," adds the commissioner, "have so centralized the business in certain lines that as respects particular commodities, particular companies are able to exercise a practical monopoly, especially of export business. In some instances this practical monopoly has been fairly administered, in others, concerning which I shall have specifically to report, it has not. As to the matter of over-accumulation, all the evidence is against it. The popular conception is unquestionably wrong. It is surely not open to contradiction that the reasonableness of the amount of stock in trade, carried by a person, firm or company, depends upon the volume of business transacted, by which I mean the turnover."

Exports and High Prices.

The commissioner points out that all food prices are ruling high. "As respects cold-storage products," he continues, "it seems to me that extensive buying for export has contributed most to the advances in prices of cold-storage commodities. The domestic price has followed the trend of export prices upward. And I humbly suggest that the figures will disclose that the Canadian farmer has not been blind to his opportunities. It will be noted that the cost to the various companies, of the various cold-storage commodities, has been climbing, and that a direct relation has been maintained between the cost, to the companies, and their sale prices. In stating this, I do not wish to be understood as stating that the relation has been invariable, or as contending that there have not been cases of undue profit-taking. Quite the contrary, as will appear when I shall express an opinion concerning certain seemingly excessive charging which, in my judgment, is none the less open to criticism because, for the most part, the commodities affected were destined for export to Great Britain and the allies overseas."

As to Export Firms.

Canada's export trade, in cold-storage products, Mr. O'Connor states, is practically limited to four or five large meat companies, and three or four export houses, handling cheese and dairy products.

"In the face of tremendous and insistent export demand," he says, "the matter of the prices payable by the companies to their vendors was one practically immaterial and seems to have been so regarded. The unfortunate domestic consumer, though living in a land of plenty, was thus constituted a competitive buyer as against a hungering world. Export prices reacted upon domestic prices, ordinarily associated with periods of famine. The food consumer has suffered as a result, the food purveyor has not."

No Illegal Combination.

In concluding his report, the commissioner gives his findings to the effect that there has been no illegal combination nor any excessive accumulation of goods on the part of the companies. There were, he says, two individual cases of profiteering [illegible] the passage of the cost of living [illegible] he would consider it his duty to recommend that the facts be laid before the proper [illegible] criminality. He finds a tendency on the part of some companies to exact seemingly excessive margins on beef and butter. Whether these margins are excessive, he says only a criminal prosecution or a declaration by the food controller as to what shall be a fair price or a fair margin, can determine. He considers that the profits of most companies on certain lines, while not high as compared with before the war prices, might well be less. Their business has so enormously extended during the war period that the before the war margins of profit ought not to be considered fair tests of fair profits.

Some of the Purchases.

The report is understood to show that the companies in 1916 purchased 46,561,063 pounds of butter at an average of 30.83 cents a pound; 76,806,324 pounds of cheese at 18.11 cents a pound; 28,122,683 dozen eggs at 26.05 cents a dozen; 189,952,154 pounds of beef at 10.75 cents a pound; 158,848,834 pounds of pork at 15 cents a pound; 125,605,834 pounds of bacon at 15.76 cents a pound; 14,383,485 pounds of ham at 19.20 cents a pound; 13,609,605 pounds of mutton and lamb at 16.80 cents a pound. They sold 43,867,720 pounds of butter at an average of 32.73 cents a pound; 72,638,890 pounds of cheese at 18.88 cents a pound; 26,410,119 dozen eggs at 30.36 cents a dozen; 170,472,195 pounds of beef at 11.45 cents; 123,686,256 pounds of pork at 16.85; 151,309,429 pounds of bacon at 20.34 cents a pound; 14,390,367 pounds of ham at 21.32; 12,666,380 pounds of mutton and lamb at 17.41 cents a pound.

Margins in Buying and Selling.

The margins between purchase prices and selling prices were thus: Butter, 1.98 cents a pounds; cheese, .77 cents a pound; eggs, 4.31 cents a dozen; beef, .70 cents a pound; pork, 1.85 cents a pound; bacon, 4.58 cents a pound; ham, 2.11 cents a pound; mutton and lamb, .61 cents a pound.

Mr. O'Connor explains that by the word "margin," he means the gross profit on a commodity from the time it is laid down all costs and expenses paid, in the storage warehouse. It is thus the difference between the cost price and the selling price, and includes cost of storage loss, interest on investment, overhead charges and any other expenses from the time the commodity enters the warehouse until it reaches the purchaser. He indicated the "margins" on commodities for export during the year as follows: Butter, .57c. a pound; cheese, .4c. a pound; eggs, 6.56c. a dozen; pork, 2.37c. a pound; bacon, 3.68c. a pound; mutton, .01c. a pound. On beef there was an apparent loss of .81c. a pound, and on ham an apparent loss of 2.38c. a pound. The explanation was that much of the beef and ham was purchased in 1915 when cold-storage costs were less than those of 1916. On goods for home consumption the "margins" were: Butter, 2.35c. a pound; cheese, 2.52c. a pound; eggs, 3.79c. a dozen; beef, .50c. a pound; pork, 2.13c. a pound; bacon, 3.09c. a pound; ham, 3.73c. a pound; mutton and lamb, .59c. a pound.

Increases in Commodities.

Mr. O'Connor shows the increases in the costs of commodities and to the companies and their selling prices in the four years from 1913 to 1916. Costs to the companies increased in the period as follows: Butter, 5.47 cents a pound; cheese, 5.33 cents a pound; eggs, 3.47 cents a dozen; beef, 1.79 cents a pound; pork, 2.34 cents a pound; bacon, 1.01 cents a pound; ham, 4.77 cents a pound; mutton and lamb, 4.83 cents a pound. Coincidentally prices charged by the companies increased as follows: Butter, 5.61 cents a pound; cheese, 5.65 cents a pound; eggs, 5.43 cents a dozen; beef, 1.43 cents a pound; pork, 2.38 cents a pound; bacon, 2.25 cents a pound; ham, 2.40 cents; mutton and lamb, 4.06 cents a pound.

The commissioner considered that unjustifiable profit is being made on bacon, of which sales by the companies since 1913, have increased twelve-fold.

Can Substantiate all in Report.

In a telegram to The Montreal Star, asking that paper to correct one of its statements regarding the report, Mr. O'Connor said: "I have not made any retractions or explanations, nor added nor taken away one word to or from my cold-storage report which is based upon precise figures as sworn to by those affected and subsequently verified by di-

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

rect enquiry. The report is correct as written. There has been but one. There has not been any supplementary report.

"Much confusion has resulted from inaccurate and necessarily incomplete newspaper summarizations of a hundred page document, which is practically half statistics. Over one hundred companies were investigated and practically all absolved. The cases of those retained from absolution will be further proceeded with to fix their precise profits, which the report does not purport to show in millions or otherwise, or at all, but plainly states that further investigation will be necessary for this purpose and that it will be made.

"While I have no doubt that excessive profits have been levied, and so find, my report does not even mention the figures of profit as quoted in the press. Accordingly all criticism of my capacity, from whatever source emanating, and all imputations of malice and of ignorance, have been mere beating at the air. Whatever I have stated in the report I can substantiate."

PRESS REPORTS GROTESQUELY UNTRUTHFUL

So Sir Joseph Flavelle Says of Cold Storage Findings—They Evidence Ignorance and Malice

Until the O'Connor report on cold-storage companies is printed and distributed, it is improbable that any steps will be taken in the direction of a further investigation, say Ottawa dispatches. There will be action, but whether the government will relegate the further investigation to the food controller or a royal commission, will be decided after the report is discussed in parliament.

A parliamentary committee to investigate the cold-storage business has been suggested, but as parliament is in the fourth month of the present session, this is believed to be impracticable.

Sir Joseph Flavelle's Statement.

The following telegram has been sent by Sir Joseph Flavelle, president of the William Davies Company, Limited, to Premier Borden, with respect to a statement published by the department of labor concerning the business of the Wm. Davies Company, Limited:—

"The statements given to the press by the department of labor, covering the business of the William Davies Company, are grotesquely untruthful, both in the mass and in detail. They evidence a curious admixture of ignorance and malice. I deeply regret the injustice of this attack—I regret it naturally on personal grounds, but even more on public grounds. Bitterness and anger and suspicion are being stirred up against public men, against labor and capital and corporations which, in many instances, have no better support than flippant impudence and ignorance. The pity of it in this case is that an authoritative statement was available and was not consulted. The department of finance is furnished with a balance sheet and the profit and loss sheet annually of each firm in Canada given under the provisions of the business tax measure.

Could Have Consulted Statements.

"The statement of the William Davies Company is, and must continue to be, furnished to the department of finance. These statements are not only audited on behalf of the company, but are verified by the accountant of the department of finance, and are final in authority. The department of labor could have consulted these statements and could have procured such further information as they might have desired by application to the general manager of the company, and could thus have avoided the grave injustice of an attack based upon absurdly untruthful statements. During its entire history, the William Davies Company has sought for no trade advantage or profit other than could be secured through diligence and attention to its business. If much volume of business has been secured in contrast to others it has been secured in open competition free from combination or arrangement or understanding with other packers or merchants. The company offered to the Imperial authorities at different periods since the outbreak of war to operate to its capacity in bacon products, canned meat products, and pork and bean products, on a cost and percentage basis, but each time the offer was declined, first for bacon and later for canned meats and pork and beans. The Imperial authorities expressed the desire to purchase in the open market. All army purchases of bacon are made in London. All army purchases of canned meats and pork and beans are made in Canada. Both are made in open and untrammelled competition with the world. The world, during the period of the war, is confined to the United States, the Argentine, Canada, Australia and New Zealand. If it is wrong to [illegible] this and other business under these competitive conditions, the company has been guilty of such wrong and no other.

"As this statement was issued by the department of labor, I ask you to take such steps as [illegible] think necessary whereby the truthfulness or untruthfulness of these statements can be established."

Says Profits are Irregular.

Mr. C. S. Blackwell, of Matthews, Blackwell, Limited, Toronto, in an interview said: "The statements are wild. Profit in the packing business is most irregular and very speculative. A period of two months elapses before the bacon is sold in England, after the hogs are bought. There is a good profit sometimes, and sometimes a smart loss. The gross average profit in the packing business, both in Canada and the United States, is from 2 to 2½ per cent. on the total turnover. On bacon the turnover would be from six to eight times a year, so that the profit on capital in a good year might go as high as 16 per cent. But that is only possible by turning capital over eight times per year. I do not know of any business with as large a turnover, with as small a net profit percentage. Packers have made money since the war, but not like Mr. O'Connor says."

The Montreal Gazette says: "If Mr. O'Connor's figures are correct, the return of the company is not, but Mr. O'Connor admits that his figures do not express net profit, and we repeat that his choice of the word 'margin' was not only unfortunate but misleading. He has raised a bit of a hornet's nest, and it might be wise for the government to instruct him to continue his investigation to the point of ascertaining what the actual profits of the packing companies have been, and when this is known such action as the premises demand can be taken."

HIGH PRICE FOR SILVER

American bankers recently purchased from the Mining Corporation of Canada, Toronto, 200,000 ounces of silver at 83 9-16 cents. This is the highest price silver has reached in recent history, and is 6 5-16 cents higher than the advance of May, 1912, when 77¼ cents was twice reported.

ONTARIO PRESSING FOR INSURANCE TAX

Having practically ignored the demands made by Provincial Fire Marshal Heaton for the payment to the Ontario government of a tax of $6,600 due upon unlicensed insurance collected as a fire loss in the fire which destroyed their Peterboro' plant a few months ago, the Quaker Oats Company have had a final demand made upon them for the tax.

If the company disregard the final notice it will be followed by the government instituting proceedings to collect the amount due under the Fire Marshal's Act. To date this year the fire marshal's office had collected unlicensed insurance taxes to the amount of $5,000, and over $9,000 is outstanding from recent fires. Included in this amount is $1,300 due the government as a result of the recent fires of the Dominion Canners' plant.

Mr. W. H. Sutherland, of Dauphin, who has successfully represented the Northwestern Life Insurance Company of Winnipeg at Dauphin for the past year, has been appointed superintendent of agencies for the territory north of the main line of the Canadian Northern Railway in northern Manitoba and eastern Saskatchewan. Mr. M. E. Gobert, of Glenboro, formerly with the North American Life, who, during the past year, has handled a small district in southern Manitoba for the company, has been appointed inspector of agencies for the southwestern Manitoba district with headquarters at Souris. Mr. C. C. Clough, of Elm Creek, formerly with the Confederation Life and who for the past year represented the Northwestern Life as local agent at Elm Creek, Manitoba, has been appointed inspector of agencies for the central district in southern Manitoba. Mr. J. I. Bargen, of Winnipeg, formerly with the Monarch Life, and prior to that a prominent merchant at Plum Coulee, has taken a contract to travel in southern Manitoba for the Northwestern Life.

WILSON'S "PROFITEERING" ADDRESS

Says Patriots Must Not Think of Profits in Nation's Time of Need, Nor Grow Rich by Shedding of Blood of Its Soldiers on Distant Battle Fields

The following is President Wilson's notable address to the mine operators and manufacturers of the United States, in which he stated that patriots must not think of profits in the nation's time of need:—

The government is about to attempt to determine the prices at which it will ask you henceforth to furnish various supplies which are necessary for the prosecution of the war and various materials which will be needed in the industries by which the war must be sustained. We shall, of course, try to determine them justly and to the best advantage of the nation as a whole; but justice is easier to speak of than to arrive at, and there are some considerations which I hope we shall all keep steadily in mind while this particular problem of justice is being worked out. I therefore take the liberty of stating very candidly my own view of the situation and of the principles which should guide both the government and the mine owners and manufacturers of the country in this difficult matter.

Must Pay Just Price.

A just price must, of course, be paid for everything the government buys. By a just price I mean a price which will sustain the industries concerned in a high state of efficiency, provide a living for those who conduct them, enable them to pay good wages, and make possible the expansions of their enterprises which will from time to time become necessary as the stupendous undertakings of this great war develop. We could not wisely or reasonably do less than pay such prices. They are necessary for the maintenance and development of industry; and the maintenance and development of industry are necessary for the great task we have in hand. But I trust that we shall not surround the matter with a mist of sentiment. Facts are our masters now. We ought not to put the acceptance of such prices on the ground of patriotism. Patriotism has nothing to do with profits in a case like this. Patriotism and profits ought never in the present circumstances be mentioned together.

It is perfectly proper to discuss profits as a matter of business, with a view to maintaining the integrity of capital and the efficiency of labor in these tragical months when the liberty of free men everywhere and of industry itself trembles in the balance; but it would be absurd to discuss them as a motive for helping to serve and save our country. Patriotism leaves profits out of the question. In these days of our supreme trial, when we are sending hundreds of thousands of our young men across the seas to serve a great cause, no true man who stays behind to work for them and sustain them by his labor will ask himself what he is personally going to make out of that labor. No true patriot will permit himself to take toll of their heroism in money or seek to grow rich by the shedding of their blood. He will give as freely and with as unstinted self-sacrifice as they. When they are giving their lives will he not give at least his money?

No Driving of Bargains.

I hear it insisted that more than a just price, more than a price that will sustain our industries, must be paid; that it is necessary to pay very liberal and unusual profits in order to "stimulate" production; that nothing but pecuniary rewards will do it—rewards paid in money, not in the mere liberation of the world. I take it for granted that those who argue thus do not stop to think what that means. Do they mean that you must be paid, must be bribed, to make your contribution, a contribution that costs you neither a drop of blood nor a tear, when the whole world is in travail and men everywhere depend upon and call to you to bring them out of bondage and make the world a fit place to live in again amidst peace and justice? Do they mean that you will exact a price, drive a bargain, with the men who are enduring the agony of this war on the battlefield, in the trenches, amidst the lurking dangers of the sea, or with the bereaved women and the pitiful children before you will come forward to do your duty and give some part of your life, in easy peaceful fashion, for the things we are fighting for, the things we have pledged our fortunes, our lives, our sacred honor to vindicate and defend—liberty and justice and fair dealing and the peace of nations? Of course you will not. It is inconceivable.

Your patriotism is of the same self-denying stuff as the patriotism of the men dead or maimed on the fields of France, or else it is no patriotism at all. Let us never speak, then, of profits and of patriotism in the same sentence, but face facts and meet them. Let us do sound business, but not in the midst of a mist. Many a grievous burden of taxation will be laid on this nation, in this generation and in the next, to pay for this war; let us see to it that for every dollar that is taken from the people's pockets it shall be possible to obtain a dollar's worth of the sound stuffs they need.

Let me turn for a moment to the shipowners of the United States and the other ocean carriers whose example they have followed and ask them if they realize what obstacles, what almost insuperable obstacles, they have been putting in the way of the successful prosecution of this war by the ocean freight rates they have been exacting. They are doing everything that high freight charges can do to make the war a failure, to make it impossible. I do not say that they realize this or intend it. The thing has happened naturally enough, because the commercial processes which we are content to see operate in ordinary times have, without sufficient thought, been continued into a period where they have no proper place.

I am not questioning motives. I am merely stating a fact, and stating it in order that attention may be fixed upon it. The fact is that those who have fixed war freight rates have taken the most effective means in their power to defeat the armies engaged against Germany. When they realize this, we may, I take it for granted, count upon them to reconsider the whole matter. It is high time. Their extra hazards are covered by war-risk insurance.

Knows What Response Will be.

I know, and you know, what response to this great challenge of duty and of opportunity the nation will expect of you; and I know what response you will make. Those who do not respond, who do not respond in the spirit of those who have gone to give their lives for us on bloody fields far away, may safely be left to be dealt with by opinion and the law, for the law must of course command these things. I am dealing with the matter thus publicly and frankly, not because I have any doubt or fear as to the result, but only in order that in all our thinking and in all our dealings with one another we may move in a perfectly clear air of mutual understanding.

And there is something more that we must add to our thinking. The public is now as much part of the government as are the army and navy themselves; the whole people in all their activities are now mobilized and in service for the accomplishment of the nation's task in this war; it is in such circumstances impossible justly to distinguish between industrial purchases made by the government and industrial purchases made by the managers of individual industries; and it is just as much our duty to sustain the industries of the country, all the industries that contribute to its life, as it is to sustain our forces in the field and on the sea.

What Prices Mean to America.

We must make the prices to the public the same as the prices to the government. Prices mean the same thing everywhere now. They mean the efficiency or the inefficiency of the nation, whether it is the government that pays them or not. They mean victory or defeat. They mean that America will win her place once for all among the foremost free nations of the world, or that she will sink to defeat and become a second-rate power alike in thought and in action. This is a day of her reckoning, and every man among us must personally face that reckoning along with her.

The case needs no arguing. I assume that I am only expressing your own thoughts—what must be in the mind of every true man when he faces the tragedy and the solemn glory of the present war for the emancipation of mankind. I summon you to a great duty, a great privilege, a shining dignity, and distinction. I shall expect every man who is not a slacker to be at my side throughout this great enterprise. In it no man can win honor who thinks of himself.

LACK OF COAL TRANSPORT PARALYZES TRADE

Government Should Handle Transportation and Stop Unscrupulous Speculating, Says Commission

A sidelight on Canada's coal problem was furnished by the federal trade commission of the United States in a recent report to Congress. The following are excerpts from the report: "In the anthracite industry coal has been traced from point of production to point of consumption. Weekly reports are required from producers and jobbers wherever needful, with the result that as regards domestic sizes high premium coal has largely been eliminated from the market, and speculation and inordinate profits have been cut in the wholesale trade in these sizes.

"During the first two months of the coal year—April and May—there has been an increase in the production of anthracite of 2,433,000 tons as compared with same months of 1916. This is an increase of 24 per cent., and should have been translated into a distinctly favorable condition of the market."

Domestic User is Sufferer.

The commission finds, however, that coal miners are crushing up domestic sizes in the breaker to supply steam sizes, the price of which the commission has been unable to curb. "If this practice continues it will constitute another evil for the future of the domestic user," the commission declares. "The stores of anthracite which now should be accumulating against next winter for domestic use are being used for steam-making in the place of bituminous coal, in place of coke, and in the production of water gas, because such anthracite is easier to obtain and at favorable prices as compared with bituminous and coke," the report continues. "The present production of bituminous coal the country over is about 40 per cent. short of the possible maximum, and this limitation is solely charged as a primary cause to faulty rail transportation. The present demand for coal is unprecedented, but the mines now open are capable of filling this demand if adequate car supply is furnished.

"It is a fact that in the bituminous industry the capacity of the mine for production and the capacity of labor is limited absolutely by the supply from day to day of coal cars for the moving of the product. Thus, we have found that with the market at unheard of prices, labor is often standing idle at the mines, and production is limited as compared with the possible producing capacity. The commission believes there are enough coal cars in the country, but that there are not enough coal cars delivered at the mines, and that an inadequate supply having been delivered to the mines and loaded, these cars are not moved to the point of consumption either with the greatest expedition, nor are they promptly discharged upon their arrival at their destination.

Speculation Must Cease.

"The commission has much testimony of the widespread abuse in the use of cars by speculators for the storage of coal for speculative purposes, and the coal cars are being used for the transportation of many other sorts of products.

"The commission believes that the coal industry is paralyzing the industries of the country, and that the coal industry itself is paralyzed by the failure of transportation. The coal problem cannot be worked out as long as the railroads are allowed to divide and allot traffic; to lay embargoes without regard to their immediate effect upon industry or the systematic distribution of coal; to give priority to the movement of high freight rate commodities, and to use the device of the 'long haul.' Whatever remedy may be applied, should be applied as immediately as possible, for time is passing, and no human power can supply the factor of time lost. Time is necessary to build up the stores of fuel at distant points, and that storage should begin without unnecessary loss of an hour.

Suggest Pooling Railroads.

"The serious aspect to the country at large is the immediate and intolerable hardship laid upon industry and transferred in large part to the public in increased prices, and the future hardship which will fall upon the domestic consumer next winter. It would seem that steady employment, fair compensation to labor and capital, equitable distribution, and stable prices could be secured by pooling all coal and coke production in the hands of the government. This would still be ineffective, either as to distribution or as to the promotion of a maximum of production, unless similar control extended over all means of transportation, both rail and water, and to meet this, the pooling of railroads and boat lines is clearly indicated. The railroads of the country, if operated as a unit and on a government account, could be used to transport coal and other products by the most direct route to the point of destination, and the efficiency of the roads themselves and of existing rolling stock and motive power would be vastly increased."

ESTIMATED NUMBERS OF FARM LIVE STOCK

It is estimated by the census and statistics office, Ottawa, that the numbers of farm live stock in Canada on June 30th were as follows: Horses, 3,035,254; milch cows, 2,642,709; other cattle, 3,325,013; sheep, 2,009,717; and swine, 2,513,526. This is an increase over last year for all descriptions, excepting swine, which are less by over 300,000. The decline in numbers of sheep, which has been annually continuous since 1913, appears to be arrested, the increase shown this year being over 44,600.

COBALT ORE SHIPMENTS

Porcupine Vipond	1.65
From Porquis Junction—Nickel ore—	
Alexo Mining Company	423

TO ADVERTISE CANADIAN GOODS IN FRANCE

The Senate has adopted a resolution of Senator Beaubien, urging the government to advertise Canadian products in France by means of an exhibition train of sample goods. Senator Beaubien said he had suggested to the French government that there should be two trains organized, one carrying French goods to be shown in Canada and the other Canadian goods to be shown in France. A French steamship line had offered free transportation for the trains across the ocean, and the plan had been favorably commented upon by the French press.

Sir James Lougheed said that there were limits to what any country could do in the way of giving effective aid for the development of foreign trade, which must be developed more or less through natural channels. In Canada there had been a disposition to rely on government assistance for everything. Not a railway could be built without government aid; there was not a transportation project that the government was not called upon to finance. This had the tendency to rob the people of initiative and confidence. The present and past governments had, to as large an extent as they were warranted, given assistance and aid to both domestic and foreign trades. He had observed frequently that enterprises without government assistance did better than those that relied upon the government. Sir James promised, however, to direct the attention of the government to the matter.

GRAND TRUNK CHAIRMAN COMPLAINS

Says Semi-Confiscation of British Stockholders' Rights is Proposed

In a statement issued by Mr. A. W. Smithers, chairman of the board, Grand Trunk Railway system, he deals at length with the conclusions arrived at by the majority report of the Railway Commission. After pointing to the fact that the Grand Trunk Railway was commenced in 1853, and built by British labor, British engineers and British capital, at a time when, as the pioneer railroad of Canada, great obstacles had to be overcome, Mr. Smithers refers to the improvements carried out in the construction of bridges, double tracking, improvement in equipment, etc. In the 65 years of the company's existence, it has never defaulted on its fixed charges. Reference is made to the fact that in June, 1915, in the midst of war alarms, the Grand Trunk was able, with the consent of the British treasury, to raise $12,500,000 in five hours.

The increase in Grand Trunk capital raised in London since the present board came into office, amounts to nearly $150,000,000, which was all raised at a little over 4 per cent. The Grand Trunk capital at present amounts in round figures to $430,000,000.

Grants to Road.

Continuing, Mr. Smithers says: "Over this period of 65 years, during which the Grand Trunk Railway has been serving the ever-growing needs of Canada, the total assistance received from the government of Canada has been only $28,000,000, of which about $12,000,000 represents bonuses given by manufacturers to aid in the construction of lines subsequently acquired by the Grand Trunk, and of which this company really never got the benefit. This compares, according to the majority report of the commission, with $347,000,000 received by the Canadian Pacific Railway in 35 years, of which amount $119,000,000 represents the value estimated by the company of the lands still unsold, and $298,000,000 received by the Canadian Northern Railway in 15 years, and $114,000,000 received by the Grand Trunk Pacific Railway in 15 years."

Mr. Smithers details the history of the Grand Trunk Pacific and gives the causes which increased the cost of building the Grand Trunk Pacific far beyond the amount estimated when the acts of 1903 and 1906 were passed.

"The causes of the increase," Mr. Smithers says, "were obviously beyond the control of the company. This increased cost has brought both the Grand Trunk Pacific and Canadian Northern Railway into financial difficulties which have been aggravated by the effect on the money markets of the world of the terrible war now raging in Europe."

Position of Grand Trunk.

Continuing, Mr. Smithers says: "The majority report of the Royal Commission now proposes that the Canadian Northern should be taken over by the government and relieved of all its liabilities, but does not propose to apply the same method to the Grand Trunk Pacific, which has received far less assistance than any other road. The commission proposes that in consideration of the Grand Trunk Pacific being taken over by the government, the old Grand Trunk, as one of the parties to the construction of the Grand Trunk Pacific, should be surrendered to the government on terms amounting to the semi-confiscation of the rights of British stockholders. In other words, they suggest that the pioneer railway of Canada, which out of its own resources has rendered far more service to Canada than any other railway, should be the only railway to be treated in this unjust way, a way certainly unprecedented in the history of Canada. In addition to having carried the largest traffic in its history during the last year, the Grand Trunk, at the request of the government, has undertaken considerable orders for munitions, and the work has received high approval.

Congestion Less Here.

"Anyone reading the majority commission report will find, so far as the Grand Trunk is concerned, no reference to the fact that we are in the midst of the greatest war in history, that in consequence of the demands of that war, it has been impossible to obtain adequate supplies—coal, engines, rolling stock or rails, and that by common consent Canada has just passed through one of the severest winters in its history. The officials of the company are prepared to substantiate the fact that the congestion on the Grand Trunk Railway [illegible] on the frontier, and on the other Canadian railways, and that notwithstanding the congestion, the company carried in that time the biggest traffic that it has ever carried.

"Locomotives have been ordered at prices varying from $45,000 to $50,000, or more than double the cost prevailing before the war, and freight and coal cars at even greater price," Mr. Smithers points out.

NEW INCORPORATIONS

The following is a list of new companies omitted from last week's issue on account of pressure on space:—

Coronation, Alta.—Irvine Dixon, Limited, $15,000.

Pense, Sask.—Hammond Hamilton Company, Limited, $2[illegible]

Investment vs. Speculation

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

MANITOBA ACCOUNTANTS MEET

Notable Contributions to Nation's War Work by Accountants

"Notable contributions are being made by chartered accountants to the nation's war work," said Mr. A. K. Bunnell, speaking at the annual general meeting of the institute of chartered accountants of Manitoba, held in Winnipeg. Mr. Bunnell cited the case of Lieut.-Col. J. G. Ross, a Montreal accountant, who is chief paymaster of the Canadian overseas forces; Mr. D. G. Kerr another Montreal accountant, who is in charge of the widows' and dependents' pension fund under the militia department; and Mr. George Edwards, of Toronto, who is in charge of the accounting of the Imperial Munitions Board at Ottawa, with a staff of some five or six hundred responsible to him. Mr. Parker acknowledged, on behalf of the institute of chartered accountants of Saskatchewan, the debt the western Canadian chartered accountant bodies owe to the Manitoba institute for having done the pioneer work for the profession in the west and shown them the way towards professional organization.

Institute Enlisted Twenty-one.

The report of the council showed a membership at May 31st last of 99, consisting of 96 active members and three honorary. Nineteen of these are on military service at the present time. Two members of the institute have been killed in action since the war began, making, in all, twenty-one who have enlisted. In addition, twenty-two students and fourteen members of chartered accountants' staffs (other than students) have been accepted for overseas service. A silent toast was drunk to the absent members, and a suitable acknowledgment on their behalf was made by Lieut. J. M. Dunwoody, who has himself re-enlisted after having been awarded the D.C.M. for gallantry in the field as a trooper in Lord Strathcona's Horse and been returned to Canada to recover from wounds.

The finances of the institute have been maintained in good condition, notwithstanding the falling off in income, due to enlistment of members, and a portion of the reserve fund has been invested during the year in the Dominion war loan. The council during the past year has been in negotiation with the university over the transfer of the conduct of its examinations to that institution, and the institute endorsed the project and empowered the new council to proceed with the arrangement of details, report to be made for ratification at a later special general meeting.

Honorary Membership.

Mr. A L. Crossin, who recently retired from active membership in the institute after many years of association with its work, was elected to honorary membership, and a number of warmly-worded tributes of appreciation were paid to his valuable services, especially during the early pioneer stages of the institute's development. In his address of acknowledgment he spoke of the fact that he had early recognized the value to the business community of a live and progressive body of chartered accountants, and, while not actively engaged in the profession himself, was glad to ally himself with the pioneer efforts of those who were endeavoring to lay the foundations of a professional organization. He spoke regretfully of the passing of many of these pioneers. and urged the importance of a memorial to them that would foster an appreciation of the service they had rendered.

The personnel of the new council, with its organization, is as follows: President, John Parton; vice-president, F. C. Gilbert: S. George Brown, David Cooper, W. D. Glendinning, William Gray, B. F. Griggs, W. A. Henderson, W. Sidney Ronald, E. S. Read, G. G. Rowbotham, F. C. S. Turner. Mr. W. J. Spence was re-elected secretary-treasurer. The annual meeting of the Dominion association will be held at Banff, Alta., in August.

The following companies have increased their capital stock: Hooton Chocolate Company, Limited, with Dominion charter, from $100,000 to $150,000; Appleford Counter Check Book Company, Limited, with Ontario charter, from $100,000 to $400,000; Canada Pipe and Steel Company, Limited, with Ontario charter, from $300,000 to $600,000.

ONTARIO FIRE LOSSES

The fire marshal of Ontario, Mr. E. P. Heaton, reports that the actual fire loss of May is again inexcusably heavy, and the following leading fires will explain the figures for some of the counties and cities: Colonial Lumber Company, Pembroke, Renfrew (estimated), $125,000; Copp Stove Company, Fort William, Thunder Bay (munitions), $153,007; Ontario, Yarn Company, Markham, York, $91,277; MacLaren Imperial Cheese Company, Toronto, storage, $37,322; Hooton Chocolate Company (factory), $28,684; Cluff Ammunition Company (estimated), $250,000. Munition factory fires again bulk largely in the fire waste of the month.

The following is a summary of fires in Ontario in 1917:—

Month.	No. of fires.	Loss.	Insurance loss.	Loss not covered by insurance.
January	[illegible]	$ [illegible]	$ [illegible]	$ [illegible]
February	[illegible]	[illegible]	[illegible]	[illegible]
March	[illegible]	[illegible]	[illegible]	[illegible]
April	666	896,461	693,484	202,977
May	[illegible]	[illegible]	[illegible]	[illegible]
Total	4,157	$[illegible]	$[illegible]	$[illegible]

The most unique "cause of fire," brought to the fire marshal's attention during May, was the use of coal oil in cleaning hen roosts. The oil was spread over the roosts, then set on fire. Result: The roosts were thoroughly cleaned; so was the hen house, stable and barn! Loss, $3,600.

INDUSTRIAL CONDITIONS

The increasing demands for steel for the manufacture of munitions place the private consumer in a difficult position, and to obtain his requirements he has to pay high prices, reports the Canadian Bank of Commerce. All steel mills continue to be very active, and the same is true of textile mills. In both cases the demands upon them are beyond their capacity. Stocks in the mill warehouses are low, but in the retail stores they are fairly complete. Labor troubles are common to all industries, and as a result production is not up to capacity. This is particularly the case in the mining industry. The production of all the Canadian coal fields is much less than normal, and some anxiety exists as to the winter supply at points distant from the mines where lack of transportation facilities adds to the difficulties of the situation.

In the first quarter of this year the gold produced in Ontario was 127,692 ounces, an increase of 18 per cent., and the output of silver was 3,945,957 ounces as compared with 5,297,831 ounces in the corresponding period of 1916, a decrease of 25.52 per cent. There was a considerable increase in the production of lead and a slightly greater output of pig iron. Of molybdenite concentrates 25,073 pounds were produced in three months, or much more than for the whole of 1916.

The difficulty in procuring the necessary potash for the manufacture of explosives has led to the making of experiments in order to discover a commercially profitable method of obtaining it from feldspar, a mineral of which there are large deposits readily available in Canada. The quantity of feldspar produced in Canada in 1915 was only 14,559 tons, and in 1914, 18,060 tons, valued, respectively, at $57,801 and $70,824. It s alleged that by means of a process perfected by much costly experiment the potash contents of feldspar may now be recovered at a cost which makes it possible to meet the prices of the German product in pre-war times. Potash is necessary in many industries, and is as well a fertilizer of the first importance. Hitherto the supply has been controlled by Germany, which exported to the United States 1,340 tons per day, or only 60 tons less than the daily consumption. In the fiscal year ending March, 1914, just before the war, the quantity of crude potash imported by Canada was 15,337,370 pounds, valued for customs purposes at $274,000, or about $35 per ton. After the outbreak of the war, as the German supply was cut off, the amount imported declined very materially, and in the fiscal year ending March, 1917, the quantity imported was only 700,987 pounds, valued at $83,255, or no less than $238 per ton. There is a wide market for potash, both in Canada and abroad, and the development of the new process, therefore, gives every promise of founding another Canadian industry of national importance.

LOCOMOTIVE DECLARES DIVIDEND ON COMMON

Pellatt-Haney Proxy Campaign May Mean Attempt at Amalgamation, Says Rumor

That the proposal of Sir Henry Pellatt and Mr. M. J. Haney, who are seeking proxies for the Canadian Locomotive Company's annual meeting, is ultimately to amalgamate that company with others, is heard in financial circles, the Steel and Radiation Company being mentioned as one of the companies. The locomotive company's directors met on Wednesday and declared a dividend of 6 per cent. on the common stock, it being made clear in the announcement to shareholders that the company had not previously been in a sufficiently strong position to take dividend action on common stock. In the meantime, a campaign for proxies is in its initial stages. The company's annual meeting will be held on September 20th. Common and preference stock have equal voting powers. There is issued $1,500,000 7 per cent. cumulative preference stock and $2,000,000 common stock.

Differences with Harty Interests.

In the directors' letter to shareholders this week, it is indicated that while no objection would be raised to consideration of Sir Henry Pellatt's representation on the board, there would be objection to Mr. M. J. Haney, on account of his alleged differences with the Harty interests. It is thought that for this reason harmony would not prevail on the board and the best interests of the company and its shareholders would suffer. In the letter dated July 10th, signed by Sir Henry Pellatt and Mr. Haney, proxies are sought by them "as two of the larger shareholders of the company." The letter continues: "We are at present without direct representation on the board of directors, and we feel that many complex and unprecedented conditions may face the company as a result of the war and after-war conditions, which may warrant unusually careful consideration of the shareholders and the directors representing their interests." On inquiry, from the transfer office we learn that Sir Henry Pellatt does not hold either preferred or common stock in his own name.

Reply to Pellatt-Haney Letter.

The first letter to the shareholders from the present management and directorate, in reply to the Pellatt-Haney letter, was sent out this week and is as follows:—

"You have no doubt received a request from Sir Henry Pellatt and Mr. M. J. Haney for a proxy to vote your stock in the Canadian Locomotive Company at their annual meeting on the 20th day of September next, the only apparent reason given being that the post-war conditions are likely to be so complex that the present board of directors may not be able to cope with them, and representing that they are two of the largest shareholders.

"The present board of directors do not feel that post-war conditions are likely to be more difficult than those they have already surmounted. The past statements of the company show conclusively that they have managed its affairs conservatively and efficiently and the 1917 statement (when it appears) will again abundantly confirm this and show the company to be in a stronger and more prosperous condition than at any period of its history.

Why Should Present Directors Go?

"In view of this attempt to get control of the company, the directors feel it incumbent upon them to place before the shareholders the results that will follow if these gentlemen should succeed in obtaining a sufficient number of proxies to carry out their purpose. Neither of them have shown any reason to the board why they should be placed upon it, or why any present member should be displaced to make room for them. The directors are not desirous of monopolizing office, but they do not think it would be in the best interests of the company to have a forced entrance of a discordant element on the board that would undoubtedly lead to the resignation of all its members and, what is still more vital, to the resignation of several officers of the company to whose ability and zeal, the success of the company is largely due. The board is so constituted at present that it would be utterly impossible to reconcile old differences between certain factions and Mr. Haney, and his presence would not be conducive to harmony and the efficient operation of the company and would lead to an entirely new personnel, probably with new and hazardous schemes of policy.

"The directors have in the past and so long as in office propose in the future to follow the policy of keeping the company in such a strong financial position that interest on the bonds and dividends on the preferred stock are assured, even though we may meet periods of depression. The wisdom of this policy has been amply justified by the fact that this company is one of the very few industrial corporations in Canada that continued its preferred dividend during the years 1913, 1914 and 1915. They have felt it imprudent to pay a dividend on the common stock while large expenditures were being made on property and plant and while the company was borrowing from the banks. They also felt that it was unwise to declare such a dividend until the surplus of the company was in such a position as to justify the conclusion that the payment of a dividend on the common stock when begun could be continued with a reasonable degree of permanency.

"If you have already given a proxy without due consideration, we would ask you to reconsider and revoke it by signing the enclosed in the presence of a witness, and, if you have not yet given a proxy, we would be glad if you would execute and return the enclosed form; that is, if you wish to retain the present management."

Company has Efficient Organization.

In various interviews in Kingston, where the company's plant is situated, and in Toronto, Mr. Æmilius Jarvis, president, stated there was no friction among the present directors, who are composed of himself as president, Mr. J. J. Harty, of Kingston, as vice-president, Mr. Robert Hobson, president of the Steel Corporation of Canada, Mr. Warren Y. Soper, of Ottawa, Senator Richardson, of Kingston, Mr. John L. Whiting, of Kingston, and Mr. Frank Wallace, of Kingston, who is managing director. Mr. Jarvis said:—

"Mr. Wallace gives his entire time to the company. Mr. Harty is general manager, and attends particularly to the sales. Mr. William Casey is manager and general superintendent. The combination has proved to be an excellent one, and works much more efficiently than our distribution of work under the old arrangement, as we are at present getting out fully 30 per cent. more production with practically the same plant than we did before.

"We are going through extraordinary conditions, and, whilst I feel the locomotive business has post-war value much greater than most industrials (as a canvass made recently by the Baldwin Locomotive Works reveals the fact that it would take five years to bring the present locomotive equipment of the railways of the world up to normal), I like, however, to see my way clear before committing a company to a policy of cash distribution.

Are Astute Financiers.

"We may take it for granted that Sir Henry Pellatt and Mr. Haney, being both astute financiers, would scarcely bestir themselves in the case of a company that was not prosperous.

"Then, too, while these gentlemen have been quite willing to trust us with the management of the company before and during the war—the results evidently have pleased them as much as they have pleased the other stockholders—they profess to be much concerned as to what will happen under the same management after the war. The transparency of the whole scheme is apparent. It is a case of coming into the affairs of a company whose prosperity has been created by the very management that Mr. Haney and Sir Henry Pellatt are seeking to oust."

The Kingston Standard states that the feeling in Kingston is very much against any change in the present management of the company.

Many of the shareholders are understood to hold the view that they are under some obligation to the present directorate, more especially to President Jarvis, who put $105,000 cash into the company in 1912, being the amount of profits the shareholders had been led, by an auditor's report, to expect from a certain contract which actually was unprofitable.

Shareholders Want to Know.

In an interview with *The Monetary Times*, Mr. Æmilius Jarvis said: "No one could say what our dividend would be. The directors only recently have had final figures regarding last year's operations and upon these our dividend policy is being based. We believe that our bonds and preferred stock should be made an absolute security and to that end we have been working with good results. The company's position has been

(Continued on page 44)

Alleged Profits of The William Davies Company in 1916 on Bacon, as Indicated by Department of Labor to be Five Cents per Pound, Untrue:

Actual Profits Two-Thirds of a Cent Per Pound

THE statement issued by the Department of Labor concerning the business of The William Davies Company Limited has been given widespread circulation throughout the country and provoked public unrest.

Whatever the technical wording of the report was, the effect has been that the newspapers have published that "the profits on Bacon alone" of this Company "for 1916" were about "five millions of dollars." This interpretation of the official report is not surprising in view of certain statements that the Commissioner of the Cost of Living makes. The Commissioner is reported as saying that "There were two individual cases of profiteering in 1916 and that had these cases occurred since the passage of the cost of living Order-In-Council, he would consider it his duty to recommend that the facts be laid before the Attorney-General for consideration as to their criminality." The situation created by such erroneous and damaging statements is serious as emanating from a Government Official, from whom one looks for not only accurate statements but correct conclusions.

The William Davies Company, being a private concern, has followed the practice of all private corporations, except when it made a bond issue in 1911, in that it has not published reports of its assets and liabilities or profit and loss. The present circumstance, however, in which a Government Official has led the public to false conclusions, makes it advisable for this Company, for both the public interest and its own interest, to publish particulars of its business as well as point out the error of the statement of the Government Official.

For the last fiscal year ending March 27th, 1917, The William Davies Company bought and killed 1,04[illegible] head of Live Stock (Cattle, Hogs and Sheep). This, plus purchases of outside Meats, produced 160,000,000 pounds of Meats. The Company handled 6,550,000 pounds of Butter and Cheese, 5,650,000 dozens of Eggs, and manufactured 26,500,000 tins of Canned Goods.

The net profits on these were .68 cents (or two-thirds of a cent) per pound on meats, 1.04 cents on Butter and Cheese, 1.04 cents per dozen on Eggs, and .47 cents (or slightly less than one-half a cent) per tin on Canned Goods. These profits include profits on all By-Products derived from these accounts.

During the year the Company served at its retail stores 7,500,000 customers, the average purchase of each customer was 35c., and the net profit upon each sale was 5-8 of 1 cent.

The turnover of the Company from all its operations for the last fiscal year ending March 27th, 1917, was $40,000,000. The net percentage of profit upon this turnover, after deducting war tax, was 1.69 per cent., or including war tax 3.45 per cent.

The William Davies Company has assets of $13,385,000, of which $3,865,000 is tied up in fixed investments.

To provide the necessary facilities for the increased volume of business the Company expended $750,000 in buildings and equipment during the year.

Companies of other character present no more reasonable statement of profit and loss based upon the investments made in the business.

The William Davies Company offered to the Imperial authorities, as well as to the War Office Service (which represents the Imperial authorities in Canada) to place the output of its Factory with respect to Bacon supplies, Canned Beef and Pork and Beans at the service of the authorities, on the basis of cost plus an agreed percentage. These offers were successively declined as the authorities evidently desired to purchase in the open market, and on this basis The William Davies Company has secured War Office business by open competition with the world.

Respecting the Report of the Commissioner on the Cost of Living:—

Last Winter the Commissioner, under authority of Order-in-Council, required packers to submit statements under oath for some years back and up to December 1st, 1916, of incoming stocks of Meats, and the cost of such, as well as statements of outgoing product and the selling value. This Company represented in writing at the time that the information as specifically required was not in accordance with Packing House Accounting methods, and invited the Commissioner to send an Officer to the Head Office of the Company to examine the books for any information desired, and to secure a viewpoint as to the best way of collecting data which would be of use to the Government. This offer was declined, and there was nothing to do but fill in the information required as literally as we could determine it. For example, there was no recognition of the fact that a raw product may enter a factory under a specific classification and leave the factory as a finished product under some other classification.

We submitted a series of accurate figures based upon our interpretation of the official requirements which made no provision for charges of any description other than incoming freight and unloading charges to be included in the cost or to be deducted from the selling price. There was nothing in the report which could be read so as to determine a profit and loss statement. The very fact that with only a statement based upon cost of raw products and value of sales in Great Britain a Government Official has deduced "Large margins," "Profiteering" and "Criminality" if it had occurred since the passage of a recent Act, shows too dangerous a trifling and incapacity to be permitted to deal with any important situation. The statements of this Company have been treated by the author of this report as if the out-going product was identical with the incoming product, and from the series of reports he has singled out two items—the Bacon and Egg reports—and from them deduced an erroneous "margin" which the newspapers have interpreted as "profit." The author of the inquiry shows a strange lack of even a fundamental knowledge of simple bookkeeping and a dangerous inability to co-ordinate figures. The following are specific and outstanding errors in the report:—

The principal item that is causing excitement deals with cold-storage Bacon. The term "cold-storage" is not defined, and the public is allowed to make its own definitions. As all Bacon in a packing house is under refrigeration it is really all cold-storage, and therefore this Company's figures of cold-storage Bacon represent the complete quantity of Bacon handled in its entire Plant, whether in freezers or in process of cure for immediate shipment. That some Companies interpreted cold-storage product as "freezer" product only is evidenced by the smallness or entire lack of figures on the Bacon list for some Plants, indicating that many Firms did not submit statements of their complete stocks, as did this Company. An Official of this Company pointed out this cold-storage distinction to Mr. O'Connor and Miss McKenna in Ottawa a few weeks ago, and the failure to make the distinction after having had it pointed out evidences lack of desire for accuracy of the real information desired.

It is true The William Davies Company, in 1916, exported 97,791,000 pounds of Bacon, but we do not know how the margin of 5.05 cents per pound is arrived at by Mr. O'Connor, as there were no figures to justify such a conclusion. The probabilities are that the margin is arrived at by taking the average cost per pound of incoming product from the average selling price per pound of outgoing product. This may be a rough way of estimating the gross margin when dealing with small figures, but when dealing with figures the size that Mr. O'Connor has to deal with, a very small fraction of a cent per pound of error makes a very important difference in the total, and one must be careful to make sure that the outgoing product is the same finished merchandise of the incoming product reported on.

Allowing it to pass, however, as a rough estimate, we wish to point out—(first)—the inquiry of the Commissioner allowed only for incoming freight and unloading charges, and made no provision whatsoever for operating charges of any kind, such as labor, curing materials, refrigeration, et cetera. Such actual charges on the 97,791,000 pounds exported were $1,162,000—or 1.2 cents per pound. This amount covered all charges up to the point of placing the Bacon on cars f.o.b. packing house. In addition to this was the actual cost to land and sell this 97,791,000 pounds in England after leaving the packing house, which involved charges of 2.9 cents per pound—or $2,836,000. This 2.9 cents per pound included inland and ocean freight, landing charges, war and marine insurance, cables and selling commission to agents. The ocean freight and war risk alone would make up 2.4 cents of the charge of 2.9 cents per pound. This 1.2 cents, plus 2.9 cents—a total of 4.1 cents—must be deducted from Mr. O'Connor's margin of 5.05 cents per pound, leaving a margin of .95 cents, or slightly less than a cent per pound, which still has to be reduced because of the error of premises and because of further factors which have to be considered to determine net profits.

It is quite evident some of the other packers did not show selling values in the country in which the goods were sold—a proceeding quite proper, as the forms submitted to be filled in were indefinite and ambiguous, thus permitting without charge of evasion a variety of interpretation as to the information required. It is thus possible that of all the figures submitted by the different packers that no two sets of costs and sales prices are determined at the same common point. It is this difference of interpretation of what was required that accounts for the difference of the alleged "margin" made by the different companies. Common conclusions, however, have been drawn by the author of the report from varying bases of premises.

The figures of the Egg business were submitted on the same basis as Bacon, and similar deductions must be made.

(Second)—The above margin is further reduced in that the author of this inquiry singled out the Bacon figures as an item in which the selling price shows an alleged improper advance over cost, but he did not give us credit for the statements of other products, of which figures were submitted, the selling prices of which were under cost. The reason of this was that through failure to inquire the Department entirely overlooked the fact that product may come in as pork, and, through the process of manufacture, go out as Bacon, or, in another instance, enter the factory as beef and go out in the form of canned meats; for example: much of the product which came in as pork, and which was entered on the pork sheet submitted to the Commissioner—about which he makes no mention—was cured and left the factory in the form of Bacon, and was, therefore, entered on the outgoing side of the Bacon sheet—the result is that the Bacon sales are increased by this amount over the incoming stocks of Bacon, and, likewise, the sheet showing sales of pork is reduced by the amount that went out in the form of Bacon. If the Department takes one set of figures that show favorable to the Company they should take another set of figures that show unfavorable, as the principle in either case is the same, and failure to do so looks as if the author of the report was exercising more enthusiasm than sound judgment in his investigations.

(Third)—It is queried in the report, that "if the margin of 3.47 cents," alleged to have been made in 1915, "was satisfactory, why was it necessary to show increased margin in 1916?" Assuming again for the moment the soundness of the premises in asking such a question based on an erroneous "margin," it will be found that the increased margin is chiefly absorbed in increased ocean freight rates and war risk insurance in 1916, of which apparently the author of the report was in ignorance.

The Company does not challenge either the legal or moral right of the Government to investigate business enterprises when public interest directs such an investigation should be made. If an investigation of the packing and meat business is ordered, the Company will place at the disposal of the Government not only the data it would be required to supply under Order-in-Council directing that inquiry be made, but will place the experience of its officers at the disposal of the investigating committee, if it is considered they can render any service which will be of value. The Company has not now—nor at any time during the fifty years of its operation—anything to conceal in method or practice of carrying on its business. It does, however, claim the right to conduct its export busi-

[illegible] Government civil servants—especially when the conclusions drawn from the data asked for are improper and false.

One of Canada's [illegible] effect of which is to create an [illegible] able and essential a wealth-producing power and, in the long run, are harmful to the very people that the statement seeks to benefit.

If the passing out of existence of a corporation such as The William Davies Company, or if nationalization of packing houses would materially and permanently [illegible] in view of the present world tragedy it ought to be consummated without delay. The fact of the matter is, however, that with millions of people in Europe turning from producers into consumers because of [illegible] and the tremendous destruction of food products incident to war, there is no remedy for the high prices of food while such conditions last, except the remedy of thrift and increase of production.

Long before there was talk of a Food Controller in the United States or Canada, The William Davies Company [illegible] Government at Ottawa [illegible] Food Controller with full power to do what he saw fit, as we realized at that time the upward tendency [illegible] effort. At the most a great deal cannot be done in reducing food prices while currency is inflated and until the scale of prices of all kinds of commodities declines also. [illegible] by a Food Controller. We wish to point out that nothing at all can be accomplished unless the data secured are accurately and clearly made and the deductions therefrom sound. Only public harm arises from dangerous incompetency in the haphazard collection and careless use of important figures.

As far as The William Davies Company is concerned this terminates all public statements of the Company, and it will pay no more attention to speculative and haphazard statements made either by newspapers or civil servants. The only further statement that will be made will be at an official investigation.

E. C. FOX, General Manager

THE WILLIAM DAVIES COMPANY, LIMITED

Toronto, July 17th, 1917.

TARIFF NEEDS REVISION, BUT——

Any Material Lowering of Rates Will Be Suicidal, Says Colonel Cantley

While admitting that the tariff may need revision, Colonel Thomas Cantley, retiring president of the Canadian Manufacturers' Association, expressed his regret at "the agitation conducted in certain quarters in favor of a general lowering of the tariff." If any scheme of Imperial preferential or Allied reciprocal tariffs is brought into operation, tariff revision will necessarily have to be fairly general, but any material lowering of the tariff, at a time when Canadian capital and Canadian labor are facing one of the most critical periods of their existence, can only be suicidal, said Colonel Cantley, who continued: "Canadian manufacturers do not ask for anything more than a chance to produce, and to pay their employees a fair living wage. Under free trade we could not produce, and our employees in consequence would have to seek work elsewhere, probably in the United States.

Tariff and Wages.

"Under a high tariff we could pay high wages and still make large profits for ourselves, but only by loading other forms of production with burdens that would check their growth. Somewhere between these two lies a happy medium under which all can live and let live, and it is in maintaining a moderate protective tariff that we bespeak the hearty co-operation of other producing forces. We must have food to sustain our manufacturing forces. We must have manufacturers to sustain our food producing forces. Why should we not aim to be self-reliant, and supply both lines ourselves? It is quite obvious that if we can and do so we will be the richer and better for it.

"In the troublous times still ahead of us this country will need all the help she can secure from men of enterprise, from men of business capacity, who, when opportunities present themselves, can quickly secure and employ the requisite capital to bring profitable industry into operation. Canada can best obtain that form of help by shaping her fiscal policy so as to create opportunities for home and foreign business, for, given opportunities, capital and enterprise will do the rest.

"The wisdom of a sound fiscal policy could find no better proof than in the magnificent service rendered by our manufacturers since the outbreak of the war. During 35 years of moderate protection Canada was able to build up for herself a large and varied industrial equipment of first-class efficiency. The speedy adaptation of that equipment, supplemented by large investment in new plant, probably exceeding $25,000,000, for the production of munitions and war supplies, not only enabled Canada to render assistance of immeasurable value to the Allied cause, but it also enabled her to keep her workmen fully employed at high wages at a time when but for her possession of that equipment, and but for the enterprise of her manufacturers Canadian artisans would have had to seek employment beyond her borders.

National Policy of Protection.

"Our national policy of tariff protection never needed any justification, for the results always spoke for themselves, and if it did, then surely the wonderful achievements of the past two-and-a-half years have furnished that justification in abundant measure, and discredited the free trade propagandists who have consistently sought to belittle the importance of our manufacturing industries. These industries have done yeoman service in the cause of freedom, not the least important features of which have been the contributions they have enabled Canada to make to the army in fighting men, and to the treasury in money.

"These industries of ours will continue to give a good account of themselves under a policy of moderate protection, for notwithstanding new conditions, opportunities will arise which discerning manufacturers will be quick to take advantage of. Their enterprise has already been evidenced in the shipment of large amounts of railway equipment and material to the Allies—to reach its sphere of usefulness some of this equipment has had to be freighted half-way around the world. Further enterprise has been manifested in the attempts to build steel ocean-going ships, an industry new to Canada, but one that can be made an asset of great value to this country if given reasonable encouragement while endeavoring to establish itself."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Lake Superior Corporation.—Negotiations have been under way between Lake Superior stockholders and the bondholders' committee representing the Flemming interests, to elect a new president of the company who shall be an experienced steel man. Such a man has been approached and was inclined favorably to the proposition. The directors, on their recent visit to the plant were shown contracts which will keep the steel plant running at full capacity until July, 1918, signed with the Canadian government, at prices ranging around $70 a ton.

Steel Company of Canada.—In co-operation with American interests, the directors propose to acquire certain ore and coal properties situated in an advantageous location in the eastern States, from which such of its supply as is necessary in the future will be drawn. Hitherto the company has not controlled its supply of raw material, although it has enjoyed the reputation in the steel trade of having the benefit of some exceptional contracts.

It was stated that the plans included the construction of a considerable plant for the production of coke. The Steel Company of Canada has been the only large domestic steel corporation without its own ore and coal reserves. The capital expenditure involved in the new policy is said to be relatively small.

Canadian Car Company.—Application has been made to the Montreal Stock Exchange for the listing of an additional $750,000 common shares of Canadian Car & Foundry Company, Limited. It is understood that these shares were issued in lieu of cash payment of commissions in connection with the Russian shell contract of the company.

Reports bearing on the new issue gave rise to some perplexity. With the common stock selling around 32, obviously the issue could not have been a matter of new financing in the ordinary course of affairs. When $250,000 new common stock was sold in the early days of the Russian contract, the old stock was selling above par and the company realized something close to par for the new shares. The mystery was cleared up when it was verified that the new stock was being issued in part settlement of certain claims for the shell commissions, which have been in dispute for some time.

Tooke Brothers, Limited.—The financial statement for the year ended May 31st last, reports the largest profits in the history of the company. Net trading profits, together with returns from investments, footed up $111,954, against $109,400 in 1909-10, the best year previously, and only $26,306 in 1914-15, when the company's business was brought virtually to a standstill by the war in Europe.

After deducting $14,000 for depreciation, bad debts reserve and directors' fees there was a net balance of $97,954, equal to just a shade less than 10 per cent. earned on the $985,000 preferred stock.

A comparison of earnings for three years, given below, shows that the net available for dividends in the past year was $18,219, or 23 per cent., higher than in 1915-16, and no less than $81,648, or 500 per cent., higher than in 1914-15. Profit and loss figures for the three years follow:—

	1917.	1916.	1915.
Net profit	$111,954	$98,485	$26,306
Reserve, etc.	14,000	18,750	10,000
Balance	$ 97,954	$79,735	$16,306
Preferred dividend	68,950	17,237	......
Balance	$ 29,004	$62,498	$16,306
Previous balance	134,016	71,518	55,211
Total balance	$163,020	$134,016	$71,518
Dividend arrears	51,711		
Net balance	$111,309		

Total current assets at the end of the past year were $1,070,159, against $886,013 a year ago, and current liabilities $471,622, against $264,551. Bills payable increased, but there was a still larger gain in inventories, and in view of the active demand for goods the liquidation of that item should realize a highly satisfactory profit this year. Comparisons of balance sheet figures for two years follow:—

Assets.

	1917.	1916.
Cash	$ 3,552	$ 2,972
Bills receivable	7,725	28,865
Accounts receivable	488,265	492,330
Inventory	505,921	355,898
Insurance	4,095	5,946
Plant, etc.	568,005	495,377
Good-will	720,034	720,034
Total	$2,298,288	$2,101,424

Liabilities.

	1917.	1916.
Bills payable	$ 341,225	$ 153,887
Accounts payable	113,159	110,663
Dividend payable	17,237	....
Contingent accounts	46,128	41,128
Preferred stock	985,000	985,000
Common stock	650,000	650,000
Depreciation reserve	34,228	26,728
Profit and loss balance	111,309	134,016
Total	$2,298,288	$2,101,424

Brazilian Traction, Light and Power Company.—The fourth annual report, just issued, shows that an increase of almost 8,000,000 milreis in gross earnings of the Brazilian company resulted in the revenue, after payment of all fixed charges, increasing from $5,612,000 in 1915 to $6,019,000 in 1916. In the same period the surplus of net revenue available for preferred and ordinary dividends increased from $5,394,000 in 1915 to $5,674,000 in 1916. Earnings of the company received in Brazilian currency, have to be converted into Canadian currency. The exchange rates prevailing between Brazil and New York determine the revenue as expressed in dollars. Brazilian exchange has recently improved after the serious break of 1914, although not in the same ratio as the company's earnings. The approximate rate of exchange in 1916 was 12 pence, which was also the average in 1915, and this was four pence below the approximate rate of 1913. No improvement occurred during 1916.

The gross earnings of the five telephone companies for the past year were 5,778,281 milreis, being an increase of 833,114 milreis, or 16.84 per cent. The operating expenses were 3,089,813 milreis, or 53.47 per cent. of the gross earnings, and the net earnings were 2,688,468 milreis, as compared with 2,264,704 milreis in 1915, an increase of 18.7 per cent. But for the telephone business the Brazilian company would not have been able to make so good a showing last year, and the contributions from this department promise to become a factor of increasing importance in the Brazilian company's income accounts.

The growth of the company's business is shown by the following comparison of the results of the different departments in the past three years, the totals of the items starred being in millions:—

	1916.	1915.	1914.
Tramways—			
Car mileage	* 34,820	* 33,884	* 34,311

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Russell, Man.—An issue of $[illegible] 6 per cent. [illegible] bonds has been awarded to Nay and James, Regina.

Rossland, B.C.—Tenders for $30,000 6 per cent. 20-year school debentures will be received up to August 14th. J. A. McLeod, city clerk, Rossland, B.C.

Vancouver, B.C.—The by-law having been voted down by the ratepayers, the city has decided to cancel the proposed issue of debentures, so Mr. G. F. Baldwin informs *The Monetary Times*.

Louiseville, Que.—Credit Canadien Incorpore, Montreal, has purchased an issue of $125,000 5½ per cent. serial bonds, issued by the city of Louiseville, Que. The proceeds of the loan will go to consolidate a floating debt contracted for waterworks some years ago.

Montreal East, Que.—Credit Canadien Incorpore has purchased $50,000 20-year 6 per cent. bonds, issued by the school commissioners. This is the first debt contracted by this commission, and the purpose of the loan is to provide a school building and grounds.

Kitchener, Ont.—Messrs. Mulholland, Bird and Graham Company, Toronto, has been awarded the two recent issues made by Kitchener. The first was $20,000 6 per cent. 5-year patriotic bonds, and the other $7,000 6 per cent. 3-year soldiers' insurance bonds. The price paid was 99.52.

Halifax, N.S.—The Royal Bank has advanced the city a temporary loan of $200,000 at 5½ per cent., secured by the hypothecation of bonds. All advances will be made by way of overdraft. Should the city desire to dispose of all or a portion of its bonds, it may do so and apply the proceeds to reduction of the advances.

Trenton, N.S.—Wm. Fraser, town clerk, tells *The Monetary Times* that for the $35,000 issue an option at 88 and interest was given for one month to the Eastern Securities Company. Later, the bonds were sold at 90 per cent. and interest to Captain Peter Graham, contractor, New Glasgow; amount to be the amount of sewer installed.

St. Catharines, Ont.—Stuart K. Watt, city treasurer, tells *The Monetary Times* that the city council is gratified with the result of its recent sale of $291,649 5½ per cent. serial bonds. The tender of the Canada Bond Corporation was 95.822, or $279,465, and the bonds were, therefore, sold at a yield basis slightly lower than 6 per cent., which is very satisfactory.

Winnipeg, Man.—The J. P. Morgan Company, of New York, have received $207,000 5 per cent. debentures, thus completing the second bond conversion and enabling the cancelling of $50,000 worth of Winnipeg, 1914, 4 per cent. registered stock. This total amount of city stock cancelled by the bond conversion scheme now amounts to $1,600,882, this being the result of the $37,790,956 worth of new stock sold.

British Columbia.—The following certificates have been issued by the municipal department of the province:—Victoria—By-law No. 1797, local improvement paving, $28,068.33, 10 years, interest 4½ per cent., payable half-yearly, June 21st, 1917; by-law No. 1798, local improvement sidewalks, $2,483.16, 10 years, interest 4½ per cent., payable half-yearly, June 21st, 1917; by-law No. 1799, local improvement paving, $7,039.93, 10 years, interest 4½ per cent., payable half-yearly, June 21st, 1917; by-law No. 1800, local improvement paving, $7,413.88, 10 years, interest 4½ per cent., payable half-yearly, June 21st, 1917; by-law No. 1801, local improvement paving, $8,508.63, 10 years, interest 4½ per cent., payable half-yearly, June 21st, 1917; by-law No. 1960, local improvement consolidation, (consolidating the amounts to be borrowed under the foregoing 5 by-laws), $53,813.03, payable in annual instalments, 1 to 10 years, interest 5 per cent., payable half-yearly and debentures thereunder, June 21st, 1917.

Calgary, Alta.—The following is Comptroller Wood's statement, with reference to the [illegible] of the paving by-law from five to fifteen years:—By-laws, $100,000; less, on hand to spend, $15,155.87; cost of plan on hand, $81,842.11; Depreciation reserve No. 1 plant, $[illegible]615.55; No. 2 plant, $7,150; total, $26,765.55; sinking fund, 1916, $13,075.27; book value of the plant, December 31st, 1916, $[illegible] [illegible] if the [illegible] fund of $13,075.27 is set up each year till due date, the bonds will be paid from the sinking fund, leaving the reserve, $26,765.55, to be expended on the plant to keep it in a workable condition. If the life of the bonds be extended by act of the legislature or by refunding when due, the reserve should still be sufficient for the life-time of the plant. The life of the plant was fixed by the engineer as at least ten years. If the bonds were made payable at the end of fifteen years the [illegible] if for ten years the sinking fund would be $8,329.09, and if for five years it would be $18,462.71.

Regina.—The city's financial statement for the year ended December 31st, sent to *The Monetary Times* by Mr. J. E. Snowball, city treasurer, shows a capital surplus of $5,867,908. The bonded debt is $10,566,520; the revenue surplus is $87,647. These figures appear in the consolidated balance sheet. The balance sheet of the general fund shows a capital surplus of $5,182,137, a revenue surplus of $87,647 and a bonded debt of $5,773,743. The following is a statement of temporary debentures issued and hypothecated against three years 6 per cent. coupon bonds:—Waterworks extension, $288,000; electric light and power plant, $195,000; storm water sewers, $136,000; hospital extension, $140,000, and street railway extension, $200,000; total, $959,000.

The following statement shows the borrowing power of the city at December 31st, 1916:—Net assessment, 1916, $51,240,265 borrowing power, 20 per cent., $10,248,053; gross debenture debt, $6,354,934; consolidated stock, $3,252,585; coupon bonds, $959,000. Deduct: Local improvement debt, $1,880,280; sinking fund, cash and invested, $918,897; collegiate institute debt, $282,500; street railway debt, $1,575,234. Balance of borrowing power, $4,338,445.

Halifax, N.S.—The following are official details, supplied to *The Monetary Times* by Mr. J. J. Hopewell, city treasurer, of the two offers received for the city's bonds, both tenders being refused:—

Harris, Forbes & Company, Incorporated:—In reference to your call for tenders for $195,500 34-year 5 per cent. bonds, to be dated July 1st, 1917, due July 1st, 1951, we will make you the following proposition. For $55,000 sewer bonds described in your circular, we will bid you 83.57, which is at the rate of $835.70 per $1,000 bond, with interest added to date of delivery, provided you will grant us option on remainder of $199,500 offered for sale at same price, option to be good until August 1st, 1917. Further provided that bonds are in coupon form of $1,000 denomination, bearing interest at rate of 5 per cent. payable half-yearly, January 1st and July 1st, and that principal and interest be payable in gold coin of present standard weight and fineness in Canada or New York City, at option of holder. That bonds be direct and binding obligation of city of Halifax at large; that we be furnished prior to delivery of same with legal papers providing legality of issue to complete satisfaction of our solicitors. This bid is made for immediate acceptance or rejection by you. If you require any deposit we will have Merchants Bank of Halifax pay you such amount as is satisfactory to guarantee our purchase. Kindly send complete list of bids and bidders.

J. C. Mackintosh & Company:—Referring to your request for tenders for city of Halifax debentures, we beg to offer for such an amount of 5 per cent. debentures, maturing 1951, as would provide fifty thousand dollars ($50,000), and would pay eighty-seven point twenty-seven per cent. (87.27 per cent.) and accrued interest, provided we are given an option on the balance at the same rate for a period of thirty days, or provided you will undertake not to offer them elsewhere during that period.

Prince Rupert, B.C. — The report of the auditors, Riddell, Stead, Hodges and Winter, notes that the corporation obtained the right under a private bill, passed by the provincial legislature on March 28th, 1916, to change the nature of certain debentures originally authorized to be issued upon the sinking fund plan to debentures issued upon the annuity instalment or serial bond plan, the difference between the two classes of debentures being that in sinking fund debentures the city pays the interest annually, and sets aside an annual sum as a sinking fund to provide for the redemption of the debentures at maturity, whereas in the case of the annuity instalment or serial bonds, the city pays a definite amount annually for the term of the bonds, which in this case is thirty years, these thirty equal annual payments consisting of both principal and interest, being sufficient during the term of the bonds to pay the interest and also redeem a portion

of the principal each year. Since the act was passed, and during 1916, arrangements were completed by which the city made definite and final arrangements to dispose of $[illegible] worth of these serial debentures at a price of 87½. At the date of this report debentures of the nominal value of $1,138,000 had been actually disposed of. The balance is represented by treasury notes exchangeable for the debentures amounting to $478,000, which the city disposed of at 95, the purchasers now having on deposit to the credit of the city the sum of $38,827 as a guarantee that the treasury notes will be exchanged for the serial debentures. As soon as this transaction is completed and the treasury notes are exchanged, then the finances of the city can be said to be on a permanent and sound basis. The sale of these serial debentures at 87½ resulted in a nominal loss to the city of $202,000, all of which has already or will be charged to the various capital accounts under the proper by-laws as soon as the transaction is finally completed, in accordance with the terms of the private bill before referred to. Certain instalment debentures, amounting to $270,000, have been authorized, but not issued, as the work intended to be undertaken from the proceeds of these debentures has been indefinitely suspended.

Saskatchewan.—The following is a list of debenture applications granted by the local government board from July 3rd to 6th, 1917:—

School Districts.—*Lakeside, $2,000 20-years not ex. 8 per cent. annuity. A. H. Campbell, Mayview; Crocus Prairie, $2,000 10-years not ex. 8 per cent. annuity. Mrs. A. A. Hamilton, Gray; Chippewa Hill, $1,200 10-years not ex. 8 per cent. instalment. M. A. Perry, Major; Curzon, $2,000 10-years not ex. 8 per cent. instalment. C. A. Stewart, Bengough; *Beswick, $2,000 10-years not ex. 8 per cent. annuity. T. J. Edwards, Rod Pheasant; Beattie, $2,000 10-years not ex. 8 per cent. annuity. J. Flack, Rowletta; Barton, $500 10-years not ex. 7 per cent. instalment. A. B. Woodward, Marquis.

Rural Telephone Companies.—Leross, $10,500 15-years not ex. 8 per cent. annuity. A. H. Mills, Leross; Palmer, $16,000 15-years 7 per cent. annuity. S. H. Kring, Palmer; Thornfield, $5,400 15-years not ex. 8 per cent. annuity. E. E. Hamerston, Venn; North Forres, $53,500 15-years not ex. 8 per cent. annuity. L. A. Moore, Hatton; Leo, $8,300 15-years not ex. 8 per cent. annuity. F. G. Salisbury, Hanley; Theodore Whitesand, $6,300 15-years not ex. 8 per cent. annuity. A. G. Tracey, Theodore; Logberg, $3,900 15-years not ex. 8 per cent. annuity. G. Eglisson, Logberg; North West Webb, $3,400 15-years not ex. 8 per cent. annuity. C. Williams, Webb; Winton Park, $15,600, 15-years not ex. 8 per cent. annuity. J. R. Haunsell, Birch Hill; Battlevale, $2,000 15-years not ex. 8 per cent. annuity. J. A. Morrison, Waseca; Eyebrow, S.W., $9,800 15-years not ex. 8 per cent. annuity. Wm. Hills, Eyebrow; Talmage, $1,800 15-years not ex. 8 per cent. annuity. W. T. Crawford, Talmage; Durham, $500 12-years not ex. 8 per cent. annuity. C. C. Bray, Wolseley; Odel, $4,500 15-years not ex. 8 per cent. annuity. A. P. Peterson, Dundurn.

Town.—Rosthern, $23,000. K. A. Reeder, Rosthern.

The following is a list of debentures reported sold from July 3rd to July 6th, 1917:—

School Districts.—Wolverine Lake, $2,000. Canada Landed and National Investment Company, Winnipeg; Lawson, $1,000. Canada Landed and National Investment Company, Winnipeg; LaMartine, $1,900. Canada Landed and National Investment Company, Winnipeg; Green Mount, $2,200. Canada Landed and National Investment Company, Winnipeg; Colville, $500. Wood, Gundy and Company, Saskatoon; Davidson, $8,000. Nay and James, Regina; Aird, $1,800. Goldman and Company, Regina; Niobe, $1,800. Goldman and Company, Regina.

Rural Telephone Companies.—Perdue, $45,400. H. O'Hara & Company, Regina; Nadeauville, $20,200. W. L. McKinnon and Company, Regina; Carlton, $[illegible]. W. L. McKinnon and Company, Regina; Woodrow Co-Operative, $17,300. J. A. Thompson, Winnipeg; Strongfield, $5,000. J. A. Thompson, Winnipeg; Grassy Hill, $9,000. W. L. McKinnon and Company, Regina.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Meryton, $2,000, 10-years not ex. 8 per cent. annuity. J. W. Russell, Davidson; *Bird's Eye View, $600, 6-years not ex. 8 per cent. annuity. E. W. Johnson, Parkbeg; *Wymark, $2,000, 10-years not ex. 8 per cent. annuity. P. H. Peter[illegible], W[illegible]; [illegible] $[illegible], 5-years not ex. 8 per cent. annuity. W. G. Llewellyn, Ituna; *St. Eloi, $280, 10-years not ex. 8 per cent. annuity. L. M. Tindall, Kindersley; Colonsay, $7,000, 20-years not ex. 8 per cent. instalment. John Roberts, Colonsay; Fairyland, $1,900, 10-years, not ex. 8 per cent. annuity. F. F. Ball, Wilkie; Quill Lake View, $1,200, 10-years not ex. 8 per cent. instalment. S. W. Norris, Quill Lake.

Rural Telephone Companies.—Beatty, $4,800, 15-years not ex. 8 per cent. annuity. W. M. Sproule, Melfort; Rock Creek, $2,700, 15-years not ex. 8 per cent. annuity. O. J. LIFE COMPANIES DOING A BIG BUSINESS

The Great-West Assurance Company, Winnipeg, wrote in Canada over $4,000,000 of life insurance. The company's Quebec organization challenged the rest of the eastern division, with the result that the entire division wrote in June over $3,000,000, divided as follows: Ontario, $1,191,075; Nova Scotia, $286,925; New Brunswick, $151,500; Prince Edward Island, $24,500; total, $1,654,000; Quebec, $1,346,000. Mr. C. H. Carpenter is superintendent of eastern agencies. The company's Alberta organization set out to write $391,000, and managed to obtain $407,518 new business. Mr. C. P. McQueen is the Alberta manager. The company's head office at Winnipeg says: "We believe we will again this year show an increase of business in force in Canada for the first six months of 1917 larger than the increase of any other Canadian company for the whole of the year 1916."

Few exceptionally large policies were written, scarcely any larger than $25,000. The business was general all over the territory, and not confined to one or two districts. One district agent in Ontario wrote 37 applications for a total of $50,000; another wrote 37 applications for $41,000, Twenty men of the Ontario division wrote over $20,000 each. The men of the Ottawa division wrote 149 per cent. of their average allotment per man for the month.

June was a good month also for the Crown Life. Applications totalled $402,512. The net insurance gained was $206,274. During the six months of 1917 applications totalled $2,311,053, and policies issued $2,097,138. The net insurance gained was $732,060, about 35 per cent. of the issue. The total insurance in force June 30th was $15,185,206. Premium collections for the first half of 1916 and 1917 were, respectively, $215,047.50 and $255,527.02.

Mr. E. J. Lesperance, the Montreal manager of the Imperial Life, has probably written more life insurance during the past year than any other individual agent in Canada. His personal business, from July, 1916, to July, 1917, totals approximately $1,000,000.

SUBSTANTIAL TARIFF PREFERENCES

Canadian Manufacturers Hope to Have Their Help to Enter All British Countries

The fiscal policy needed for the upbuilding and welding of the British empire is the general adoption by all British countries of tariff preferences for Empire products corresponding to the preferences which are granted to Empire products under the tariff of Canada. This is the opinion expressed in the report of the tariff committee presented at the annual convention of the Canadian Manufacturers' Association at Winnipeg last week. The hope is also expressed that arrangements may be consummated whereby Canadian products may find entrance into all British countries under substantial tariff preferences. The report points out that in trade questions arising from the war, international thought has been focused on customs tariffs as the most efficient instrument by which the resources of nations may be developed and their use controlled and directed. One result of the shifting events and constantly changing conditions throughout the three years of this terrible war, is intense conviction throughout the Empire that in the period preceding the war, the German government deliberately took advantage of the freedom of British commercial laws and practice to acquire control of "key" industries so as to cripple the progress of British countries in peace, and prevent their development of facilities for turning out war munitions.

Principle of Conference.

"It has been made clear to every one," says the report, "that the nation which develops capacity to utilize all its resources, strengthens itself to the highest pitch against the possibility of national disaster. With the view to so developing their resources, the British Empire and Allied nations, within the year, convened an economic conference at Paris, where the policies necessary to attain such development were determined upon. One important principle which was laid down by the conference calls for the control and development of resources by means of customs tariffs. Another step in the same direction is represented in the report of a committee appointed by the British government to investigate the entire subject, and which has recommended on trade relations, that:—

"1. In the light of experience gained during the war, we consider that special steps must be taken to stimulate the production of foodstuffs, raw materials and manufactured articles within the Empire wherever the expansion of production is possible and economically desirable for the safety and welfare of the Empire as a whole.

Preference to Dominions.

"2. We therefore recommend that his Majesty's government should now declare their adherence to the principle that preference should be accorded to the products and manufactures of the British Overseas Dominions in respect of any customs duties now or hereafter to be imposed on imports into the United Kingdom.

"3. Further, it will in our opinion be necessary to take into early consideration, as one of the methods of achieving the above objects, the desirability of establishing a wider range of customs duties which would be remitted or reduced on the products and manufactures of the Empire, and which would form the basis of commercial treaties with Allied and Neutral Powers.

"Announcement also comes from France that the government of that country has taken measures looking to the abrogation of existing commercial agreements or treaties, the object being to acquire full liberty of action for carrying out the resolutions adopted at the Economic Conference of the Allies.

Preferences for British Products.

"The great plan of imperial and colonial development by means of customs tariff preferences for British products, and the further policy of specially favorable customs legislation in order to stimulate trade with the Allied countries, coupled with the fact that almost every country has felt compelled to adopt large increases in customs duties to obtain emergency revenue, seem to make it perfectly plain that general world-wide tariff readjustments, that will produce widespread international consequences in the development and progress of nations, must result from the war

"In connection with these matters, the question has been before the tariff committee as to the practicability of removing all customs duties on importations into Canada of the products of the United Kingdom. The subject is of prime importance to labor, for any such removal of customs duties could not fail to reduce the price of labor in Canada to the basis prevailing in the United Kingdom. Indeed, manufacturers operating very numerous industries in Canada would find it impossible to pay as high a wage rate as the manufacturer in the United Kingdom. Yet our more rigorous climate really makes it necessary that labor shall receive substantially higher pay in Canada—for the home costs more to build, to heat, and to maintain, and in numerous other directions the wage earner's expenses are greater than in Great Britain. Therefore, under such a fiscal policy, labor would inevitably be driven from Canada to seek employment in the protected labor markets of other countries. Another fact to be remembered is that the Federal government of Canada must assure to this country an enormous annual revenue to meet its obligations. The proposal also needs to be thought about in the light of knowledge, that Canada would of necessity maintain her tariff against other countries, and, also, that foreign countries must continue their present policies of excluding importations generally except upon payment of substantial customs taxation.

Many Important Considerations.

"Without going into the details of other considerations, such as:—

"(a) In normal times the discrimination in favor of imported goods owing to the cheaper through freight rates from Europe to interior points in Canada as compared with the local rates on similar goods of Canadian production;

"(b) The higher interest charges for money in Canada;

"(c) The larger capital investment required to meet the greater cost of factory construction and operation owing to the more rigorous climate of Canada; and,

"(d) The fact that revenue now derived on importations from the United Kingdom would have to be obtained by the Federal government by direct taxation.

the committee considers it sufficient to draw attention to the fact that after the war the United Kingdom may still admit numerous products of foreign manufacture free of duty, whilst the same products when imported into Canada may be subject to customs tariff dues. And if such imported materials, when advanced in manufacture in the United Kingdom, were admitted into Canada free of duty, the Canadian manufacturer of like finished articles would be discriminated against, and, being unable to compete, would be forced to close his factory. To illustrate: Before the war wire rods were imported into Great Britain in a large way free of duty and there made up into wire products. After the war the United Kingdom may still admit wire rods free of duty; and it is plain that with the wire products as made in the United Kingdom being sent into Canada free of duty, our own tariff on foreign-made wire rods and other wire products would neither produce revenue nor assist in the maintenance and building up of Canadian manufactories in rods and wire products.

Is a Discriminatory Condition.

"The same discriminatory condition would apply practically in every line of industry, and would result in strangling manufactories in Canada. These same results would prevail generally under an extension of the British preferential tariff rate from the basis of the present average of 33⅓ per cent. preference, to a preferential basis of 50 per cent. Even under the present preferential tariff there are outstanding examples where materials not produced in the United Kingdom or Canada enter the former country free of duty, and are manufactured there into finished products, which are shipped into Canada under the preferential customs rate of 22½ per cent., whilst the original materials if imported by Canadian manufacturers are dutiable at 35 per cent.

"If such discriminatory tariff rates were general, and they could not fail to be general under a tariff which would admit the manufactures of the United Kingdom at one-half the customs rates applying against the same goods imported from other countries, there would be a widespread strangling of manufacturing industries in Canada. Before leaving this subject it seems worth while to recall the fact that the preferential tariff rates of Canada encourage and stimulate the importation of British products by providing specially low customs dues, averaging one-third lower than the customs dues payable on similar goods not British—without any resultant

Service for Women

In the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

A SQUARE DEAL IN LIFE ASSURANCE

"First in the Northwest."

Do YOU know anything about "loadings" ? ? ?

When the average Life Assurance Actuary figures out your premium he first finds the "net" premium, then adds to it a percentage called a "loading" to provide for expenses.

This method has been condemned by world famous actuaries for over half a century.

The Northwestern is the only Canadian Life Company that uses a scientific method of providing for expenses, and this results in

LOWER PREMIUMS

Assurance Company
WINNIPEG . CANADA

advantage as a rule to exports of the products of Canada to other parts of the Empire. New Zealand, British South Africa and certain of the smaller British West Indies, grant tariff preferences to certain Canadian products. But the products of the Dominion of Canada receive no tariff preference over foreign goods in the markets of Great Britain, Newfoundland, Jamaica, India, Ceylon, the Straits Settlements, Australia, Egypt and numerous smaller British countries."

MANITOBA INCREASES INTEREST RATE

The Dominion government has acceded to an application made by Manitoba to pay 5 per cent. instead of 3 per cent. interest on school land moneys. This means that the revenue of Manitoba is increased approximately $80,000 per year, an additional 2 per cent. being given on a $4,000,000 investment. This additional money will be put into school improvements.

GRAVE FOOD PROBLEM

Drastic food regulations have been passed by the United States House. Canada has appointed a Food Control Commission. Great Britain has long been subject to food regulations. Altogether ten nations are on rations and six are in distressing lack of food. The Allied nations are co-operating to solve the food problem. Such co-operation is essential in the interests of their fighting forces. Canada has a great duty to perform in helping to feed the other nations of the Entente as well as feed herself. She has further an imperative financial duty. The savings of the nation are necessary to the support of the men at the front. By the practice of economy, national wealth can be saved for investment in War Savings Certificates. The National Service Board is appealing for such investment. It is asking every man and woman in the country to save their dollars and buy war bonds. The opportunity for war service is given to everybody. Have you taken advantage of that opportunity?

AREAS SOWN TO FIELD CROPS

For wheat, oats, hay and clover the areas now reported to the census office, Ottawa, are somewhat higher than the figures of a month ago, when the seeding had not been completed; but for other crops, including barley, rye, peas and mixed grains, they are less. For wheat the acreage sown is now placed at 13,549,650 acres, as compared with 14,897,090 acres, the area sown, and with 12,900,590 acres, the area harvested in 1916. Thus the area sown to wheat, whilst 9 per cent. less than the area sown for 1916, is 5 per cent. more than the area harvested for 1916. Of the total area under wheat, 809,250 acres were sown last fall and 12,740,400 acres were sown this spring. In the three prairie provinces the total area sown to wheat is 12,604,550 acres, comprising 2,448,850 acres in Manitoba, 7,689,700 acres in Saskatchewan and 2,466,000 acres in Alberta. The acreages for all Canada now estimated as sown to other early grain crops, as compared with the harvested areas of 1916, are as follows: Oats, 11,806,000 against 9,875,346; barley, 1,819,900 against 1,681,180; rye, 153,900 against 147,170; peas, 151,830 against 150,280; and mixed grains, 409,140 against 397,770. Hay and clover are estimated to occupy 7,824,000 acres as compared with 7,892,932 acres, and alfalfa, 86,500 acres as compared with 89,472 acres. For later-sown cereals and hoed crops the estimated areas, as compared with the areas harvested last year, are as follows: Buckwheat, 336,400 acres as against 341,500 acres; flax, 695,750 acres against 605,700 acres; corn for husking, 173,600 acres against 173,000 acres; beans, 43,000 acres against 32,500 acres; turnips, etc., 152,100 acres against 156,200 acres; sugar beets, 14,000 acres against 15,000 acres; and corn for fodder, 310,465 acres against 297,100 acres. Every province shows an increase in the area planted to potatoes, and the total area under this crop is estimated at 502,400 acres as compared with 448,800 acres, the area harvested in 1916, an increase of nearly 12 per cent. The acreage under potatoes for 1917 is larger than in any previous year, and is 18,400 acres larger than the previous record of 484,000 acres in 1912.

POWERS OF OUR FOOD CONTROLLER

The duties of Hon. W. J. Hanna, the food controller, are set out in the official Labor Gazette as follows:—

"He is directed and empowered to investigate the quantities, location, ownership and sources of supply of food commodities, the prices of same and the causes of such prices. He is to ascertain the food requirements of the country and to facilitate the export of the surplus to Great Britain and the Allies, and he is empowered to make regulations as to prices, storage, distribution and conservation of food, and the consumption of food in hotels, restaurants, cafes, private houses, clubs and other places. The food controller may also make regulations respecting the manufacture, transportation and storage of food, and may purchase, requisition, store sell and deliver food."

Prices of grain, live stock and dairy products showed some decreases for the month of June, but there were advances in many other lines, especially in fruits and vegetables, textiles and metals.

WESTERN CROP REPORTS

A Manitoba crop report issued last week shows that there is an estimated cereal acreage of 6,417,696 in the province this year, an increase of 151,488 acres over last year. The figures for the various cereals are:—

	1917	1916.
Wheat	[illegible]	2,094,520
Oats	[illegible]	[illegible]
Barley	1,270,724	1,153,660
Flax	[illegible]	[illegible]
Totals	6,417,096	6,266,208

According to a Winnipeg Grain Exchange report, Alberta has an increased cereal acreage of 419,584 over 1916. The figures issued by the Alberta Department of Agriculture follow:—

	1917.	1916
Spring wheat	1,420,000	1,550,075
Winter wheat	10,000	18,763
Oats	1,500,000	1,394,927
Barley	250,000	297,967
Flax	50,000	43,364
Rye	12,000	[illegible]
Speltz	3,000	2,242
Green feed	1,000,000	505,044
Totals	4,245,000	3,825,416

The Saskatchewan wheat acreage is estimated at 7,862,507, as compared with 6,457,700 last year.

Wheat in Saskatchewan is now in the shot blade and in a great many places heading out, according to reports received by the Saskatchewan Department of Agriculture. Crop conditions vary so much in the different parts of the province at the present time that it is difficult to make any authoritative statement as to the conditions generally. Rain is badly needed in many places, especially in the west and south-western districts, where the crops are burning up on account of the extremely hot weather of the last few days. However, reports from other parts state that rain has fallen during the day and the weather is now cooler. The crops, however, are from ten days to two weeks later than last year. Weeds are causing some trouble, especially on the summerfallowed lands. Summerfallowing will be practically completed this coming week. The hay crop will be about the average.

The following companies have changed their names: The Montreal Carriage Leather Company of St. Henri, Limited, with Dominion charter, to Montreal Leather Company, Limited; Valleyfield Tool Manufacturing Company, Limited, with Dominion charter, to Canadian Marine Engineering Company, Limited; Dominion Envelope Company, Limited, with Ontario charter, to Dominion Envelope and Carton Company, Limited; Lang Brothers Investment Company, Limited, with Alberta charter, to Lang Brothers, Limited; Hardy and Hunt Piano Company, Limited, with Alberta charter, to the Hunt Piano Company, Limited.

CANADIAN BOND AND MORTGAGE CORPORATION

With net profits for the year ending April 30th, 1917, the directors of the Canadian Bond and Mortgage Corporation, Winnipeg, were able to recommend a dividend payment of 5 per cent. carrying the balance to the credit of profit and loss account. An analysis of the company's balance sheet indicates a good financial position. The balance of the profit and loss account is now $51,128. The following comparison of the company's position at the end of April last and in April, 1913, clearly indicates the corporation's progress during the past few years:—

Assets.

	1913.	1917.
Cash on hand and in bank	$ 24,482.19	$ 1,839.10
Investments, mortgages	147,473.77	471,008.48
Office equipment	300.00	166.97
Organization expenses	1,916.60	1,064.76
Deferred charges to revenue	1,695.53	1,326.83
Interest accrued (not due)	3,297.27	16,385.15
	$179,165.36	$491,791.29

Liabilities.

	1913.	1917.
Accounts payable	$ 782.54	$ 437.97
Loans	50,000.00	2,507.80
Discounts unearned	....	160.80
Capital paid up	125,370.00	435,362.50
Dividends outstanding	....	2,193.86
Balance profit and loss account	3,012.83	51,128.36
	$179,165.36	$491,791.29
Dividend	4%	5%.

Last year, the interest collections represented 87 per cent. of interest charges; the unpaid amount represents largely those whose crops were hailed or rusted last year, or men who have enlisted. The interest rates received on mortgages placed during the year were practically the same as last year, and, while there was a noticeable difficulty in obtaining first-class loans, the company believe that its accepted applications are as good, if not better, than in any former year.

DIVIDENDS AND NOTICES

THE RIORDON PULP AND PAPER COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 6

Notice is hereby given that a quarterly dividend of 1½%, being at the rate of 6% per annum, and a bonus dividend of 1% have been declared on the Common Stock of the Company for the second quarter of the year, payable August 15th, 1917, to shareholders of record at the close of business on August 8th, 1917.

By order of the Board.

LIFE INSURANCE AND MARKET GARDENING

The July issue of "Life," the Canada Life's monthly agency paper, deals with a rather unique object, from a life insurance point of view, namely, market gardening. The company has rented a large market farm some few miles out of Toronto, where the male members of the staff put in one afternoon a week. Potatoes, carrots, beans and turnips have been planted, with indications of a large crop. The lady members of the staff also have obtained a plot of ground from the war thrift committee, and are growing all the different market vegetables in their spare time. At both farms the staff is divided into teams, and great friendly rivalry exists between the different "farmers." These phases are illustrated by actual photographs, showing the work in full progress. The Canada Life, our oldest company, was the first insurance company to go into this new avenue, and already several others have followed suit.

COST OF LIVING CONTINUES TO RISE

Another increase in the cost of living during the latter half of May and the first half of June is recorded in the official Labor Gazette, Ottawa, just published. In retail prices the average cost of a weekly family budget of 29 articles of food averaged $11.89 in sixty cities at the middle of June, as compared with $11.82 at the middle of May, and $8.51 in June, 1916.

Milk, butter and flour were lower in price in June, but eggs, meats, rice and other commodities showed increases in price. Coal and wood were also dearer.

In wholesale prices the labor department's index number for 272 commodities stood at 242.7 for June, as compared with 240 for May, 183.6 for June, 1916, and 135.3 for June, 1914. The chief increases in wholesale prices during the month were in fruits, vegetables, textiles, metals, coke, and miscellaneous building materials. Decreases occurred in grains, dairy products, fresh fish, and some other foods.

There were 24 strikes, involving 97 establishments and 10,657 employes, in existence during June, of which eight, involving 49 firms and 3,291 employees, commenced during the month. Thirteen strikes were settled during the month, leaving 11 still unsettled at the end of June.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

EX-MAJOR, C.E.F., also served S.A. war, wishes appointment. Late position not vacant owing to war conditions. Good business and office experience. Trained engineer; age 33; married. Would take position in any business offering good prospects to energetic and capable worker. Box 89, *Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

BOY WANTS POSITION for the summer with bond or financial house. Fifteen years old, high school graduate. Good references. Has passed University entrance exams. Box 81, *The Monetary Times*, Toronto.

WANTED.—Fire Insurance Inspector, principally for Ontario Province, for a tariff Fire Insurance Company. Must be experienced and well recommended. All applications strictly confidential. Apply Box 85, *Monetary Times*, Toronto.

LEGAL NOTICE

THE THOMAS WARREN KNITTING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 21st day of June, 1917, incorporating Alfred Geoffrey Edwards, Theophilus James Macnamara, Thomas Paterson Geggie, John Smith Masson and William Fostus Alexander Hill, all of the City of Toronto, in the Province of Ontario, accountants, for the following purposes, viz.:—(a) To buy, sell, manufacture and deal in woollen and other fibres and yarns and the products thereof throughout the Dominion of Canada; (b) To acquire the business and good-will of Thomas Warren, manufacturer of knitted goods doing business in the City of Toronto. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Thomas Warren Knitting Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 21st day of June, 1917.

THOMAS MULVEY,
Under-Secretary of State.

52-2

At the forty-eighth annual meeting of the Dominion Telegraph Company, Toronto, Sir Henry Pellatt, the president, who presided, presented a report for the year ended June 30th last. The balance at the credit of profit and loss account was $272,404.32, which compares with $291,961.88 a year previous.

WHAT MARKET FOR NEXT WAR LOAN?

Many Authorities Think It Should Be the United States—Conversion Privileges—Liberty Loan

That it would be desirable to float our next war loan in the United States, or to make a simultaneous issue in both countries, or to obtain assistance from the United States in our war financing in some other way, is an opinion which has many advocates in financial circles here. Sir Thomas White, finance minister, visited Washington to discuss with Mr. McAdoo, secretary of the United States Treasury, the general question of exchange between Canada and United States and the closely related question of Canadian borrowings in New York. The question of a loan to the Canadian government is understood to have been taken up at the conferences this week. When in Washington in June with the British mission the minister informally broached the general subject to Mr. McAdoo. Since the declaration of war by the United States such borrowings have not been possible, as the financial community and the public generally have been exclusively interested in the Liberty Loan, and it was desirable that there should be no issues in competition with it.

Borrowing is Necessary.

A certain amount of borrowing by Canada in the United States is necessary in order that the balance of trade between the two countries may be redressed and exchange on New York reduced to normal. Canada is the second best customer of the United States. During the last fiscal year, which ended on March 31st last, Canada purchased from the United States for domestic consumption goods to the value of $664,000,000, as against only $290,000,000 purchased by United States from Canada. During April, May and June of the present year the balance in favor of United States has become still more greatly accentuated.

After subscribing three war loans aggregating $350,000,000, many financial men think that this market should be given a rest. They feel that a large war loan every six months is a big task for a comparatively small population without any great accumulation of funds for investment. The result of Sir Thomas White's conferences at Washington will, therefore, be awaited with considerable interest.

The official announcement that the second and third Canadian war loans will be convertible at the issue price of each, plus accrued interest, into the fourth war loan, provided that is a 20-year bond issue or longer, will prove attractive to investors, whether the loan is floated in the United States, in Canada, or simultaneously in both countries. The second war loan was issued in September, 1916, at 97½, and sold subsequently as high as 99½, reaching recently a low record of 93¼. Since then the price has advanced to about 95½. At this price there is still a spread of two points between the same and the price at which these bonds would be acceptable by the government as the equivalent of cash in subscribing to the fourth war loan.

The third war loan was issued last March at 96, and shortly after the lists closed sold at 96¼, but since that time has declined steadily until two or three weeks ago, when the low level of 93⅜ was reached. Since then the price has risen to about 95⅜. At this figure there is still a spread of seven-eighths of a point between that price and the price at which these bonds would be acceptable by the government as the equivalent of cash in subscribing to the fourth war loan.

Liberty Loan a Factor.

Undoubtedly the Canadian and United States government officials will endeavor to arrange their war financing in a way which will assist the war loans of both countries. The second instalment ($3,000,000,000) of the Liberty Loan is expected early in September, and this fact will have some bearing on the date of issue, the terms and the market for the fourth Canadian loan. The new issue of New York city 4½ per cent. bonds will be offered to the public at 101¾, at which price they will yield approximately 4.42 per cent. Bond dealers, in comparing the new issue to the 3½ per cent. Liberty Loan bonds, point out that the difference between the two securities is only .92 per cent., and express the opinion that after the new municipals are distributed they will probably be sold at a higher premium, in which case the yield will be brought down to a level closer to the Liberty bonds. It is the general opinion of bankers that the result of the New York offering does not furnish a convincing argument for having Congress raise the rate on the new issue of Liberty Loan bonds.

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

CANADA LIFE
ASSURANCE CO.
Head Office, Toronto
Established 1847

New Records

Results secured during the past year re-affirm the position of the Sun Life of Canada as the leading life assurance organization of the Dominion.

It leads all Canadian Companies in annual New Business, Total Business in Force, Assets, Surplus Earnings, Net Surplus, Premium Income, Total Income and Payments to Policyholders.

Fair-dealing and progressive business methods are the foundations for the Company's phenomenal growth.

BIG INSURANCE PAYMENTS MADE LAST YEAR

Estate of a Winnipeg Citizen Paid $117,000 by Insurance Companies

The largest Canadian insurance policy paid last year was on the life of Mr. R. M. Thomson, Winnipeg, the amount being $117,000. The next largest policies paid in Canada last year were those of Mr. William J. Carrique, of Montreal, for $100,598, and Mr. Robert Davies, of Toronto, for $100,000. The next largest was for the sum of $91,500 in favor of the estate of Mr. Bowman B. Law, M.P., of Yarmouth, Nova Scotia, who lost his life in the fire that destroyed the parliament buildings at Ottawa a year ago.

The largest policy written in Canada this year is on the life of Sir Mortimer B. Davis, Montreal, the details being printed exclusively in *The Monetary Times* a few weeks ago.

The payments made by life insurance companies in the leading cities of Canada last year were: Montreal, Que., $2,650,000; Toronto, Ont., $1,350,000; Winnipeg, Man., $655,000; Vancouver, B.C., $480,000; Hamilton, Ont., $350,000; Ottawa, Ont., $275,000; St. John, N.B., $253,000; Quebec, Que., $234,000; Halifax, N.S., $181,000; Edmonton, Alta., $146,000; Westmount, Que., $125,000; Yarmouth, N.S., $120,000; Kingston, Ont., $110,000.

Doing Large Business.

In Canada, the life insurance companies did almost a record business in 1916. The total new business in Canada was $231,000,000. Already in 1917 the demand for life insurance is beyond all precedent.

According to figures compiled by The Insurance Press of New York, the sum of $758,500,000 was distributed last year by life insurance companies and associations in Canada and the United States. The payment for death claims, matured endowments and other benefits amounted to $476,000,000. Moreover, the aggregate amount paid by companies to policyholders who lapsed or surrendered their policies, fell considerably below the 1915 record, indicating an improvement in general business conditions.

Life Insurance, 87 per Cent.

It is said that 87 per cent. of all the estates left in the United States consist solely of life insurance. In life insurance there is no frontier for companies of both countries to cross the boundary freely for business.

When one considers that nearly $25,000,000,000 of life insurance contracts were in force in the United States at the end of 1916, and $1,400,000,000 in Canada, in level premium companies alone, the obligations imposed upon the managements of life insurance companies assume something like the dimensions of the obligations imposed upon nations by their war debts, with the difference that the rules under which life insurance obligations will progress to maturity, and be paid, are predetermined with mathematical accuracy.

The largest payment in the United States on a single life in 1916 was in the case of Mr. Thomas L. Shevlin, of Minneapolis, the amount being $1,525,000.

Group insurance plans increased their popularity, many notable transactions being recorded in large industrial plants. Monthly income insurance appealed to an increasing number of insurants, who prefer to leave monthly incomes to their beneficiaries rather than lump sums. The mortality rate for last year was favorable. Interest earned on investments for 1916 was a little higher than in 1915.

Insurance and War Risks.

The plan of the United States government to cover the casualties of war in the army and navy, through a system of insurance—possibly as a complete substitute for the pension system—demonstrates how vital a place the insurance principle has in human affairs. Life insurance was practically undeveloped at the time of the Civil War; its employment as a means of indemnifying the dependents of war heroes was probably not even considered. Now it may come to pass that the insurance method will displace the pension method and that the United States will be the first nation in the world to make the change. Within a short time the treasury department will submit to Congress an insurance measure adapted to war service. In the preparation of the plan, whereby the government itself will provide insurance for soldiers and sailors, loyal co-operation will be given to the government by all life insurance companies.

It is estimated that $3,000,000,000 of life insurance is carried by men who are subject to the draft and who will carry their insurance into the war without any extra war premium.

LOCOMOTIVE DECLARES DIVIDEND ON COMMON

(Continued from page [illegible])

considerably improved. We have made substantial reductions in our overhead expenses and we have an efficient organization. Since my visit to Russia, we have been kept busy with orders and the outlook is good.

"As to any discussion of amalgamation with other companies, we feel that the locomotive business stands by itself, and that it would be unwise to link up with companies which perhaps would have not such good prospects for the postbellum period as we have. In view of the gratifying position of the company and its improvement in recent years, we think the shareholders generally will want to know something more of the reasons for the present campaign for proxies."

CANADIAN TRADE CONTINUES TO EXPAND

The total trade of the Dominion in June was $213,800,908, compared with $162,035,400 in June, 1916. Exports for the past month totalled $116,285,841, and imports $97,515,067. During June there was exported foreign merchandise to the value of $3,725,324, as compared with $54,347,307 in the corresponding month last year. The total trade for the first three months of the fiscal year was $622,407,781, and for the same period last year $431,626,215.

In exports the product of the mine, the forest, the fisheries, and animals and their produce showed a decrease, while agricultural products and manufactures showed large increases. Exports of agricultural products increased from $38,744,527 for June, 1916, to $57,869,423 in June, 1917, and manufactures from $32,252,447 to $32,021,170. The increase in export trade during the past month over the corresponding month last year, was about $21,000,000. Of the imports for June, $51,761,825 were dutiable goods, and $45,753,242 free goods. The total imports increased $31,000,000 over the corresponding period last year, and for the three months of the present fiscal year, $105,000,000. Customs revenue for June amounted to $15,329,381, an increase of over $3,000,000 over the receipts for June, 1916.

Sir Henry Drayton, chairman of the Dominion Railway Board has returned to the government a cheque for $15,000, which was sent to him in payment for his services as a member of the Drayton-Acworth-Smith Commission, which investigated the Canadian Railway situation. In the letter which accompanied the cheque, Sir Henry said he could not accept such payment in the present time of stress and war. He asked that his services as a member of the Royal Commission be regarded as a contribution to the country. Hon. Frank Cochrane has acknowledged the return of the cheque with thanks. The incident was fully commented upon in the House at Ottawa last week.

Mr. C. W. Stokes has been appointed assistant general publicity agent of the Canadian Pacific Railway, with office at Montreal, so Mr. J. M. Gibbon, the company's general publicity agent, announces. Mr. Stokes has been in the company's London office, and later, assistant to Mr. J. S. Dennis at Calgary. He is a bright writer and has contributed to *The Monetary Times*. In London, he was a frequent contributor to the Daily Mail, while, in the west, he wrote stories and articles for the papers and magazines. Mr. Stokes was chiefly responsible for the western weekly letter which the Canadian Pacific Railway issues. Mr. Stokes will assist Mr. Gibbon, and, in the absence of the latter on business for the company, will represent him.

We have audited the Books and Accounts of the Canadian Bond and Mortgage Corporation for the year ended 30th April, 1917, and report to the Shareholders that we have received all the information and explanations that we have required.

We have examined the Mortgages constituting the security for the Corporation's investments and have found same in order, the Corporation's Solicitors certifying to the sufficiency of the title and conveyancing.

In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Corporation, according to the best of our information, the explanations given us, and as shown by the books, subject to the accompanying report.

WEBB, READ, HEGAN, CALLINGHAM & CO.,
Chartered Accountants.

WINNIPEG, 14th May, 1917.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 13th, 1917:—

McKinley-Darragh-Savage Mines, 82,853; Trethewey Silver Mine, 52,966; Beaver Mines, 73,916; Buffalo Mines, 62,149; La Rose Mines, 136,247; Nipissing Mining Company, 498,265. Total, 906,396 pounds, or 458 tons.

The total shipments since January 1st, 1917, now amount to 15,033,702 pounds, or 7,566.8 tons.

FURTHER SUGGESTIONS ON RAILROAD PROBLEM

Writing to *The Monetary Times* regarding the railroad problem, Mr. A. T. Drummond, LL.D., Toronto, says:—

"Two circumstances must be kept in view when considering the question of future government action: (1) Whatever course is adopted, even if a receiver were appointed, the different governments must come to the aid of these railways, at least to the extent of the guarantees; and (2) the Dominion government, by constructing such an unnecessary and unprofitable length of line from Winnipeg to Moncton; by not adopting on the western prairies a policy of concentration of population, under which new districts would not be opened to settlement and to railways until the older districts were fairly populated; and by encouraging, through land grants, guarantees and cash subsidies, so many branch, parallel and competing lines, through thinly-settled territory, has aggravated the situation very greatly. And the provincial governments, by their free-handed giving of guarantees, have been equally blameable.

"Under these circumstances, a suggestive way of solving the question would be to maintain the status quo, with the following conditions: That the Dominion government should aid the roads, by way of loans, to pay their interest for, if necessary, a year to come; that for a period of five or more years passenger and freight rates in Canada should be raised 10 to 12 per cent. to enable the railways to increase their net revenue sufficiently to meet interest, and, at the same time, to increase their credit, in order that needed capital for equipment and for improvements would be more readily forthcoming; that no extensions or branches or new issues of capital be permitted without the approval of the Dominion Railway Commission; that the two aided railways should transfer a total of 60 per cent. of their capital stock to the Dominion government, to be held permanently for the people of Canada, but the remaining stockholders to be allowed, through their directors, to control so long as efficient management prevailed; and that the government should retain its own systems, but that to help the traffic on them the Canadian Northern and Grand Trunk Pacific should, where not utilizing the lake route, send, via the government roads, their shipments from the west intended for maritime points and for export to Europe, and the imports, through them, from Europe for the west, wherever they control the route, and should devote the connecting lines they have between Ontario and Winnipeg to Ontario business.

"Twelve per cent. increase in traffic rates will probably afford to these two railways upwards of ten million dollars annually. With manufacturers and farmers, for a long time past, cheerfully demanding advances of, in some cases, 100 per cent. for their products, there should be no grumbling over an advance of 12 per cent. in railway rates. The moral effect of the 60 per cent. holdings by the government would be efficiency, but if trustees ever had to be installed, they should be trained railway experts, appointed by an independent body, like the judges of the Supreme Court or the Railway Commission, and should have full control."

The Lake of Bays is one of the jewels in the Highlands of Ontario. The whole territory is one great mass of lakes, streams and forests. Speckled trout, salmon trout and black bass are plentiful in these waters. The altitude is 1,000 feet above the sea, making the air rare and invigorating. There is splendid hotel accommodation. Literature regarding the district can be had free on application to C. E. Horning, D.P.A., Toronto, Ont.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Amherst, N.S.—July 11—International Engineering Works; the pattern building containing between $[illegible] and $[illegible] worth of material was completely destroyed. [illegible] covered by insurance.

Assiniboia, Sask.—July 5—Mr. C. Shurwater's barn totally destroyed, including five horses. Estimated loss, $3,000, partly covered by insurance.

Brantford, Ont.—July 11—Two sub-stations on the Lake Erie and Northern Railway burned out.

Brussels, Ont.—July 12—Mr. William Armstrong's barn burned to the ground. Insured for $600, carried in the Howick Mutual Insurance Company. Cause, lightning.

Ingersoll, Ont.—July 16—Mr. E. Marshall's dwelling-house. Cause, defective stove.

Kelvin, Ont.—July 11—Methodist church destroyed. Cause, lightning.

Moncton, N.B.—July 10—Murdock McLeod's tailoring shop and F. H. Barnes' art store. Damage to McLeod's store, $1,500, covered by insurance. Damage to F. H. Barnes' art stock, $1,200, covered by insurance.

Moose Jaw, Sask.—July 10—Mr. Carl Battell's barn destroyed.

Newdale, Man.—July 9—Driver and Armstrong's livery stables. Loss, $3,000; insurance carried, $1,000. Warehouse and office of C. A. Conden. Loss, $500, covered by insurance. Barn of Theo. Cochrane. Loss, $600, no insurance carried. Fire started in lane, spread to load of hay and thence to livery stables.

New Liskeard, Ont.—July 12—Capt T. Magladery's garage burned. Estimated loss, $1,000. No insurance carried.

New Westminster, B.C.—July 11—Mr. Neil McAskill's house, 230 Fourth Avenue. Estimated loss, $200. Insurance carried. Cause, sparks from chimney.

Paris, Ont.—July 6—Plant of the Transcontinental Compress Company, containing 2,700 bales of cotton, destroyed. Loss, $400,000.

South Lancaster, Ont.—July 11—St. Lawrence Lumber and Box Company's saw-mills. Damage, $3,000. Mills were saved.

St. Catharines, Ont.—July 9—McKinnon, Dash and Shell Company's frame transformer house destroyed. Cause, lightning.

Strathroy, Ont.—July 13—Three-story factory of the Strathroy Canning Company, owned by the Dominion Canning Company. Estimated loss, $175,000. Cause, hot box.

Sydney, N.S.—July 7—Dominion Coal Company's power house, considerably damaged. Cause, lightning.

Vancouver, B.C.—July 11—British Columbia Fir and Cedar Lumber Company's yards; dry kiln damaged and considerable lumber destroyed. Loss will run into several thousands of dollars, stated, however, to be covered by insurance.

Vancouver, B.C.—July 11—Mr. W. Medder's house gutted out. Damage partly covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Cache Bay, Ont.—By the fire which occurred on July 8th on the premises of George Gordon and Company's saw-mill, the following companies are interested: Queen, $2,500; Liverpool and London and Globe, $2,500; Phœnix of London, $2,500; Norwich Union, $2,500; total, $10,000. Loss total.

La Broquerie, Man.—June 25—Dwelling house of Mrs. Ursule Pelletier. Damage to stock, $350; to buildings, $1,000; insurance on stock, $100; on buildings, $500; total, $600, carried in the Northern Assurance Company.

Port Stanley, Ont.—Recent information on the fire at Cattanach Brothers shows estimated damage on stock $[illegible]; on buildings, $2,000.

St. Catharines, Ont.—July 9—McKinnon, Dash Company report the following additional information regarding the fire, to *The Monetary Times*: Damage to buildings, $[illegible]; insurance carried in New England Mutuals.

St. Thomas, Ont.—July 5—Mr. Wm. Vair's barn; damage to building, $400; insurance, $200.

Vancouver, B.C.—The fire department reports the following [illegible] 3; out of city limits, 2. The estimated loss by fire for the month [illegible] covered by insurance, leaving the property loss above insurance at $195. The total value of the property involved was $1,089,163. On June 24th, at 1.04 p.m. a fire occurred in the premises occupied by the Master Craft Clothing Company, Limited, at 179 Hastings Street, E. The fire started in the rear of the store, in the pressing and work room, and was due to an electric iron having been left on the switch. Some damage to the stock was caused by smoke. The following list shows the cause of fires occurring during the month: Carelessness with matches, 2; children playing with matches, 3; chimney fires, 7; cigar stub thrown in rubbish, 2; defective boiler, 1; electric iron left on switch, 3; false alarms, 8; flying sparks, 6; gasolene leaking (catching fire), 2; incendiary origin, 1; nail in picking machine, causing sparks, 1; outside city limits, 2; overheated cooking range, 1; overheated furnace, 1; smoking in hay barn, 1; spontaneous combustion (oil rags in box), 1; tar pot on fire, 1; unknown, 1; and services not required, 3.

Victoria, B.C.—June 8—The following information regarding the Cameron Lumber Company's fire has been received. Estimated damage to stock, $30,000; to buildings, $50,000. Cause, hot box. Insurance carried read in order of name of company, number of policy, amount of policy and amount claimed as follows: London and Lancashire, 10929587, $1,500, $528.50; Liverpool Manitoba, 631037, $2,000, $704.66; Mechanics and Traders, 137680, $2,000, $704.66; National Fire, 410801, $2,500, $880.82; Nova Scotia Fire, 83070, $1,000, $352.33; Ocean, 92081, $2,285, $805.07; Phœnix, 50141, $4,000, $1,409.32; Phœnix, 58573, $1,500, $528.50; Philadelphia, 20531, $1,750, $616.58; Palatine, 1890340, $3,500, $1,233.15; Palatine, 1890341, $1,500, $528.50; Queen Insurance, 215146, $2,500, $880.82; Royal, 378495, $1,500, $528.50; Reliance, 41724, $2,500, $880.82; Svea, 78228, $1,000, $352.33; Union of Paris, 1348910, $5,000, $1,761.66; Atlas, 8216855, $3,000, $1,056.99; Arizona, 201629, $1,000, $352.33; American Central, 492548, $5,000, $1,761.66; Canada Accident, 11519, $3,000, $1,056.99; Canada Accident, 11679, $2,500, $880.82; California, 60640, $4,000, $1,409.32; Canadian Fire, 169007, $2,000, $704.66; Detroit, 125593, $1,730, $609.53; Firemen's, 185,672, $10,000, $3,523.30; Firemen's, 185618, $1,750, $616.58; Globe and Rutgers, P.30705, $3,935, $1,386.42; Hartford, 13670, $2,200, $775.12. Total amount on various policies, $76,150; total amount claimed, $26,829.

The following items in the schedule were affected by the fire: No. 3, $3,000, rate 5.10, plan No. 3.4, building of planing mill, box factory and engine house, with metal roof; No. 4, $16,000, rate 5.10, plan No. 3.4, on machinery while contained therein or attached thereto; No. 5, $200, rate 4.65, on building of new box factory, metal clad, open in front, situate thirty feet north of planing mill; No. 6, $350, rate 4.65, on machinery while contained therein or attached thereto; No. 11, $1,000, rate 4.20, on building of machine shop and warehouse, metal clad, partly open in front, situate thirty feet west of the planing mill; No. 12, $1,500, rate 4.20, on machinery while contained therein or attached thereto; No. 13, $1,650, rate 4.20, on stock-in-trade while contained therein; No. 25, $4,000, on stock-in-trade while contained on the platforms or approaches to any of the above described building (not otherwise insured). This item subject to attached distribution clause.

GRAND TRUNK ORDERS EQUIPMENT

The Grand Trunk Railway Company has followed its order for 15 Mikado type locomotives by one calling for 1,000 new box cars. These cars were ordered last week from the American Car and Foundry Company, and arrangements have been made to obtain the earliest possible delivery. They are to be of 80,000 pounds capacity, and of the most modern type, with steel under frame and standard safety appliances. President Chamberlin declared recently that the Grand Trunk owns more passenger and freight car equipment, and also more locomotive equipment per mile of road than any railroad in Canada, except the Michigan Central, and compares more than favorably in this respect with the most successful railways of the United States.

Merchandise	77,911,728	176,184,314	259,886,725	921,072,746	1,431,736,729	2 166,602,713
Coin and bullion	2,111,593	789 152	1,602,966	166 476,602	131,493 784	214,818,384
Total trade	80,023,321	176 973,466	261,489,691	1 087,549 348	1,563,230 513	2,381 421,097

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending May, 1917, were: imports 1915 $132,349,976, 1916, $34,129,108; 1917, $28,609,813; and exports 1915, $34,126,626; 1916, $97,364,676, 1917, $186 208,571. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada

AND FIRE INSURANCE

You Look for Security

Whether with the intention of taking out insurance or associating yourself with some Company, you look for security.

The latest figures emphasize the unexcelled financial position of this Company.

Business in Force over......$59,600,000
Assets over................ 16,400,000
Net Surplus................. 2,600,000

These are reasons why the Company is known as

"SOLID AS THE CONTINENT"

North American Life Assurance Co.
HEAD OFFICE - TORONTO, ONT.

POLICIES PROVIDING
Guaranteed Annuities, Payable Monthly

A POLICY THAT SECURES TO THE BENEFICIARY A DEFINITE INCOME PAYABLE IN MONTHLY INSTALMENTS THROUGHOUT LIFE IS THE IDEAL LIFE ASSURANCE CONTRACT. SUCH AN INCOME IS GUARANTEED FOR TWENTY YEARS UNDER MUTUAL-LIFE-OF-CANADA CONTRACTS ISSUED ON THE LIFE, LIMITED PAYMENT LIFE AND ENDOWMENT PLANS. THE INCOME WILL BE INCREASED BY AN INTEREST DIVIDEND DURING THE TWENTY YEARS OF GUARANTEED PAYMENTS. WRITE FOR OUR BOOKLET—"POLICIES PROVIDING GUARANTEED ANNUITIES PAYABLE MONTHLY." FULL PARTICULARS OF ANY DESIRED PLAN MAY BE SECURED BY GIVING AGE OF THE PROSPECTIVE BENEFICIARY AS WELL AS YOUR OWN.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario
Assurances, $109,645,581. Assets, $29,361,963. Surplus, $4,595,151.

When a Life Company

receives from its Policyholders such informal and spontaneous expressions of appreciation as the following, it is clear that the relations between Policyholder and Company are as they should be —

"I received to-day your cheque for $1,559.00 in settlement of the twenty-year endowment policy taken by me in June, 1896. I am more than satisfied with this Policy, as I find it has given me twenty years' insurance free and a return of all my money with more than four and a half compound interest. I consider this BETTER THAN a BANK ACCOUNT. In addition my insurance has cost me nothing."

Those contemplating Life Insurance will do well to look into the Policies that earn such [illegible] approval—clearly shown in the unprecedented business being written by

Cold Storage Report Hints Government Control

COMMISSIONER O'CONNOR, *Investigator, Says Food Controller Hanna is the Man for Action—Companies' Control of Domestic and Export Trade—Figures as to "Margin" and a Note as to What "Margin" is—Extracts from the Official Report.*

HAVING completed his investigation into the cold storage business in Canada, Mr. W. F. O'Connor, the commissioner, places the burden of action upon Hon. W. J. Hanna, the food controller. In his report, Mr. O'Connor says:—

"Now that a food controller has been appointed and very close co-operation established between that official and this branch of this department, I consider myself relieved from the making of any suggestions as to the amelioration of conditions as I may find and disclose them, deeming that the function of action concerning food prices and food conditions, as distinguished from that of investigation, is now his to perform, and that any recommendations of mine, even though valueless, or because so, might prove embarrassing. He will be furnished with a copy of this report, and all data secured on the investigation or to be secured will be (as he has requested, and as you as minister have directed) will be at his disposal."

In several parts of the report the commissioner hints at government control. In one place he says: "The fact that the food sold from cold storage for export is in the hands of a very few companies is sufficiently evident. This situation is may be possible to turn to use. In the event of necessity of national control of exports, export prices or export buying, the concentration of the major part of the trade in foodstuffs in the hands of a few companies will greatly facilitate such control. As to the advisability or otherwise of state action of this kind, it is a matter of policy and beyond the sphere of the present inquiry. It would come about, if at all, as a war measure, and in case of its being considered the course and fate of 'big business,' such as referred to, during the war should be studied and known." In another part of the report he says: "No specific data is given upon the point of storage costs, because it is believed that a special investigation is required into the value of the by-products of meat, and that some compulsorily applicable cost accounting system of storage and other costs on specific commodities should be established. The present storage charges are such as are arbitrarily fixed by the different companies and levied against their commodities. The existing intricate system of storage charging can best be investigated at the same time, and possibly a legal scale of charges can thereafter be established. The project of providing such an expert examination is under way." And again elsewhere: "In view of any possible effort on the part of the State to control export trade or export prices, it might be well to note that because such a large proportion of these commodities passes through only two or three warehouses governmental control or supervision would not be difficult to bring into effect."

In a little homily on business profits and patriotism, Mr. O'Connor says: "Wandering not from the text, and taking conditions as they are, the simple and potent fact is that the large cold storage companies which operate in the different sections of Canada, having or securing the capital to control and the organizations to distribute the country's food products, have set themselves to the doing of it, and with success. This control does not in all cases approximate the absolute. With respect to certain lines it does. Canada's export trade of cold storage products is practically limited to four or five large meat companies and three or four large export houses which export cheese and dairy products. This export trade, which has attained to such immense proportions since the war, has greatly increased the capital and solidified the organization of the companies which have been so fortunate as to have had it come, or to have contrived to bring it their way. When the opportunity offered they were ready for it, and whether or not they have administered a practical monopoly of their country's foodstuffs in time of war in such manner as in the judgment of their country they had ought, there is due to them at least a meed of admiration on account of the efficiency with which they have performed what they set out to do. Their reward has been that which, doubtless, they anticipated—a large and increased revenue with substantial profits. In the face of a tremendous and consistent export demand the matter of the prices payable by them to their vendors was one practically immaterial, and seems to have been so regarded. The unfortunate domestic consumer, though living in a land of plenty, was thus constituted a competitive buyer as against a hungering world, whose fields and farms produced not enough or not at all; the export prices reacted upon domestic prices and raised them, notch by notch, until Canadian foodstuffs for home consumption were selling, as they yet are, at prices ordinarily associated with periods of famine. It is proper that the Canadian consumer's contribution towards the upbuilding of Canada's immense export trade, so rendered, should be recognized. Up to the present the laurels have gone to the purveyors. The food consumer has suffered as a result of war conditions. The food [illegible] has not. He has seen to it that he has been well and sufficiently paid. Accordingly, while yielding well-deserved credit to the cold storage companies of Canada for the capable manner in which they have grappled with the problem of supplying the needs of the armies and people of Great Britain and the Allies, it will be well to remember that the performance has been upon strictly business and not upon patriotic lines. The consumer, who alone has suffered for his country in the process, is the patriot."

Mr. O'Connor finds that the operations of cold storage companies generally have been fairly conducted and that there has been no illegal combination nor any excessive accumulation on the part of any company. His other conclusions are:—

"Individual instances of profiteering occurred during the year 1916. These I have already identified. If they had occurred during the present year, since the provision of the order-in-council under which I am acting in the making of these investigations, I would consider it my duty to recommend that the facts be laid before the proper attorney-general for his consideration as to their criminality.

"A tendency has become apparent during this present year, on the part of a few companies, to exact seemingly excessive margins upon beef and butter. Whether these margins are in fact excessive only a criminal prosecution or a declaration on the part of the food controller as to what shall be a fair price or a fair margin can determine.

"While, since the coming into force of the order-in-council concerning the cost of living, the margins of the companies referred to in conclusion No. 2 have not ruled as high as during 1916, they are, in my judgment, yet too high; but I have to make concerning them the same observation as made concerning the companies referred to in conclusion No. 3. Perhaps the mere mention of the matter may lead to a desirable change in conditions.

"As concerns the business of most other cold storage companies, I consider that their profits on certain lines, while not high as compared with before-the-war prices, might well be less. Their business has so immensely extended during the war period that the before-the-war margins of profit ought not to be considered now fair tests of fair profits.

"Any reductions securable by the lessening of the margins of the cold storage companies will go only a short way towards reduction of prices to the consumer. The margin of the cold storage companies is, per pound or per dozen, relatively small; the profits of the cold storage companies are made on the enormous turn-over.

"The farmer, the cold storage operator, the wholesale produce merchant, the retailer and the consumer, indeed every person who in any manner has come into relation with the commodities covered by this report, including the farm laborer whose wages have been increased, the carter whose charge has been increased, the miller whose shorts and bran command higher prices, the employees of wholesalers and retailers whose salaries are higher, the consumer who requires delivery under a more expensive system, and who, besides, is on his own part as master or employee a link in an independent but connecting chain of causation of high prices in some other commodity the price of which reacts upon the price of the commodities covered by this report, have all contributed with a multitude of unmentioned others to produce such prices as prevail. We cannot have peace prices in the midst of war conditions. As conditions change price levels will change—upwards or downwards. Prices depend upon costs. If certain costs must be paid certain prices must be charged. If the farmer can be enabled to produce cheaply and will sell at a reasonable price to a distributor or distributors who will resell at a fair profit all that is possible to be done will have been done. Eliminate the profit and you eliminate the enterprise. Substitute the State and it too must regard costs and earn sufficient profit to make the enterprise pay its way. Any other course leads towards State bankruptcy.

"In connection with conclusion No. 3, I refer to the preceding figures for April, 1917. Replacement costs may have tended towards enhancement of the margin on beef during that month. The farmer or producer was charging more for the product. As respects butter, a western company sold over 200,000 pounds of butter at a margin of ten cents per pound. The selling price, notwithstanding, was but one cent above the average price ruling at the time. An explanation was demanded. It transpired that the butter had been bought at a price very much below the market rate. My conclusions concerning this case, based upon the law, were as follow: The transactions were isolated. One who buys low, as one to whom an article is gifted, may, so far as the law is concerned, sell at the prevailing rates. A temporary fluctuation of a cent or two in price is common and unavoidable, so that it cannot be said of one who (unless consistently) sells a cent or so in advance of the prevailing price, that he is necessarily an extortioner. So I make no recommendation concerning the case but exhibit it as an example of an opportunity that came to a firm to share with the public a 'good thing' but which opportunity the firm overlooked. Its action was not, in my judgment, illegal, but was it respectable? Likewise as to the more aggravated, because continuous, exaction of excessive profits by another firm, on bacon: aside from the matter of illegality, is this sort of thing to be considered respectable? Mine may be as the voice of one crying in the wilderness, but I have to register in the negative."

The commissioner makes the claim that the figures in his report are "highly reliable." On this point he says: "For the six months last past I have maintained a close and persistent scrutiny over the operations of these companies. Without exception they report to me monthly, with items, their stock on hand, their receipts, their costs, their sales, their prices realized and the quantities sold for export and for home consumption respectively. In the beginning the necessary information, covering a four-year period, year by year, 1913 to 1916, inclusive, was obtained under oath. The monthly reports are by cards not under oath, nor need they be for the present purpose, because they connect with the basic information originally obtained. Nor have I omitted to check the returns as to exports by the customs figures, nor to check those given from time to time as to domestic sales by examination of the actual invoices of purchasers, extraneously obtained. Further, in response to many suggestions from such companies that I personally attend and examine their books, I have caused it to be known that in due course an expert accountant will in all likelihood attend for this purpose. You will be aware that I have already recommended such action, for the purpose of verification and especially of securing an accurate computation of the profits upon by-products. I make the preceding statements to justify the claim that the figures hereinafter appearing may be accepted as highly reliable."

After analyzing the table showing the business done by the cold storage companies (and printed on the following page), Mr. O'Connor says: "It is possible now to see the real character of the work of the cold storage companies and their place in the economics of foods. As the primary collectors and distributors of the food of the country subject to commerce, that is not consumed on the farm or distributed locally by the butchers and grocers of the small towns, they compete with the produce dealer in the home market; they practically monopolize the export market; they purchase meat directly from the producer; manufacture the by-products, put the meat through the necessary processes and control the sale of it. Eggs they buy directly from the producer or through local produce dealers. The butter is bought to some extent in this manner, and largely from the creameries; cheese is, of course, purchased from the cheese factories. From the fact that their dealings are on such a huge scale, it is to be expected that the margin imposed on the food passing through hands will be small compared to that of the total margin between the price paid to the producer and the price paid by the consumer. The total profit may be and frequently is very large and in particular cases individual companies have taxed the food passing through their hands as highly as the grocer or small dealer, but the general trend of the cold storage business is toward a normal margin, frequent and flagrant as may be the exceptions to this rule. The truth of this statement is borne out by examination of the grocers' invoices, buying and selling.

"It is natural that the average wholesale prices for Canada of the different commodities is higher than the average selling prices of the cold storage companies in Canada, as these prices represent both those of the cold storage companies and the wholesale dealers, to whose prices another margin after that of the cold storage house has frequently been added. The average price received by the cold storage companies for butter in 1916 was 32.7

TABLE I.—Business of All Cold Storage Companies in Canada in 1916.

Commodity	1	1 (a)	2	3	4	5	6	7	8	9	10
	Total production of Canada (Note [1]) and the total quantity of meat (dressed weight) killed in Government abattoirs (Note [2]) for twelve months from Jan. 1 to Dec. 1, 1916.	Estimated Home Consumption for all Canada.	Total quantity purchased by cold storage companies and cost of same laid down in the warehouses of these companies.		Average cost per pound.	The total quantity sold and amount for which sold (Note [11]).		Average Selling Price per lb. or doz.	Margin per lb. or doz. (Note [3])	Quantity sold for export from Canada according to the Trade and Commerce Returns (Note [10]).

NOTE 1.—Estimation based on the exports plus the estimated per capita consumption and the figures of the last decennial census.

NOTE 2.—This includes practically all the live stock killed in the abattoirs and represents, according to the estimates of the Agricultural Department, about half of the live stock killed in Canada.

NOTE 3.—This is the difference between the average selling price and the average cost price including all expenses of storing, overhead charges, losses and profit.

NOTE 4.—This is the difference between the average cost price per pound or dozen and the average selling price for export.

NOTE 5.—This is the difference between the average cost price and the average selling price for home consumption.

NOTE 6.—This does not represent a loss as much meat sold for export in 1916 was bought in 1915 when the average cost of cold storage plants was lower than in 1916.

NOTE 7.—This includes some smoked pork products as well as bacon, the prices of such being very similar.

NOTE 8.—It will be observed that the sum of the quantities sold for export and for home consumption by the cold storage companies does not equal the total quantity sold. The reason for this is that many of the cold storage companies were unable to state whether their sales were for export or for home consumption, but a very considerable proportion of the total sales is shown in these two columns.

NOTE 9.—With regard to fresh pork a large percentage that was purchased as such was manufactured into bacon, ham and smoked pork and was sold as such.

NOTE 10.—This includes sales made by all dealers of all kinds in Canada.

NOTE 11.—Where the quantity sold exceeds the quantity purchased the excess represents partially the quantity on hand at the beginning of the year.

cents. The average wholesale price for Canada was 35 cents. Absolute comparison cannot be made of these figures because the average wholesale price for Canada is based on a specific class of butter, but the general comparison holds good. For instance, the average price which the investigation showed as received by the cold storage companies for cheese was 18.9 cents. The average wholesale prices for 1916, as worked out from the prices ruling daily throughout the year by the proper officers of the labor department, were as follow: Butter, creamery, Montreal, 35 cents; cheese, western, colored, Montreal, 19.8 cents; eggs, fresh, Montreal, 39.5 cents; beef, hind quarters, 14.6 cents; pork, 14.7 cents; salt pork, 16.8 cents; mutton, 14.6 cents; ham, 21.2 cents; bacon, 23.7 cents. The wide difference between the wholesale and the cold storage prices of eggs is due to the fact that the average wholesale price is calculated from the price of fresh eggs during each month throughout the year.

"The average price of mutton is lower than that showed by the cold storage companies because lamb is included with the mutton in their reports. The foregoing figures cannot form the basis of an absolute comparison because the price of specified lines is recorded in the average wholesale prices, and the price of all qualities of each commodity is shown in the average prices worked out from the cold storage reports. Comparison can be made, however, in a general way. It is in the profit per pound or per dozen that the public is chiefly interested. That margin, if reasonable, will be cheerfully paid; if unreasonable, its exaction, aside from all question as to the morality of food profiteering in time of war, is by the law pronounced criminal. A reasonable margin is as due the cold storage operator as it is due the farmer, the wholesaler or the retailer. It is the price which Canada pays for the preservation of her food supplies (*a*) for distribution from her large centres of production to her population in general and her urban population in particular, and (*b*) for export, so that she may compete with her excess supply, as a food purveyor, with other countries. It is the reward which Canada allows to those who perform for her the service of so conserving her food supply as to enable the use of the whole and the return of a fair yield in money therefor. Within it is included the price paid by the farmer for storing his excess production until the time of greater scarcity. He pays so that the fruits of his labor may be rendered an article of commerce and become a reliable source of revenue.

"The consumer pays to stimulate production so that he may be able to procure sufficient of the particular commodity at all seasons, at a nearly as possible stableized prices, and so that gluts and famines may alike be avoided. Have the margins exacted by the cold storage operators been unreasonable? There are two ways of discovering this: First, by applying the test of the averages of other years; second, by specific and expert examination of the records of actual operations. Both methods have been pursued, but it must be admitted that although much has been done the latter method has not been followed out as yet to the full extent desirable. The work is still proceeding. The accompanying table of margins shows the average prices and the proportion of the total quantities sold by cold storage companies for the years 1913 to 1916, and for home consumption."

Commenting on this table, the commissioner says: "It is desirable that the precise meaning attached to the word 'margin' in this report should be very carefully noted. It represents gross, not net, profit on the commodity from the time it is laid down, all costs and expenses paid, in the storage warehouse. The questionnaires sent out to the various companies to secure specific information on margins demanded sworn testimony as to (*a*) the quantity of each commodity purchased during the year; (*b*) the cost of such laid down in warehouses including freight and unloading charges; and (*c*) the total quantity sold during the year and the total amount for which sold. The average cost prices and average selling prices were computed. The difference between these is the margin referred to. The margin represents, therefore, the cost of storing, losses, interest on investment, overhead charges, any other expenses incurred by the cold storage company from the time the commodity enters the warehouse until it reaches the persons to whom they sell and the cold storage company's profit. It is the total charge imposed on the food from the time it enters the cold storage house until it passes into the hands of grocers or wholesale dealers. It will be observed that the margin on butter since 1913 has increased two cents per pound, on cheese 0.35 cents per pound, on eggs 0.96 cents per dozen. On beef it has decreased 0.12 cents, on bacon it has increased 2.25 cents, on ham it has decreased 0.76 cents. The export of butter has increased during the same period from less than 1 per cent. of the total cold storage sales to 12 per cent. Although the proportion of cheese exported as compared with the total quantity sold by cold storage

TABLE II.—Margins, With Average Prices and Proportion of Total Quantities Sold by Cold Storage Companies, 1913-1916, and for Home Consumption.

INCOME TAX

There is general approval of the income tax introduced in the House at Ottawa this week. The people have asked for such a tax, believing it fair and equitable. If adequate machinery is devised for its collection, Sir Thomas White's estimate that the probable revenue from the tax will be $15,000,000 or $20,000,000, will probably be exceeded. To learn successful collection methods, the government should turn to the United Kingdom rather than the United States.

The objections to the proposed tax raised in the House by Mr. E. M. Macdonald, deserve the consideration of the finance minister. Undoubtedly the tax as it stands will bear heavily on the men of moderate incomes. The average citizen with an income of $3,000 or $4,000, in these days especially, has about all he can do to finance the home, the family, increased property taxation, life, fire and accident insurance, mortgage payments, and so on. In face of the greatly increased living costs the smaller incomes have (without the tax) a very narrow margin between income and legitimate expenses, however thrifty and careful the wage-earner or salaried man may be. Mr. Macdonald also objected that there was not a sufficient differentiation between the unmarried and the married men in regard to the respective amounts they would have to contribute. The only differentiation is that the tax, with the unmarried men, starts with incomes of $2,000 a year, while with the married men it starts with $3,000 a year. Another point which deserves consideration in connection with the proposed tax is the matter of a deduction for life insurance premiums and government annuities. Citizens who are paying out part of their incomes in this way, thus relieving the State of possible responsibilities after death, deserve more consideration than those who are not making provision for the future of their family, and which means some sacrifice of income in the meantime. The deduction, from the federal tax, of all or a part of the municipal or provincial taxes, is another matter for consideration.

OUR NEXT WAR LOAN

In discussing the probable market for the next Canadian war loan, we may take it for granted that, if necessary, the loan can be raised and oversubscribed at home. It would not be an easy task; it would require hard work and great effort; but it could be done. Would it be more desirable, however, to have the United States assist with the financing of our fourth war loan, thus giving the Canadian market and investor a well-earned respite and for greater effort next spring? At present, opinions are divided. On the one hand is the contention that such financing in the United States would have two direct results. It would give immediate relief to our banks, and this, it is contended, is greatly needed at this time in view of the heavy balance of trade between Canada and the United States. We are buying largely in the United States and paying cash, at the same time we are selling to England and giving credit, thus rapidly using up our available working capital. Under normal conditions, Canada is the second best customer of the United States, and there is no reason why we should not be favored, at present, with a substantial loan, which would correct exchange, prevent gold exports and relieve the strain on our banks in taking care of our United States balances. Canada is not, at present, in a condition to float a fourth domestic loan. If a loan were attempted it would not meet with entire success, and would make more difficult any future domestic financing. We could not find a market for the fourth loan through the channels in which the previous loans were obtained. These in brief are the arguments of those who favor the United States for our next loan.

On the other hand, there is weighty opinion in favor of keeping our war debt at home, making our taxpayers our war bond holders also. The views of this group are somewhat as follows: Canada has existed mainly upon borrowed money for twenty-five years. Thoughtlessly the people of the Dominion have come to look upon money borrowed abroad as a gift or as manna from heaven instead of a liability. The moment our ability to borrow from foreign markets is suspended, our troubles commence. That is what is chiefly the matter with Canada to-day, according to the view of many authorities. The sooner we stop borrowing money abroad, the better, as we already have a vast debt per capita, seven or eight times as great as the public debt per capita of our neighbors across the line. Every day of our national life we must send $500,000 over the border to meet the interest on our indebtedness of $4,500,000,000 abroad. We are in the position of a young spendthrift who gaily continues to squander money so long as the mortgagee will lend. It is correct to assume that financing in the United States will afford relief to the situation, including the question of premium on New York funds, if the government can borrow money in the United States instead of in Canada, but it is only temporary relief and it increases our already heavy debt abroad. In addition, the economic situation is far from satisfactory and the outlook obscure.

Upon consideration of these opposing views, our decision must be made as to where we will market our fourth war loan, assuming the United States authorities are willing to assist. The consensus of opinion, however, seems to be in favor of a loan in the United States. Various opinions are printed elsewhere in this issue.

The above was written before the announcement yesterday of the proposed Canadian loan in the United States.

COLD STORAGE COMMISSION

Criticism of the appointment of Mr. G. F. Henderson, K.C., as chairman of the new commission to review the report of Commissioner O'Connor on the cold storage corporations, was made to parliament on Tuesday by Mr. F. B. Carvell. He was afraid that the chairman would be "more inclined to prevent the truth coming out than to get at it for the benefit of the public." He was of this opinion from experience he had had with Mr. Henderson at a previous inquiry, the shell committee inquiry, where Mr. Henderson acted for the then Colonel J. Wesley Allison. Mr. Carvell thought that, in view of the appointment of Mr. Henderson, counsel should be named to represent the people. If this were not done, he was "afraid that a truthful report would not be forthcoming."

We are not in a position to judge of Mr. Henderson's qualifications for his present appointment. We do know, however, that implicit confidence may be placed by the public in the work and the findings of Mr. A. B. Brodie, representing Price, Waterhouse and Company, and of Mr. Geoffrey Clarkson, of Clarkson, Gordon and Dilworth. These two accountants are associated with firms of the highest standing and one may feel certain that the investigation, so far as they are concerned, will not be tinged with the slightest political consideration. Mr. Clarkson particularly has had considerable experience in just such investigations and has won an excellent reputation for straightforward and accurate work of this nature.

Sir Robert Borden stated in the House at Ottawa on Tuesday that the question was largely one of accounts, profits, and so forth. The inquiry was eminently one for gentlemen of the experience possessed by those appointed. A committee of the House of Commons would not be the best tribunal for an inquiry into complicated accounts and matters of a complex nature in relation to large business affairs. That is the proper view. In the meantime, the cold storage companies, we feel sure, will do everything possible to facilitate the work of the inquiry. It was Sir Joseph Flavelle, president of the William Davies Company, who asked for the investigation.

MINING INVESTMENTS

The suggested legislation to protect investors in British Columbia mines has much to commend it. It is proposed to divide the province into six mineral survey districts, each in charge of a qualified mining engineer. Permanent survey and inspection of mining areas would replace the temporary work of the past, and so bring capital directly into touch with the man who needed it. It is proposed also to carry on experimental work with the oil flotation and other processes which would be done at the Department of Mines, Victoria, or in connection with the British Columbia University at Vancouver. Anyone bonding a property must guarantee in advance the payment of a month's wages to his miners. Hon. Mr. Sloan, provincial minister of mines, who introduced the bill, deprecates fraudulent stock sale methods. Legislation in some places presumes that a man is dishonest and attempts to legislate him into honesty. In a clause in the British Columbia act, for the protection of investors, the government takes the attitude that if persons floating a mining stock company do not aim at legitimate development, the minister of mines can give such notice as will protect investors. This provision in the bill for the protection of investors in mining stock or shares reads: "The minister of mines may, and each resident engineer shall, upon receiving notice of any advertised or intended sale of shares in any company or interest in any claim or mine or mineral property or interest whatsoever, upon statements or terms not in accordance with actual facts and conditions, give such notices, either personal or public, as may be necessary to prevent any injury to investors, and every notice given under this section shall be absolutely privileged."

The Canadian mining industry has suffered too long with the evils of stock jobbers. The reputable mining engineer has not been consulted often enough regarding mining investments. Our governments can well afford to take a greater interest in the relation of capital to the mining industry, one which will yield a much larger income to the nation in future years than it does now.

LLOYDS BANK RETURNS

The report of Lloyds Bank, presented by R. V. Vassar-Smith, chairman, at the recent annual meeting, showed gratifying results. The available profit for the past year, after payment of salaries, pensions, other charges and expenses, and the annual contribution to the provident and insurance fund, and making full provision for rebate, income tax, bad debts, contingencies, etc., is £1,283,797 15s. 8d. To this has to be added £106,969 1s. 11d. brought forward from the previous year, making a total of £1,390,766 17s. 7d. Out of this an interim dividend of 14s. 6d. per share, being at the rate of 18⅛ per cent. per annum, and amounting, less income tax, to £363,128 was paid for the half-year ended the 30th June last, the usual £60,000 has been written off the bank premises account, and £520,000 has been appropriated in writing down the bank's investments, which (with the exception of the war loans, which are taken at cost) stand at or below market value.

From the balance remaining, £447,638, the directors recommended that a dividend at the same rate, amounting, less income tax, to £340,433, should be declared, and that the balance, £107,204, be carried forward to the profit and loss account of the present year. Four directors were elected during the year, namely, Mr. Henry Bell, the Hon. Robert Henry Brand, C.M.G., Mr. Oswald Sanderson and Mr. Andrew Weir.

The company's assets are as follow, shillings and pence omitted:—Cash in hand and with the Bank of England, £38,115,548; cash at call and short notice, £6,430,338; bills of exchange, £15,306,652; war loans, at cost (including £1,100,000 lodged under treasury minute of the 17th November, 1915), and other British government securities, £35,774,830; Indian and colonial government securities, corporation stocks, English railway debenture and preference stocks, and other investments, (including investments lodged with the treasury under Scheme B), £5,867,958; Lloyds Bank (France), Limited, namely: 11,980 shares of £50 each, £20 paid, £239,600; advances to customers and other securities, including stock exchange loans under treasury minute of the 31st October, 1914, £55,856,841; liabilities of customers for acceptances, endorsements, etc., as per contra, £11,207,869; bank premises, at cost, less amounts annually written off for depreciation, etc., £2,832,845; total, £171,632,486.

We cannot sell in foreign markets only those styles and qualities we desire to sell and at our price. We can sell in foreign markets only what they want and against competitors who give careful attention to market requirements.

Mr. F. H. Wright, who has been in charge of the rental department of the Yorkshire and Canadian Trust Company, Vancouver, has been appointed assistant general manager of the company. Mr. Wright is a capable young business man

(12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1917, and that the same will be payable at the Head Office and Branches on and after Wednesday, the first day of August next.

The transfer books will be closed from the 17th to the 31st July, 1917, both days inclusive.

By order of the Board,

E. HAY, General Manager.

Toronto 20th June, 1917.

PERSONAL NOTES

MR. R. R. [illegible] is in charge of the bond department of the Sterling Bank of Canada.

MR. A. BARTON HEPBURN, chairman of the board, Chase National Bank, New York, is another of the leading financial men of the United States who visits Canada for a vacation. He tells *The Monetary Times* that he has just returned to New York from a pleasant salmon fishing outing here.

MR. ALEXANDER NAISMITH MOUAT, who has been appointed comptroller-general of British Columbia, is a business man of wide experience and a fully qualified chartered accountant, being a member of the Dominion Association of Chartered Accountants and the Institute of Chartered Accountants of Manitoba and Alberta. He was born in Edinburgh, Scotland, and educated at the Royal High School. He came to Canada in 1882, at the age of 18, and spent some time in the west. After service in the audit department of the Canadian Pacific Railway at Winnipeg, he left in [illegible] to enter the service of the Hudson's Bay Company at Winnipeg. He was appointed assistant manager at Winnipeg, then the most important of the company's branches. In 1897 he organized a system for handling the company's large trade arising from the rush to the Yukon and Alaskan gold-fields. In 1904 he became comptroller of the company at Winnipeg and in 1905, after twenty years' service, he retired and for several years gave attention to personal interests in Alberta, during that time also establishing eleven branches for Swift & Company. Four years ago Mr. Mouat was called to Edmonton as city auditor, and in January, 1915, he was appointed by the council to establish a comptroller's department. The system then installed created favorable comment in the financial world. The system secures control at every stage by audit before liability is incurred or expenditures authorized to be made against the appropriation, audit before payment is made, and audit after payment is made, to ensure that the expenditure is charged to the correct account. This system was adopted by the Norris government in Manitoba at the outset of its administration. Mr. Mouat is a man of executive and administrative ability, is a hard worker, and his appointment to this office will mean the complete reorganization of the accounting system of British Columbia province, as recommended to the government by Price, Waterhouse & Company in its report made recently.

Mr. A. N. Mouat.

LIEUT.-COL. W. S. DINNICK who for a period of fifteen years has held the office of president of the Sterling Trusts Corporation, the Dovercourt Land Company, and vice-president of the Standard Reliance Mortgage Corporation, has resigned these offices. He is severing his official relations in order that he may enter with his full time upon broader and more personal enterprises with which he has recently become connected. These include the proposed Devonshire Hotel, Toronto, which will be built when financial conditions improve and the prices of materials are not so high. Col. Dinnick has left the companies with which he was associated for many years, with the best of friendly relations.

MR. H. R. SILVER, manager of the Dominion Molasses Company, Halifax, N.S., has been appointed a director of the Acadia Sugar Refinery Company.

MESSRS. W. J. [illegible] & Company, Toronto, have been appointed special representatives for the St. Lawrence Underwriters' Agency of the Western Assurance Company.

MR. W. B. CUMMING, formerly with G. A. Stimson and Company, is looking after the interests in Toronto and vicinity of Messrs. C. Meredith and Company, Limited, Montreal.

MESSRS. FREDERIC W. THROSSELL, C.P.A., JOHN B. ROBERTSON, C.A., and GEORGE A. ROBINSON, C.A., have become associated in practice as public accountants, auditors, and cost accountants, under the firm name and style of Throssell, Robertson and Robinson, with offices in the Citizens' Building, Cleveland, Ohio. The firm also represents in Cleveland Robertson, Robinson and Company of Toronto and Hamilton.

MR. GEORGE H. ALLEN, and of the best-known men in life insurance circles, died last week at Toronto in his fiftieth year. Mr. Allen was one of the founders of the Travellers' Life Assurance Company, first president of the Dominion Life Underwriters' Association, and for the past three years city manager of the North American Life Assurance Company. He was successful in writing many large insurance policies. He was a Liberal in politics, and an active member for recruiting, being vice-president of the Recruiting League.

MR. DAVID MITCHELL has been appointed city comptroller by the city council of Edmonton. Mr. Mitchell succeeds Mr. A. N. Mouat, who has been selected as comptroller-general for the province of British Columbia. Mr. Mitchell, who since 1915 has acted as assistant city comptroller, entered the city's service four years ago, having been chief audit clerk for a time. His services have been generally recognized, and he possesses excellent qualifications for his new position, particularly in municipal experience. Mr. Mitchell came from Scotland in 1899, and has held numerous positions of trust.

MR. NICHOLAS F. BRADY, president of the New York Edison Company; Mr. J. E. Aldred, senior member of the firm of Aldred & Company, and Mr. Arthur V. Davis, president of the Aluminum Company of America, have been elected directors of the Merchants' National Bank to fill vacancies. Mr. Raymond E. Jones, agent of the Royal Bank of Canada in New York, and a director of the Merchants' National Bank, will assume his duties as vice-president on August 1st. Ex-Senator Burton, of Ohio, will continue as president of the institution. The Merchants' National Bank is the institution of which interests associated with the Royal Bank of Canada acquired control recently.

MR. H. ROSEN, agent of the New York Life Insurance Company, who recently sold $1,500,000 of life insurance to Sir Mortimer Davis, president of the Imperial Tobacco Company, Montreal, has had an interesting career. According to Mr. D. P. Kingsley, president of the New York Life, Mr. Rosen came from German Poland to America in the steerage of an ocean liner. He arrived in New York friendless, penniless, and without a working knowledge of the English language. Last year he made $107,000 in commissions alone, an amount $32,000 greater than the president of the United States. "When one considers that many life insurance agents make less than $1,000 a year, one sees what this immigrant's achievement signifies," said Mr. Kingsley, who added:—"What is most interesting to me about this man is the fact that he is not one of those 'natural born geniuses' who begin to challenge attention as soon as they step out of the cradle. When he entered our employ thirteen years ago he stated on his application blank that he hoped to write 'about $5,000 worth of insurance a month.' This is an amount so modest that any agent who expects to hold his job ought to reach it, at least. Soon after he entered our employ a change, a development, came into this man's life. New possibilities open- [illegible] In a few years he was breaking all records. In 1916 he wrote over $10,000 of [illegible] Sir Mortimer Davis, of Montreal, had $50,000 of insurance in a [illegible] Mr. Rosen [illegible] $1,[illegible] The premium [illegible]

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

La Salle, Que.—Messrs. J. O. Davis and Company, Montreal, have purchased $50,000 6 per cent. 25-instalment bonds at 9.373.

Petrolea, Ont.—The $15,000 6 per cent. 20-instalment hydro-electric extension bonds were sold to the Canada Bond Corporation at 99.

New Toronto, Ont.—Tenders for the purchase of $50,000 6 per cent. 30-year waterwork debentures will be received up to July 27th. T. R. Longstaff, treasurer, New Toronto.

Brockville, Ont.—Tenders will be received up to August 15 for $28,000 5½ per cent. 5-year debentures, issued in denominations of from $100 to $1,000. C. A. McLean, treasurer, Brockville, Ont.

Preston, Ont.—Messrs. George A. Stimson and Company, Toronto, have purchased $33,100 bonds, bearing 5½ per cent. interest and repayable in 10 instalments. These bonds were issued for local improvements and permanent pavements.

Burlington, Ont.—For the issue of $45,745.18 6 per cent. 30-year debentures, A. E. Ames' bid of $45,187 was accepted. The following were the other bids: Wood, Gundy and Company, $45,104.74; Canada Bond Corporation, $45,081.81.

Winnipeg, Man.—The Greater Winnipeg Water District's issue of $3,000,000 5 per cent. 5-year debentures has been disposed of through a Canadian bond house syndicate. Sales will be extended to the amount of $4,000,000. The sale of this sum will not only finance the district until next spring but will also pay off the overdraft now being carried by the Bank of Montreal.

Shawinigan Falls, Que.—Messrs. A. E. Ames and Company have purchased $25,000 6 per cent. 10-instalment bonds at 96.829. Other tenders received were:—

Dominion Securities	96.05
Rene T. Leclerc	95.55
Notary Couture	95.50
Royal Securities Corporation	95.273
Hanson Brothers	95.02

Halton County, Ont.—The following bids were received for $74,000 5 per cent. 20-year good roads bonds:—

Macdonald, Bullock & Company (accepted)	$69,242
Canada Bond Corporation	68,839.24
Dominion Securities Corporation	92.35
W. A. Mackenzie & Company	69,235

Geo. A. Stimson & Company	68,131.80
A. E. Ames & Company	69,221

Mr. Wm. Parton is county clerk, Milton, Ont.

Halifax, N.S.—An offer had been received from the Canada Bond Corporation, Toronto, for acceptance of either a serial bond or straight bond issue, sufficient to net the city $133,500. The serial bond issue would be 5 per cent. for 30-years, at 90.50, and the straight issue would be for 34-years, at 92.34. The city treasurer reported in favor of the serial bond issue, stating that the city would make a net saving of $28,000 compared with the straight bond issue for 34 years, at a price of 92.34. It was decided to wire the company and ask if they would accept a serial bond issue to net the city 199,500. The city would have to give nearly $217,000 of their bonds to receive this amount. If the loan can be put through, the proposed temporary loan from the Royal Bank will not be made. Later, the offer of the Canada Bond Corporation was withdrawn owing to changed conditions, though the company intimated that if the city wishes to dispose of part of the issue they might purchase the first 20 maturities. The offer was refused by the city.

Regina, Sask.—Adequate provision has been made by the city as required by the city act for sinking fund purposes; the amount of $131,550 shown on the balance sheet as due the fund by the city, represents the portion of the 1916 sinking fund has not yet been collected from the taxpayers. These facts are noted in the report of the sinking fund trustees, Messrs. L. A. Thornton, G. J. Bruce, [illegible] and J. E. Snowball. The report continues: "Full cash deposits required for sinking fund for the years prior to 1916 have been duly made. Under the present system of tax enforcement the 1916 arrears due the fund should be collected by the time of the tax sale. We would point out that as a result of negotiations instituted a year ago, legislation has been made which provides that any real surplus earned by the sinking fund investments may, subject to the consent of the local government board, be used in alleviation of the current year's taxes. The surplus $4,620 shown by the statement was earned largely by the investments made by the trustees since their appointment. It should be remembered that these investments were made during the latter half of the year 1916, and that the full extent of the earnings from investments will become evident during 1917."

Saskatchewan.—The following is a list of bond applications granted by the local government board from July 9th to July 13th, 1917:—

School Districts.—Strawberry, $2,000 10-years not ex. 8 per cent. annuity. B. Carney, Young; Butterton, $1,600 10-years not ex. 8 per cent. annuity. M. H. Hall, Butterton; Bapaume Park, $1,800 10-years not ex. 8 per cent. annuity. E. B. Flower, Hoosier; Process, $2,000 10-years not ex. 8 per cent. annuity. E. M. Bader, Hilda, Alta.; Windsor, $1,800 10-years not ex. 8 per cent. instalment. J. E. Muth, Springside; Allan Hills, $1,800 10-years not ex. 8 per cent. annuity. J. F. Reeves, Hanley; *Salt Lake, $1,600 10-years not ex. 8 per cent. instalment. C. Heidebrecht, Rush Lake; *Colmer, $2,000 10-years not ex. 8 per cent. annuity. E. M. Wurts, Duff; *Shaunavon, $15,000 20-years not ex. 7 per cent. annuity. E. G. Stedman, Shaunavon; Dowandville, $2,100 10-years not ex. 8 per cent. annuity. J. W. Rowand, Nokomis.

Rural Telephone Companies.—Narrow Lake, $6,500 15-years not ex. 8 per cent. annuity. F. Ketcheson, Wilkie; Lynne, $5,600 15-years not ex. 8 per cent. annuity. H. A. McInnes, Langham; Doyton, $8,000 15-years not ex. 8 per cent. annuity. G. E. Brown, Brock; Bromhead South, $9,600 15-years 7 per cent. annuity. H. McAlpine, Bromhead; Fielding, $4,800 15-years 7 per cent. annuity. B. Ireland, Fielding; Bresaylor, $10,500 15-years not ex. 8 per cent. annuity. E. E. Mack, Bresaylor; Vanguard East, $10,200 15-years not ex. 8 per cent. annuity. W. J. Hanley, Vanguard; Rockhaven, $2,000 15-years not ex. 8 per cent. annuity. L. T. Mickle, Rockhaven; Kenaston, $7,000 15-years not ex. 8 per cent. annuity. E. B. Hamre, Kenaston; Coleville, $1,000 15-years not ex. 8 per cent. annuity. A. G. Bridger, Coleville; Eddy, $5,500 15-years not ex. 8 per cent. annuity. E. G. Stoner, Bulyea; North Brock, $8,700 15-years not ex. 8 per cent. annuity. H. L. Coule, Brock; Meadowdale, $10,000 15-years 7½ per cent. annuity. D. C. Ross, Canora.

Village.—Herschel, $1,500 10-years instalment 8 per cent J. M. Ballentine.

The following is a list of bonds reported sold:—

School Districts.—Luce, $1,000. Nay and James, Regina; Prussia, $12,500. Nay and James, Regina; Tessier, $7,500. Nay and James, Regina; Novar, $6,500. Great-West Life Assurance Company, Winnipeg; Diamond Coulee, $1,800. Canada Landed and National Investment Company, Winnipeg.

Rural Telephone Companies.—St. Boswells, $8,800. W. L. McKinnon and Company, Regina; Ernfold, $15,200. W. L. McKinnon and Company, Regina; City View, $3,000. Regina Public School Sinking Fund; Radville, $8,000. W. L. McKinnon and Company, Regina; Pinto Creek, $18,000. H. O'Hara and Company, Regina; Bothwell, $5,800. Goldman and Company, Regina; Ettington, $7,500. W. L. McKinnon and Company, Regina; Druid, $7,900. Nay and James, Regina; Arlington, $11,500. H. O'Hara and Company, Regina.

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

WILL FLOAT $100,000,000 IN STATES

Canada's Next Loan to be Offered There to Investors at 6 Per Cent.

Messrs. J. P. Morgan and Company announced on Wednesday that arrangements had been perfected for the flotation of a $100,000,000 loan of the government of the Dominion of Canada, which will be offered to the United States public upon a basis to yield approximately 6 per cent. The loan will be unsecured, and it will run for two years.

The loan to Canada will be the first foreign government transaction that has been undertaken since the United States' entrance into the European war. It was first thought that the United States might make advances to Canada just as it has given credits to Great Britain, France and other enemies of Germany, but when it was found that the government at Washington was not disposed to lend money to Canada, New York bankers were asked to do the financing. They readily consented, but pointed out that in the circumstances it would be necessary to obtain Secretary McAdoo's consent. Sir Thomas White, the Canadian minister of finance, called on the secretary to discuss the matter, and upon the announcement by Mr. McAdoo that he had given permission, the Morgan firm issued the following statement:—

Statement of Morgans.

"We are authorized to state that the Dominion of Canada will shortly offer to American investors, upon approximately a 6 per cent. basis, $100,000,000 of its two-year notes, adopting this method of offsetting in part the trade balance in excess of $300,000,000 now existing against Canada and in favor of the United States. The comprehensive statement issued by Secretary McAdoo at Washington indicates clearly the attitude of the Federal treasury in this matter."

The proposed loan is the third to be raised in the United States by the Dominion of Canada since the outbreak of the war. The first loan was for $45,000,000, consisting of $25,000,000 of one-year 5 per cent. notes, which matured in August, 1916, and $20,000,000 of two-year 5 per cent. notes, which become due next Wednesday. The Dominion government has made preparations for meeting the maturity, irrespective of the new transaction. The second Canadian loan was for $75,000,000, and it was placed in April, 1916. It was in the form of 5 per cent. notes, $25,000,000 maturing in five years, $25,000,000 in ten years and $25,000,000 in 15 years.

The price at which the new loan will be offered to the public is higher than that of the earlier issues, none of which was sold on a basis higher than 5½ per cent.

J. P. Morgan and Company sent out letters on Wednesday inviting participation in the syndicate that is being formed. While all the names have not been made public, it is understood that the list will include the National City Company, Harris, Forbes and Company, Brown Brothers and Company, Lee, Higginson and Company, the Guaranty Trust Company and the Bankers' Trust Company.

United States Government Agreeable.

United States Secretary of the Treasury McAdoo issued the following statement:—

"Sir Thomas White, minister of finance of the Dominion of Canada, called on me recently to ascertain if there would be any objection on the part of our government to Canada's seeking a short-time credit of $100,000,000 in the American market.

"I stated to Sir Thomas that in view of the fact that the balance of trade between the United States and Canada was running strongly in favor of the United States, I realized that it was desirable for Canada to establish credits in our markets to meet these adverse balances. Therefore, there would be no objection on the part of this government to the proposed offering, but that we should, of course, have to keep control over our own situation by determining each foreign offering on its own merits and with reference to the financial condition prevailing at the time.

"It is important that our commercial and financial relations with Canada shall be conserved in every reasonable way. The proposed transaction is intended for that purpose."

BOND ISSUES AWARDED

Messrs. Mulholland, Bird and Graham, Toronto, have purchased [illegible] per [illegible] and [illegible] 5 per cent. 5-year local improvement bonds of East View, Ont.

Total assets	[illegible]		33,079,640

The statement in detail and the usual analysis will be printed in these columns next week.

NORTHERN ASSURANCE COMPANY

The Northern Assurance Company, of Aberdeen, is one of the veterans in the underwriting field, having completed its 81st year of business. In Canada it has transacted only fire insurance and in that line has built up an excellent business, having established its branch and organization in this country in 1867. Mr. G. E. Moberly is manager of the Canadian branch at Montreal and has proved a very capable officer. He has well maintained the company's reputation for sound business methods and fair dealing with the insuring public. The company has $814,208 assets in Canada, $673,000 of which is represented by high-class bonds and debentures. There is also a sum of $43,428 cash on hand and in banks in this country. At the end of last year the Northern had a net amount at risk of $91,895,000, a large and well-selected volume of business. The net cash received for premiums in 1916 was $762,029. The net amount of losses incurred during the year was $584,822.

According to the statement of the company presented at the recent annual meeting held in Aberdeen the company's total funds are $39,589,945, made up as follows: Capital (subscribed $15,000,000) paid up, $1,500,000; fire reserve fund and unearned premium reserve, $[illegible],588,800; life and annuity funds, $24,708,435; endowment and capital redemption fund, $627,400; employers' liability and accident fund, $1,081,610; staff funds, $927,375 and profit and loss balance, $1,156,235.

In its fire department the company received premiums last year of $7,177,600, showing an increase of $568,455 in comparison with those of the previous year. The losses amounted to $3,607,045, or 50.3 per cent. of the premiums. The expenses of management (including commission to agents and charges of every kind) came to $2,682,285, or [illegible] per cent. of the premiums. [illegible] excellent record

LOCOMOTIVE DIVIDEND A GOOD SIGN

Shareholders Read It That Way—Story of the $105,000 Payment

While an active campaign for proxies is in progress in connection with the annual meeting of the Canadian Locomotive Company in September, new developments did not occur last week. The letter sent to shareholders by the present management and directorate is understood to have been very favorably received. It was deemed a frank, businesslike statement of the company's position, its directorial policy and of its future prospects. Sir Henry Pellatt has not issued any statement regarding his position in the proxy campaign, although he has been asked for such a statement. Mr. M. J. Haney is not in Toronto at present and his office reports that he will be away for some time.

Significance of Dividend.

The declaration of an initial dividend at the rate of 6 per cent. per annum is taken by the market to mean that the company is in excellent condition. Mr. Emilius Jarvis, president, stated in an interview with *The Monetary Times* last week that the directors felt that before paying dividends on common, the bonds and preferred stock should be made an absolute security. This point was also emphasized in the letter sent to shareholders. The dividend declaration, therefore, means that, in the opinion of the directorate, the company has reached that desirable position.

An article in the Montreal Mail this week, discussing the company's affairs, ventured the opinion that the Haney-Pellatt interests had already secured control of the company with proxies already in hand. This is not generally believed and the Jarvis interests are quite confident that it is not the case. Their view is that the only way for Mr. Haney and Sir Henry to obtain control is to buy 51 per cent. of the stock. The Montreal report that the Harty interests would go over to the Haney-Pellatt camp is not given any credence in Kingston (the home of the company's plant and of the Hartys) or in Toronto.

Mention has been made in the discussion of the company's affairs, of the placing of $105,000 into its treasury by President Jarvis in 1912. This incident is described in the company's annual report for that year. Here is the reference:—

"You will recollect that in December last an open letter was addressed to the shareholders in respect to a matter that arose just after the new company had taken over the business from the old. It is usual only to make explanations of company's affairs at an annual meeting and we now think that some further explanation is advisable in connection with this matter, as a portion of the profits of the company as shown in the balance sheet was not derived from the ordinary business operations of the company.

"When negotiations were going on for the purchase of the stock and bonds of this company and before the public offering of the stock was made in July, and of the bonds in September, 1911, Messrs. Price, Waterhouse and Company, were employed to make an audit of the affairs of the old company for the four years preceding the 31st of December, 1910.

Was Unprofitable Contract.

"In June, 1911, they gave the certificate which appeared in the public offering in July and at the same time conveyed the information to the issuing financial firm that among the contracts in hand there was one upon which a profit of $105,000 was expected. In September, 1911, and after the preferred stock had been sold to the public the auditors reported that it had developed that the contract referred to would be unprofitable, and that our plant would be engaged in working out this unprofitable contract well on into November. As this company had taken over the works from the old company on the 1st of July, 1911, the operations of the company for the months of July, August, September and October and part of November, were unprofitable, for the reason above mentioned. In other words, one-third of our working year had been lost. The discovery of this situation naturally caused a good deal of irritation, and those financial firms associated with the public offering of the preferred stock and bonds felt keenly their position, as it was quite impossible for the company, in the remaining part of the working year, to make the profits they had been led to expect, so they voluntarily put into the company $105,000 cash, the amount of profits they had been led to expect would result from this particular contract, therefore, you must understand that the figures of $326,380.43, shown you in to-day's statement as the result of this year's operations include this amount of $105,000. It must also be borne in mind, however, that had the company had its entire year free to work on its own contracts the amount that would have been earned during the period above mentioned would have considerably exceeded this $105,000."

Company's Earning Record.

The company's earning record to date, taking the net revenue from manufacturing and investments, the balance available for preferred dividends after all charges and depreciation allowances, and the surplus carried forward is as follows:—

	Profits.	Net after charges.	Surplus.
1916	[illegible]	[illegible]	[illegible]
1915	[illegible]	*55,400	[illegible]

1913	[illegible]	[illegible]	114,262
1912	†[illegible]	[illegible]	[illegible]

*Deficit.
†Including $105,000 donated to treasury.

OF NEWSPRINT PRODUCTION, 89% EXPORTED

How Canadian Paper Producers are Grouped—Five Companies Only Supplying General Market

Only 11 per cent. of the total present production of newsprint paper in Canada is used in Canada; the remaining 89 per cent. is exported. The returns of the manufacturers to Commissioner Pringle and the evidence taken before him at the investigation at Ottawa, showed that Canada's total production of newsprint paper in 1916 amounted to 584,789 tons.*

Since the beginning of 1917 the St. Maurice Paper Company, Limited, of Cap Madeleine, Que., has commenced operations and the annual production of its present plant will be about 30,000 tons. There have been also increases of about 15,000 tons in the annual capacity of the Ontario Paper Company, Limited, and of about 11,000 tons in the annual capacity of the Spanish River Pulp and Paper Mills, Limited. These two additions make the present annual production of the newsprint paper mills of Canada 640,789 tons.* This production is distributed as follows:—

Group No. 1—Companies selling their entire product through George H. Mead and Company, of Dayton, Ohio, which is practically controlled by Geo. H. Mead, president of Spanish River Pulp and Paper Mills, Limited.

	No. of tons.	No. of tons.	Percentage of total production.
Abitibi Power and Paper Company, Limited	61,787		
Spanish River Pulp and Paper Mills, Limited	131,474		
		193,261	30.15

Group No. 2.—Companies comprising the Canadian Export Paper Company, Limited, of Montreal.

	No. of tons.	No. of tons.	Percentage of total production
Belgo-Canadian Pulp & Paper Company, Limited	50,517		
Brompton Pulp & Paper Company, Limited	16,669		
Laurentide Company, Limited	63,307		
Price Brothers & Company, Limited	[illegible]		
Plus the St. Maurice Paper Company, Limited, which sells its entire output through Canadian Export Paper Company, Limited	30,000

---

*These figures do not include the production of the Crabtree mill, which is being changed to a book paper mill and by August will not be producing any newsprint paper.

Five Companies for General Market.

There are thus only five companies that are supplying the general market and are not included in either the Geo. H. Mead and Company, or the Canadian Export Paper Company, Limited, groups. The combined annual production of these five companies is only 161,075 tons, or one-quarter of the total Canadian production. The Geo. H. Mead and Company and the Canadian Export Paper Company, Limited, groups represent between them an annual production of 403,222 tons, or 62.81 per cent. of the total Canadian production.

Evidence of Combination.

It was suggested by Mr. W. N. Tilley, K.C., counsel for the newspapers, at the government investigation, that perhaps the companies interested in the Canadian Export Paper Company, Limited, allowed to that company an exorbitant selling commission that was included in their statements of cost, but was returned in part in dividends from the Canadian Export Paper Company, Limited. This was one of the reasons why Mr. Tilley wished to probe the affairs of that company. As the enquiry was "into and concerning the manufacture, sale, price and supply of newsprint paper within the Dominion of Canada," he claimed the right to bring out all the facts in regard to the Canadian Export Paper Company, Limited, which is a Canadian company incorporated under Canadian laws, composed of Canadian paper manufacturers, and dealing only in Canadian-made paper. Notwithstanding these facts and the production of a letter from a Canadian paper manufacturer to a Canadian publisher, in which the latter was told his enquiry for paper had been referred to the Canadian Export Paper Company, Limited, Mr. Tilley's question to the vice-president of that company as to the nature of the business in which it was engaged, was ruled out by Commissioner Pringle as irrelevant. In his ruling he said: "Any evidence that tends in the direction of showing that there was a combination will be excluded."

Mr. H. R. S. McCabe, managing director of the Northwestern Life Assurance Company, Winnipeg, Man., has informed *The Monetary Times* that for the half year ending July 1st, 1917, the company's subscribed capital had increased by $46,000 over the figures at the first of the year, a gain of slightly over 13 per cent. During the same period the company's cash investments increased by 19 per cent. Its total resources now exceed $400,000.

FIGHTING LINE AND FINANCIAL LINE

Housewives throughout the United States are to be enrolled by the government to aid in food conservation. The enrolment took place between July 1st and 15th, according to plans announced by Herbert C. Hoover, America's food controller. Every woman in the country was asked to sign a pledge to aid the government by household sacrifices. Hundreds of millions of dollars will be saved by such national effort in the opinion of American authorities. Millions can be saved in Canada by the same means. Household economy, industrial economy, commercial economy—all these are required if the Dominion is to practice that measure of thrift which is required if the national resources of the country are to bear the increasing war burden. The National Service Board is urging investment in war savings certificates. By buying these certificates you are giving your money directly for war purposes. The fighting line must be supported by the financial line.

CONCERNING WAR BONDS

An order-in-council has been passed at Ottawa to the effect that holders of bonds of the war loan issues of $100,000,000, maturing October 1st, 1931, holders of bonds of the war loan issue of $150,000,000 maturing March 1st, 1937, be granted the right to surrender their bonds at the issue prices, namely, 97½ in the case of the issue maturing on October 1st, 1931, and 96 in the case of the issue maturing on March 1st, 1937, plus accrued interest in each case, as the equivalent of cash in payment of any allotment made under the terms of the prospectus of any future Canadian war loan issue, other than issues made abroad, of bonds of a maturity of 20 years or more.

Members of the Montreal Stock Exchange were notified last week that on and after Friday, July 20th, scrip certificates for the Dominion war loan bonds of the 1937 maturity would not be considered good delivery when the last instalment was paid outside of Montreal "unless the Department of Finance has agreed to deliver the bonds in Montreal."

PALATINE INSURANCE COMPANY

The Palatine Insurance Company is an English corporation, which has its Canadian head office in Montreal. Mr. James McGregor, of Montreal, is manager for Canada, Mr. W. S. Jopling being assistant manager. Both are experienced underwriters and favorably known in insurance circles. The company's fire premium income in Canada last year amounted to $276,444, an increase of nearly $30,000 over the preceding year, and net losses incurred to $210,883.

The company's balance sheet for 1916 shows a premium income of $2,566,135, an increase of $66,000 over the premiums of 1915. Losses were heavier than in 1915, and absorbed $1,626,850. At the end of the year, the company's fire fund totalled $2,670,875, which with the balance on profit and loss account of $144,100 makes a total of $2,814,975 available for the protection of the company's policyholders—a ratio to premium income of about 110 per cent.

The total assets of the Palatine are $4,833,625, chiefly invested in the highest grade of securities. The balance sheet tabulates assets as follows:—Investments, British government securities, $239,185; colonial government securities, $110,390; colonial municipal securities, $69,975; foreign government securities, $216,345; foreign municipal securities, $538,470; railway and other debentures and debenture stocks—home and foreign, $1,670,055; railway and other preference and guaranteed stocks, $91,450; ordinary stocks, $1,925; branch and agency balances, $605,525; bills receivable, $4,730; outstanding interest, $8,485; due by Commercial Union Assurance Company, Limited, $75,005, amounts due by other companies for re-insurances and losses, $227,090; cash in hand and on current account, $965,905; total, $4,833,625.

The Palatine therefore gives ample security to its policyholders, who are further protected by the guarantee of the Commercial Union Assurance Company, Limited, with its excellent reputation and assets exceeding $151,600,000.

Real Estate Management

Owners of property who feel that the burden of management is irksome will find this Corporation qualified by thirty-five years' experience to manage their real estate for them, no matter where it may be located. We solicit an interview or correspondence.

SAMPLE MARKET FOR HEAD OF LAKES

Some Arguments in Favor of Its Establishment at Port Arthur and Fort William

The national grain sample market to serve the farmers, the railways and the nation, should be at the nation's grain outlet at the head of the Great Lakes. This is the opinion of Port Arthur and Fort William people and it is shared by many others. Some convincing arguments in favor of the proposal have been prepared by Mr. Joseph Redden, vice-president of the Port Arthur board of trade and a well-known writer on the grain handling problems of Western Canada. He contends that the Canadian lake town ports offer the greatest advantages as a location for the market and blending headquarters. From a national standpoint Mr. Redden demonstrates that the market located there would provide the development of Canadian shipping and other kindred industries.

Without Any Delay.

"With the chief sample market located at Fort William and Port Arthur," he says, "samples could be taken for sample market purposes at Winnipeg with no greater delay than exists to-day in taking samples for grading purposes and the cars sent on their route to the lake front. These samples could be sent on by express on all of the three railways leading to the twin ports, and on which trains leave at different periods during the day, so that within 24 or 30 hours from the time the samples were taken in Winnipeg, they would not only have been received there, but also placed on the market and disposed of and orders for cars' final destination in the hands of the railway officials awaiting the arrival of cars.

"At the lake front is also the ideal location for the blending houses, which will be the real, active competitive bidders for all low-grade and super-grade cars of grain. When the cars reach the head of the Great Lakes they have reached, during the season of navigation, their terminal; have accomplished their contract, and would be immediately released for further service. This uninterrupted car service would be impossible if blending houses were located elsewhere en route to the final unloading terminal point of the grain.

Must Handle the Cars Rapidly.

"With freight cars now costing approximately twice the amount for construction than a few years ago, rapid handling of cars is absolutely essential in order to keep down cost of transportation. As a blending or hospital elevator site which will render to the farmer maximum results in making his grain of the highest commercial value without impeding or increasing cost of traffic, which is equally essential to his prosperity, the Great Lakes ports is the only site possible.

"If we look at the locations at which the sample markets are possible from the viewpoint of possible intense competition, which competition is also absolutely essential for real tangible results to the farmer from the operation of sample markets, the lake ports promises such a development in that line that no other point can possibly equal. Here we are directly tributary, and most adjacent to, the densely populated districts of the United States, and also connecting with their long border line by a direct water route, the cheapest of all modes of transportation; also on the direct route to European markets by a great many channels both rail and water or a combination of both to the ocean; a route which will always maintain its supremacy over the prospective Hudson's Bay and Panama routes as to cheapness of haul, efficiency and quickness in arranging tonnage for shipment, no matter what are the demands of the purchaser. Thus, from the site at the Canadian head of the great lakes, can be served the milling centres not only of the United States, east and south-east, equally as well as Minneapolis and Duluth, but also the European markets, the real, permanent markets for western grain growers, for they are the real grain importers, not a competitive grain exporter, as is the United States.

Good from National Standpoint.

"From a national standpoint the twin ports of Canada are also without a competitor as a site for sample market purposes if the upbuilding of Canadian railways, of Canadian shipping and all the other industries which those great factors in the handling of the nation's commerce brings into being are to be considered.

"With the main sample market centred and developed at Winnipeg (made only a national asset there by the erection of necessary blending houses to retain to Canada the real value of her grain) with double handling of cars—unloading and loading—and the unprofitable sequence of delays on the railways in transportation while waiting sale on the market and blending at elevators, the American southern routes to the markets of the Eastern States and Europe will undoubtedly be stimulated and encouraged in antagonism to the Canadian routes. The location of a main market there favors American railways, American outlets and American exporters who would route their grain secured for blending purposes, not by the Canadian route to Canadian blending houses and the seaboard, but by the route to their own blending houses in Duluth, Minneapolis or elsewhere, and thence on to the seaboard by American railways.

"A sample market is an absolute necessity to Western Canada in order to deal justly with certain low-grade and super-grade cars of grain which the grading system alone is not elastic enough to do. It is imperative that the market should be located at a point which will make possible the perfect working of such an institution, giving the desired results to the farmer and at the same time retaining national assets and the high efficiency of our railways. And that site is at the Canadian head of the great lakes. The locating of the main sample market at Winnipeg would be, besides impeding traffic, simply propitiating a further leakage in the main artery of Canada's transportation system without any greater benefits to the Canadian farmer than could be obtained at the lake front.

United States Competition.

"With a full developed sample market located at the lake ports, interior sample markets, for all grain destined eastward, will be even unnecessary to securing greater results for the farmer. They would be just facilitating United States blending houses and exporters in securing their grain with the least possible trouble and expense to themselves at the expense of the western farmer and Canadian railways for the upkeep and transportation delay caused by such markets. These markets would simply facilitate the blending of vast quantities of super-grade wheat with the low-grade wheats of the United States, in order to make a first-class grade of wheat or flour to compete in the world's market with the high-grade Canadian product. A fully developed sample market at Fort William and Port Arthur will be the only lever required to enhance the price of all western grain and without disability or hindrance to the United States buyer. If the United States exporters or millers do not desire to secure and route their grain from the lakes' ports market, they can secure it by paying the necessary premium, which the operation of the sample market at the lake ports will make possible to the farmer, at the point of shipment, and route to their own blending houses in Duluth, Minneapolis or elsewhere. This also applies to Canadian millers. Thus it can be readily seen that the absence of interior sample markets to handle grain destined east will be of no detriment to the farmer and of incalculable benefits to railway efficiency."

ENAMELING INDUSTRY STARTED

A new industry has been introduced into Canada by the Canada Stove and Foundry Company, Limited, of Ville St. Laurent, Que. The industry consists of the enameling of both steel and cast iron stoves, ranges, or any kind of stove parts, and druggists' enameled sundries in any color. The manufacturing of these latter classes of goods will bring an entirely new industry to Canada.

The special grade of enamel which they are using is particularly adapted for chemical work, and will successfully resist any kind of strong acids.

They are also making porcelain enameled ice cream containers. These containers are made of light cast iron porcelain enamel-lined so that they are guaranteed to be absolutely impervious to any chemical action caused by flavoring extracts, salt and so forth, all of which objections are found in the sheet tin containers, which rust readily and result in the can becoming unsanitary, and allowing of the great possibility of dangerous results from tix oxide poisoning.

Investment vs. Speculation

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

Where Should Our Next War Loan Be Sold?

If United States Government is Willing, Liberty Loan Funds Provide Easiest and Most Economical Way — Strain on Bank Resources Needs Relief — Fourth Domestic Loan Should not be Made Until 1918, Say Some Bankers—Other Authorities Think it Unpardonable to Increase Already Large Foreign Debt for Expenditures Here—We Should Have 280,000 Subscribers to a Domestic Loan — Are Our Flotation Methods Good Enough?

(*See also Page 16.*)

WHILE the prospects for the next Canadian war loan are being discussed here, Wall Street bankers have pretty well decided that our fourth war loan will be obtained in the United States and that no further domestic issue will be made here until early in 1918. The general opinion is that one of the next loans which the United States government will make to the Allies will be extended to Canada. Sir Thomas White, finance minister, was in Washington last week in close consultation with the United States Treasury Department. In New York banking circles a loan of $100,000,000 or $150,000,000 is being mentioned. Anything smaller than this would not satisfy Canada's needs just now. This would be the first loan Canada has obtained direct from the United States government since the war. If $100,000,000 is advanced, it will bring the total loans made by the United States government to the Allies up to $1,488,000,000.

On August 1st Canada has $20,000,000 of two-year notes falling due in New York. These could probably be paid off out of the proceeds of the suggested United States loan. These two-year notes were part of an issue of $45,000,000 five per cent. notes placed by the Dominion government in the summer of 1915. The remaining $25,000,000 were one-year notes, and fell due August 1st, 1916. Both principal and interest were made payable at the agency of the Bank of Montreal in New York, in United States gold coin, or, at the option of the holder, at the head office of the bank in Montreal. Nearly all of the maturing notes will be presented in New York for payment, because they are mostly held there, and because the exchange rate between New York and Canada favors such a course. The privilege of conversion to twenty-five-year five per cent. Canadian bonds was exercised to only a negligible extent.

A number of bankers and bond house representatives have been interviewed by *The Monetary Times* with a view of ascertaining the general opinion as to the possibility and desirability of obtaining our war loan requirements this fall in the United States, leaving the next domestic war loan until the spring of 1918. The following articles have been based on these interviews and other statements received by *The Monetary Times*:—

CANADIAN FUNDS FROM LIBERTY LOAN

That Would Be Easiest and Most Economical Way, Says J. B. Forgan, Chicago

Should the fourth Canadian war loan be raised in Canada or in the United States? This question has been put by *The Monetary Times* to many leading bankers and bond brokers of both countries. The replies received are practically unanimous in favor of our war financing this autumn being negotiated in some way in the United States. Interviewed by *The Monetary Times* at his summer home, Harbor Point, Michigan, Mr. J. B. Forgan, president of the First National Bank, Chicago, stated that even under ordinary conditions, the question as to the advisability of Canada making an effort to finance her next war loan in the United States, was one on which he could not give advice that would be reliable. "Such a loan," said Mr. Forgan, "could only be placed through some strong firm of bankers in New York, who could first have it underwritten and then offer it for public subscription. I have no doubt this could be done successfully. It would only be a question of terms.

"As to whether Liberty loan funds could be made available or not, could only be ascertained by application to the administration in Washington, through the secretary of the treasury. If this could be accomplished it would afford Canada by far the easiest and most economical method of financing."

Our Case is Good One.

In a statement to *The Monetary Times*, Mr. A. E. Ames, of A. E. Ames and Company, investment bankers, Toronto, was strongly of opinion that the United States should be the market for our next loan. "It is my opinion," he said, "that, if practicable, it is desirable that the next Canadian government loan should be procured from the United States, either out of proceeds of the Liberty loan or through New York bankers, according as may prove the more desirable from the American standpoint. It is conceivable that the Washington authorities, having their next Liberty loan in view, might prefer not to have a direct issue to the public of Canadian government bonds on a considerably better yield basis than will be offered on their own loan, keeping their own market without distraction for their own government issue.

"The case for Canada getting a loan, now or a little later, in the States is that we have, ourselves, already financed very heavily, for so young a country and within so short a period, with our Dominion government domestic loans totalling $350,000,000, and advances of a similar amount for munition purchases on Imperial government account, together with our being, year in and year out, one of the biggest customers of the United States and having at present a heavy adverse balance with them. We have no right, of course, to demand a loan from them, but, on the other hand, we have an excellent case to ask them for it—as a solvent and valuable customer. Their granting a loan to Canada would provide and preserve a normal exchange position between us and make possible further trade with them on a greater scale than would be possible without it.

Would Curtail Output.

"Should such a loan not be available, it would mean that Canadian investors must provide for the government another very heavy sum of money to recoup the banks for advances which they have made. This could be accomplished, but it would mean curtailment both in the manufacture of munitions in Canada and in the importation of raw material and other commodities from the United States."

Here is the opinion of another investment banker:—

"I am strongly of the opinion that our next loan should be floated in the United States, and no attempt made to negotiate a domestic loan until after the turn of the year. There are many reasons indicating this to be the proper course. In the first place, I feel it is quite possible to float a loan in the United States, and there is every indication at the present that this will be done. The money could be obtained either from the Liberty loan funds or from a flotation made in New York with the consent of the secretary of the treasury of the United States."

Pay Your Debt To Your Defenders

Turn Your Luxuries Into Comforts For Those Who Have Sacrificed Most.

"Self-sacrifice, self-denial and service lie at the basis of the highest personal and national development."

Sir Thomas White, Minister of Finance.

IS it nothing to you that men from all round you have sacrificed home and salary, safety and life, to defend your home as well as their own?

Is it nothing to you that their wives and families tremblingly scan each casualty list, and pale at the step of the postman or telegraph messenger?

Can you see others giving their dearest, without feeling that you ***must do something*** yourself? Do you wonder what to do?

You can at least save—and lend your savings to the nation. Canada needs every dollar her loyal sons and daughters can spare, to meet the growing expenses of the struggle.

Every dollar you invest in Canadian War Savings Certificates helps the nation to deal generously with those who are defending you.

Certificates in denominations of $25, $50 and $100, repayable in three years, may be purchased at any Bank or Money Order Post Office at $21.50, $43 and $86 respectively. This means over 5% interest—making them a profitable as well as a patriotic investment.

WAR LOANS AND BANK RESOURCES

There is a Heavy Strain on Banks—Government Should Clarify Atmosphere

That the war loan absorptive power of this country is nearly exhausted for the time being, and that further government financial arrangements growing out of the war must of necessity now be made with the Washington authorities, is the opinion expressed by a prominent Montreal banker in a statement to *The Monetary Times.* "It would appear to me," he said, "that Canada must—and logically should—for the immediate future at any rate, be included in any broad general scheme of imperial financing with the American government.

"A fact that should be borne in mind is that while ours is a country of great wealth in natural resources, it is yet far from being rich in a monetary sense, and having in view this consideration, it would seem as if we had thus far done, while not as much as we would like, yet not badly in the matter of financing imperial purchases in this country.

"Another point of paramount importance which should not be lost sight of is that in addition to financing to a very substantial amount munitions plants and the like throughout the Dominion, the resources of the banks are now fully employed in supporting the essential commercial and industrial business of the country, a fabric which must be maintained. In consequence, at the moment, bank resources are under a heavy strain, which shows no sign of diminution and further assistance from that quarter can hardly be expected in reason.

"It would, therefore, appear that the only course open is the establishment of an outside credit, sufficient not only for immediate requirements but of an amount large enough to provide against the necessity of a further domestic flotation until the coming spring, at the earliest.

Washington not Unsympathetic.

"In so far as I can judge from the somewhat limited opportunities I have had of forming an opinion, the authorities at Washington would not, as they should not, be unsympathetically disposed towards a proposal of this nature, and if we in this country could be relieved for a comparatively extended period from the over-hanging possibility of a fresh domestic loan, it would have, I doubt not, a distinctly beneficial effect upon the financial and industrial situation generally.

"As the second largest customer of the United States, it is but businesslike and reasonable that we should receive special consideration at the hands of the American Government, and I venture to think it is realized there, as it is here, that our present rate of imports from that country cannot be maintained at existing figures unless financial assistance at this juncture is extended to us from thence."

The report of a Canadian bond house, with exceptionally strong United States connections, expressed the opinion to *The Monetary Times* that the United States is the logical market for our next loan. "Canada," he said, "was debtor to the United States on a balance of trade last year in the amount of approximately $350,000,000. The last Canadian loan has not as yet been entirely absorbed by the ultimate investor, in fact, it is fair to suppose, judging from the market, that there is quite a large amount of this loan still to be put away in its final resting place.

Government Should Clarify Atmosphere.

"The entire Dominion is waiting in a more or less nervous state the outcome of the political situation at Ottawa. The present government's policy as to taxation has not yet been fully outlined and yet intimations have come or rumors have been circulated to a sufficient extent to alarm some of the larger corporate interests and some of the big investors. Until the above mentioned items are fully cleared up it is doubtful if the large corporations and the big investors will be as eager to subscribe for a new loan as they have been in the past.

"On the other hand, there are two courses open to Canada in the United States. The first would be a direct loan by the government of the United States to the government of the Dominion of Canada, which would, of course, be at the same rate of interest that the United States government was obliged to pay on its own security, as has been the case with advances made to England and France. The second would be a loan sold by the government of the Dominion of Canada to the bankers of the United States, to be distributed by them among the investors. Either one of these courses should be clearly open to Canada for the American people are aware that their big neighbor to the north is their second best customer, and in times like these the seller of commodities must be willing to advance to the purchaser reasonable credits to cover trade balances for extended periods. The Canadian and American people are so closely united in the great struggle for liberty and humanity that the American mind can be easily moulded to the idea that Canada, by right of past performances, is entitled to an extended credit of this kind.

"The only question that arises is what the attitude of the United States government will be toward Canadian borrowing in their territory. No fair-minded man, however, could suppose that they would refuse Canada, their near neighbor and large customer, what they have granted England and France so recently by means of advances to them from money accumulated through the sale of Liberty bonds.

Direct Loan and Interest Rate.

"Of course if the advance is made by the United States government, the rate of interest would be much more favorable to Canada than it would be, either through the means of an internal loan or an external loan floated in the United States.

"Furthermore, if the contemplated financing is done in the States, Canada would allow her own capital to accumulate again and the success of a future loan in this country would be more readily assured, as it is fair to suppose that the questions enumerated in the first part of this letter will have been solved to the more or less complete satisfaction of all parties."

NEXT WAR LOAN SHOULD ISSUE HERE

Unpardonable to Increase Large Foreign Debt for Expenditures in Canada, Says R. D. Bell

"To postpone another Canadian war loan would be dodging the issue," said Mr. R. D. Bell, of Greenshields and Company, investment bankers, Montreal, in a statement to *The Monetary Times.* Mr. Bell is a close student of and a well-known writer on financial and economic subjects. "To the extent that our imports from the United States exceed our exports to that country, it is desirable that we secure credits in the United States. Having a favorable balance with Great Britain which will amply cover the balance against us in the United States, it is legitimate enough finance to increase our indebtedness in the United States to cover our purchase there.

"But, presumably, the government requires considerably more than enough to cover our balance with the United States. The government requires large sums representing expenditure in Canada. At a time when this country is well able to subscribe the necessary funds it would be unpardonable to increase our already enormous foreign indebtedness for such a purpose. I believe that with the necessary effort, via the proper avenue of approach, ample funds can be secured without any disturbance to our financial system. Borrowing money abroad to spend here cannot possibly be justified.

Improve Flotation Methods.

"It may be said to this that Canada is not able to subscribe further war loans and the discount at which the last loan is selling and the many evidences that this loan was poorly distributed may be pointed to in support of such a claim. But, because the last loan was not properly distributed, is no reason why the next should not be. In spite of repeated warnings from those familiar with the mechanics of bond merchandising, the government, encouraged no doubt by the ease with which the first loan was floated, did not take the necessary steps to insure a widespread distribution of the last loan.

"Ever since the first loan, we have again and again pointed out (and *The Monetary Times* has been good enough on several occasions to publish our remarks) that Canadian war loans were not being floated in such a manner as to insure the best results. The first two loans were successful in spite of this and the third loan was only successful superficially. Too much of it was taken by large institutions and wealthy individuals. Too much was subscribed for advertising purposes with the idea of reselling at a profit. Failure was bound to be the ultimate fate of war loans which were offered at a complicated price in a technical prospectus, un-

supported by any widespread propaganda in modern result-getting advertising and salesmanship. War loans are bound to go begging if you continue to force them into the same hands and neglect to get them out in small lots throughout the mass of the people.

Raise War Loans from Current Income.

"Under such circumstances, subscriptions naturally came mainly from the regular investing class. They came for the most part out of the capital of those investing and not out of income. Sources such as these are soon dried up; also subscriptions from such sources, coming out of capital largely tend to reduce bank deposits. The method of war finance endorsed by economists is that of raising money as far as possible out of the current income of the people. Such a method gives bond issues a wide distribution, does not affect seriously the banking position, encourages thrift and that part which comes out of current income can be tapped again and again.

"This is the method England has striven for ever since the war started and we have often had occasion to refer to the manner in which Great Britain, which is the most conservative financial community in the world, called in the aid of the most modern methods of publicity and merchandising to insure the success of their war loans and get real distribution among the people generally. A council of expert advertising men were secured and Great Britain actually sold its bonds in the same way that our big manufacturing companies have found it necessary to adopt in order to sell anything—the way Pears sell their soap and Heinze his pickles. As a result, eight million people participated in the last British war loan.

Should Have 280,000 Subscribers.

"Let me make an odious comparison. The United States sold $2,000,000,000 of 3½ per cent. bonds to 4,000,000 people. That was the very first war loan and paid a rate of interest 1½ per cent. less than the Canadian loan and at least that much less than the average man could get on his funds, with a reasonable amount of safety. In other words, without any previous education in domestic war loans and at a rate of interest which was far below normal for the ordinary American, the government reached 4 per cent. of the population.

"To have secured equally wide distribution the last Canadian war loan should have been sold to 280,000 people. How many did the last war loan actually reach? The official government figures were, approximately, 40,000.

"Anyone that was in the United States while the Liberty loan subscriptions were open, can easily tell you how the Americans did it. In every newspaper, on every bill board, in every window, at the movies, in the theatres, on the street corners, throughout the length and breadth of the land, the appeal to patriotic necessity and self-interest was proclaimed. No man, whether he was a capitalist or a laborer, could go through a day's work without having the Liberty loan impressed upon him, not once, but twenty times.

Experience of Canadian Loans.

"Every inducement was offered to the people at large to subscribe. The facilities of the periodical payment plan, whereby the bonds could be paid for on easy payments out of income were advertised energetically by practically every bank and security house in the United States. In Canada only those who habitually read the financial page of the newspapers came in contact with the war loan advertising; in fact we know of one firm which had great difficulty in persuading one of our leading newspapers to allow them the use of the first page. The only house which actively brought to the attention of the public the fact that they could buy the war loan on easy payments out of income, was the firm with which the writer is connected. The security houses did most of the work of actually distributing the loan, but the work was confined largely to the restricted clientele that always buys bonds

"In war, which entails so much misery, and will leave us with such an enormous debt, it behoves us to secure as many benefits as we can from it. In an economic way the best single effect of war should be an awakened responsibility on the part of the individual to the obligations of citizenship; the thrift that this should inspire along with a general participation of the public in war loan finance.

Investment Rather than Expenditure.

"War helped to make the French a nation of bondholders, a fact that has constituted France's greatest economic asset. So far in this war we have lost a splendid opportunity to make this country a nation of bondholders. Certainly our war loans are attractive enough and our people are prosperous enough.

"It is only necessary to glance at the figures representing the savings of the people in our chartered banks, to scan the totals representing the imports of unnecessary articles of semi-luxury and comfort, and to see the prosperity of the thousand and one trades which depend on free spending for their existence to realize that not only is there an ample margin to spare from the people's income to subscribe to many war loans, but that a war loan with a popular appeal is highly desirable in order that these funds may be absorbed by investment rather than by expenditure."

WAR LOAN EARLY IN 1918

That is Best Time for Our Next Issue, Says Financier—Consolidated Loan

In discussing with *The Monetary Times* the next domestic war loan, bankers and brokers are practically unanimous in their opinion that much hard work is necessary to prepare the way for the issue.

"The next loan will have to be a very popular issue, in small, as well as large, denominations," said the head of a bond house, "and everybody will be expected to participate. At the present time there is a great scarcity of investment funds in Canada, and it would be very difficult to place any considerable amount of new securities. On the other hand, if the loan is deferred until after the turn of the year, and until after the 1917 harvest has been marketed, there will have accumulated a large amount of funds for investment purposes. After the turn of the year, I think it would be quite possible to float a large loan, consolidating the three previous loans, and making the new issue in such denominations as would appeal to the small, as well as the large investor.

Would be Success in 1918.

"With everybody assisting and the country properly organized a loan early in 1918 could be made a big success, and not only then provide the government with the funds they require, but I think that steps could be taken that would place us in a position to provide the government with such funds as may be required during the balance of the war, if peace has not been concluded before that time.

"Our manufacturing industries are using a great deal of capital at the present time, and a large amount of funds will be required to handle this year's crop. It is quite evident the banks have all they can attend to for the balance of this year without any attempt being made to undertake any government financing, which would only increase the burden, and not in any way relieve the strain on the banks. Then, again, if the fourth loan is postponed until after the end of the year, the unabsorbed balance of the third loan will be, by that time, properly distributed, and the road will be clear for a new issue.

"Taking all things into consideration I am of the opinion that there is every reason why the present financing should be arranged in the United States, and our fourth domestic loan postponed until after the turn of the year. This course would mean sound financing, and guarantee the success of the next domestic issue."

Money Difficult to Get.

Mr. C. Meredith, of C. Meredith and Company, bankers and stock brokers, Montreal, in a statement to *The Monetary Times*, said: "If the minister of finance purposes issuing a further war loan in this country this autumn, it will require a great deal of canvassing to make it a success, and the small investors in particular will require to be brought in as subscribers.

"The finance minister will no doubt want money this autumn. Whether or not he can get it in New York I cannot say, or it may be he does not want to avail himself of any credit there, leaving that for possible necessary requirements later.

"In any case, there will be much more difficulty in getting money here, either for war loans or for the Patriotic Fund, than there has been in the past, and I look for a higher return being offered the investor by the finance minister if a further war loan is necessary here this autumn."

Here is a banker's view of the position: "Unless the minister of finance is able to borrow from the United States,

I think he will have to issue a domestic loan. The only alternative is to see the business of the country come to a standstill by the stoppage of the purchase of munitions and supplies by Great Britain. We all surely realize that she cannot be expected to pay cash in these times, and what is the use of our stating that we have probably done as much as can be expected from us by loans that have already been made. It seems to me that it is on the same plane with the statement that we have sent all the men that can be expected of us. The result of such a policy, carried to its logical conclusion, would be that we are prepared to become a German colony.

"I think that all the financial papers and business men should make a united effort to find the money if a domestic loan is decided upon. There has really been very little sacrifice so far in subscribing, and I think we should hold up the hands of the minister of finance in the policies that he finds it necessary to adopt. For one, I would like to see him pay a larger portion of the daily bill by increased taxes, and by the formation of savings societies all over the country, to obtain more of the money required out of the pockets of the people. We have really not yet begun to feel the pinch in Canada, and I am surprised at the attitude taken by some financial papers."

(See also Page 16).

DOMINION BANK'S HALF-YEARLY REPORT

The profits of the Dominion Bank for the six months ended June 30th, according to the statement just issued, were $559,281, after making the usual deductions. Dominion and provincial government war and other taxes accounted for the substantial sum of $52,415 of the profits, leaving net profits of $506,866. This, together with the balance of $363,442 brought forward from December last, gave $870,308 for distribution. To the patriotic fund, $25,000 was contributed, and dividends at the rate of 12 per cent. per annum absorbed the sum of $360,000 for the half-year. A balance of $485,308 was carried forward. This balance is $122,000 greater than six months ago. Mr. C. A. Bogert is general manager of the Dominion Bank.

CANADIAN TRADE AFTER THE WAR

Some interesting information regarding the steel industry was given by Senator Frederic Nicholls, in speaking to his resolution to appoint a trade committee. Referring to the steel bounties, he said: "The government, though opposed to the policy, saw that if this country was ever to develop it was necessary to assist in the development of the fundamental basis of industry, the iron and steel industries. Relatively speaking, not very much was paid out; but what is the result of that assistance to-day? As I pointed out, the Dominion has received orders for upwards of one billion dollars worth [illegible] steel, $600,000,000 of which has already been manufactured and paid for. Without government aid we could not have done that; we could not have got that steel outside of our own boundaries. Steel has been produced on the Atlantic coast and as far west as the Soo, and we have been able to [illegible] over what after the commencement of the war, threatened to be the greatest period of depression that this country had [illegible] experienced, and to make Canada a prosperous country which, during the war, has increased its per capita wealth at a greater rate than at any other period of its existence. [illegible] government assistance helped to produce the steel which led us to secure orders for munitions. But steel was not the [illegible] element we needed [illegible]. We have turned out hundreds of thousands of tons of lead, in bullets for shrapnel, which were shipped to the Allies when they were [illegible]ly needed, and when, without them, not only would they [illegible] been unable to advance, but the enemy might have [illegible]len through."

[illegible] Senator Nicholls' resolution, which was agreed to by the [illegible], was as follows: "That, in the opinion of this honorable House, it is expedient to appoint a committee to inquire [illegible]d report upon the best method or methods of conserv[illegible] increasing our domestic and overseas trade to the end [illegible]r present prosperity may not unduly suffer when the [illegible]s resulting from orders for munitions and other war [illegible] is removed; and that the said committee be composed [illegible] Honorable Messieurs Beaubien, Edwards, McLennan, [illegible]and, Gillmor and the mover."

TWO-THIRDS OF CANADA FOR TIMBER CROPS

[illegible] Europe in peace times is the method by which all lands are carefully examined and put to work according to their capacity. No farmer is permitted to locate on non-agricultural soil, and at the same time, good farming soil cannot be retained under such a crop as timber. Canada has only made a beginning at applying such a policy of business efficiency in the use of the nation's natural resources. Thousands of farmers are to-day tied to farms that produce only a few dollars an acre, their efforts and ambitions practically wasted in a time when man-power is at a high premium. Taking the whole of Canada's area, more than two-thirds will never produce field crops, and the bulk of the two-thirds will prove profitable under only one crop, namely, timber.

All efforts for the protection of the forests against fire and other forms of needless waste aim to keep in a productive condition those millions of acres that can never grow field crops. Canada holds a tremendous national advantage in her forests, but from the beginning of the last century about two-thirds of the original inheritance has been destroyed by fires. Nearly all modern countries have put an end to forest fires by carefully organized protective systems.

CRESHAM LIFE'S CREDITABLE REPORT

"This being the first year since the presentation of our last valuation," said Mr. Chas. A. Hanson, M.P., chairman, presiding at the recent annual meeting, "it will not be expected by any of you that the year's record will present any very startling or striking features. In the first place I call your attention to the fact that during the year 2,800 policies have been issued, as compared with 2,751 policies during the year 1915, assuring a sum of £1,254,066, as compared with £1,228,952 in 1915. The increase is not large, but still it is quite appreciable, and, having regard to the conditions which prevailed here and abroad, throughout the Dominions and in Allied countries, I think you will agree with me that the figures cannot but be regarded as gratifying, especially when I tell you that of the very large number of British offices transacting life business there are but eight transacting ordinary business whose volume of new assurances during 1916 was greater than ours. Having regard to the conditions which prevail and the markets from which we have been rigidly excluded, to have secured a volume of new business exceeding 1¼ millions is, I think, on the whole, a creditable result.

"Another point I want to refer to is in regard to our investments in British government securities," said Mr Hanson. "We have done our best to support his Majesty's government, from a financial standpoint, in this tragic war. At December 31st, 1915, our investments in war loan and treasury bills amounted to a sum of £146,128, but at the end of December, 1916, they amounted to £506,006 4s. 2d., to which must be added our investments in colonial war loans—the Dominion of Canada and one or two other similar loans—amounting to a sum of £178,200, so that the society's investment for the purpose of assisting the Imperial government in carrying on the war amounted to £684,226. In addition to that £684,000 we have deposited with the treasury under their scheme 'B' the sum of £310,000, so that, including that deposit, at the end of 1916 our assistance ran up to the total of one million sterling."

The Gresham Life has an excellent connection in Canada with headquarters at Montreal, the manager being Mr. Arch. R. Howell, a capable and energetic underwriter. The premiums in Canada for 1916 were $84,664. The number of policies in force at the end of the year was 1,344, the net amount in force being $2,837,234.

The British Columbia government has made another interest payment on the Pacific Great Eastern Railway account. The amount paid was $423,000, consisting of $315,000 interest to bondholders in England and $108,000 to the Union Bank of Canada on the company's loan of $4,800,000.

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

TRADE UNIONS IN CANADA

They Have Membership of 160,400—Report of Labor Department

Figures are printed in the sixth annual report on labor organization in Canada, containing statistics, etc., for 1916, and issued by the department of labor, showing the extent to which the trade unionists of the Dominion have contributed to the Canadian expeditionary forces since the outbreak of the war in August, 1914. Enlistment of one or more members has been reported by 1,284 local branch unions, the recruits numbering 21,599 and reservists 593, a total of 22,192 trade unionists in the ranks.

Of the 1,842 local trade union branches in Canada, 828 of them are located in 18 cities, and 589 reported a membership of 69,225, representing over 40 per cent. of the entire trade union membership in the Dominion. Montreal occupies first place as to number of local branches, while Toronto, Winnipeg and Vancouver follow in the order named. The following summary gives the names of the cities, number of branches in locality, number of branches reporting membership and the membership reported:—

Cities.	Number of unions in locality.	Number of unions reporting membership.	Number of members reported.
Montreal	127	74	[illegible]
Toronto	111	81	13,025
Winnipeg	75	47	7,121
Vancouver	[illegible]	43	3,788
Hamilton	50	38	3,539
Ottawa	40	35	3,714
Edmonton	42	33	2,059
London	40	33	2,411
Quebec	38	33	5,382
Calgary	36	20	2,184
Victoria	35	21	1,018
Fort William	30	11	925
Regina	27	21	905
Halifax	27	17	2,435
St. John	24	15	4,067
Saskatoon	[illegible]	15	796
Moose Jaw	[illegible]	15	1,254
Lethbridge	20	15	[illegible]
Totals	828	589	69,225

The loss in trade union membership recorded in the two previous years has been partially overcome by the increase of 17,064 reported for 1916, the total numerical strength at the close of the year being 160,407. In all there are 1,842 local branch unions in Canada, 1,626 comprising 129,123 members, being affiliated with international organizations, 189 with 22,884 members are connected with non-international bodies and 27 having 8,400 members are independent units. There was a loss of 35 international local branches during the year, but the membership was increased by 14,401; the non-international bodies lost two branches and 780 members, and the independent units were decreased by four, but the reported membership shows a gain of 3,443. The membership of all classes of organized labor in Canada as reported to the department for the past six years has been as follows: 1911, 133,132; 1912, 160,120; 1913, 175,799; 1914, 166,163; 1915, 143,343; and 1916, 160,407.

Benefits Paid by Central Labor Bodies.

Nearly all of the central labor organizations operating in Canada have benefit features on a varying scale. A table is furnished showing the expenditure made on this account by the various organizations, the disbursements for 1916 being $2,502,128, a decrease of $2,063,237, as compared with the payments made in 1915. The expenditure for each class of benefit was as follows: Death benefits, $7,808,225; strike benefits, $2,811,426; sick and accident benefits, $1,120,186; old age pensions, $461,780; and unemployed and travelling benefits, $106,458. Four of the non-international bodies reported having made payments on account of benefits, the expenditure amounting to $11,933.

A statement is also published showing the amount paid in benefits for the year 1916 by local branch unions in Canada to their own members, the disbursements aggregating $248,180, an increase of $119,509, as compared with the expenditure for 1915. The payments made on account of each class of benefit was: Death benefits, $56,646; unemployed benefits, $2,121; strike benefits, $15,542; sick benefits, $146,592; other benefits, $27,279.

A chapter gives details of restrictive measures which have been adopted by certain labor organizations against members joining the military forces, and the action of central labor bodies in Canada on registration is also recorded.

The report follows closely along the lines of former reports on labor organization in Canada, the various phases of the scheme of organization which have been developed being given due consideration.

The report serves as a directory of trade unions for the Dominion for 1917, including as it does particulars not only of every known local trade union in Canada, but also a list of all international and non-international central organizing bodies, together with the names and addresses of the chief executive officers.

CONDITIONS IN SASKATOON DISTRICT

A Saskatoon correspondent of *The Monetary Times* writes:—"Things here are very good. Business from the country forms a large percentage of what is passing. This, since the general advent of the farm auto, is very important. Every afternoon, our streets are literally lined with cars—country cars. During wet weather when the roads are bad, business in this city is quiet.

"The crops are rather spotty. Talk of a bumper crop is no longer justified. There is some very good crop almost everywhere; but, there is much that is disappointing. We have had far too little rain. Our average moisture precipitation for May runs about 1.75 inches, or about 204 tons of water per acre. This year, we got about 17 tons per acre during May. We started the season with lots of water in the land; but, the water that makes things grow is the water that comes from the sky. Good rains now would help wonderfully; but, there is much crop that is hopeless. Some sections of the country are worse than others. We will do well if Saskatchewan averages 12 bushels per acre, wheat, for this season."

NEW ERA IN CANADA.

A collection of valuable essays dealing with the upbuilding of the Canadian Commonwealth has been gathered by Dr. J. O. Miller, principal of Ridley College, and published by J. M. Dent and Sons, Toronto, in a handsome volume, "The New Era in Canada." Contributions to the volume are made by the following writers:—Stephen Leacock, Sir Clifford Sifton, Sir Edmund Walker, Archbishop McNeil, Professor F. D. Adams, G. Frank Beer, Sir John Willison, Professor G. M. Wrong, John W. Dafoe, A. J. Glazebrook, Miss Marjory MacMurchy, Mrs. H. P. Plumptre, Dr. Herbert Symonds, J. O. Miller and Peter McArthur.

In his introduction, Dr. Miller, who has edited the volume says, the purpose of the book is two-fold:—1. To awaken the interest of Canadians in problems which confront us as we emerge from the adolescence of past years into the full manhood of national life. 2. To urge that the test of national greatness lies in the willing service to the state by its citizens and to point out, so far as possible, opportunities for service.

The 16 essays are as follow:—Democracy and Social Progress; The Foundations of the New Era; Our National Heritage; Immigration and Settlement; East and West; National Ideals in Industry; Canadian National Unity; Women and the Nation; The Bi-Lingual Question; Our Future in the Empire: Central Authority; Our Future in the Empire: Alliance Under the Crown; Some Thoughts on the Suffrage in Canada; Public Opinion and Political Life; The Better Government of our Cities; The Outlook for Religious Faith, and Our National Organization for the War. The volume is opportune and should be read by those who take an interest in our national problems. All profits from the sale of the book are to go to the Canadian Red Cross Society.

INCOME TAX INTRODUCED

Sir Thomas White Takes Measures to Conscript Wealth —How the New Tax Works

A graduated income tax was introduced in the Commons by Sir Thomas White, minister of finance, on Wednesday.

Tabulated, the tax works in this way:—

Four per cent. upon incomes exceeding $2,000 per annum in the case of unmarried men or widowers without children.

The same tax on incomes exceeding $3,000 in the case of other persons.

In addition the following super-tax is to be imposed:—

Where income exceeds $6,000 and does not exceed $10,000, 2 per cent.

Where income exceeds $10,000 and does not exceed $20,000, 5 per cent.

Where income exceeds $20,000 and does not exceed $30,000, 8 per cent.

Where income exceeds $30,000 and does not exceed $50,000, 10 per cent.

Where income exceeds $50,000 and does not exceed $100,000, 15 per cent.

Where income exceeds $100,000, 25 per cent.

A tax of 4 per cent. on incomes exceeding $3,000 in the case of corporations or joint stock companies.

Income.	Unmarried.	Married.
$ 4,000	$ 80	$ 40
5,000	120	80
7,000	220	180
10,000	400	360
12,000	550	540
15,000	850	810
20,000	1,300	1,260
30,000	2,500	2,460
50,000	5,300	5,260
75,000	10,050	10,010
100,000	14,800	14,760
150,000	29,300	29,260
200,000	43,800	43,760

Equal Division of Burden.

"In a measure of income taxation," said Sir Thomas White, "we should consider first what amount of exemption should fairly be allowed. On the one hand we must be careful that the entire burden of the taxation is not borne by a particular class, and on the other hand we must see to it that our taxation is not oppressive to those whose incomes are barely sufficient to enable them to sustain the burden of the cost of living as it is to-day. It has appeared to us that it would be proper to fix the limit of exemption to $3,000 in the case of married persons and $2,000 in the case of unmarried persons and in the case of widowers without dependent children, so that, so far as this measure is concerned, a married man who has an income of $3,000 or less will not be subject to its provisions; an unmarried man or a widower without dependent children, having an income of $2,000 or under, will not be subject to its provisions. In brief, the bill provides for exemptions of all incomes up to $2,000 per year in the case of unmarried men or widowers without children, and $3,000 per year in the case of married men. After that, up to $6,000 per year, the tax is 4 per cent per annum; between $6,000 and $10,000 per year, 6 per cent.; between $10,000 and $20,000, 9 per cent.; between $20,000 and $30,000, 12 per cent.; between $30,000 and $50,000, 14 per cent.; between $50,000 and $100,000, 19 per cent. and over $100,000, 29 per cent.

"In addition, all business firms and corporations, where the profits are in excess of $3,000 per year, are liable to a tax of 4 per cent. per annum, but if the business tax now in force exceeds the amount which would be taken under the income tax, the higher amount only is taken. By income is meant net income, excepting all contributions to patriotic funds, and income for investment in Canadian war bonds. The tax is applicable to all incomes for the present calendar year, and the first returns are to be in before February 28 of next year."

Concrete Cases to Illustrate.

Illustrating his proposals by concrete cases, the minister explained that on an income of $4,000, an unmarried man or a widower without children would pay $80, and all other persons would pay $40. On an income of $5,000, an unmarried man will pay $120, and all other persons $80. On an income of $7,000, an unmarried man will pay $220, and all other persons $180. On an income of $10,000, an unmarried man will pay $400, and all other persons $360. On an income of $12,000, an unmarried man will pay $580, and all other persons $540. On an income of $15,000, an unmarried man will pay $10,050, and all other persons $810. On an income of $20,000, an unmarried man will pay $1,300, and all others $1,260. On an income of $30,000, an unmarried man will pay $2,500, and all other persons $2,460. On an income of $50,000, an unmarried man will pay $5,300, and all other persons $5,260. On an income of $75,000, an unmarried man will pay $10,050 and all other persons will pay $10,010. On an income of $100,000, an unmarried man will pay $14,800, and all other persons will pay $14,760. On an income of $150,000, if there are any such incomes, an unmarried man will pay $29,300, and all other persons will pay $29,260. On an income of $200,000, an unmarried man will pay $43,800, and all other persons will pay $43,760.

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first three weeks in July:—

Canadian Pacific Railway.

	1916.	1917.	Increase.
July 7	$2,616,000	$3,101,000	+ $485,000
July 14	2,738,000	2,867,000	+ 129,000
July 21	2,641,000	2,950,000	+ 309,000

Grand Trunk Railway.

	1916.	1917.	Increase.
July 7	$1,145,029	$1,297,003	+ $141,974
July 14	1,211,307	1,379,213	+ 167,906
July 21	1,140,220	1,358,013	+ 217,793

Canadian Northern Railway.

	1916.	1917.	Increase.
July 7	$ 885,100	$ 902,300	+ $ 17,200
July 14	874,900	935,600	+ 60,700
July 21	866,900	872,100	+ 5,200

WAR EXPENDITURE $850,000 DAILY

Canada's war expenditure, both in the Dominion and overseas, now amounts to over $850,000 a day. The finance minister gave the figures to the House Wednesday in explaining the necessity for the new income taxation. From the beginning of April to July 20th war expenditure in Canada amounted to $39,700,000, and estimated expenditure elsewhere, including France, during the same period, was $52,600,000, or a total of $92,600,000. Taking that total as a rough basis, Sir Thomas estimated the daily war outlay now at $850,000 to $900,000.

Sir Thomas White proceeded to give a careful statement showing the exact position of affairs. From April 1st to July 20th this year, he said, the revenue had been $78,276,000, and the total expenditure during the same period, ordinary, capital and special was $40,821,000, leaving a balance of $37,000,000 for war expenditures. The war expenditure in Canada, from April 1st to July 20th this year was $39,702,000.

Proceeding, Sir Thomas said that the total Canada had borrowed from Great Britain to July 20th, 1917, was $317,000,000, including everything. On the other hand we had advanced to Great Britain up to July 20, $302,000,000. The amounts thus were about equal, subject to the fact that Canada had repaid Great Britain $107,000,000 liabilities owing her by an issue of securities pledged in New York. The balanc due from Great Britain on July 17 last was about $95,000,00

DIVIDENDS AND NOTICES

PENMANS LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of one and one-half per cent. has been declared on the Preferred Shares of the capital stock of this Company for the quarter ending July 31st, 1917, payable August 1st, 1917, to shareholders of record of July 21st, 1917; also a Dividend of one per cent. on the Common Shares for the quarter ending July 31st, 1917, payable August 15th, 1917, to shareholders of record of August 4th, 1917.

By Order of the Board.
C. B. ROBINSON,
Secretary-Treasurer.

Montreal, July 13th, 1917.

ILLINOIS TRACTION COMPANY

NOTICE OF DIVIDEND No. 18.

Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over **$5,000.00**, and he has built up a future income of over **$3,000.00 a year** on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. **W. A. Peace,** Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

EXPERIENCED ACCOUNTANT, married, in chartered accountant's office, Toronto, wishes position of office manager or executive, with financial, mercantile or manufacturing firm in Toronto. Reorganization and systemizing a specialty. Active interest and connection with firm in future desired. Apply Box 93, *The Monetary Times*, Toronto.

EXPERIENCED ACCOUNTANT and Auditor is open for engagement in any capacity where ability and energy are required. Chartered Secretary of Joint Stock Companies, good organizer and capable manager, credits, etc., ineligible military service. Box [illegible], *The Monetary Times*, 62 Church St., Toronto.

I OFFER for sale the Canadian Patent Rights to an exceedingly valuable invention in the auto tire accessory line. The article is now being profitably manufactured in the States. It has been a demonstrated success from the start and the factory is now behind on orders. Is easily sold, as every car owner is a prospective customer. The article is easily manufactured. Only a small amount of inexpensive and easily secured machinery required. Nothing but standard materials used.

R. M. MACNISH, Pres.,
ARMORED TIRE CO.,
143-145 West Austin Ave.,
CHICAGO, ILL.

Shooting the Rapids of the Historic St. Lawrence in 1817

There is no country in the world that can offer so many fine water trips. Spend your vacation in Canada. Take advantage of our wonderful trips that people travel thousands of miles to enjoy.

Niagara-to-the-Sea

The traveller will find many points of interest in this trip that is *all* interesting. There's the Thousand Islands, the Venice of America, with its ever-changing, ever-glorious scenery. Then the thrill of shooting the Rapids near Montreal, which the Red Men used formerly to shoot in their birch-bark canoes.

Quebec, the city quaint and beautiful, reminds the traveller of Old France. The miracle-working shrine of Ste. Anne-de-Beaupre. The modern hotels of the Canada Steamship Lines at Murray Bay and Tadousac. Finally, the River Saguenay with its towering promontories, Capes Trinity and Eternity, higher than Gibraltar—beautiful beyond description. This is the trip we call "Niagara to the Sea."

Send two cents for Booklet, Map and Guide

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance.

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

LEGAL NOTICE

THE THOMAS WARREN KNITTING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 21st day of June, 1917, incorporating Alfred Geoffrey Edwards, Theophilus James Macnamara, Thomas Paterson Geggie, John Smith Masson and William Fostus Alexander Hill, all of the City of Toronto, in the Province of Ontario, accountants, for the following purposes, viz.:—(a) To buy, sell, manufacture and deal in woollen and other fibres and yarns and the products thereof throughout the Dominion of Canada; (b) To acquire the business and good-will of Thomas Warren, manufacturer of knitted goods doing business in the City of Toronto. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Thomas Warren Knitting Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 21st day of June, 1917.

THOMAS MULVEY,
Under-Secretary of State.

52-2

The Guardian Fire Insurance Company, of Salt Lake City, Utah, has been licensed to transact in British Columbia, the business of fire insurance. Mr. A. S. Matthew, 414 Pender Street West, Vancouver, is the attorney of the company.

The biggest land deal in southern Alberta this year was completed at Lethbridge recently, when C. S. Noble, of the Noble Foundation, purchased 15,000 acres of the Cameron ranch, east of the city, from the Cameron estate, New York, at an average price of about $10 an acre. This is raw land and will be put under cultivation soon.

CANADA STEAMSHIPS PAYS DIVIDEND

The Canada Steamship Lines makes an announcement respecting the declaration of dividends on preferred stock. The entire declaration consists of 7.58 and ⅛ per cent., and is divided as follows: 2⅓ per cent. payable August 1st to shareholders of record of July 15th, 1¾ per cent. payable November 1st to shareholders of record of October 15th, 3½ per cent. payable January 2nd, 1918, to shareholders of record of December 15th, 1917. The uneven payment of 2⅓ per cent. is explained by the decision of the directors to clear up the payments for one month dividends, regarding which there has been some discussion. This was settled by allowing .58⅓ per cent. for last December.

The declaration also introduces the new policy of making payments quarterly hereafter, instead of annually, as announced a couple of years ago. The change is due to the fact that the company is now operating all the year round, instead of only during the summer months, as formerly.

The declaration of the dividends on the preferred stock for the balance of the year was made for the purpose of disposing of the matter finally, and clearing up all outstanding obligations on the preferred stock, together with those which would accrue during the balance of the year. The company will then start the new year with a clean sheet and make its declarations quarterly hereafter.

CANADA'S BANK CLEARINGS

THE NORTHERN ASSURANCE COMPANY

ESTABLISHED 1836 LIMITED

THE EIGHTY-FIRST ANNUAL GENERAL MEETING of the Northern Assurance Company, Limited, was held in the Offices of the Company at Aberdeen on Wednesday, May 2, 1917, when the Directors' Report was presented.

FIRE DEPARTMENT

THE PREMIUMS received last year amounted to **$7,177,600** showing an increase of **$568,455** in comparison with those of the previous year.
THE LOSSES amounted to **$3,607,045**, or 50.3 per cent. of the premiums.
THE EXPENSES OF MANAGEMENT (including commission to agents and charges of every kind) came to **$2,682,285**, or 37.4 per cent. of the premiums.

FIRE REVENUE ACCOUNT

Amount of Fire Insurance Fund at the beginning of the year, viz.:—		
Reserve for unexpired Risks	$3,297 890	
Additional Reserve	6,000 000	
		$9,297,890
Premiums		7,177,600
Interest, dividends and rents	$441,225	
Less Income Tax thereon	42,670	
		398,555
		$16,874,045

Claims under Policies paid and outstanding		$3,607,045
Commission		1,054,600
Expenses of Management		1,610,650
Contributions to Fire Brigades		17,035
Transferred to Profit and Loss account:—		
Profit for the year	$597,360	
Interest	398,555	
		995,915
Amount of Fire Insurance Fund at the end of the year, viz.:—		
Reserve for unexpired Risks, being 50 per cent. of Premium Income for the year	$3,588,800	
Additional Reserve	6,000,000	
		$9 588,800
		$16,874,045

TOTAL FUNDS OF THE COMPANY

After carrying out the proposals of the Directors, the Funds of the Company, as at 31st December last, will stand as fol'ows:—

Capital (subscribed $15,000,000) paid up	$1,500,000

Profit and Loss Balance	1,156,235
($5 taken as equivalent of £1 sterling)	**$39,589,945**

HEAD OFFICE FOR CANADA - - - MONTREAL

G. E. MOBERLY, Manager.

NEW WOOLEN FACTORY OPENED

A new textile mill has been opened at London, Ont., by Penmans', Limited, with 75 employees, to be increased to 175. The work in this mill consists in finishing the underwear which is made in Paris and elsewhere and also in knitting hosiery. The firm thus relieves the strain upon its other mills, where labor has decreased. The opening of the new mill secures labor that could not have been obtained at the various centres where the mills are located, and in this way enables the company to increase its output by exactly the amount of work done at the London mill.

INSURANCE FIRM IN LIQUIDATION

Regarding the winding up of the Ontario Fire Insurance Company, the following report has been made by the Trusts and Guarantee Company, liquidators of the insurance company:—

The claims for losses amounted to $111,361.31, of which claims of $108,484.54 have been admitted, $2,238.57 barred by order of the court and there are yet to be dealt with claims of $637.20. Agents' claims of $10,666.27 have been admitted, and the accounts of quite a number have still to be dealt with. Another dividend cannot be paid until the accounts of all the agents have been properly determined, some having reinsured their business without instructions from, or knowledge of, the company. There were about 15,000 policies outstanding at the date of the winding-up order, the liability being $80,363.84. This liability, however, will be materially reduced through the adjustments which are being made with the agents, though there will be a corresponding reduction in the balances owing by the agents to the company.

The par value of the securities held by the minister of finance was $50,500, for which the sum of $48,276.06 was realized—$44,947.80 from sales and $3,328.26 as interest. These proceeds are earmarked for the policyholders, who will rank as ordinary creditors for the balance of their claims against the proceeds of the company's other assets, together with the other creditors, whose claims may amount to $20,000. We have approximately $53,000 cash in bank, but another dividend cannot be paid until the total liability to the policyholders is determined. The claim of the Ontario of $40,000 against the Western Canada Fire Insurance Company was admitted and we have recently been appointed liquidator of the Western Canada.

ASBESTOS CORPORATION'S PROFITS

Net profits of the Asbestos Corporation of Canada for the six months ending June 30th last, amount to $224,560, which was sufficient to take care of $75,000 bond interest, and the two quarterly dividends of one per cent. on the preferred stock, calling for $80,000 and leave $69,560 to add to balance at credit of profit and loss. This balance stood at $500,102 at the end of 1916.

Earnings as shown are given as "net profits from operations." As no mention is made of the company's usual provision out of earnings for renewals and betterments, presumably the appropriation under that head is deferred until the end of the year. Charging up only bond interest against the profits shown, the surplus for the half-year was $149,560, equivalent to earnings at the rate of 7.5 per cent. per annum on the $4,000,000 preferred stock.

The Lumber Products, Limited, a new concern at New Westminster, B.C., has taken over the premises of the Iowa Lumber Company, and will manufacture boxes and operate a sawmill. The new company will log their own timber, operate their own mills, utilize the by-products in various ways, and toys will also be manufactured. The company have taken over the North Vancouver toy factory.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Burleigh Falls, Ont. [illegible] totally destroyed. Loss partly covered by insurance.

Burnaby, B.C.—July [illegible] destroyed.

Cooking Lake, Ont. July 14 Mr. [illegible] mer residence and contents burned to the ground. Estimated loss to building, $8,800; to contents, $1,000. Partly covered by insurance.

Enniskillen, Ont.—July 1—Mr. J. Simmon's frame barn and contents. Partly covered by insurance.

Fort William, Ont.—July 17—Mr. Youman's farm stable and barn destroyed, also three pigs burned alive and 75 bushels of oats, a double set of harness, disc harrow, wagon and seed drill consumed. Fire started in pile of straw.

Haileybury, Ont.—July 19—Mrs. T. Poppleton's residence completely destroyed; covered by insurance. Probable cause, lightning.

Hamilton, Ont.—July 21—Bastien's boathouse partially destroyed, two rowboats and a canoe completely. Owners of boats, Mr. G. Burlinghoff, Mr. H. Smart, and Mr. W. S. Campbell. Total loss, $400.

Hudson, Que.—July 21—Canadian Ice Company's ice house damaged, also two cottages and some buildings destroyed. Company's losses amount to $20,000. Total loss estimated at $50,000. Cause, thunder bolt.

Macklin, Sask.—July 20.—Warin's furniture store, four others adjoining and many buildings destroyed. Total loss estimated at $75,000; partly covered by insurance.

Merritt, B.C.—July 16—Inland Coal and Coke Company's boarding house.

Nashwaak Village, N.B.—July 21—Mr. Bank's cow stable and three barns containing machinery, the property of Mr. Cameron, destroyed. Loss to barn $1,000, partly covered by insurance. Loss to machinery $500. Cause, lightning.

Owen Sound, Ont.—July 22—North American Bent Chair Company's factory; large section of roof and third floor destroyed.

Ridgetown, Ont.—July 23—Mr. W. Squire's store. Estimated loss some hundreds. Cause, burning match.

Salmo, B.C.—July 11—Kootenay Shingle Company's plant and office buildings. Loss runs into thousands of dollars, partly covered by insurance.

Vancouver, B.C.—July 14—Mr. Victor Eckstein's house damaged. Loss covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Ingersoll, Ont.—July 16—Recent information received with reference to Mr. Edwin Marshall's dwelling house show estimated damage to contents, $800; to building, $200. Insurance was carried in Liverpool and London and Globe insurance companies to the extent of $[illegible]. Total [illegible]. Cause, defective chimney.

Lethbridge, Alta.—July 7—Barn and cow stables, property of S. Trew. Estimated damage to buildings, $300. No insurance carried. Cause, children playing with matches.

PUBLICATIONS RECEIVED

Municipal Handbook. A [illegible] Toronto's civic and political history, combining street railway, building and school statistics, with [illegible] National Exhibition. Issued by the [illegible] Toronto. Publishers, The Carswell Company, Limited, Toronto.

Canada at War. A pamphlet containing speeches with reference to the war delivered by Right Hon. Sir Robert Laird Borden both in the British Isles and Canada. Issued by the Premier, Ottawa.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

National Portland Cement Company.—Under the recent [illegible] the following [illegible] the directors of the company, according to information received by *The Monetary Times* from Mr. R. H. McWilliams, manager: Hon. Dr. David Jamieson, president, Durham, Ont.; Gilbert McKechnie, secretary-treasurer, Durham, Ont.; R. H. McWilliams, manager, Durham, Ont.; John E. Russell, Toronto; R. E. Hamilton, Grand Valley; N. Colville, Orono; E. A. Smith, St. Thomas; Wm. Calder, Durham.

Brompton Pulp and Paper Company.—At a meeting of the directors a dividend of 1¼ per cent. for quarter was declared, payable August 7 to shareholders of record July 31, placing the stock on a straight 5 per cent. basis instead of the 4 per cent. with a bonus of 1 per cent. The company's figures show for the half-year ending April 30, a surplus of $326,274, after providing $150,000 for contingencies and taxes. Legal expenses and salaries amounted to $49,274 and bond interest to $45,989.

Canadian Car and Foundry Company.—New York shareholders who have been canvassing for the election of A. Hicks Lawrence, of New York, to the board of directors, state that they have already secured the support of $1,000,000 stock, and make a further appeal for support. A new circular signed by William A. Shakman, of Julius Kayser and Company, and H. R. Hilliard, of William E. Peck and Company, asks for additional proxies, stating that "we believe that if the American stockholders would name Mr. Lawrence as their proxy it would strengthen his position as an independent director." The circular states that a large number of stockholders apparently have failed to send in their proxy in response to the company's own circular, or to the circular of the American shareholders.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended July 20th, 1917:—Aladdin Cobalt Mines, 83,100; Dominion Reduction Co., 88,000; National Mines, 40,000; Penn Canadian Mines, 60,861; McKinley-Darragh-Savage Mines, 87,119; Kerr Lake Mining [illegible] 048 pounds, or 307 tons.

[illegible]

NEW BRUNSWICK SELLS $500 000 BONDS

The New Brunswick provincial government have sold $[illegible] issue has been taken by Messrs. J. M. Robinson and Sons, investment and stock brokers, St. John and Fredericton. The bonds bear 5 per cent. interest and have twenty years to run. The sale was made at 95. The bonds now offered to the public are bringing 98. The proceeds are to be applied to road work, bridge construction and repairs.

The work for the past year of the Institute of Chartered [illegible] Arthur C. Neff, and showed continued progress. The elec[illegible] President, T. Watson Sime, Toronto; first vice-president, Wilfred R. Morris, Peterboro; second vice-president, R. J. Dilworth, Toronto; secretary-treasurer, Arnold Morphy; council—A. K. Bunnell, R. Easton Burns, R. J. Dilworth, J. Wyndham Eddis, George Edwards, Edmond Gunn, G. F. G. Jewell, James F. Lawson, Arnold Morphy, W. R. Morris, Arthur C. COLD STORAGE REPORT HINTS GOVERNMENT CONTROL

(Continued from page 8.)

companies somewhat decreased, yet the total amount of cheese exported from Canada, according to the Trade and Commerce returns, during the 1913-1916 period increased from approximately 155,000,000 pounds to 169,000,000 pounds. This has, of course, directly affected the price of cheese to the cold storage companies. The export of eggs by cold storage companies has increased during the same period from less than 1 per cent. to 23 per cent. The export of bacon has increased from 24 per cent. to 91 per cent. The commodities which have been exported in the greatest quantities show the greatest increase in prices and in margin. It has been already claimed herein that the export demand has been responsible for most of the advances in domestic prices."

It is pointed out that the margin which the cold storage companies put on food products varies on butter from 1.74 cents per pound to 2.58 cents per pound in 1915, and 1.9 cents per pound in 1916; on cheese from .43 cents per pound in 1913 to 1.15 cents per pound in 1914, and .78 cents per pound in 1916; on eggs from 2.35 cents per dozen in 1913, on a steady rise, to 4.31 cents per dozen in 1916; that the margin on beef shows a decline from 1.06 cents per pound in 1913 to .7 cents per pound in 1916; on pork from 1.9 cents per pound to .36 cents per pound in 1914 and to 1.85 cents per pound in 1916; on bacon a rise from 2.33 cents per pound in 1913 to 4.58 cents per pound in 1916; on ham a decline from 4.86 cents per pound in 1913 to 2.12 cents per pound in 1916; and on mutton and lamb a decline from 1.38 cents per pound in 1913 to .61 cents per pound in 1916. In spite of these fluctuations, which in eggs and bacon particularly are abnormal, it is the price paid to farmers which has shown the original and most important ascent. Because of the varying distances of the farmers from the markets which they supply, it is not possible to say with accuracy the charge on the produce from the time it leaves the farmer's hands until it reaches the cold storage warehouses. Throughout southern Ontario, however, and as far east as Montreal, the charges are as follows: The buyer for the cold storage companies is paid 1 cent per dozen for buying eggs, ¼ cent per pound for cheese, and ½ cent per pound for butter. The freight on eggs is 25 cents to 30 cents per case of 30 dozen; on cheese it is ¼ cent to ¾ cent per pound, and it is ¼ cent to ¾ cent per pound on butter. But subtracting these items from the cost price shown by the cold storage companies we arrive at the price paid the farmers. It would, however, be misleading to use this as a basis of calculating the average price paid to farmers in Canada. Conditions vary with the localities. But as these charges are fixed, and have not appreciably increased since the war, the increase in the price received by the farmer from the cold storage buyer can be calculated. The table in the next column compares the increase in the cost and the increase in the selling prices since 1913.

The decrease in the margin on ham is not very significant as affecting the total profits of cold storage companies, as only about fourteen million pounds of ham out of an approximate total of four hundred and sixty million pounds of meat were sold by cold storage companies in 1916, and comparison with the records of previous years shows that the quantity sold from cold storage has very slightly increased. The same statement applies to mutton and lamb. Table I. shows that about twelve and a half million pounds of mutton and lamb were sold in 1916, and Table V. shows thaat the proportion of mutton and lamb sold in 1916 as compared with 1913 has actually decreased. The margin on beef has decreased, while the output since 1913 has increased. This decreased margin is, however, offset by the soaring prices which the by-products have been bringing. But the public has derived the benefit from this; the price of beef has increased less than that of any other meat since the beginning of the war. In the result, therefore, the only wide divergence shown between the increased revenues derived by producers and cold storage companies respectively applies to eggs and bacon. The disproportionate increase received by the cold storage companies as respects these commodities would be justified if storage costs had correspondingly increased, but the figures submitted by the various companies for the last four years do not evidence a sufficient rise in storage costs to bridge this gap, so the cause must be looked for elsewhere, and found. The rise in the price of bacon in 1916 was clearly a result of a practical monopoly brought about by a huge and unprecedented export trade demand.

Discussing the volume of the companies' business, the commissioner says: "The aggregate business of the large companies whose operations have been already analyzed, exclusive of those of Company No. VII., whose records are not complete for the four years, has been greatly expanded in the period 1913-1916. The total business done by these nine companies has increased during the years mentioned by the following percentages: Butter, 46 per cent.; eggs, 32 per cent.; cheese, 14 per cent,; beef, 30 per cent.; pork, 80 per cent.; ham, 150 per cent.; bacon, 1,450 per cent, Sales of mutton and lamb have slightly decreased.

"In view of the tendency towards monopoly, it is most important that the growth in the business of individual companies be carefully considered. All the companies whose operations are reported have not profited equally by the general expansion of trade. The method adopted for calculating the increased trade of each company has been to compare the total receipts from the sales of all the commodities reported on in the years 1913 and 1916. A table showing the approximate increase

Increase of Margins of Farmers and Cold Storage Companies.

Commodities	Cost per lb. 1913, to companies	Increase in cost per lb. 1913 to 1916 to companies	Selling price per lb.	Increase in selling price per lb. 1913, to 1916	Difference in profit to companies 1913 and 1916
	Cents	Cents	Cents	Cents	Cents
Butter	25.38	5.47	27.12	5.61	0.14 plus
Cheese	12.78	5.33	13.21	5.68	0.35 plus
Eggs	22.58	3.47	24.93	5.43	1.96 plus[1]
Beef	8.96	1.79	10.02	1.43	0.36 minus
Pork	12.57	2.34	14.47	2.38	0.04 plus
Bacon	14.75	1.00	17.08	2.25	1.25 plus
Ham	14.43	4.77	19.29	2.03	2.74 minus
Mutton and Lamb	11.97	4.83	13.35	4.06	0.77 minus

NOTE 1.—In partial justification of cold storage companies generally it is necessary to state that the very large advance in average profits on eggs, shown in the preceding table has been greatly influenced by excessive profits derived by two particular companies, one a very large operator, the other a smaller. Particulars will appear later herein. The average advance in the profits of cold storage companies between 1913 and 1916 exclusive of these two companies is 1.2 cents per dozen. While some allowance must be made for the greater expense of doing business even this general advance in profits seems high.

NOTE 2.—The proportion of ham dealt in as compared with bacon, is small. See Table I. Sales of ham by cold storage companies approximated 14,000,000 pounds in 1916 and sales of bacon 150,000,000 pounds. Since the war the energies of the various companies seems to have been directed to the increase of production of bacon. the figures show in 1913 an average margin (seemingly excessive) of between four and five cents per pound derived by the various companies from same. In 1916 the average margin in that commodity dropped to a more reasonable figure and a bigger, and in my judgment, unjustifiable profit is being derived from bacon, the sales of which, by cold storage companies have, since 1913, increased more than twelve fold. This tremendous increase of turnover ought to have resulted notwithstanding increased costs of doing business, in a reduction of gross profit instead of an increase, and I venture to predict that the expert examination of the books of the companies whose names I shall supply for the purpose will so establish.

GREAT NORTH INSURANCE CO

of the year's records of the different companies is given. It discloses a marked variation in the proportion in which the trade of the various companies has grown. The increase in that of Companies No. V. and No. IX. is disproportionate to the general increase. This is largely due to sales of pork and bacon. The volume of the business of Company No. IX. is at the present time (July, 1917) about ten times that of 1913. Company I. is one of the largest beef dealers in the West. Its total sales in beef in 1916 have nearly trebled since 1913. Those of Company No. IV., a Canadian branch of an American firm, are still nearly double that of its largest competitor but have increased only by approximately 20 per cent. Company No. XII. in 1916 sold approximately thirty million pounds of beef. In 1913 its sales were little more than one-third of this. The general margins for all the cold storage companies of Canada have decreased from 1.06 cents per pound in 1913 to .7 cents per pound in 1916. This illustrates the effect of active competition. The very reverse process has been exemplified in regard to bacon and the resulting higher margin. These are the two most striking examples shown in the records of the effect of competition in the one case and of practical monopoly in the other. Particulars are yet to appear herein of the business of the months of March and April, 1917. These will be supplied to illustrate the perseverance of the tendency towards centralization of export trade especially in a few hands, and also to evidence the character of the information which is now supplied to the undersigned, monthly, concerning food stocks, costs, and prices. The April returns disclose that Company No. IX. on April 1, had on hand 7,500,000 pounds of bacon alone, that it purchased during April about 10,500,000 pounds more of the same commodity and sold during the same month about 7,500,000 pounds. The company's month's sales of bacon alone at 24 cents per pound would approximate $1,800,000. This is certainly "big business."—just how big may be best appreciated by considering that a clear profit of one-quarter of one per cent. per pound on such a monthly turnover for twelve months would yield $225,000 for distribution among the fortunate shareholders of the company as their profits upon bacon alone. The business done by this same company in May, which month's figures are not yet sufficiently analyzed to enable their inclusion within this report, amounted to $3,600,000, as respects the commodities included within this report. But the company deals in other commodities, such as hides, lard, and other by-products. It ought not to be surprising, therefore, if at the end of the year 1917 the gross business of this company would be found to have amounted to not less than $60,000,000 for the year.

The table previously mentioned follows:—

Comparison of Growth of Different Companies—Their Total Annual Receipts from Sales of Commodities Covered by This Report. (Note (*a*.)

Company.	[illegible]	[illegible]	1915	1916

*The operations of Company No. XII. for which records for [illegible] are not available, is noted here, because there exists at least a [illegible] between this Company and Company No. IX. Perhaps the association is closer. The inquiry has not yet been fully followed out.

Note (*a*). The specified receipts are exclusive of those [illegible] such as hides, lard, etc.

APPOINT COLD STORAGE COMMISSION

An order-in-council has been passed at Ottawa appointing a commission of three to investigate more fully the conditions with respect to the operations and dealings of the packing and cold-storage companies referred to in the report of Mr. W. F. O'Connor, the acting commissioner on the cost of living.

The chairman of the commission is G. F. Henderson, K.C., Ottawa, one of the best-known lawyers of the capital, with considerable judicial experience as a drainage referee for the province. Mr. Henderson was brought prominently before the public last year as counsel for J. Wesley Allison in the Meredith-Duff investigation. Associated with him are A. B. Brodie, of the firm of Price, Waterhouse & Company, chartered accountants of Montreal, and Geoffrey Clarkson of Toronto, one of the leading chartered accountants of Canada.

They are instructed "to examine the books, records and papers of the William Davies Company and the Matthews-Blackwell, Limited, and to take all other necessary steps in that behalf as provided in the regulations and especially to take evidence under oath or affirmation of any person who such examiners may believe has knowledge relating to such matters as would be included in a complete return by each of such companies concerning butter, eggs, cheese, beef, pork, bacon, ham, mutton and lamb, and to report in writing to the minister of labor the results of their said investigations and examinations, particularly showing, by unit values or prices (that is by pounds or dozens as the case may be), as respects the dealings of each of said companies in each of said commodities:

"(a) The amount of margin between the first cost to each of said dealers and the price ultimately realized on sale or disposal by each of said dealers.

"(b) The net profit;

"(c) The specific elements or factors which have conduced towards or which have operated to produce the difference found between such margin and such net profit, indicating the extent of the operation of such element or fact.

Further, the board is called upon "to recommend in writing a standardized system of cost accounting applicable to the business of cold storage, from the operation of which system the net profits of cold storage companies within Canada may, from time to time, be readily ascertained."

Mr. H. C. Hoover, head of the United States Food Commission, has telegraphed Mr. Henderson that he is sending Mr. T. J. O'Connor, of Chicago, to Ottawa, to assist in the inquiry.

UNION OF PARIS FIRE INSURANCE COMPANY

Mr. W. A. [illegible], superintendent of agencies of the Canadian branch of the Union of Paris Fire Insurance Company, informs *The Monetary Times* that 27 of the employees from the head office staff in Paris have been killed or wounded, 4 missing and 33 have been mentioned in despatches, three have received the Military Medal for bravery, and another the Cross of the Legion of Honor. The company's Canadian manager, Mr. [illegible], is now in New York in connection with the purchasing commission of the French military authorities, and has been on active service for nearly two years.

The company's chief accounts now stand as follows:—Capital fully subscribed, 25 per cent. paid up, $2,000,000; fire reserve funds, $5,530,000; available balance from profit and loss account, $111,521; total losses paid to 31st December, 1916, $[illegible]; net premium income for 1916, $5,[illegible].

These figures [illegible] the company's position materially, notwithstanding the war. The fire reserve fund has been increased by $627,000. There is also a substantial growth in the premium income over that of 1915 of $350,257

No Food Trust Operates in Canada

THAT *is the Finding of Commissioner O'Connor—Neither Has There Been Destruction of Fit Food—There is Nothing Like Combination Among Cold Storage Companies Here, But Lively Competition Instead.*

THE following are the introductory remarks of Mr. W. F. O'Connor, K.C., acting commissioner, regarding the cost of living, as they appear in his report on the cold storage situation. A lengthy summary of the report was printed in these columns last week:—

"The primary object of the investigation concerning which I now report was to discover whether there existed within Canada as among those engaged in the business of cold storage, any illegal combination, undue accumulation or overcharging, in contravention of order-in-council No. 2777 of November 10, 1916; but noting very early in the course of the investigation that much valuable information of a character collateral to its main purpose and not entirely unrelated to it, could be conveniently obtained and recorded along with the necessary data as to business arrangements, stocks, costs and prices, the scope of the investigation was extended to include such other matter. As a result, it is possible to make this report one concerning cold storage conditions in Canada, rather than as it would otherwise have been, one concerning the costs and prices of cold storage commodities in Canada. The matters of costs and prices will necessarily receive the larger share of attention notwithstanding.

"The popular conception, if one may judge from articles and correspondence in the newspaper press and from discussions heard in smoking cars and in social clubs, is that there is a 'food trust' consisting of the various cold storage companies, banded more or less loosely together with the common object of creating an artificial scarcity by means of the accumulation of excessive quantities of foodstuffs so that prices may be enhanced to the great profit of the 'trust' and the great detriment of the public. Weird stories are heard of tremendous quantities of food, good and bad, that have been devoted to destruction, to lessen the supply or because they had been held until unfit for consumption. My inquiries enable me to pronounce with emphasis that there is no such 'trust' and I have failed to discover any instance of the destruction of fit food. Broken and bad eggs are, of course, destroyed, and many millions of eggs will yield many thousands of broken and bad eggs. Injured and unfit food of all kinds is from time to time, and quite properly, in all businesses, destroyed. The law so compels. The most dangerous error is one based upon truth. Supplies have been properly destroyed. A story of their guilty destruction makes easy headway. Again there is nothing like combination among the various companies. There is very lively competition instead. A few of the cold storage companies, however, have attained such dimensions, and have so centralized the business in certain lines that as respects particular commodities particular companies are able to exercise a practical monopoly, especially of export business. The following pages will make this fact very plainly appear. In some instances this practical monopoly has been fairly and justly administered. In others, concerning which I shall have to specifically report, it has not.

"As to the matter of over-accumulation, all the evidence is against it. The popular conception is unquestionably wrong. It is surely not open to contradiction that the reasonableness of the amount of stock in trade carried by a person, firm or company engaged in business depends upon the volume of business transacted, by which I mean the 'turnover.' Immense amounts of produce are bought and carried by the various cold storage companies, as of course. But as immense amounts are sold by them. The sales of some of the larger companies, many of them for export, amount to millions of dollars per month. When one hears of a company having on hand, say, a million dollars worth of bacon this seems a preposterous holding until one discovers that it represents only sufficient for a fortnight's sales. Canada's exports of foodstuffs have expanded immensely since the beginning of the war. Practically all the meats, and a very large proportion of the eggs, butter and cheese exported goes through the cold storage houses. The greater stocks carried are necessarily carried. They are not carried for long. They are merely passing through. It would be an idle and a foolish operation, with the world clamoring for food and bidding high for it, if hard-headed business men, able to sell and take fair profits, were to hold their stocks, forego the opportunity of selling, buying and selling again, and gamble upon the chance of further advances. In any event, Canadian cold storage companies have not done so, as the facts and figures hereinafter set forth will show. What profits have been made are the result of repeated turnovers. For the six months last past I have maintained a close and persistent scrutiny over the operations of these companies. Without exception they report to me monthly, with items, their stock on hand, their receipts, their costs, their sales, their prices realized and the quantities sold for export and for home consumption respectively. In the beginning, the necessary information, covering a four-year period, year by year, 1913 to 1916, inclusive, was obtained under oath. The monthly reports are by cards not under oath, nor need they be for the present purpose, because they connect with the basis information originally obtained. Nor have I omitted to check the returns as to exports by the customs figures, nor to check those given from time to time as to domestic sales by examination of the actual invoices of purchasers, extraneously obtained. Further, in response to many suggestions from such companies that I personally attend and examine their books, I have caused it to be known that in due course an expert accountant will in all likelihood attend for this purpose. You will be aware that I have already recommended such action for the purpose of verification and especially of securing an accurate computation of the profits upon by-products. I make the preceding statements to justify the claim that the figures hereinafter appearing may be accepted as highly reliable.

"As to the matter of the reasonableness of prices and the part played by cold storage companies in the enhancement of prices, I have thought it best to supply, copiously and in detail, the actual figures, so that all who care to investigate may reach conclusions for themselves, whether or not their conclusions agree with mine, which will be stated in proper sequence. I have had occasion in a previous report to state in effect that high prices and unfair prices are not necessarily synonymous. All food prices are ruling high. I shall not reiterate my ideas as to what have been the contributing causes. They have been many. As respects cold storage products, however, I will state here that it seems to me that extensive buying for export has contributed most to the advances in prices of cold storage commodities. A world shortage has induced high bidding in a world market. The domestic price has followed the trend of export prices upwards. And I humbly suggest that the figures which follow will disclose to those who consult them that the Canadian farmer has not been blind to his opportunities. It will be noted that the cost to the various companies of the various cold storage commodities has been climbing, and that a direct relation has been maintained between the cost to the companies and their sale prices. In stating this I do not mean to be understood as stating that the relation has been invariable or as contending that there have not been cases of undue profit taking. Quite the contrary, as will appear at a later stage of this report when I shall express an opinion concerning certain seemingly excessive charging, which, in my judgment, is none the less open to criticism because, for the most part, the commodities affected were destined for export to Great Britain and the Allies overseas. But on the whole the operations of the cold storage companies have stood the test of investigation well. The profits per pound or per dozen of most of these companies have been small, and have not to any great degree contributed to produce the very high prices prevailing. Any one can deduce this fact from the tabulations which appear later on herein. A very small profit, per pound or per dozen, will produce quite an aggregate, all the same, when the operations of a company cover many millions of pounds or of dozens. For this reason it seems to me that such companies may well be content in such times as these with a very minute profit, per pound or per dozen, indeed.

"As already stated, the investigation covered the period of 1913 to 1916 inclusive. Thus comparisons may be made with conditions prevailing before the war. In addition, this report is extended to take in the operations of the cold storage companies to the first day of May last. It will appear that while we have quite sufficient cold storage products for our own needs, and more, an abnormal export demand is lessening our stores and enhancing the prices of commodities for domestic consumption.

"It is planned to issue a monthly bulletin hereafter stating the exact conditions obtaining during the period immediately preceding the issue. The three subsequent parts of this report are devoted to (1) a classification of the cold storage establishments, including abattoirs, in Canada, and a consideration of their character; (2) a consideration of the proper functions of cold storage companies and of the operations of the year 1916 in Canada with an analysis of the margins of profits and of the relation of exports to domestic consumption; an analysis of the business done by certain of the larger companies; a consideration of the reasonableness or unreasonableness of the amount of stocks carried; a comparison of margins of profits, etc., and of the business done in the years 1913 to 1916; and a consideration whether the business of the larger companies has proportionately increased with relation to the total Canadian trade in cold storage products since the war; (3) a statement of the present conditions with prevailing costs and prices and a comparison with the equivalent period of one year ago."

NEW YORK COMMENT ON LOAN

If United States Government Had Provided Funds, They Would Have Been Tax Exempt

"Not since the loan of $100,000,000 to France on April 1st had a bond issue of a foreign government been floated on the United States markets, until the credit of $100,000,000 to Canada on two-year 5 per cent. notes was made this week, with the sanction of the treasury department," says the New York Evening Post. "With our entrance into the war and our government's assumption of the burden of making loans to the Allies, New York bankers tacitly recognized that United States markets were closed to public flotations for foreign nations, unless such flotations were authorized by Washington. This policy of closure, rigorously followed in England, brought it about that, as against $2[illegible] advanced in Great Britain to foreign governments, municipalities and railways in the first half of 1914, not a shilling has been publicly raised for those purposes on Lombard Street this year.

"In a sense, the public offering of a Canadian loan, rather than the financing of the Dominion through our treasury department, may be looked upon as an effort to make use of funds which are available for short-term investment, but which might not go readily into a long-term bond offering of our own government. The success of the numerous note issues by railway and industrial corporations recently had demonstrated the existence of large amounts of this sort of capital. More than that, it is worth noting that the government is also a gainer from the fact that it will collect the income tax from holders of the Canadian notes, whereas its own 3½ per cent. bonds, if issued to provide funds for the Dominion, would be tax-exempt."

Foreign Loans on Merit.

The New York Times' financial review makes the following reference to the Canadian loan situation: While the administration has been loath to encourage any borrowings here by other governments for fear that they might prejudice the financing necessary for account of this country, the situation of Canada, with its heavy debit balance here, made it advisable that the aid she desired to get in this money market be extended, and the secretary of the treasury formally approved of the Canadian loan, but called attention to the fact that it would be necessary for the United States to control the financial situation by determining each application for a foreign loan on its own merit, and with reference to the monetary conditions prevailing at the time.

LIFE INSURANCE STOCK AS AN INVESTMENT

Great-West Life Labels as False Statements Made in Recent Article

The following letter has been received from the Great-West Life Insurance Company, of Winnipeg:—

Editor, *The Monetary Times*.

Sir,—With reference to libellous journalistic statements made against the Great-West Life Assurance Company, it has been the usual practice of this company to ignore such occurrences. However, when statements appear in the columns of a responsible journal of the standing of *The Monetary Times*, we feel that the matter deserves some comment.

An article appears in your issue of the 20th ult., under the heading "Life Insurance Stock as an Investment," written by George Boyd Wickes. We are informed that the employment of the author has been promoting and endeavoring to sell the stock of a new life insurance company. A very natural inference is that he would find it advantageous in the attempt to sell stock in a new company if he had ready for use quotations from a financial journal of your standing. This no doubt has caused him to use more enthusiasm than ability in the compilation of his figures and in the deductions drawn from them.

Stock Capital and Surplus.

In his first reference to the Great-West Life, Mr. Wickes states that during the years 1912-1915 inclusive, the company followed the policy of increasing its stock capital, by the application of surplus to the extent of $385,303. In order to give the color of authority to this and other statements made, it is suggested that the "Blue Book" is the source of information. Neither the "Blue" nor any other book shows anything of the kind and the statement is absolutely false. The capital of the Great-West Life has been paid up in cash by the shareholders themselves, and not one cent has ever been applied for that purpose out of the funds of the company, profits or anything else.

The statement follows that during the years referred to the Great-West Life distributed stockholders' dividends, amounting to $130,722. In point of fact the dividends paid in the years in question amounted to $384,453.38.

Capital and Dividends.

The third statement refers to paid-up capital of $1,000,000 stockholders dividend at the rate of 14 per cent. and an absurd annual dividend return of 56 per cent. The figure quoted for present paid-up capital is only approximately correct; the annual rate of dividend is 15 per cent., not 14 per cent.; and if Mr. Wickes intends to refer to the actual annual return to stockholders on their cash investment this is less than 15 per cent. on account of the cash premium paid on part of the stock, while for several years no dividends whatever were received.

In the table of statistics appearing on the lower half of page 7, the figures exhibited in the second, third and fourth columns relative to the Great-West Life, are incorrect. We have already referred to the present rate of dividend on the company's stock. The inaccurate figure of 14 per cent. is repeated in the second column of this table. As regards columns three and four, the amount paid for dividends on stock during the year 1915 was $120,581.90, not $130,722, and the total amount for the years 1912-1915 inclusive was $384,453.38, not $493,500.

Figures are Incorrect.

As regards the final reference to this company embodied in a short paragraph on page 8, we have already pointed out that the figures used are incorrect and that the statement to the effect that the Great-West Life has applied profits towards the increase of its capital stock is absolutely false.

We regret that a journal with the reputation and standing of *The Monetary Times* should allow such shameful misrepresentations to be given publicity in its columns. Inasmuch as *The Monetary Times* is regarded in many quarters (and we believe, quite rightly), as a source of reliable information, we can only assume that the effusion of Mr. Wickes escaped in some way the usual careful editorial scrutiny, and we shall rely on you to give, in your next issue, an equal publicity to the correction which the circumstances demand.

Yours, etc.,

The Great-West Life Assurance Company.

July 28th, 1917.

The following letter has been received from D. H. McDonald and Company, bankers, Fort Qu'Appelle, Sask.:—

"I notice in your issue of July 20th an article on page 7 by George Boyd Wickes, "Life Insurance Stock as an Investment," in which certain errors have crept in regarding the Great-West Life Assurance Company. As one of the original shareholders, I would like to ask you to correct these errors. Mr. Wickes states that during the years 1912-1915, the Great-West Life increased its capital by bonused profits. This is incorrect. All the Great-West Life capital was paid in cash by calls on the stock, by half-yearly payments spread over a number of years; and again, the dividends for 1915 are quoted as 14 per cent. per annum. This should be 15 per cent. I enclose you a circular which we had prepared last year in connection with the selling of some of this stock. The record of the company from 1893 to 1915 was secured from the head office of the company. While the letter in question does not make any serious charge against the company, it might be as well to have it corrected at an early date, as no doubt the statements contained in *The Monetary Times* become authoritative. You are also no doubt aware of the fact that there is at times considerable agitation against the high dividends paid by companies in Canada. You will notice, however, that in the case of the Great-West Life, the original shareholders waited for seven years for their first dividend."

SAYS INSURANCE FIGURES ARE CORRECT

No Charge Against Great-West Life, Whose Achievements are Admired

The preceding letters were handed to Mr. G. B. Wickes for comment and he has written as follows:—

I have perused the letters received by *The Monetary Times* from the Great-West Life (initials not decipherable) and pass over the writer's remarks by answering in the words of our immortal bard, "Methinks he doth protest too much."

My facts are absolutely correct. On referring to my article you will see that I did not say (as he states) that the company "increased its capital by the application of surplus to the extent of $385,303." What I did say was that it increased its capital from profits in the period under review by this sum and again in summary, making my meaning doubly clear, "1912-16 reports show that shareholders received $493,500 in cash dividends, of which amount $385,303 was applied towards increase of capital." If my words are ill-chosen, I sin in good company, as the Royal Commissioners in their report use this exact same phraseology in referring to the exact same procedure by other companies.

What Happens in Practice.

This is what happens in practice as every reader of *The Monetary Times* is no doubt aware: A call is made and the shareholder pays this call in cash. What I pointed out was that in the period under review (quoting 1912-16 reports), the Great-West Life shareholders received in cash dividends $493,500. The following are details of the amounts debited the shareholders' surplus fund for dividends declared shareholders during previous year:—

Report of superintendent of insurance,	1912	$ 82,233
" " " " "	1913	82,475
" " " " "	1914	87,924
" " " " "	1915	110,146
" " " " "	1916	130,722
		$493,500

Note all reports are for previous financial year.

During the same period these reports show capital stock increased	385,303
	$108,197

so that during this period the Great-West Life shareholders were in the happy position of being able to pay all calls out of their profit dividends, whilst, in addition, the cash distributions retained in hand amounted to $108,197.

I trust that the above details, coupled with my subsequent remarks, also clear up the points raised in Mr. McDonald's courteous letter. My article being an analysis of all companies, I gave summaries rather than details. Had I been writing a series giving the history of each company in detail, it might have made interesting reading, and enabled me to perhaps emphasize my points more clearly.

I certainly made no charge against the Great-West Life. I have the greatest admiration for the late Mr. Brock and his associates and for the success they have achieved. In less than a quarter of a century they have built up a volume of over $1[illegible] of life insurance. As a result they have been enabled to declare the increasing dividends to their shareholders shown above, making, especially for the original investor, a splendid investment. I [illegible] that $71,000 out of the dividend declared in 1915 was derived from the revenue of the shareholders own capital and fund, to avoid public misconception as to the amount of dividends being high.

The 1916 report for the year ending 1915 gives the paid-up capital as $933,803.30 and the cash dividends declared during the year $130,722.48. This works out approximately at 14 per cent., but if 15 per cent. is correct, it only makes my point the stronger and the return of to-day to the original investor who paid $25 per $100 share and purchased his stock at par, is at the rate of 60 instead of the 56 per cent. per annum I stated. I agree that for six years he received no dividends at all, and that ten years after the company commenced business some of the stock was purchased at a premium, but I did not refer to the later, but to the original investor, and it does not alter the fact that 15 per cent. on 100 = 60 per cent. on 25.

Fully Entitled to Security.

I would like to state here that I did not in any way single out this particular company, but analysed all alike. Personally, I consider that the original investor, who, for the first few years, goes without a dividend altogether and for some further years, when dividends are declared, applies part or even the greater portion of them to his uncalled liability, is fully entitled to the position of security and the ultimate handsome return that his investment has earned for him. Your Great-West Life correspondent has access to the blue books which he says are incorrect. I would recommend him to have the errors rectified instead of reflecting on me. It is true that I sell and have sold life insurance stock for a new company, just as Mr. Brock did for the Great-West Life 25 years ago, and I do not consider this derogatory, for I am convinced of its great potentialities as a high-class investment from every standpoint, and in particular the possibilities of its great future appreciation in value. In this connection I would say that the time to buy life insurance stock is at its inception. Great-West Life stock to-day is a good investment around $300 or $400 per share, it was better still for those who bought it at $85, paying $60 premium for it in 1903, but it has proved the best investment of all to the fortunate investors who purchased it at its inception for $25 per share.

PERSONAL NOTES

[illegible] awarded the D.S.O. Two years ago he joined the Highland battalion raised by Lieut.-Col. Cantley for overseas duty.

[illegible] to N. W. Halsey & Company, Chicago, have opened their new eastern offices at 49 Wall Street, New York, in charge of Theodore Luce and Chas. C. Pape; the Boston office is in charge of Chas. A. Fassett, and the one at Philadelphia, of Lloyd A. Munger.

Mr. B. F. Repton, general auditor of the Dominion Steel Corporation, has been appointed to the post of comptroller of the Canadian Car & Foundry Company, and supervisor of the Canadian Steel Foundries, Limited. Mr. Repton was formerly with the firm of Price, Waterhouse, as chartered accountant.

Mr. F. S. Oliver, who is taking the place of Sir Richard Burbridge, deceased, as a director of the Hudson Bay Company, is a literary as well as a commercial man, being the author of "Life of Alexander Hamilton." He is also connected with two well-known London firms, namely, Debenhams, Limited, of which he is one of the managing directors, and forms one of the board on Marshall & Snellgroves, and the Textile Securities, Limited. His wife is a daughter of Lord Justice McLaren.

Mr. C. R. Drayton, manager of the Vancouver Financial Corporation, Limited, and prominent in connection with other financial interests in Vancouver, has returned from a two months' visit to the Orient. He visited Hong Kong, Yokohama, Kobe, Tokio, Shanghai and Manila. Mr. Drayton in a recent interview, stated that Japan was making wonderful progress in the shipbuilding and commercial fields. Japanese craft are to be seen on every part of the Pacific, and more tonnage is being continually produced. The ambition of Japan to rule the Pacific seems to be in process of realization. The war has conferred great industrial benefit upon Japan, he states. Very few ships have been lost, and many have been added. The result is that in the competition after the war she will be able to sweep everything from the ocean. At Shanghai, where Great Britain only possesses concessions, there are still German interests, Mr. Drayton said. But they have been [illegible]

RAILROAD PROBLEM

"Canada is in a separate and serious position of its own regarding its railroads," says Mr. Samuel Rea, president of the Pennsylvania Railroad Company, in a letter on the Canadian railway problem, to which *The Monetary Times* has already devoted much space.

"Only one large system is pre-eminently profitable, and the country is engaged in a serious war. Judged by either its population, its traffic, or future growth, it has pursued too rapid and too liberal a programme of new railroad construction, supported by governmental aid. The crux of the situation is, who is to provide for the deficiency in earning the interest charges and operating expenses and furnish the capital essential to finish and properly equip these lines in the next 10 years or more?

"Obviously," Mr. Rea concludes, "the only available source in sight that can shoulder that great responsibility is the Canadian government. It is also obvious that the Canadian people will not shoulder these obligations, and at a future date permit private companies or stockholders to be the beneficiaries. The majority commissioners suggested operation by a board of trained railroad and business men with practically a life tenure of office. This is an experiment which may fail, but some such co-operative plan must be adopted to meet with the approval of the Canadian people. The burden is too great to be left solely to private capital and initiative, because there is no present nor immediately prospective earning capacity to warrant private capital in assuming that lead, and all capital sources are being drained by the war."

TO NATIONALIZE THE CANADIAN NORTHERN

The following, in brief, are the government's railway proposals announced in the House this week:—

Purchase of the outstanding $60,000,000 stock of the Canadian Northern Railway, giving the government complete ownership of the Canadian Northern Railway system and all subsidiary enterprises.

Appointment of three arbitrators to determine the value of the stock acquired, subject to an appeal to the Supreme Court by either the government or the owners or pledgees of stock in the event of failure by the arbitrators to reach an unanimous determination.

Canadian Northern to retain its corporate identity with operation and administration under a board of directors named by the government.

At least five-sixths of the outstanding shares to be transferred by agreement. Government to take the right to compel the transfer of the remaining shares.

Demand loan of $7,500,000 at 6 per cent., secured by mortgage, to be made to the Grand Trunk Pacific Railway. Government to take power to constitute a board of directors.

Orders for winches amounting to $400,000 have been placed with British Columbia firms. An order for 1,400 tons of bolts has been given to the Vancouver Engineering Works, and Secretary J. Hart, of the British Columbia Manufacturers' Association, has also received word that an order of 500 tons of castings has been distributed among three Vancouver firms.

THE RAILROAD PROBLEM

The government's proposal to nationalize the Canadian Northern Railway and to loan the Grand Trunk Pacific $7,500,000 does not solve our railroad problem. The arrangement, however, is probably the best that can be made in view of financial conditions and of the fact that the war has the right of way. Some criticism is heard regarding the acquirement by the government of $60,000,000 outstanding stock of the Canadian Northern Railway at a price fixed by arbitration. The Drayton-Acworth report, referring to the position of the company's shareholders, stated that the completion of the Canadian Northern system would involve a very large capital expenditure on branch lines and terminals in Eastern territory and a large duplication of existing facilities; that it was impossible for the company unaided to complete its venture, and that it was absolutely vital to the interests of the country that further duplication should cease. "Under these circumstances," said the report, "have the Canadian Northern shareholders any claim to compensation? Not, we think, as of right. But governments in the past have not taken a stand on strictly legal grounds in their dealings with other companies. There are grounds on which similar action could be justified in this case. . . . We think that, on the whole, the equity of the case would be met, if the Canadian Northern shareholders were permitted to retain a moderate portion of the $60,000,000 of shares which they now hold."

The arbitration proposed by the government will presumably be based on that position, so far as the government is concerned. The arbitrators will probably consist of a government representative (perhaps Sir Henry Drayton), a representative of the Canadian Northern shareholders, and a third arbitrator to be appointed by the other two. While the present proposals shelve, for the time being, the complete solution of the railroad problem and satisfies the popular demand that no more financial assistance be given the Canadian Northern Railway, it will remain for a new parliament to consider the Drayton-Acworth-Smith report and a permanent solution of our railway troubles, having in view at the same time the rapidly increasing national debt.

HELPING PAY THE WAR

For the past six months, the sale of war savings certificates in Canada has averaged $1,500,000 a month, making a total of $9,000,000 which has been made available for war purposes through these small investments. The number of certificates sold is over 130,000. This is a good record but can be greatly improved without difficulty. A war savings certificate should be held by every member of every family in Canada.

The first certificates issued in England were sold on February 19th, 1916, and the sales to June 16th, 1917, were as follows:—

No. sold.	Certificates.	Value at purchase price.
25,212,700	Single, £0 15 6	£19,539,842 10s
604,048	£12, £9 6 0	5,626,016 8s
907,057	£25, £19 7 6	17,585,854 7s
54,670	£500, £387 10 0	21,184,625 0s
168,213	Certificates for amounts between £25 and £500—24,904,173 single 15s 6d certificates	19,300,734 1s
26,984,188	Equivalent to 107,402,674 single 15s 6d certificates of the total value of	£83,237,072 7s

The Canadian war savings certificates are issued in denominations of $25, $50 and $100, to be repaid in three years at full face value. They cost $21.50, $43 and $86 respectively, at all money order post offices and banks, thus yielding over 5 per cent. interest. The war spirit in Canada has sent hundreds of thousands of men overseas and given the Dominion a high place amongst the nations of the world. If that place is to be maintained, there must be no relaxation of war temper. The National Service Board is urging national thrift and economy. They are essential if the men at the front are to be properly supported by the men and women at home. Every dollar that can be spared in the Dominion is needed for war purposes. The purchase of war savings certificates strengthens the financial line.

OUR LATEST LOAN

One cannot repress a little disappointment at the high rate we have had to pay for war funds in the United States and as to the method of financing. In its foreign loans Canada established the 5 per cent. interest rate as the proper basis for borrowing, for we were the first of the belligerent countries to enter New York for funds. That lead was followed by Great Britain and France a few weeks later in the joint Anglo-French loan, which was offered on about a 5.40 per cent. basis. The last loan in New York of the United Kingdom was, however, in the form of 5½ per cent. notes, brought out on a 6 per cent. basis, whereas the Dominion has maintained the 5 per cent. rate, but its newest issue is to yield 6.08 per cent. Also the last French government financing in the United States was in the shape of 5½ per cent. notes sold to investors to yield slightly more than 6 per cent. When expenses are added to the present loan, the money will probably have cost approximately 7 per cent., double the rate at which Liberty bonds were offered to the people of the United States.

Sir Thomas White, Canadian finance minister, and Mr. McAdoo, secretary of the United States treasury, have knowledge of the facts, figures and theories governing the loan, and undoubtedly Sir Thomas will make a statement in the House at Ottawa. In the meantime, we know that the United States sold over $3,000,000,000 war bonds to 8,000,000 citizens on a 3½ per cent. basis. Much of the money has gone to various Allies at the same figure. Now we have gone into the New York market and through bankers there are seeking a short-time credit of $100,000,000, paying a good price for it. There is something about Secretary McAdoo's statement regarding the loan which strikes a little cool, after the raising of hopes, not by him and perhaps unwarranted, that Canada might possibly obtain $100,000,000 or $200,000,000 through Liberty Loan funds at a low rate, as a practical appreciation of its war work and war finance for three years. Even though Canadian investors, who have oversubscribed $350,000,000 of war loans, badly need a respite, the question is raised as to whether, after all, we might not have been able to subscribe $100,000,000 at a figure somewhat lower than we are paying in New York. The entire transaction is a very businesslike one and in accordance with money market conditions, but there is an unmistakable element of disappointment in it.

JULY FIRE LOSSES

They Were Heavier Than in May and a Year Ago—Nineteen Deaths by Fire

The Monetary Times' estimate of Canada's fire loss during July is $1,101,734, as compared with June loss of $1,184,627 and $1,150,285 for July of last year. The following is the estimate of the July losses:—

Fires exceeding $10,000	$868,234
Small fires reported	89,800
Estimates for all unreported fires	143,700
	$1,101,734

The Monetary Times' record of the first six months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January	$ 2,796,312	$1,240,886	$ 1,010,217	$ 1,018,660
February	2,920,749	1,019,556	3,275,600	2,009,953
March	2,660,666	1,631,696	1,406,501	2,050,650
April	1,916,235	1,463,747	1,460,437	1,317,714
May	1,035,510	881,855	1,850,205	1,103,110
June	1,207,410	1,157,150	404,557	1,184,627
July	2,033,130	773,269	1,159,285	1,101,734
Totals	$15,530,033	$7,177,165	$11,265,802	$10,746,448

The fires reported in June at which the losses amounted to $10,000 and over were:—

Cache Bay, Ont., George Gordon & Company's saw mill, $22,145; adjusted.

Hudson, Que., Canadian Ice Company's property and other buildings, $50,000.

Macklin, Sask., conflagration, $75,000.

Fernie, B.C., Elk Lumber Company's camp and equipment, $75,000.

Retlaw, Alta., July 7th, National Company's elevator, and 10,000 bushels grain, $15,000.

Amherst, N.S., July 11th, International Engineering works, $75,000.

Strathroy, Ont., Strathroy Canning Company's factory, $165,000.

Restigouche, N.B., L. & A. Malenfant's mill at Arsenault Siding, $21,000.

North Vancouver, B.C., July 7th, North Shore Lumber & Shingle Company's saw mill, $10,000.

Seven Persons, Alta., July 2nd, conflagration, $75,000.

St. Jacques L'archigan, Que., July 4th, parish church, $50,000.

Regina, Sask., July 25th, exhibition grand stand, etc., $100,000.

Owen Sound, July 22nd, North American Bent Chair Company, Limited, $95,000.

Haileybury, Ont., July 13th, Mrs. R. A. Simpson's stores, $10,080; adjusted.

Rouleau, Sask., July 21st, barn and 200 horses, $20,000.

Deroche, B.C., July 17th, business block, $10,000.

Among the reported causes in July were:—Lightning, 10; children playing with matches, 1; fire started in boiler room, 1; defective stove, 1; fire in lane, spreading to load of hay and then to livery stables, 1; sparks from chimney, 1; hot box, 1; starting in pile of straw, 1, and burning match, 1.

The structures damaged and destroyed last month included: Bungalows and summer cottages, 2; boathouse, 1; workmen's boarding house, 1; power houses, 4; churches, 2; garages, 3; park pavilion, 1; military camp buildings, 1; post office, 1; elevator, 1; poolroom, 1; farm house, 1; ice houses, 3; lumber and saw mills, 5; stores, 11; factories and plants, 5; barns, 10; stables, 5; business blocks, 2.

The fires at which fatalities occurred last month were:—

Hodgson, Man., July 25	Trapped in burning house	3
Fernie, B.C., July 29	Forest fire	8
Campbellton, N.B., July 3	Lumber mill	1
Montreal, Que., July 1st	Children playing with fire	1
Carberry, Man., July 14	Playing with matches	1
……………, July 1	Pouring coal oil on fire	1
Woodstock, Ont., July 27	House fire; mice nibbling matches	3
Haileybury, July 30	Pouring coal oil on fire	1
		19

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first six months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.
January	27	27	27	14	26	3	10	21
February	15	12	11	21	18	11	23	19

POINTS ABOUT THE INCOME TAX

Foreign Corporations Will Pay on Earnings Here—Speech of the Finance Minister

We should not be known to the outside world as a country of heavy individual taxation. This was the opinion expressed by Sir Thomas White, finance minister, in his speech in the House at Ottawa last week. "Hitherto," said Sir Thomas, "we have relied upon duties of customs and of excise, postal rates and other miscellaneous sources of revenue. It is true that since the outbreak of the war we have adopted the business profits war tax act which is a measure of direct taxation akin to income taxation, but not so wide in its scope. The Dominion government, under the provisions of the British North America Act, is empowered to raise revenue by any mode or form of taxation, whether direct or indirect. On the contrary, the provinces, and, by consequence, the municipalities which derive their taxation powers from the provinces, are confined, in the raising of their revenues, to measures of direct taxation. For this reason, in the past and since the outbreak of the war, I have hesitated to bring down a measure of federal income taxation. The provinces and municipalities are confined to direct taxation, and I have not regarded it as expedient, except in case of manifest public necessity, such as exists at present, that the Dominion should invade the field to which the provinces are solely confined for the raising of their revenue.

Cost of Administration.

"There is a further fact, Canada is not a country of concentrated wealth. We have a sparse population of 8,000,000 people, scattered over an immense territory as large in area as the United States of America, almost as large as the continent of Europe. The result of that is that the cost of administration of an income tax measure will be quite substantial, and the cost of administration is always a factor which should be had in mind in connection with the imposition of taxation. Generally speaking, if the cost of administration of a tax is disproportionately heavy, it is not a good tax. I do not say that the cost of administration of such an income tax as I shall propose to-day will be unduly heavy, but the fact that we shall have to cover the entire Dominion in our administration of the measure has been an element to which I have given some thought when the matter of income taxation has been under my consideration and the consideration of the government in the past.

"Furthermore, Canada has been and will continue, during the lifetime of those present here to-day, to be a country inviting immigration. I have, therefore, thought it desirable that we should not be known to the outside world as a country of heavy individual taxation. There is another feature which has had some influence with me in hesitating to bring down an income taxation measure, and that is the fact that the people of this country, from the very outbreak of the war, have been most generous in contributing from their incomes to the Patriotic, Red Cross and other funds connected with the war.

Cost of Living.

"In framing these proposals we have had regard to certain conditions. In the first place, we must not be blind to the fact that the cost of living has materially, and indeed, greatly increased in this country, as it has all over the world since the outbreak of this war, and that has a bearing upon the question of the exemption which should be allowed in an income tax measure. We have also borne in mind the fact that in most of the provinces of the Dominion there is a municipal tax upon income more or less heavy, running as high as 2 or 3 per cent. In addition to that, there is in some of the provinces a direct income tax levied by the province itself. So we must bear in mind that when this measure becomes law the people of this country whose incomes make them subject to the several income taxation laws in force in Canada, will be liable to three different sets of income taxation—first, income taxation by the municipality, secondly, income taxation by the province, and thirdly, income taxation by the Dominion.

Inviting Immigration.

"There is another matter which I have thought proper to bear in mind, and that is the existing income taxation in the United States of America. For 3,600 miles the territories of the two countries adjoin, and there is a continual flow of population over the border. We are inviting immigration to this country; we are inviting those of good character [illegible] cupy the northern half of this continent, and I think it would be a mistake, except for the gravest reasons of national necessity, that our income tax should be substantially heavier than that in force in the United States. The American measure which I have had in mind for the purpose of comparison only when drafting this bill is the measure which is now before Congress, and which provides for a very much heavier degree of taxation than is provided for by their existing legislation, or by the legislation which existed before the outbreak of the war.

"In a measure of income taxation we should consider first, what amount of exemption should fairly be allowed. On the one hand, we must be careful that the entire burden of the taxation is not borne by a particular class, and on the other hand, we must see to it that our taxation is not oppressive to those whose incomes are barely sufficient to enable them to sustain the burden of the cost of living as it is today. It has appeared to us that it would be proper to fix the limit of exemption at $3,000 in the case of married persons, and $2,000 in the case of unmarried persons and widowers without dependent children. So that, so far as this measure is concerned, a married man who has an income of $3,000 or less will not be subject to its provisions. An unmarried man, or a widower without dependent children, having an income of $2,000 or under will not be subject to its provisions.

A Graduated Tax.

"We have also thought it advisable to adopt the principle of graduated tax. Within certain limits of income it is proper that an income tax should be uniform, but when we reach the higher salaries I regard it as just and proper that the rate of taxation should increase as the scale of income increases. Our proposals are therefore as follows:—

"We propose to levy an income tax of 4 per cent. upon incomes exceeding $2,000 per annum in the case of unmarried men and widowers without children, and exceeding $3,000 in the case of other persons, and in addition thereto a supertax of 2 per cent. upon the amount by which the income exceeds $6,000 and does not exceed $10,000; and 5 per cent. upon the amount by which the income exceeds $10,000 and does not exceed $20,000; and 8 per cent. upon the amount by which the income exceeds $20,000 and does not exceed $30,000; and 10 per cent. upon the amount by which the income exceeds $30,000 and does not exceed $50,000; and 15 per cent. upon the amount by which the income exceeds $50,000 and does not exceed $100,000; and 25 per cent upon the amount by which the income exceeds $100,000.

"The following statement will show how this tax works out in concrete cases:—

Income of	Unmarried men and widowers without dependent children, exempt $2,000.	All other persons exempt $3,000.
$ 4,000	$ 80	$ 40
5,000	120	80
7,000	220	180
10,000	400	360
12,000	580	540
15,000	850	810
20,000	1,300	1,260
30,000	2,500	2,460
50,000	5,300	5,260
75,000	10,050	10,010
100,000	14,800	14,760
150,000	20,300	20,260
200,000	43,800	43,760

Definition of Income.

Income is the net profit or gain arising from any business in which a person, as defined in the act, is engaged—salary, income, investment whether stock, mortgages, or otherwise. In other words, we have endeavored to give a definition of income as wide as possible so that everybody in Canada shall be subject to the tax, provided the income is over the amount of exemption.

" 'Income' means any income, not deducting living expenses. If a man has a business and his gross receipts are, say, $100,000, but his operating and under expenses are $50,000, the income would be $50,000. You cannot tax a man on his liabilities.

"In connection with a man's own business municipal and provincial taxes will be deducted; in connection with a man's

own income I should say no, however that is a question which we will have to deal with a little more fully in committee. This measure applies to the income of the present year. It provides for returns by all parties subject to the tax before February 28 of next year. There are a number of exemptions under the act, mostly of those institutions that do not operate for gain.

"The House is aware that liability to the business profits war tax act of 1916 and the amendment thereto of this year comes to an end on December 31 this year, and it is not the intention to renew that measure. When that measure was imposed it was retroactive to the extent of one year, so that in 1916 firms and companies subject to its provisions paid in respect of their profits of 1915; those liable on account of their profits in 1916 paid this year and those liable in respect of any accounting period falling in during this year, 1917, pay the tax next year. I think it is only just and proper that those who pay the very heavy business profits tax—much heavier than this tax—upon an accounting period falling in during the present year should not be called upon to pay this income tax unless it chances to be heavier than the tax they are paying. The result of that view is that we shall exempt from the taxation which would be payable by such firms and companies under this measure the amounts paid by any taxpayer under the business profits war tax act, 1916, and any amendments thereto for any accounting period ending in the year 1917. In the case of a partnership, each partner shall be entitled to deduct such portion of the tax paid by the partnership under the business profits war tax act, 1916, as may correspond to his interest in the income of the partnership. In addition to that, we provide that taxpayers shall be entitled to deduct from the amount which would otherwise be payable by them for income tax under this measure the amount paid by them for taxes during the year 1917, and in any year thereafter, under the provisions of part 1 of the special war revenue act, 1915. That means that if the taxation under the special war revenue act, 1915, is greater than the income tax, they pay the greater taxation, but if, on the other hand, this income tax is greater than the tax to which they are now subject, they are permitted to deduct from the income taxation the tax to which they are liable under the special war revenue act, 1915.

Levy Tax on Corporations.

"We are providing in the legislation also that we shall levy an income tax on corporations and joint stock companies earning an income exceeding $3,000. In England there is no supertax upon companies, but their shareholders are liable to it. We are providing by this measure that joint stock companies and corporations shall be subject to a tax of 4 per cent. Their shareholders are liable not only to the tax of 4 per cent. but to the supertax. But, in estimating the income of any person subject to the tax, we credit him with the amount which has been paid by the company from which he derives dividends under the provisions of this act, the idea being to avoid double assessment. That question gives a great deal of difficulty. In Great Britain they have not imposed a supertax upon corporations or companies. In the United States they have an income tax called the normal tax to be paid by corporations and joint stock companies. They provide—and we have similarly provided—that, while the shareholders of these companies are subject to the supertax, the amount of the normal tax shall be deducted from their income. Only the amount which they receive from the companies they have to pay tax. It will be obvious to the committee that it is not possible to impose the supertax upon a company, much as we should like to do so, for this reason: Take a company that is owned by hundreds of shareholders, that has a capital of $1,000,000 and that earns 6 per cent.; it would have an income of $60,000. Take another company with $2,000,000 capital and which earns 6 per cent.; it has an income of $120,000. Although both derive 6 per cent., if you applied the supertax, because the income of the $2,000,000 company is larger than that of the $1,000,000 company, you would make one set of shareholders pay so much more than another set of shareholders. Accordingly, we get over the difficulty by making joint stock companies and corporations subject to a 4 per cent. tax, called the normal tax, and then we make their shareholders liable to a supertax giving them an allowance equivalent to the normal tax upon the dividend that they derive from such companies.

"Foreign corporations will pay in respect to their earnings upon their business in this country.

"In the case of a resident of Canada, if he was taxed in respect of his dividends in a foreign country, he would be entitled to deduct the amount of such taxation from his income for the purpose of ascertaining the amount on which he should be assessed here. So far I have not been able to reach a conclusion, that he should be allowed to deduct the amount of such tax from the taxation which he would pay upon his entire income.

Taxation of Aliens.

"I do not see how we can hold an alien liable unless we provide to cut off a portion of his income at his source and that would raise questions as to what his real income was and as to whether it was proper to do that. This bill will not apply to aliens unless they are living in Canada.

"We must bear in mind that we must not be too astute or too eager to tax an alien in respect to the small investments he may have made in Canada. I would fear that too stringent taxation in that regard would deter men from investing in this country—and we want investment.

"I have placed no time limit upon this taxation measure; but I do suggest, that after the war is over this taxation measure should be deliberately reviewed. What I have in mind is this: In the period after this war, as in the past, we will continue to invite people to come to this country. We shall need men of enterprise, men of ability, to bring in capital and develop our immense undeveloped resources. In reviewing this measure after the war, I think consideration should be given to the question whether the taxation is so heavy that it would operate to prevent men of that type from coming to this country and giving us the benefit of their enterprise and their capital and their ability. I have placed, as I stated, no time limit upon the measure. We cannot see very far ahead in these days. We do not know how long this war will last. We do not know what the attitude of the people of this world or of this country will be upon many questions, social, industrial, financial and fiscal. Therefore I have placed no time limit upon this measure, but merely have placed upon Hansard the suggestion that, a year or two after the war is over, the measure should be deliberately reviewed by the minister of finance and the government of the day, with the view of judging whether it is suitable to the conditions which then prevail.

"It is almost impossible to do more than guess at the amount of revenue expected from this income taxation, because we have never had a tax of this kind in Canada; but roughly speaking, we hope to get $15,000,000 or $20,000,000 a year at least.

Substantial Incomes Should Contribute Substantially.

"For a considerable period after this war broke out the business and industrial interests of this country were greatly dislocated, and I cannot imagine anything that would have been more unwise, in 1915 at least, than to have brought in an income tax measure because at that time owing to the dislocation which prevailed on account of the war it would have been a most serious and discouraging burden upon the people of this country. We had a pretty prosperous year in 1916, and I brought down the business profits tax, which is giving us a very handsome revenue. The idea of that was to take a portion of the abnormal profits earned by firms and companies during the war. This year we increased that tax, and having regard to the financial condition of the country at the time I brought down the budget, having regard to the fact that our revenues from all sources enabled us to pay all ordin-

ary expenses, all capital and special expenses, all the increased interest charges due to the war, and all pensions, and still have left some $70,000,000 to devote to the payment of principal on war expenditure, I thought it inexpedient and unnecessary to bring in an income tax measure. But, with this new measure now adopted by the House, and having regard also to the fact that by reason of the compulsory provisions of that measure there exists a just and proper sentiment that those who have substantial incomes should contribute substantially to our growing expenses of the war, I felt this to be a proper measure to bring in at this time.

"There are many men who are unmarried because they have others dependent upon them. I do not believe there are very many single men without dependants who have large incomes. There are many unmarried men who have incomes of $2,000, $3,000 or $4,000 who have many dependants upon them that the public know nothing about. I know of many such cases. I thought if we made a distinction of $1,000 between the unmarried men and the married men, in favor of the latter, that it would be a fair distinction. When I was in Washington I made some inquiry about the reduction of the exemption limit from $4,000, which is the limit under the existing legislation to $3,000, and from $2,000, to $1,000, and I may say it is felt there that they have gone quite a distance in reducing the exemptions to $2,000 and $1,000 respectively. I know this is a subject on which differences of opinion may exist, but, having regard to the cost of living and to the fact that a married man has dependants, and that many single men have dependants, and for that reason do not marrry, I felt if we fixed the exemptions at $3,000 and $2,000 it would be about fair play.

"In the United States the corporations are liable to the normal tax, while their shareholders are liable to the general measure of taxation, which embraces both the normal tax and the supertax. Therefore, in this regard, our taxation follows the same principle as the British and the American taxation."

AN UNDERWRITING WANTED

BRITISH EXCESS PROFITS TAX

They do some things better in Canada than in the mother country, says Canada, of London. There the necessity of providing funds for meeting war expenditure has driven the treasury to take a very substantial slice out of the abnormal profits of those profiting by the war. No fault can be found with this, but the incidence of the tax has aroused much criticism, and Mr. Bonar Law has been hard driven to justify the taxation procedure in connection with an impost which undoubtedly does not sufficiently differentiate between old-established companies earning large profits before the war which are able to maintain them, and those at the opposite end of the scale which have been able to slightly increase them. Canada has decided to alter its own war profits tax drastically. At the end of the three years covered by its first excess profits legislation it will take from all companies one-half of all profits between 15 and 20 per cent., and 75 per cent. of those exceeding 20 per cent. This is in sharp contrast with the system now in operation in the mother country. The company earning 20 per cent is able to distribute 10 per cent. to its shareholders, who should be well content with such a return in war time, seeing that the company which earned 5 per cent. here before the war, and has since increased it to 7 per cent., has, in addition to its ordinary contribution to the exchequer, to pay over 80 per cent. of its additional 2 per cent., leaving only one-fifth of 1 per cent. to be divided amongst its unfortunate shareholders. On the other hand, a company which was earning 25 per cent. before the war, and is now enjoying such phenomenal prosperity that it has doubled its profits, is able to divide no less than 30 per cent. It is this inequity in the incidence of the British excess profits tax which has aroused so much justifiable criticism and bitterness amongst those who are holders of shares which paid small dividends before the war, and have only been able to increase them in a moderate degree since the new taxation became operative.

CANADA CAR REQUIRES LARGE BANK LOANS

Heavy Production in Hand—Question of Dividend Payments Must Be Held in Abeyance

Four matters were raised by shareholders at the annual meeting of the Canadian Car and Foundry Company last week, viz., a possible dividend, the reason for the big deficiency in the earnings for the year, the closing of the New York agency and the possibility of more frequent reports. The Montreal Gazette states that to the first question the president, Senator N. Curry replied that the company would require large borrowings from the banks in addition to its own resources, to enable it to use its full facilities for the production of the orders now on hand, and as full indications pointed to increasingly severe monetary conditions this coming autumn and winter, the directors believed that the question of dividend payments must be held in abeyance until the assets of the company were in a more liquid position.

Requirements of Shell Production.

The Canadian Steel Foundries, Limited, was largely adapted to the requirements of shell production, but required a large expenditure for additional equipment and plant extensions to enable it to produce the tonnage required by the munition board. It had and was at the present time making fair profits, but had been compelled to put its profits into the business.

Prices of materials ran from 100 to 300 per cent. above normal prices and inventory requirements were very burdensome. The combined inventories of materials at the various plants aggregated over $6,000,000 to-day and this sum would be greatly increased when the Fort William plant was in full operation.

Mr. W. A. Shackman, of New York, asked how the directors accounted for the fact that the profits for the whole year amounted to only $353,000, when the earnings for the first six months of 1916 amounted to $389,999, and was informed that this was due to unforeseen difficulties in connection with the erection and shipment of cars to Europe. Mr. Michael Connolly then asked if the balance sheet for the first six months of the current year could be had, and that the meeting be adjourned until it could be provided. Senator Curry explained that the present meeting was to review last year's work, and that the directors had a vague idea only of the earnings for the period mentioned.

About the Russian Business.

Speaking of the Russian business, the president stated that the company had no work in hand at the present time for that government, and that the trouble with last year's orders was caused by a fire at the Kingsland plant that destroyed it absolutely. Fortunately, however, for the company, a great deal of the loss had to be borne by the Russian government. The president further stated that during the operation of the Russian contracts, over three and a-half million dollars of the company's working capital had been engaged thereon, and that while this money had since been returned, it had been required by the present company for purposes of liquidation of bank advances, etc.

Amongst the items mentioned in connection with the working of the company, the president stated that it was true the Amherst plant was working at a loss, but that if it were not working, the loss would be greater still. He stated also, in reply to a question, that the New York business should be concluded by the end of September, and that in connection with the Russian business, there were no more commissions due. They had been taken care of, and the company had received $750,000 for 7,500 shares of stock.

Regarding the general business in the books of the company, the president said:—

"In the report now before you it was stated that the combined order books of your companies showed a value in unfilled orders of $2,500,000. This has since been increased and at this date the value of unfilled orders aggregates over $35,000,000. Your Fort William, Ont., plant, which has not yet been operated is now being put in condition for operation and it is expected to commence shipments of cars from this plant in October of this year."

CANADA'S PULP WOOD INDUSTRY

Demand for Pulp and Paper During Recent Years Cause of Present Rapid Growth

The steady growth of the pulp and paper industry in Canada, practically since its inception, was continued in 1916, says a statement of the forestry branch, Ottawa. Forty-nine firms reported their mills as active in 1916 as compared with fifty firms in 1915, but the total consumption of pulpwood and total value of the wood used rose much above the preceding year. These facts are brought out in the figures below:—

Year.	Total consumption. Cords.	Total value.
1908	482,777	$ [illegible]
1909	622,129	[illegible]
1910	598,487	3,585,154
1911	672,288	[illegible]
1912	866,042	5,215,582
1913	1,109,034	[illegible]
1914	1,224,376	[illegible]
1915	1,405,836	9,426,217
1916	1,764,912	13,104,458

Of the five provinces engaged in this industry, three greatly increased their production and two fell behind last year. Those which increased in production were Quebec, Ontario and British Columbia, and those which showed decreases were New Brunswick and Nova Scotia. This change brings British Columbia back into third place, which it occupied in 1914.

Spruce and Balsam Head List.

As in the past, spruce heads the list of the different kinds of wood used with 68.2 per cent. of the total, followed by balsam fir with 24.5 per cent. This represents a gain of about 2½ per cent. in balsam fir and almost a corresponding decrease in spruce. Each of the remaining woods, hemlock, jack pine and poplar, formed less than 5 per cent. of the total.

The Canadian pulp mills in 1916 consumed for the manufacture of pulp in Canada 1,764,912 cords, valued at $13,104,458, while 1,068,207 cords, valued at $6,866,669, were exported, making a total production of 2,833,119 cords, valued at $19,971,127. This represents an increase of 25.5 per cent. in pulpwood production and 28.1 per cent. in total value as compared with 1915. This great increase is due to the tremendous demand for pulp and paper caused by the war conditions of the preceding two years. The average value of pulpwood at the mill increased 71 cents per cord over that of 1915. All the provinces show increases in the value of pulpwood except Ontario and British Columbia.

Pulpwood Production Increases.

Approximately 1,296,084 tons of air-dry pulp were made in Canada in 1916. This is on the basis that one cord of wood produces one ton of ground-wood pulp or one-half ton of chemical fibre. This is a total increase of 20.6 per cent. over 1915. The increases shown by the different processes were: ground-wood pulp, 11.2 per cent.; sulphite process, 54.6 per cent.; sulphate process, 9.3 per cent.; and soda process, 23.1 per cent. Spruce and balsam fir are used in all provinces and in all processes. Hemlock and poplar are not reported from New Brunswick and Nova Scotia. Jack pine was used only in Ontario and Quebec, and most of it was used in the sulphate process.

Process of Conversion.

In regard to the process by which the wood is converted into pulp, it is to be noted that while the mechanical, or ground-wood, process was the single process most largely used, the three chemical processes, for the first time in Canada, together consumed more wood than the mechanical, the totals being: chemical processes 937,654 cords and mechanical process 827,258 cords. While a slight increase was made by the soda process and a considerable increase by the sulphate process, the notable change during the year was the increase made by the sulphite process from 470,949 cords in 1915 to 727,945 cords in 1916. An increased quantity of wood was converted into pulp by each of the four processes.

The exports of wood-pulp from Canada show alternate increases and decreases practically every year from 1909 to 1916. The total export in 1915 decreased 14.3 per cent., while in 1916 it showed the remarkable increase of 53.4 per cent. The exports to the United States show a gain of 148,263 tons. Exports to Great Britain increased from 18,488 tons to 51,072 tons and to France from 18,335 tons to 31,821 tons. There was not much change in the business to other countries except that Spain, which was not an importer of Canadian pulp in 1915, took 1,737 tons in 1916.

BANK RESOURCES SEVERELY TAXED

Canadian Borrowers Asked to Assist in Conserving—Public Can Help

The current number of the Canadian Bankers' Journal contains a leading article on the outlook for the money markets this autumn, which, while not official, will be generally regarded as representative of expert banking opinion upon the matter. The Canadian loan in New York has occurred since the publication of the article, but it is unlikely that the views of bankers have been changed much by this assistance which [illegible].

"With the tightening of the money markets here and in New York," says the Journal, "it is becoming increasingly apparent that the resources of the Canadian banks will be severely taxed by the requirements of the business interests of the country, and the special governmental demands upon them, Imperial as well as Canadian, arising out of the war.

Business Must Go On.

"While the successful prosecution of the war is the immediate purpose to which all other considerations are secondary, it does not necessarily follow, in the opinion of economists, that all available cash resources are to be unreservedly turned into war channels. The duration of the war is an uncertainty, and if business is crippled and profitable manufacturing production is paralyzed by withdrawal of the necessary capital, there will very shortly be an end of money for the war itself. Britain has maintained her financial position and consequent ability to maintain her increasing armies in the field by exports increased in annual volume since the war began. Canada and the Canadian banks cannot ignore at this juncture this object lesson of British financial management. The creation of wealth is the correlative of its conservation if Canada and the banks are to 'carry on' financially until the end of the struggle.

Against Over-Stocking.

"There are two principal reasons why Canadian bankers should warn their friends, the merchants and manufacturers of the Dominion, against over-stocking. First, the outlook for trade in Canada after the war is obscure to a greater degree than ever before, and manufacturers and merchants must guard against finding themselves with goods on hand produced under fictitious conditions as regards cost of labor and material, for which there may be little demand, even at heavy loss. The second reason Mr. E. F. Hebden gave in his timely hint as to how the commercial demand for discounts might be diminished to a certain extent without appreciably cutting down our productive capacity, in his address to the Merchants Bank shareholders on June 6, when he referred to 'the unreasonable buying and storing of raw material far ahead, and excessive contracting in advance on borrowed money,' practised by some clients of the banks.

Public Can Help.

"There has not yet been serious pinching in the matter of money supplies, and if customers generally recognized it as a patriotic duty to limit their demands for loans there will be a better chance of avoiding or escaping a prolonged stringency; at the same time the banks will have a freer hand in extending financial support to the government. By way of illustration it might be said that the general public can help in this matter of conserving the money resources of the country, by postponing extensions to plants and machinery which could be profitably operated, but which can wait—this does not, of course, refer to war industries; buying only such goods as are needed to carry on business, and not stocking up beyond present needs in the hope of gain through a further increase in price; avoiding special operations which promise to be profitable, but might just as well be left alone.

"During this great crisis it is most important that the individual customers of the banks make some effort to discern the economic effect of the credit transactions which they submit to their bankers. Particularly in those transactions which merely promise personal gain without increasing Canada's production, should self-restraint be exercised."

Sir EDWARD H. HOLDEN, Bart., *Chairman.*

PREMIUM OR BONUS BONDS

Plan to Divert More of the Nation's Money Into Government Channels

Cable advices from London state that the chancellor of the exchequer will probably be persuaded to try the experiment of a premium bond issue carrying a low interest rate, with graduated prices selected by drawings. It is reported that there is a great agitation in favor of the plan. "The outstanding fact regarding the present financing arrangements," reads the cable despatch, "is that the war loan at its present quotation yields more than the exchequer gives at par, hence the small sales of the latter and the suggestions that the interest on the exchequer's be raised." An issue of premium bonds would divert large funds to the benefit of the state, is the opinion of Mr. Stephen H. M. Killik, in a recent article in The London Financial Times.

"It may be well at the outset," says Mr. Killik, "to state emphatically that what are known as premium bonds are in no sense lotteries according to the usually accepted definition of the word. What is commonly understood as a lottery is a participation in a fund, which may be represented by cash or articles of value, for the privilege of which the participant pays a sum of money. This payment is entirely lost if no portion of the fund falls to the lot of the participant, and the effect upon the investor of small means may be to quickly exhaust his resources.

"A premium or bonus bond may be described as a bond entitling the holder to a participation in a financial operation in regard to which the capital invested is secured, but bearing a rate of interest lower than that current for a similar transaction to which the attraction of obtaining a premium or bonus is not attached. The difference between the ordinary rate of interests and the lower rate paid on the premium bonds is used for the purpose of providing premiums or bonuses, to be allotted by periodical drawings, and for paying the expenses of management.

War Loan as a Premium Bond.

"The five per cent war loan, which was issued at 95, is repayable at 100 any time on or after the 1st June, 1929, and must be redeemed at that price by the 1st June, 1947, so that to that extent it is a premium bond. A portion of the premium bond issue to which attention is here directed would be redeemable at an increase on the issue price by periodical drawings during the currency of the loan. The essential difference between the two issues is that in the one case the premium is distributed among all the holders at the date of redemption pro rata to their holdings, while in the other the premiums can only be gained by a comparatively small number of holders."

Mr. Killik continuing says: "The most important statement in the communication referred to is the expression of opinion that, 'we are convinced that it would be productive of an insignificant sum altogether out of proportion to the loss of prestige in this country which would be the inevitable result.' The sum which would be realized by such an issue is, of course, largely a matter of conjecture, but most financial experts will, we think, incline to the opinion that a very considerable sum, and one which it would be the height of folly to disregard, would result. To those who say that we cannot afford to try the experiment it may be replied that we cannot afford not to try it.

Speculation Basis of Business.

"Speculation is the basis of all business transactions. The shopkeeper in buying goods to resell to his customers speculates on their tastes and desires; to the manufacturer speculation is an important factor in his success. The successful conduct of a manufacturing business is largely dependent on the manner in which the raw materials are purchased. The manager of the business must have knowledge of the conditions which govern the prices of the materials which he uses in his manufactures. If they are purchased on favorable terms he is naturally in a better position to dispose of his goods and can compete to advantage with those whose materials have been acquired at higher prices. He must, therefore, use his business knowledge in buying greater or less quantities in accordance with the conditions which, in his judgment, will affect the course of prices.

"At the present time, when the working man is, in spite of the increased cost of living, probably earning more money than ever before, his surplus is employed in the purchase of useless and often stupid luxuries. An issue of premium bonds would divert a large proportion of this money to the benefit of the state.

"The most potent objection to an issue of this description, is that the gaining of a comparatively large sum of money by an exceptional turn of good fortune might lead to improvidence and the development of gambling. No doubt evidence in favor of this assumption could be adduced, but it is equally certain that examples could also be brought forward where the recipients of substantial sums, under like conditions, had thereby been enabled to so lay the foundation of an honorable and prosperous career to the benefit of the community as well as the individual. It has also been objected that the present facilities for the investment of small amounts in exchequer bonds and war savings certificates are sufficient to absorb all the funds available from the sources which it could be hoped would be attracted by an issue of premium bonds.

Potential Investing Power.

"The amount of exchequer bonds purchased through the post office in small sums is not separately stated, but it cannot be large. Through the instrumentality of the various war savings associations, a total of £82,500,000 had been collected up to 16th June, 1917, a period of about two years, and this sum, it must be remembered, includes a large number of subscriptions from investors of means who have acquired a certificate for £500 on account of the freedom from taxation attaching to subscriptions up to this amount. It must, of course, be a matter of opinion and judgment as to whether premium bonds would induce a much larger subscription. For the reasons already set out, it is submitted that the response would be much greater, and there is a large and growing preponderance of expert opinion in favor of this view.

"Has it ever been considered that of the millions of money being spent daily on the manufacture of munitions and other war requisities a largely preponderating percentage is absorbed by labor? It is unnecessary to attempt to estimate the vast sum that is thus being daily transferred into the pockets of the working classes, but the potenial investing power must obviously be enormous, and the proportion which finds its way into government channels is ludicrously small.

"In support of the view that a preponderance of expert opinion is in favour of premium bonds we may point to the very favorable views expressed to the late government by an important deputation of business men, headed by Sir William Plender, the acknowledged leader of the accountancy profession.

Where Small Investor Benefits.

"To the man with £5 to invest it is little inducement to offer him interest at the rate of 5 per cent. on his investment, or the sum of 5s. per annum. The offer of interest at the rate of even 10 per cent., which would amount to 10s. a year on £5, would be almost equally unattractive. If, on the other hand, he is given the opportunity of investing in a bond of £5, with interest at the rate of 2 or 2½ per cent. per annum, or even with no interest at all, but carrying a participation in periodical drawings, with a chance of obtaining a substantial bonus, together with the knowledge that his capital will be secure, you place before him a proposal which will receive his enthusiastic support. He would thus be induced to become a capitalist instead of a spendthrift.

"It is advanced in some quarters," says Mr. Killik in conclusion, "that an issue of premium bonds would have the effect of inducing small investors to withdraw their money from war savings certificates to invest in the new security. This fear, if it really exists, is obviously a strong argument in favor of the attractiveness of premium bonds. If, however, the effect should be to divert some money from war savings certificates to a premium bond issue, this would really be to the advantage of the government, for it would be converting certificates which are repayable on demand into a security which would be repayable only over a period of years. In other words, it would convert money at call into a deposit for a fixed term."

Safety for Your War Loan Bonds

Absolute safety and every convenience for privacy in cutting of coupons, and in examination of other papers kept in private deposit boxes. The only business-like way to save and protect valuable papers.

Safety Deposit Boxes $3 per Year and Upwards.

June Bank Statement Records Big Deposits

Savings Deposits For the First Time Reach $900,000,000 and Total Deposits at the End of June Stood at $1,350,000,000—All Loan Accounts Showed Reductions During June.

	June, 1916.	May, 1917.	June, 1917.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$428,117,340	$443,839,847	$449,689,670	+ 4.8	+ 1.1
Deposits after notice	767,598,130	892,562,657	900,510,552	+17.3	+ .8
Current loans in Canada	747,470,541	844,890,589	839,355,782	+ 12.3	— .4
Current loans elsewhere	60,081,584	98,993,197	93,150,083	+ 55	— 5.1
Loans to municipalities	46,773,032	39,790,191	42,757,673	— 8.77	+ 7.6
Call loans in Canada	86,776,474	78,514,798	76,085,220	—11.6	— 2.5
Call loans elsewhere	182,757,015	168,692,675	159,309,133	—15.5	— 5.3
Circulation	123,373,395	142,653,596	157,886,939	+ 27.6	+10.6

The above are the changes in the principal accounts of the chartered banks during June. The most striking change is in the savings deposits accounts which now stand at the highest total on record, namely, $900,000,000. The gain for the month is about $8,000,000. Concurrently there was an expansion of about $6,000,000 in demand deposits, but deposits outside Canada contracted sharply, declining about $29,000,000. Current and call loans at home and abroad were decreased during the month. There was a substantial increase of 10 per cent. in circulation. Loans to municipalities were increased, but show a decrease compared with the figures of a year ago.

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada	Call in Canada
1916—June	$747,470,541	$86,776,474
July	740,040,741	87,355,648
August	739,038,513	86,351,210
September	752,545,750	88,145,851
October	774,028,222	90,412,021
November	813,701,947	89,395,370
December	820,378,557	82,569,983
1917—January	800,479,147	79,727,994
February	813,302,717	78,686,535
March	843,054,466	76,478,708
April	880,523,897	82,737,417
May	844,890,589	78,514,798
June	839,355,782	76,085,220

Current loans in Canada at the end of June were 12 per cent. greater than a year ago, but during June were reduced about $5,000,000 or 0.4 per cent. This account was at its highest point in the past year in April, when the total was $880,000,000. Call loans in Canada do not vary in volume to any great extent. They reflect fairly accurately the activities of the Canadian stock exchanges. In June, call loans were 2½ per cent. less than in the previous month.

The following table shows the course of the principal loan accounts during recent years:—

June.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913	$899,200,000	$36,804,081	$68,042,377	$ [illegible]
1914	838,276,428	46,186,854	67,401,481	137,120,167
1915	750,034,154	30,273,120	73,628,187	124,604,875
1916	747,470,541	60,081,584	86,776,474	182,757,015
1917	839,355,782	93,150,083	76,085,220	159,309,133

Current loans in Canada last June were considerably higher than in the same month of 1915 and 1916. They were about the same as in June, 1914, two months before the declaration of war. In some respects, therefore, business activity to-day, as reflected in this account, is somewhat similar to that just prior to the war's beginning. Current loans in June, 1913, were $60,000,000 more than they were in June last, so we have some way to go yet before we reach pre-war business conditions. Current loans abroad were greater in June last than in any previous year. This is probably accounted for by the larger place Canadian banks are taking in international finance and to the triangular financial arrangements of Canada, Great Britain and the United States which have arisen out of the war.

The course of call loans abroad for the period beginning two months before the declaration of war is of interest and is shown in the following table, compiled by *The Monetary Times*:—

	1914	1915	1916	1917
January	....	$ 85,796,641	$134,248,552	$155,747,476
February		[illegible]	139,188,651	162,244,559
March	....	101,938,685	141,889,989	161,616,735
April	....	121,522,971	147,146,443	159,156,054
May	....	136,098,835	163,400,659	168,692,675
June	$137,120,167	124,604,875	182,757,015	159,309,133
July	125,545,287	117,821,174	177,121,733	....
August	96,495,473	120,607,677	171,380,353	....
September	89,521,859	135,108,412	173,877,586	....
October	81,201,671	129,081,624	189,340,210	
November	74,459,643	135,530,562	183,250,389	....
December	85,012,984	137,157,869	173,878,134	.

Call loans abroad, while considerably higher, as might be expected, than in the financial panic days surrounding the declaration of war, are still short of the high totals of last year. In October, 1916, this account stood at $189,000,000, or $30,000,000 more than in June last.

Domestic deposits for the past thirteen months are as follow:—

	Deposits payable on demand.	Deposits payable after notice.
1916—June	$428,117,340	$767,598,130
July	451,058,188	780,363,019
August	443,217,275	800,774,087
September	454,148,049	816,374,171
October	489,230,234	814,297,404
November	459,277,454	836,593,269
December	458,208,417	845,006,717
1917—January	427,208,526	864,103,244
February	430,331,801	880,456,637
March	445,131,528	888,765,008
April	471,112,285	874,048,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552

Still another notable addition to the volume of after notice deposits was made during June, that account increasing by about $8,000,000. Although these deposits are usually considered to represent savings, there are considerable business deposits among them. Transfers from the demand to the notice deposits account have taken place, especially during the past year or so. At the same time, the bulk of the $900,000,000 of notice deposits are conceded to be the savings of the people. These savings are increasing at a good pace, but

Experience in Investment

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

	Total	53,474,064	23,578,458	77,052,527	122,596,539	20,620	122,617,160	6,982,421	43,450,000	19,252,351	77,381,179		5,031,507	17,703,963	44,205,229

Of the deposit in Central Gold Reserves $14,810,000 is in gold coin : the balance is in Dominion Notes.

not as fast as they could do were greater thrift practised and the purchase of luxuries lessened.

The course of the deposits account during the past five years is shown in the following table:—

June.		On demand.	After notice.	Total.
1913	......	$362,760,028	$622,938,779	$ 985,698,807
1914	......	355,009,220	663,650,230	1,018,659,450
1915	......	349,057,351	683,761,432	1,032,818,783
1916	......	428,117,340	767,598,130	1,195,715,470
1917	......	449,689,670	900,510,552	1,350,200,222

Total deposits were higher at the end of June last than in any previous June. At $1,350,200,000, they make a creditable showing. The June bank statement reflects active conditions and a strong financial position in anticipation of the crop movement and fall financing generally.

COMMISSION CHOSEN TO INVESTIGATE POWER

A commission of High Court judges, comprising Chief Justice Sir William Meredith, Mr. Justice Kelley and Mr. Justice Sutherland has been appointed by the Ontario government to act as commissioners to investigate the practices of power-development companies using the waters of the province for hydro-electric purposes. The commission has been appointed under the powers of the Water Power Regulation Act, passed at last session, authorizing the province to determine by a judicial tribunal whether electrical development plants operating within the province are exceeding their charter rights either in the diversion of water or development of horse-power. The tribunal also has authority to set a price to be paid by any company to the province for whatever power the company involved may have developed or made provision to develop beyond the limit entitled by charter rights.

Dominion Government---June, 1917

T. C. BOVILLE, *Deputy Minister of Finance.*

LENDING COMPANIES ASK FAIR COMPETITION

That life insurance business prospects are excellent, was the opinion of Mr. James B. McKechnie, managing director of the Manufacturers' Life Insurance Company, of Toronto, in a recent interview given to the British Columbia Financial Times. Mr. McKechnie was asked for his opinion regarding provincial agricultural aid acts such as have been enacted by the legislatures of Manitoba and British Columbia, as they affect the farm loan investments of insurance companies. The companies, he stated, were not afraid of the competition of governments in regard to farm mortgages so long as this competition is fair. If government boards will charge up the expenses of making loans to farmers and offer their securities for sale on the basis of actual cost price to the government, then the insurance and loan companies which so heavily invest in this class of mortgage will welcome the competition. But the companies are opposed to the cost of administration, valuation, etc., of such government boards being charged to provincial expenses and thus have the taxpayer foot the bill. This is class legislation in the interest of the farmer of an undesirable nature and in addition to upsetting investment conditions as they exist is economically unsound and cannot for that reason be permanent.

War losses, Mr. McKechnie stated, were not seriously affecting the companies. The war had increased slightly the ratio of loss to expectancy, but since the tables were made up on the basis of British experience and Canadian experience tended toward greater longevity, it simply meant a reduction in profit which Canadian companies could not reasonably anticipate or expect anyway. But extra premiums on war policies are generally counterbalancing war losses, so that no serious inroads are being made on insurance reserves of the companies by reason of policyholders' claims through the war.

JULY MUNICIPAL BOND SALES

Total was Large on Account of Winnipeg Water District Issue

The municipal bond sales in Canada for July, as compiled by *The Monetary Times*, amounted to $3,814,489, compared with $1,642,003 for June and $1,485,225 for the corresponding month of last year.

Comparing the record of July, 1916, with that of the month just ended, the bond sales are as follow:

Sold in	1917	1916
Canada	$3,814,489	$1,485,225
United States	1,030,000	354,000
	$4,844,489	$1,839,225

The July total was made substantial by the sale of $3,000,000 5 per cent. 5-years Greater Winnipeg Water District bonds, approximately $2,000,000 having been sold in Canada and $1,000,000 in the United States. Outside of that issue, $1,814,489 of municipal bonds were sold in Canada last month, Ontario sales contributing $1,347,326 of that total.

The municipal bond sales in Canada the first seven months of the year, according to *The Monetary Times*' bond record, were as follow:—

	1913. $	1914 $	1915. $	1916 $	1917 $
January.	1,337,500	1,953,137	1,784,047	1,909,441	1,969,256
February	1,038,806	5,995,336	3,047,011	1,419,909	458,874
March .	335,492	5,123,176	2,572,357	2,027,741	229,013
April ..	3,693,857	2,847,953	8,603,094	1,979,852	430,974
May ..	880,630	6,400,755	3,464,281	2,649,000	1,375,039
June ..	2,435,726	4,617,857	2,395,744	4,428,100	1,642,003
July ..	1,591,924	2,180,758	1,618,422	1,485,225	3,814,489
Totals .	11,313,934	29,118,072	23,485,856	15,899,268	9,919,648

The following are the details of sales in Canada during July:—

*Sold to local investors during past two months.

†Now being offered to local investors: greater part sold.

‡Sold to a local contractor.

The following is a record of Canadian municipal bond sales made in the United States last month:—

Greater Winnipeg Water District.	$1,000,000	5	5
Red Deer	30,000	Treasury bills.	

The United States market has been practically closed to Canadian offerings for the past few months, and this condition is likely to continue while war loans have the right-of-way. About $1,000,000 of the $3,000,000 Greater Winnipeg Water District issue was placed there by a Canadian bond house syndicate. They were an attractive issue, being offered 94.70 and interest, yielding 6 per cent. To investors purchasing $25,000 or over, a further concession of ¼ per cent. was made, and on blocks of $50,000 or over, ½ per cent. The bonds sold readily in Canada and the United States, the purchasers of institutions and individual investors being features of the sale. Another $1,000,000 is now being placed on the market. The $30,000 issue of treasury bills of Red Deer, Alberta, was sold to W. L. Slayton and Company, Toledo, Ohio, at 94. Another tender at 92, was received from a United States bond house.

Canadian municipal bonds sold in the United States during July, compared with sales of the first six months of 1914, 1915 and 1916, were as follow:—

	1914	1915	1916.	1917
January ...		$ 340,000	$3,183,215	$2,285,000
February ..	$ 50,000	6,471,000	899,506	485,725
March	18,000	6,543,947	595,000	95,000
April	25,000	7,100,825	2,158,306	1,563,200
May	1,750,000	600,000	7,219,000	1,375,039
June	2,100,000		2,130,226	80,000
July	1,130,000	890,000	3,540,000	1,030,000
Totals ..	$5,073,000	$21,945,772	$16,545,253	$6,913,964

Twenty-six blocks of Ontario bonds were offered last month, county issues being a feature of the sales. Seven counties offered $383,000 worth of bonds. The bidding was fairly good for most of the Ontario loans.

Municipalities selling their bonds to local investors had a good measure of success. Ingersoll has sold $91,000 in this way, mostly sold in June. Simcoe has practically completed the sale of $39,477 5½ per cent. 20 and 30-year bonds locally. St. Thomas and Brockville are offering $30,700 5½ per cent. 1-10 years, and $28,000 5½ per cent. 5-year bonds respectively. The former town sold about $12,000 on the first day of the sale.

Quebec province municipalities are not finding it as easy to market their bonds as is the case in other provinces, Ontario particularly. Grand Mere, Quebec, has $30,000 5½ per cent. 30-year bonds for sale, but on July 18th, the day fixed for the receipt of bids, no offers had been received. Maisonneuve still has $700,000 bonds for sale.

Several municipalities, not receiving any offers for their bonds, or receiving prices considered too low, made arrangements with their bankers for temporary loans. These munici-

CANADIAN EXPORTS STILL LARGE

Sales Abroad from January to June, Totalled Six Hundred and Twenty Millions

The total trade of Canada this year to date has made an excellent record. The following table shows the exports, imports and balance of trade, January to June:—

1917.	Exports.	Imports.		Balance.
January ..	$ 99,106,259	$ 73,323,074	+	$26,783,185
February .	68,224,383	68,030,469	+	193,914
March	[illegible]	[illegible]	+	20,079,427
April	[illegible]	[illegible]	+	21,092,360
May	[illegible]	[illegible]	+	41,490,857
June	[illegible]	[illegible]	+	18,770,774
Totals	$620,234,481	$534,608,684	+	$85,625,797

Exports of Canadian produce during the first six months of the current calendar year were valued at $620,234,481, an increase of $144,778,000, or 30 per cent., over the record total reported for the corresponding period of 1916. Compared with the corresponding period of 1914, the increase is $472,004,000, or about 320 per cent.

Six Years' Comparison.

The following table compares six months' exports of Canadian produce and of imports entered for consumption, for a period of six years:—

Six months.	Exports.	Imports.		Balance.
1917	$620,234,000	$534,608,000	+	$ 85,625,000
1916	475,456,000	350,104,000	+	125,352,000
1915	216,171,000	205,759,000	+	10,412,000
1914	148,230,000	260,336,000	—	112,106,000
1913	160,621,000	340,266,000	—	179,645,000
1912	139,504,000	291,871,000	—	152,276,000

The figures exclude coin and bullion returns.

The export gain of about 30 per cent. compares with a gain of 52 per cent. in imports, an unsatisfactory feature of our trade returns. In the first six months of 1916 we established a favorable balance of about $125,000,000; this year it is less by about $40,000,000. Everything possible should be done to curtail imports of luxuries and unnecessary imports generally.

Figures of June Statement.

The figures of the June trade statement recently published show a decline from the high level reached in May.

As compared with May there was a decrease of about $33,000,000 in exports and of $10,000,000 in imports. As compared with June a year ago there was a gain of about $21,000,000 in exports and a gain of about $31,000,000 in imports. June figures for six years compare as follow:—

June.	Exports.	Imports.		Balance.
1917	$116,285,000	$97,515,000	+	$18,770,000
1916	95,635,000	66,399,000	+	29,236,000
1915	42,505,000	35,224,000	+	7,281,000
1914	28,000,000	45,750,000	—	17,750,000
1913	[illegible]	5[illegible],057,000	—	24,333,000
1912	29,246,000	53,587,000	—	24,341,000

+Excess of exports. —Excess of imports.

Details of June exports in the government classifications, with comparisons, are as follow:—

	June, 1917.	June, 1916.	May, 1917.
Mine	$ [illegible]	$ 7,755,875	$ 6,322,572
Fisheries	1,055,[illegible]	1,207,883	1,165,306
Forest	5,451,5[illegible]	5,816,072	5,007,747
Animals, etc.	[illegible]	8,275,786	11,371,898
Agriculture	57,860,423	38,744,527	71,793,023

NEW INCORPORATIONS

Charters Were Issued This Week to 96 Companies with Total Capitalization of $20,895,000

Canada's new companies incorporated this week number 96. The head offices of these companies are located in seven provinces. The total capitalization amounts to $20,895,000.

The largest companies are:—

British American Shipbuilding Company, Limited.	$1,000,000
Grahams, Limited ...	1,000,000
McEnaney Gold Mines, Limited	3,000,000
Nipissing Mines Company, Limited	6,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:

Province.	No. of companies.	Capitalization.
Ontario ...	31	$1[illegible]
Quebec ...	21	1,354,000
British Columbia	14	3,417,250
Manitoba ...	8	510,000
Saskatchewan .	6	100,000
Alberta ...	13	[illegible]
New Brunswick	[illegible]	141,000
	—	———
	96	$20,895,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Regina, Sask.—Campbell's Pharmacy, Limited, $20.000.

Limerick, Sask.—The Limerick Drug Company, Limited, $10,000.

Raymond, Alta.—Raymond Pool Company, Limited, $20,000.

Golden, B.C.—Chinook Copper Company, Limited, $25,000.

Peachland, B.C.—Independent Fruit Company, Limited. $50,000.

Port Alberni, B.C.—West Coast Transportation Company, Limited, $10,000.

Georgeville, Que.—Glenbrooke, Limited, $50,000. A. Holden, H. Morin, I. Kert.

Gravellbourg, Sask.—Gravellbourg Farmers Elevator Company, Limited, $20,000.

Mundare, Sask.—The Association of Ruthenian Farmers of Alberta, Limited, $20,000.

Alton, Ont.—Beaver Knitting Mills, Limited, $350,000. E. Smily, B. Williams, A. Silk.

Belleville, Ont.—Grahams, Limited, $1,000,000. W. S. Morden, F. W. McNeil, C. D. Dyke.

Quebec, Que.—The Pure Food Products, Limited, $49,000. J. Vinet, V. Dion, E. Hamel.

Bradford, Ont.—Watson Specialties, Limited, $150,000. A. Greig, J. M. Sparrow, M. H. Eaton.

Trois Rivieres, Que.—The Saint Maurice Foundries, Limited, $49,000. W. J. Miller, P. Dumoulin, G. Gouin.

Saindon, Que.—The Syndicate of Sayabec, Limited, $3,000. A. Belanger, E. Belanger, P. Belanger.

Chatham, Ont.—Sarvice, Limited, $48,000. W. S. Radforth, G. A. McAlpine, Mildred E. Sarjeant.

London, Ont.—Leather Products, Limited, $20,000. G S. Gibbons, E. H. Braund, Lillian A. Fowler.

Maisonneuve, Que.—Le Club L-O. David Incorportee, $10,000. E. Hebert, E. Lariviere, F. X. Lizotte.

Picton, Ont.—Gore G. Telephone Company, Limited, $1,250. S. W. Tripp, T. Arkett, G. Pearsall.

Why Burden Your Wife?

If you wish to appoint your wife as executrix or trustee under your will, why not assist her to carry the heavy burden by appointing this Corporation as co-executor?

Your estate will thus have the advantage of the personal direction which she can give, and she will be relieved of the burdensome details necessarily involved in the management of any estate. Also she will receive invaluable assistance in regard to investments.

Our officers will be glad to confer with you in regard to the making of your will or any trust business you may have in mind.

OUR $100,000,000 LOAN IN STATES

Full Amount was Taken Rapidly—Review of Rates Paid —Comment by Wall Street Journal

There was no doubt as to the success of the Canadian loan offering of $100,000,000 in the United States this week. Many of the banks and bond houses that had been advised of their allotments, requested larger participations. The Canadian notes will be widely distributed, the syndicate members including banks and investment houses throughout the United States, the west and middle west taking an active interest in the flotation. The Canadian borrowing is being done through two-year notes, and will net subscribers 6.07 per cent. Even at this attractive rate, it is not expected to lessen that amount of funds available for the next United States war offering, because of the subscriptions to the Canadian loan are coming from traders not open to tenders of long-term issues.

Subscription books to the $100,000,000 Dominion of Canada two-year 5 per cent. notes were opened on Monday morning at the office of J. P. Morgan and Company, New York. The books were closed yesterday morning. The notes will be dated August 1, and will be offered to the public at 98 and interest, yielding about 6.07 per cent. Interest is payable February 1 and August 1 in United States gold coin in New York city at the agency of the Bank of Montreal. The offering is made under the names of J. P. Morgan and Company, Brown Brothers and Company, Harris, Forbes and Company, the Bank of Montreal, the First National Bank, the National City Company, the Guaranty Trust Company, the Bankers' Trust Company and William A. Read and Company.

Our Loans in United States.

Canada's first loan in the United States was made in July, 1915, in $25,000,000 one-year and $20,000,000 two-year 5 per cent. notes. The one-year notes were offered to investors on a 5 per cent. basis and the two-year notes on about a 5¼ per cent. basis.

Last year came the second loan amounting to $75,000,000, divided into equal amounts of 5, 10 and 15-year bonds bearing 5 per cent. interest. The 5-year issue was sold to investors on a 5.10 per cent. basis, the 10-year bonds on a 5⅜ per cent. basis and the 15-year bonds on a 5½ per cent. basis.

The third Canadian loan in the United States is that on which negotiations have just been completed. It amounts to $100,000,000, the Dominion's borrowings growing in arithmetical progression. It too bears 5 per cent. interest, but at the offering price of 98 it yields approximately 6.07 per cent. The cost to the Canadian government of this new money was approximately 6.90 per cent.

Commenting on this issue the Wall Street Journal says:—

"In its foreign loans Canada established the 5 per cent. interest rate as the proper basis for borrowing, for Canada was the first of the belligerent countries to enter this market for funds. That lead was followed by Great Britain and France a few weeks later in the joint Anglo-French loan, which was offered on about a 5.40 per cent. basis. At the outset the Dominion's credit here was therefore better than that of Britain and France.

"The last loan here of the United Kingdom was, however, in the form of 5½ per cent. notes, brought out on a 6 per cent. basis, whereas the Dominion has stuck with the 5 per cent. rate, but its newest issue is to yield 6.07 per cent. Also the last French government financing here was in the shape of 5½ per cent. notes sold to investors to yield slightly more than 6 per cent. It might be said, therefore, that the credit of Canada had now fallen to the same basis as that of Britain and France. That, however, would hardly be a fair comparison since the United Kingdom's last note issue here was made six months ago and France's four months ago. Further, both countries borrowed on collateral, whereas Canada has not had to put up security for her borrowings.

"In fact, the increased cost of her borrowings here is the price Canada has to pay indirectly for the entrance of the United States into the war. But she should be recompensed for that higher cost by the saving there will be to her through the shortening of the war by our participation and the resultant lessening of loss of lives.

"Canada's record in financing her war expenses has been a satisfactory one. Dependent entirely on the mother country to the middle of 1915 for her financial needs, she has herself oversubscribed three war loans aggregating $350,000,000. Since June, 1915, every cent of her war expenditures has been financed without aid from the old land. Of the three domestic war loans of the Dominion, approximately $80,000,000 has been subscribed from this country."

Notes Due on Wednesday.

On Wednesday there became due $20,000,000 of Dominion of Canada 5 per cent. notes, which were put out two years ago. An issue of $25,000,000 one-year notes sold at the same time matured last August and was paid. With payment of the maturing notes on Wednesday there remain outstanding only the $75,000,000 Canadian loan placed in April, 1916, and the new loan of $100,000,000. The $75,000,000 is in the form of 5 per cent. notes, lots of $25,000,000 maturing in 1921, 1926 and 1931.

Cannot Convert into this Loan.

Referring to the privilege of conversion which has been given to holders of Dominion of Canada domestic war loan bonds, it is pointed out by the finance department, Ottawa, that this applies to issues of internal loans only and has no connection with such financing as the government of the Dominion of Canada may do in the United States or other outside markets such as the operation now being undertaken in the United States in the issue of two-year notes.

CANADIAN MILITARY PAGEANT

A national spectacle will be the grand stand product at the Canadian National Exhibition, Toronto, this year, which is calculated to write a new page into the history of patriotic pageantry. The Heights of Quebec are to be reproduced on a mammoth scale, with the St. Lawrence and its burden of battleships and fighting craft in the foreground. The story will deal with the half century from Confederation to the present day, and patriotism will achieve a thrilling climax when file after file of overseas troops embark on huge transports and proceed down the river behind a convoy of destroyers on their way across the submarine-infested seas to the battlefronts "over there."

The following companies have changed their names: The Federal Steel and Foundry Company, Limited, with Ontario charter, to Monarch Tractor Company of Canada, Limited; Maple Leaf Tires, Limited, with Dominion charter, to the Mackintosh Rubber Company of Canada, Limited; Phillips and Windrum, Limited, with Manitoba charter, to Windrum's Limited.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

London, Ont.—An issue of $760,000 5½ per cent. 5-year bonds has been awarded to A. E. Ames and Company, Toronto.

Orillia, Ont.—An issue of $53,000 6 per cent. 20-instalment bonds has been placed with A. H. Martens and Company.

Merrickville, Ont.—The town has placed an issue of $27,000 6 per cent. 18-instalment debentures with Brent, Noxon and Company.

New Toronto, Ont.—For the issue of $50,000 6 per cent. 29-year waterworks debentures, C. H. Burgess and Company's bid of 97.78 was accepted, the following being the other bids:—

Totals	$222,461,323	$196,855,953	+	$25,605,370

Toronto's bank clearings for the current week are $55,612,535; for the similar period 1916, $46,958,734, and for 1915, $34,550,443.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

An Underwriting Wanted of a successful Industrial or promising public utility. If an Industrial, must be able to show good past history with good management for a term of not less than three years. A merger of several allied concerns would be considered. Underwriters' can supply capital from $250,000 up.

Apply to Box 95,
MONETARY TIMES.

EXPERIENCED ACCOUNTANT and Auditor is open for engagement in any capacity where ability and energy are required. Chartered Secretary of Joint Stock Companies, good organizer and capable manager, credits, etc., ineligible military service. Box 91, *The Monetary Times*, 62 Church St., Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

TWO ENERGETIC MEN WANTED.—Advertiser desires to get in touch with two energetic, ambitious men, not over forty years of age, possessing good business ability and of unquestionable character, to join him in the active management of a thirty-five years established and very successful Canadian manufacturing concern, in which he is employed in executive position, and from which the two principals are retiring on account of age and health. This firm dominates the Canadian market in its lines, protected by trade-marks and patents, and does an excellent export business. Its books will show it has always made big money, is at present in flourishing condition, has large selling organization, and the contemplated change will be made without disrupting its affairs in any way. A $25,000 investment is required from both men, but more than the ability to invest this sum is required to entitle them to share this rare opportunity. Fullest references and investigation will be required and exchanged. Preliminary to interview write in some detail to Box 97, *The Monetary Times*, Toronto.

DIVIDENDS AND NOTICES

CANADA CEMENT COMPANY, LIMITED

PREFERRED SHAREHOLDERS, DIVIDEND No. 30.

Notice is hereby given that a dividend of 1¾% for the three months ending July 31st, 1917, being at the rate of seven per cent. per annum on the paid up preference stock of this Company has been declared and that the same will be paid on the 16th day of August next, to Preference Shareholders of record at the close of business, July 31st, 1917.

The Transfer books of the Company will be closed from August 1st to 10th, both days inclusive.

H. L. DOBLE,
Secretary.

Montreal, July 23rd, 1917.

UNION BANK OF CANADA

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Saturday, 1st September, 1917, to shareholders of record at the close of business on the 16th day of August, 1917.

By order of the Board.
JOHN AIRD,
General Manager.

Toronto, 28th July, 1917.

LIFE INSURANCE MEN TO MEET AT WINNIPEG

Record Gathering of Underwriters is Probable—Features of Programme

The men who sell life insurance in Canada will meet in annual convention at Winnipeg from August 21st to 25th. They are members of the Life Underwriters' Association of Canada, an organization which has for its chief objects the improvement of conditions in the life insurance business and the maintenance of high ethical standards in the dealings of insurance companies and agents with the public. Since the formation of the association, about ten years ago, many evils of the business have been remedied and a great deal has been done not only to improve the lot of life insurance salesmen, but also the mutual relations of policyholders, agents and insurance companies.

There is every prospect for a successful convention at Winnipeg this month. The gathering will be held at the Fort Garry Hotel. The membership of the Winnipeg Association is 213, which constitutes a record. This large membership of enterprising Westerners will see to it that this convention will be remembered for many years to come. The Western associations generally are exceptionally strong in numbers. The Brandon association, for example, which two years ago had only 16 members, last year increased to 69, and now has a membership of 103. Calgary had 25 members last year; it now has 78. Edmonton musters 74. A large attendance is expected at the convention from the prairie provinces. A delegation of about eight is coming from Vancouver and more than 100 will come from Eastern Canada.

Moving Pictures With a Moral.

One of the features of the convention will be the display of moving pictures with a life insurance moral. These pictures were conceived by Mr. Hugh Willett, a past-president of the National Life Underwriters' Association of the United States. They were produced by the Scenic Film Company in Atlanta. The Canadian life insurance men will pass their opinion upon the pictures, and if thought to be of service in awakening a greater interest here in the necessity of life insurance a set of the pictures will be purchased and shown in the moving picture houses of Canada.

Another interesting attraction will be an exhibit in connection with the proposed institutional advertising campaign of the life insurance companies.

An attractive programme of practical addresses and discussions on life insurance topics has been arranged. The discussions have always proved one of the most popular features of these gatherings, and it is generally hoped that ample time will be allowed for these. The following are some of the addresses to be heard:—

Addresses and Discussions.

Addresses.—"Selection and Training of Agents," Mr. Winslow Russell, agency manager, Phœnix Mutual, of Hartford, Conn.; "The Economic Value of Life Insurance," Professor W. W. Swanson, of the University of Saskatchewan; "The Licensing of Agents," Mr. A. E. Ham, superintendent of Insurance for Manitoba; address, Mr. C. C. Ferguson, general manager, Great-West Life, Winnipeg; "The Standardization of Provincial License Laws," Mr. A. E. Fisher, superintendent of insurance for Saskatchewan. Presidential address, Mr. J. Burtt Morgan, Victoria, B.C.

Discussions.—"Enlarging One's Clientele." Led by Mr. F. G. Hassard, Dominion Life, Toronto "Monthly Income Insurance and How to Sell It." Led by Mr. E. J. L'Esperance, Imperial Life, Montreal. "The Need of Life Insurance for the Farmer, and How to Sell Him." Led by Mr. P. A. Wintemute, vice-president for Alberta and British Columbia. "Institutional Advertising." Led by Mr. J. H. Castle Graham, general secretary and treasurer. "Salesmanship." "Enthusiasm." "Teaching of Life Insurance in Our High Schools and Colleges." Open competition. First prize, $20; second prize, $15. Demonstration of the best canvass. Competitors will try to sell life insurance on the platform to a selected prospect.

Banquet.—The following speakers will be present: His Honor Sir J. A. M. Aikens, Lieutenant-Governor of Manitoba; the Hon. T. C. Norris, Premier of Manitoba; Mr. Geo. T. Wilson, vice-president Equitable Life, New York City. Subject, "Now." (Subject to slight changes and additions.)

When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now—when you can spare the money—invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

CANADA LIFE
ASSURANCE CO.
Head Office, Toronto
Established 1847

New Records

Results secured during the past year re-affirm the position of the Sun Life of Canada as the leading life assurance organization of the Dominion.

It leads all Canadian Companies in annual New Business, Total Business in Force, Assets, Surplus Earnings, Net Surplus, Premium Income, Total Income and Payments to Policyholders.

Fair-dealing and progressive business methods are the foundations for the Company's phenomenal growth.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

North American Paper. The company reports total earnings for the first six months of the current fiscal year of $632,106, and after bond interest and sinking fund requirements there was a balance of $262,510. The second half of the year is expected to give better returns.

Niagara Falls and Canada Niagara Power Company.—The combined income accounts of the two companies for the quarter ended June 30th last follow:—

	1917.	1916.
Total operating revenue	$832,20[illegible]	$7[illegible]
Net operating revenue	580,117	519,043
Net income	622,050	557,835
Surplus	373,715	308,0[illegible]

Canadian Pacific Railway.—The gross earnings of the Canadian Pacific Railway Company for the first six months of the year show a gain of $8,345,054, or 13.2 per cent., as compared with the first six months of 1916.

Gross and net earnings of Canadian Pacific for the six months ending June 30th in each of the past eight years are tabulated below:—

Six months.	Gross.	Net.
1917	$71,356,776	$20,007,448
1916	63,011,721	19,061,733
1915	42,027,084	13,001,05[illegible]
1914	54,528,660	15,114,491
1913	65,869,508	19,114,723
1912	60,753,175	18,827,004
1911	48,380,154	14,083,121
1910	45,[illegible]	13,77[illegible]

June figures of the company were about $800,000 less in gross and about $600,000 less in net than those of May. But as compared with June, 1916, gross stood 13.9 per cent. higher and net 6.1 per cent. higher. The lower ratio of the gain in net is explained by the increase of 17.5 per cent. in operating costs.

In June, 1916, operating costs absorbed about $68.90 out of every $100 received from the public; in June of this year they absorbed about $71.20. Back in June, 1912, it was only $66.10.

June figures, gross and net, over a period of eight years offer the following comparisons:—

June.	Gross.	Net.
1917	$13,556,070	$3,915,0[illegible]
1916	11,892,000	3,689,0[illegible]
1915	7,512,934	2,078,031
1914	10,054,421	3,335,625
1913	11,674,430	3,627,755
1912	11,311,307	3,840,00[illegible]
1911	9,479,650	3,024,671
1910	8,807,817	2,717,916

International Nickel Company.—The company reports for the quarter ended June 30th last as follows:—

	1917.	1916.
Earnings	$4,388,594	$3,959,[illegible]
Other income	69,268	66,262
Total income	$4,457,862	$4,025,396
Expenses	896,368	222,422
Net income	$3,561,494	$3,802,974
Depreciation, etc.	487,678	497,400
Net profits	$3,073,816	$3,305,574
Preferred dividend	133,689	133,689
Balance for common	$2,940,127	$3,171,885

The balance for the common stock is equal to slightly in excess of $1.75 per share on the issue, or at the annual rate of $7 per share. In the quarter ended June 30th, 1916, the balance was equal to $1.89 per share, or at the annual rate of $7.56. In the fiscal year ended March 31st last the company earned $7.78 per share on the junior issue.

The balance sheet as at June 30th last compares with the same date last year as follows:—

Assets—	1917.	1916.
Property	$4[illegible]	$4[illegible]
Investments	1,332,735	1,501,034
Inventories	[illegible]	[illegible]

BANKS HAVE STOOD THE TEST

Federal Reserve System of the United States and War Conditions

How the Federal reserve system, created four years ago, has stood the test of nearly three years of war, four months of which time the United States itself has been engaged in the great conflict, is outlined in a statement prepared by Governor Harding, of the Federal reserve board. Governor Harding shows that the Federal reserve banks met the exigencies of the $2,000,000,000 liberty loan transactions without a strain upon their resources, without an advance in discount rates, and that their total resources now aggregate more than $2,000,000,000. Governor Harding's statement follows:—

Governor Harding's Statement.

During the month prior to the entry of the United States into the European war the Federal reserve board, recognizing the unsettled and disturbed condition of foreign affairs and the unusual influences to which domestic and financial conditions were subject, devoted special attention to the problem of immediately placing and of maintaining the Federal reserve banks in a strong and liquid condition. To this end the reserve banks were encouraged to refrain from making more than very moderate investments in securities. Even with respect to the purchase of commercial paper they were counseled to observe a policy of conservatism. As a result of the adoption of this plan of action the entry of the United States into the war as an active participant found the Federal reserve banks and, in consequence, the banking system of the whole country in an extremely satisfactory and strong position. On the 30th of March the reserve banks held against deposits a reserve of 82.1 per cent., while the combined national banks of the country held, on March 5th, $813,028,000 of vault reserve, an excess of reserves over legal requirements of $227,861,000.

Bank Act Amended.

The power of the Federal reserve system to render financial aid has been increased by recent legislation. The President on June 21st signed the bill amending the Federal reserve act, which in its original form had already passed the house of representatives on May 5th and the senate on May 9th. The broad purpose of the amendments is that of strengthening the gold reserves of the Federal reserve banks, and this end is accomplished in two principal ways. Arrangements are made for transferring to the Federal reserve banks the vault cash heretofore carried at the option of the banks either in their own vaults or with the reserve institutions. At the same time the non-member banks are encouraged to deposit their reserves with the Federal reserve banks by the making of liberal provisions which will enable them to exchange their gold for Federal reserve notes and to carry accounts with the Federal reserve banks for the clearing and collection of their checks. The other method chiefly relied upon to effect the purpose of the amendments is that of rendering the system more attractive to State institutions in the belief that they will become members of it.

The total resources of the reserve banks now aggregate over $2,000,000,000, their cash reserves being over $1,400,000,000.

Supply of Notes Increased.

In another way the Federal reserve system has endeavored to make exceptionally careful preparation for any possible demands that might be brought to bear upon it. The opening of the year had found it with a large stock of Federal reserve notes on hand, but it was deemed a measure of prudence almost to treble the available supply, $761,000,000 of new notes being ordered. Moreover, in order to render these notes easily available they were distributed throughout the country at the various mints and sub-treasuries, where they were held subject to release by telegraph from Washington upon application of the Federal reserve bank nearest situated. Not only a note currency, but a ready means of distributing that currency without delay to the points where it was most needed was thus provided for.

Since January 1, 1915, the Federal reserve banks have been exercising the functions of fiscal agents, holding the funds of the treasury department in the 12 Federal reserve cities, other deposits being held in national banks outside those cities. In providing for the exercise of this function of "fiscal agent," the Federal reserve act, however, contemplated the possibility of powers much broader than those involved in the holding of public deposits.

Not long after the declaration of war upon Germany the offering of the liberty loan was decided upon by the secretary of the treasury, and the question of organization and method for the placing and distribution of the loan at once presented itself. The secretary of the treasury determined to employ each Federal reserve bank as the head of a district organization designed for the distribution of the new bonds, and in each Federal reserve district such an organization was quickly developed about the local reserve bank as a centre.

Local bankers and financiers freely gave of their time and assistance to the furtherance of the work, and in each case the Federal reserve bank proved an efficient basis of organization. The several banks have, under instructions issued by the secretary of the treasury, received subscriptions to the loan and carried on the immense work of detail resulting therefrom, besides taking charge of the deposits in banks and general banking relationships growing out of the operation.

Sought to Aid Banks.

The Federal reserve board itself, besides co-operating closely with the authorities of the treasury department in efficiently conducting the loan operations of the Federal reserve banks, further sought to develop a general policy that would support and aid the banking community at large in taking and distributing the new issue of bonds. For this purpose it first established a special rate of 3 per cent. per annum for the discount at Federal reserve banks of the direct 15-day obligations of member banks secured by the temporary certificates of indebtedness which were issued in order to anticipate the proceeds of the sale of the new bonds.

Carrying further this same policy, it later established a 3½ per cent. rate of discount at Federal reserve banks intended for the 90-day paper of ordinary bank borrowers, thereby enabling the member banks of the system to extend accommodation to bond buyers in the assurance that they would be able to obtain accommodation from the Federal reserve banks by rediscounting these notes. In order to aid the customers of banks not members of the Federal reserve system, it further authorized the member banks to act as agents for non-member institutions by rediscounting the notes of bond buyers who desired to obtain assistance from their own banks without being obliged to transfer their business to member banks. Savings banks and trust companies were assured that the board would in every way co-operate with them in avoiding shock or disturbance to existing conditions, and that the Federal reserve system stood ready to extend to them reasonable accommodation in the event of necessity resulting from withdrawals made by depositors in order to purchase or invest in government bonds.

Confidence is Established.

In various other ways also rulings were put into effect with the purpose of easing the general monetary and financial situation, the result of which was to etsablish a general feeling of confidence throughout the country, the banks making loans to their customers at the 3½ per cent. rate, paid by the liberty bonds themselves, and obtaining aid from the Federal reserve banks as they needed it at the same rate.

Disturbance to the money market was avoided by permitting funds subscribed by customers of banks to remain on deposit in those banks until such time as they were needed for government disbursement. Rates on commercial paper remained stable and moderate throughout the whole operation, notwithstanding that it represented a greater transfer and shifting of funds than had ever before been attempted in any like operation in the history of the United States.

The whole process of selling the bonds, receiving subscriptions, transferring them to the credit of the treasury, and disbursing them upon government requisition has been carried through with remarkable ease, and constitutes a service to the country at large which would have been out of the question had it not been for the efficient organization and operation of the Federal reserve system.

Service Performed by System.

The general service performed by the reserve system can best be understood when the financial ease and quiet that have prevailed throughout the country ever since the opening of the war three years ago are contrasted with the disturbances and uncertainties which have been felt in former

times in consequence of events of the [illegible] moment [illegible] of the past three years. Panics or runs upon banks have been entirely avoided, while rates of interest throughout the country have been more moderate and uniform than ever before. The process of moving the crops, which in past years has given rise at times to serious stringency and high money rates, is now carried out without the slightest shock or interference with normal conditions. The banks, in general, enjoy a confidence they could not have acquired under any other conditions—a condition which is in itself perhaps the best contribution of the Federal reserve system to the general public welfare during the financial strain inevitably resulting from the war.

PROVISIONS OF INCOME TAX BILL

Exemptions, Methods of Appeal and System of Collection —Deduction from Incomes

Under the income tax measure of Sir Thomas White, any person making a false statement in any return required by the minister of finance will be liable on conviction to a fine not exceeding $10,000 or six months' imprisonment, or both. For each default in complying with provisions of the act governing returns the person will be liable to a penalty of $100 a day during the period of default. Boards of referees, consisting of not more than three members, are to be appointed by the governor-general-in-council, and will act as courts of revision and hear appeals. The boards will have power to confirm or amend an assessment. If an appeal is unsuccessful, the board may direct that the appellant shall pay the costs or part of the costs, but if the appeal is successful it may recommend that all or part of the costs be paid by the Crown. The Exchequer Court fees will apply in connection with the administration of the act.

May Make Appeals.

If a taxpayer is dissatisfied with the decision of a board of referees, he may within twenty days appeal to the finance minister. Such appeals will come under the exclusive jurisdiction of the Exchequer Court.

The bill provides that "every person liable to taxation under this act shall, on or before February 28th in each year, without any notice or demand, deliver to the minister a return in such a form as the minister may prescribe of his total income during the last preceding calendar year. In such return the taxpayer shall state an address in Canada to which all notices and other documents to be mailed or served under this act may be mailed or sent." The bill also provides that all employers shall make a return of all persons in their employ, liable to taxation under the act, and all corporations, associations and syndicates shall make a return of all dividends or bonuses paid shareholders or members, and these returns must be forwarded to the minister of finance on or before February 28th in each year. Returns in the case of corporations, associations or other bodies shall be made and signed by the president, secretary or chief agent having a personal knowledge of the business.

Incomes Exempt.

The act makes it compulsory on the part of employers to deduct from salaries of employees subject to the income tax the amount of the tax and to forward it to the finance department.

The following incomes are exempt from the operation of the tax: the income of the governor-general and of consuls and consuls-general who are citizens of the country they represent and not engaged in any other business or profession; the income of any company, commission or association of which not less than 90 per cent. of the stock is owned by a province or municipality; the income of religious, charitable, agricultural and educational institutions, boards of trade, chambers of commerce, labor organizations and benevolent and fraternal societies; the incomes of mutual corporations, not having a capital represented by shares and no part of the income of which inures to the profit of any member thereof, and of life insurance companies, except such amount as is credited to the shareholders' account; the incomes of clubs, societies and associations, organized and operated solely for social welfare, civic improvement, pleasure, recreation or other non-profitable purposes, no part of the income of which inures to the profit of any stockholder or member; the incomes of such insurance, mortgage and loan associations operated entirely for the benefit of farmers as are approved by the minister; the incomes derived from any bonds or other securities of the Dominion of Canada, issued exempt from any income tax; the military and naval pay of persons who have been on active service overseas during the present war in any of the naval or military forces of His Majesty or [illegible] of His Majesty's Allies.

Deduction from Incomes.

From incomes the following will be deducted for the purpose of the tax: the value of property acquired by gift, bequest, devise or descent; proceeds of life insurance policies paid upon the death of the person insured; such reasonable allowance as may be allowed by the minister when determining the income derived from mining and from oil and gas wells as shall make an allowance for the exhaustion of the mines or wells; the amount subscribed and paid by a taxpayer during the year to the Patriotic and Canadian Red Cross funds and other patriotic and war funds approved by the minister. For the purpose of the normal tax the income embraced in a personal return shall be credited with the amount received as dividends upon the stock or the net earnings of any company or other person which is taxable upon its income under the bill.

NEXT DOMESTIC LOAN AND INCOME TAX

"War Loans are Free from Any Income Taxation, and They Must Be," Says Sir Thomas White

It is doubtful whether the $100,000,000 Canadian loan floated in the United States this week, will obviate the necessity of another domestic war loan late this fall. Larger borrowing in the United States might have postponed our fourth internal war loan until January, February, or even March. As it is, the strength of the Canadian investor may have to be tested again in November.

One may almost read a plain sign in Sir Thomas White's speech on his income tax proposals, to the effect that the next domestic war loan will be exempt from the Federal income tax. He said:—

Must be Tax Free.

"The government war loans are free from any income taxation, and they must be. It is absolutely impossible for this government to issue its bonds to the amount which is and will be required for the war expenditure of the Dominion unless those bonds are income tax free, so far as Dominion legislation is concerned. The reason is that men buy securities to yield a certain interest rate. Sometimes the difference between 5.30 and 5.40 per cent. will determine whether a man will or will not buy a bond.

"The value of securities is regulated having regard to market conditions and the value of all other securities, and in offering Dominion issues, put out as we must put them out to finance a war of this kind, the uncertainty of an income tax so far as the future is concerned, or a heavy income tax so far as the present is concerned, means that people will not buy those bonds to the extent they otherwise would. And there is this further point to be considered.

Broad as it is Long.

"If you should sell your Dominion bonds without that provision that they are income tax free, it would only mean that you would have to sell them to yield a higher rate than they yield to-day. So it is as broad as it is long; you would not get as much for your issue of securities as you get for them to-day, free of income-tax. That is a question that has perplexed many chancellors of the exchequer. In the United States they have issued their loans free of income taxation for the reasons I have mentioned. Even in England, which is the home of the income tax, where they struggled to the utmost against issuing securities free of income tax, in connection with the last loan in London they gave an alternative, one free of income tax and another subject to it."

Ideal War-time Policies
Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

A Conservatory Idea Worth Considering

IT'S really more than a conservatory, in that it conserves health and happiness as well as flowers.

Easy chairs, lounge swing, table, books, your favorite magazines, with the warmth and cheer of the sun as an accompaniment; while outside the ground is frozen, and the ponds covered with ice. Again, when it snows and blows, you are surrounded with summer's bloom and promises personified by the presence of your favorite flowers.

For years you have wanted just this thing. Now is the time to build it. The chances are it will be many a day before building costs are lower.

Just now we can give you particularly prompt service.

Booklet No. 342 shows a charming interior of the subject. Send for it.

Acquisition of Canadian Northern by Government

MAXIMUM *Cash Investment Made in the Property is $383,000,000—Position of the Common Stock—Minority Commissioner A. H. Smith said in his Report that with the Return to Normal Conditions and with Necessary Capital the Road Could Work its Way Out in a Reasonable Time.*

AS noted in *The Monetary Times* last week, the government proposes to acquire the Canadian Northern Railway system including its subsidiary companies. Briefly the proposal is as follows: Purchase of the outstanding $60,000,000 stock of the Canadian Northern Railway, giving the government complete ownership of the Canadian Northern Railway system and all subsidiary enterprises.

Appointment of three arbitrators to determine the value of the stock acquired, subject to an appeal to the Supreme Court by either the government or the owners or pledgees of stock in the event of failure by the arbitrators to reach an unanimous determination.

Canadian Northern to retain its corporate identity with operation and administration under a board of directors named by the government.

At least five-sixths of the outstanding shares to be transferred by agreement. Government to take the right to compel the transfer of the remaining shares.

Demand loan of $7,500,000 at 6 per cent., secured by mortgage, to be made to the Grand Trunk Pacific Railway. Government to take power to constitute a board of directors.

In view of this announcement, the majority report of the Railway Inquiry Commission (commonly known as the Drayton-Acworth report) is of especial interest. *The Monetary Times* therefore prints this report below in detail, so far as it refers to the Canadian Northern system and to that company's shareholders:—

The system now known as the Canadian Northern began with the acquisition by Messrs. Mackenzie and Mann, in the year 1896, of a charter which had been granted in 1889 by the province of Manitoba to the Lake Manitoba Railway and Canal Company. The charter was for a line, 123 miles in length, from Gladstone on the Canadian Pacific to Winnipegosis. Construction was promptly begun, and the line was opened in January, 1897. In the same year, 1897, Messrs. Mackenzie and Mann began to construct a line from Winnipeg to Port Arthur, known as the Manitoba and South-Eastern. Shortly after they constructed also the Winnipeg and Great Northern.

These three companies among them received land grants of 4,000,000 acres, and their bonds were largely guaranteed by the province of Manitoba.

In 1899, the Lake Manitoba Railway and Canal Company and the Winnipeg and Great Northern Company were amalgamated as the Canadian Northern Railway Company.

Thereafter, by leases, by absorptions, and by new construction, the Canadian Northern system grew fast in both directions, eastward and westward. As a system it never has had, nor has it to-day, any corporate existence. It was held together by stock ownership. The whole of the common stock of the Canadian Northern Railway Company itself was held by Messrs. Mackenzie and Mann. In the case of the affiliated companies the stock was held sometimes by the parent company; sometimes by Messrs. Mackenzie and Mann in their own names.

Throughout the history of the Canadian Northern construction, the company has depended on public aid, direct or indirect. The development in the twenty years since 1896 has gone through four distinct stages, though chronologically the stages overlap to a considerable extent. In the first stage, the company relied on provincial guarantees. As it grew larger and more ambitious, it invoked and obtained aid from the Dominion. This was the second stage. In the third stage, the company, having become better known, raised large amounts by the issue of perpetual debenture stock, and later of convertible income debenture stock, on its own credit. At no period, as far as we have been able to ascertain, has any actual cash been obtained from the sale of the common stock, either of the parent company or of the constituent or subsidiary companies. With the exception of a French issue of $4,000,000 in December, 1911, practically all the Canadian Northern money obtained by public subscription has been raised in London.

In the fourth and last stage, in 1914, with heavy interest payments to be made and large construction contracts still open, the company found its own resources insufficient. It reported that it required $100,000,000 to complete and equip its system; that it could raise on its own account $58,000,000; and it appealed to the government to find the balance.

The government thereupon guaranteed an issue of $45,000,000 of 4 per cent. first mortgage debenture stock. Of this issue, $14,600,000 was sold in London at 91½ in July, 1914; and $2,433,333 at 91 in February, 1915. There have been handed back to the Dominion government $12,500,000 as security for a cash loan of $10,000,000. The remainder (except $133,333 unissued) has been pledged as security for loans in New York. The total proceeds in cash from those sales and pledges were $36,759,265. This sum having proved insufficient, in May, 1916, the Canadian Northern obtained from the government a further loan of $15,000,000 at the rate of 6 per cent. repayable on demand, to be used either for construction or to meet interest obligations. In addition, the government undertook in September, 1915, to lend to the company the money necessary to pay interest either to the government itself or to the public on the $45,000,000 debentures. And to date, $1,756,000 have been advanced for this purpose.

It will be observed that the first appeal to the government was some months before the war. No doubt the stringency of the money markets of the world at the time made it more difficult than it otherwise would have been for the company to sell its securities. But that was not all. There was a further cause intrinsic to the company itself. It had gone ahead too fast and had undertaken various expensive schemes, which could not possibly carry themselves from the outset. The Canadian Northern Pacific, the Canadian Northern Ontario, and the Montreal Terminal especially implied very serious commitments. And the prairie system, which was self-supporting and yielded a profit, was not sufficiently developed to carry this weight.

The war, which at the outset paralyzed the business of the country, and which has practically closed the markets of the world to the issue of permanent securities, other than government loans, for an indefinite time to come, further aggravated the situation. The company, when it applied to the government early in 1914, reckoned on selling its $45,000,000 guaranteed debentures for $42,000,000. In fact it has only obtained from them $36,759,265 in cash. It reckoned that other securities which it had to sell would bring in $58,000,000; but many of them it has not been able to sell. At present the company is living from hand to mouth, and is nominally borrowing from the government to pay interest on the government's own loans.

Canadian Northern Annual Report for 1916.

The report to shareholders for the year ending June 30, 1916, appears to show that, after paying working expenses and fixed charges, the company has a deficit of only $248,127. But this report does not disclose the fact that more than $5,400,000 were paid for interest and charged to capital as part of the construction cost of a system which was all but completed.

According to an estimate submitted to us by the company the fixed charges for the year ending June 30, 1917, will be $16,539,638. Of this the Dominion and British Columbia governments have undertaken to pay $4,514,507 under certain agreements. This leaves the company to find out of net revenue about $2,500,000 more than it had available this year. An income of $2,500,000 net implies an increase of at least $9,000,000 gross. The company itself does not venture to expect a greater increase of gross than $7,000,000.

The above agreements to pay interest are only for two and three years respectively. In the year ending June 30, 1920, the government contributions will have fallen to $627,000 and the following year they will have ceased entirely. The company's estimate for the year ending June 30, 1921, is that they will then have fixed charges amounting to $18,300,000. (This includes the interest amounting to $2,250,000 on the new capital estimated by the company as necessary to be spent in the five years. This estimate we regard as quite inadequate. If so, the fixed charges will be correspondingly increased.) And this burden they will have to bear unaided. To carry it they would need (assuming working expenses at the very moderate ratio of 70 per cent.), a gross revenue of $61,000,000. We cannot think it safe to assume that any such result will actually be attained.

Canadian Northern Estimate in 1914.

Without desiring to cast any reflection on the Canadian Northern Company, we think that those responsible for its management have taken, and still continue to take, an unjustifiably sanguine view of its possibilities. In 1914, when the company was applying to the Dominion parliament for the guarantee of $45,000,000 debentures to complete the undertaking, it submitted an estimate for the three years, 1916 to 1918, by Mr. Hanna, vice-president of the company, on what was described as "the very conservative basis of the percentage increase for the past five years." The company added that "inasmuch as a part of the mileage has been disconnected and confined to a local short-haul business, operation as a united trunk line system should result in a much greater per mile revenue."

We reproduce this estimate below:—

	For the year ending June 30.		
	1916.	1917.	1918.
Gross earnings	$54,000,000	$61,000,000	$67,000,000
Operating expenses	38,880,009	43,300,000	46,900,000
Net earnings	$15,120,000	$17,700,000	$20,100,000
Fixed charges, including interest on securities at present applied for..	12,607,115	14,019,615	14,807,115
Surplus	$ 2,512,885	$ 3,680,385	$ 5,292,885
Less interest on 5 per cent. income debenture stock .	1,250,000	1,250,000	1,250,000
	$ 1,262,885	$ 2,430,385	$ 4,042,885

This estimate showed a margin, after paying $1,250,000 per annum on the 5 per cent. income debenture stock, of $1,262,000 in 1916.

The estimate was:—

Gross earnings	$54,000,000
Net earnings	15,120,000

The facts have been:—

Gross earnings	$35,476,000
Net earnings	9,373,000

And there has been a bumper harvest and it is acknowledged that the war has increased rather than diminished traffic. A further fact has been that for the year ending June 30, 1916, after passing the interest of $1,250,000 upon the $25,000,000 income debenture stock, and after charging against capital interest to the amount of $5,445,389 (less $878,166 paid by the government under its guarantee) in respect of "lines under construction," the company was still $248,000 short of the money required to meet its bonded indebtedness.

We appreciate that circumstances which could not have been foreseen in the spring of 1914 have arisen to upset the estimates then made. The money was not immediately forthcoming. The full amount estimated as necessary was not obtained, and the terms were more onerous. Prices have gone up. Labor has been scarce and dear. The expected immigrants have not come.

The company has sold its ocean steamers. The system, even to-day, is not in the condition that was in the minds of the company's officers when the estimates were made.

But making all possible allowances, we think that those responsible for the estimates of 1914, upon which parliament acted, have incurred very serious responsibility.

Canadian Northern Estimate in 1917.

In January last the company submitted to us an estimate for the five years, 1917-21. This was as follows:—

	Year ending June 30, 1917.	Year ending June 30, 1918.	Year ending June 30, 1919.	Year ending June 30, 1920.	Year ending June 30, 1921.
	$	$	$	$	$
Gross earnings	42,590,000	48,185,000	55,410,000	62,300,000	68,460,000
Operating expenses....	31,090,000	34,790,000	39,895,000	44,200,000	47,920,000
	11,500,000	13,395,000	15,515,000	18,100,000	20,540,000

The estimate submitted to parliament by the company for the year to June 30, 1917, was:—

Gross	$61,000,000
Net	17,700,000

The revised estimate now submitted to us by the company is:—

Gross	$42,590,000
Net	11,500,000

The estimate submitted to parliament by the company for the year to June 30, 1918, was:—

Gross	$67,000,000
Net	20,100,000

The revised estimate now submitted to us by the company is:—

Gross	$48,185,000
Net	13,395,000

We think the new estimate made for us, even though more conservative than the old, is still too sanguine. We see no reason to think that the traffic will increase at any such rate as that indicated. To assume a growth each year of about 11 per cent. over the previous year, and simultaneously an operating ratio falling steadily from 73 per cent. to 70 per cent., is only once more to invite disillusionment.

Comparison with Canadian Pacific.

We think the following statement of the facts of the last eleven years of Canadian Pacific history is instructive. The table shows for each year gross and net earnings per mile, and also the percentage of operating ratio.

	*Gross earnings.	Net earnings.	Operating ratio.
1906	$ 7,026	$2,617	62.7
1907	7,890	2,765	64.9
1908	7,573	2,312	69.4
1909	7,726	2,324	69.9
1910	9,425	3,358	64.4
1911	10,072	3,548	64.8
1912	11,453	3,614	64.9
1913	12,263	4,068	66.8
1914	10,977	3,587	67.3
1915	7,993	2,714	66.0
1916	10,024	3,810	67.0

*Gross earnings include receipts from steamships, telegraphs and other sources not properly attributable to railway mileage.

It will be seen that the gross earnings of the Canadian Pacific Railway by no means show a steady growth. There can be no doubt that the drop of the last three years reflects, in part at least, the effect of the new competition of the Canadian Northern and the Grand Trunk Pacific. And the Canadian Northern growth must equally be conditioned by the competition of the Canadian Pacific and the Grand Trunk. It will be seen, further, from the table that there is by no means a steady growth of net earnings. Nor can we, in face of the constant increase of the operating ratio through a long series of years all over the American continent, in view of the great rise in the cost of materials, especially coal and steel rails, and the insistent demands for increases of wages, think it safe to assume that the operating ratio of the Canadian Northern will show a consistently steady decline in each succeeding year.

Prospective Requirements of Canadian Northern.

The Canadian Northern estimate submitted to us further calculated that, in the course of the next five years, the company will need to spend $12,500,000 of new capital for additions and betterments, and $25,000,000 for new equipment. We consider these estimates entirely inadequate, and especially so in relation to the estimate of 90 per cent. increase in gross receipts. The company has acknowledged that its equipment is inadequate to take care of its existing business. That equipment stands in the company's books at $59,000,000. If the business were to increase 90 per cent., it would seem to need not $25,000,000 but over $50,000,000 spent on new equipment to handle it. Again we refer to Canadian Pacific Railway figures. That company has seven freight cars per mile of line. The Canadian Northern has three. We think it will need five; and this implies an addition of 20,000 cars to the existing stock. This alone would imply, even if prices dropped to those current a year ago, an additional expenditure of something like $30,000,000. And the same thing is true in respect of locomotives. Nor can the estimate of $12,500,000 for additions and betterments, spread over a system of 10,000 miles during five years, be sustained, more especially in the case of a system that is only just emerging from the construction stage. It works out at $250 per mile per annum. It is impossible that the needs of a rapidly growing property can be adequately provided for at any such figure.

We think that $40,000,000 for equipment, and perhaps $30,000,000 for additions and betterments, would be a moderate estimate of the system's needs in the next five years, assuming that the Canadian Northern remains separate and independent.

We sum up the Canadian Northern situation as follows: The company is not at present able, and will not for some years to come be able, to meet its fixed charges. It will, we doubt not, increase its net earnings as the years go by. But the increased net earnings will be fully absorbed for some years to come by the interest on new capital, which must be put in, if the system is to render efficient service. The company has not now, and as far as we can see will not have in the near future, such credit as to enable it to raise the necessary capital. As we have already shown, the public investment, direct and indirect, in the Canadian Northern system amounts to $298,000,000. We do not recommend further public investment in the system, as at present constituted.

1. Cash Investment.—The property investment of the Canadian Northern Railway system is stated in the balance sheet of June 30, 1916, at $494,112,489.34. This figure admittedly has been written up to include $100,000,000 of capital stock. And this stock, as we have

already said, was issued without any cash consideration. We have endeavored to ascertain the actual cost of the system. From the company's official reports and special statements supplied to us, we have ascertained that the maximum cash investment that can have been made in the property is $383,302,451.33.

The following tables, which have been accepted by the company as accurate, show:—

(i) The source of money or credit.
(ii) The disposition of money or debit items.
(iii) A list of bonds of constituent companies assumed.

I. Source of Money or Credit.

Cash realized from securities sold and from collateral loans (pp. 205-7 record)		$302,71[illegible]
Dominion government loans of 1914 and 1916		15,[illegible]
Subsidies (not including subsidies of prior organizations) (Q. 4)		28,[illegible],222.3[illegible]
Land sales (Q. 4)		16,[illegible]
Sales of acquired bonds and stock (Q. 8)		618,666.45
From equipment trust securities (Q. 4)	$ 37,2[illegible],971.13	
Par value equipment trusts issued $39,836,458.20		
Now outstanding 16,862,500.00		
Paid from proceeds of other securities, p. 64	22,973,958.20	
Net amount from equipment trusts		14,250,012.93
Due on construction		16,666,957.26
Audited vouchers and accounts		11,161,443.88
Wages and salaries		1,832,708.23
Matured interest coupons unpaid		2,166,597.75
Accrued interest not yet payable		2,412,673.30
Accrued taxes		250,000.00
Insurance fund account		616,847.53
Railway surplus		2,77[illegible],711.0[illegible]
Bonds assumed in the acquisition of constituent companies		20,215,746.03
		$436,173,761.87

II. Disposition of Money or Debit Items.

Cash in hand and at bank		$ 25,414,408.50
Materials and supplies		3,[illegible],024.82
Due from companies and individuals		7,27[illegible],420.01
Due from agents		1,44[illegible],010.67
Deferred land payments		7,140,[illegible]
Insurance paid in advance		182,[illegible].11
Unadjusted debit items		24[illegible],545.00
Securities (dock, lands and stock yard companies)		1,123,[illegible].55
Sinking funds		248,75[illegible]
Terminal properties and miscellaneous investments		5,922,945.63
		$ 52,871,310.54
Total available for road and equipment	$363,086,705.30	
Bonds assumed in part payment of lines purchased (See list in table 3 following)	20,215,746.03	
		383,302,451.33
		$436,173,761.87

III. Bonds Shown as Outstanding, but for Which no Proceeds are Reported as Received—Payment Assumed by Canadian Northern Railway as Part of Purchase.

Qu'A.L.L. & S. Ry. & S.B. Co. 4% 1st mtg. deb. stock	$ 5,051,462.00		
Less in treasury	40,780.90		
		$	5,010,681.10
Central Ontario Ry., 5% 1st mtg. bonds			956,300.00
Bay of Quinte Ry., 5% 1st mtg. bonds			830,000.00
Gt. No. Ry. of Canada, 4% 1st mtg. bonds			3,505,750.00
Que. & Lake St. John Ry., 4% mtg. deb. stock			4,350,014.93
*Duluth, Rainy Lk. & W. Ry., 5% 1st mtg. bds.			2,000,000.00
[illegible]			[illegible]
[illegible]			[illegible]
[illegible]			[illegible]
		$	17,866,746.03

*[illegible]

Duluth, Rainy Lk. & Winnipeg Railway	$ [illegible]	
[illegible]	[illegible]	
		2,349,000.00
		$ 20,215,746.03

From this total maximum of $383,302,451 we deduct the following items, which the company has included in cost of road and equipment, but which do not represent investment in property:—

1. Advances to controlled companies to pay indebtedness for interest subsequent to construction and operating deficits which were capitalized when the system was put together, not less than	$10,000,000
2. Interest during 1916 overcharged to construction, not less than	3,000,000
	$13,000,000
Leaving for investment in road and equipment and in securities of constituent and subsidiary companies	$370,302,451

We find, then, $370,000,000 to be the maximum possible cost of the Canadian Northern system as at present existing. In other words, as indeed is frankly admitted by Canadian Northern witnesses, the Canadian Northern shares represent no cash investment.

2. Physical Basis.—But money cost is not all. We decided also to ascertain the approximate value, on the basis of reproduction cost, of the property as it exists to-day. And we rely on Professor Swain's valuation for this purpose. This valuation is, in his opinion, a liberal estimate of the fair cost of reproducing new, at pre-war prices of labor and material, the system at present existing. It includes property belonging to the system at its estimated cost, if it had to be acquired or constructed to-day. And therefore it not only gives the company credit for lands which it in fact owns, even though it obtained them as a grant; but it also credits the company with the increment of land values since the date of the original acquisition. And these two items are quite large.

Professor Swain's method of arriving at his results are fully explained in his report, which is printed as an appendix hereto. He makes the total cost of reproduction new, $397,441,567. From this he deducts for depreciation $40,031,889, making the cost of reproduction of the property in its present condition $357,409,678. This, however, does not include equipment. The equipment was inspected by Mr. Buchanan and, on the basis of his report as to quantities and condition, a valuation has been made by Mr. W. H. Chadbourn, C.E., chief engineer of our valuation staff. He finds the cost of reproduction new at pre-war prices to be $56,590,418, and the depreciation to be $11,250,433, making the present value $45,339,985. Putting the two valuations together, we have $402,749,663 as the fair cost of reproducing the entire physical Canadian Northern system in its present condition. Now the outstanding liabilities (bonds, debentures, notes, and bank and other loans) of the company exceed $400,000,000.

Reckoning on this basis, it appears that the liabilities are practically equal to the reproduction cost of the

CANADIAN NORTHERN PURCHASE

The proposal of the government to acquire the Canadian Northern Railway system, leaving the Grand Trunk and the Canadian Pacific Railways as they are, and loaning the Grand Trunk Pacific $7,500,000 does not follow the recommendations of its Railway Inquiry Commission. Mr. A. H. Smith's minority report recommended the following remedies for the existing railroad situation: "Let the Canadian Pacific alone; let the Grand Trunk operate the eastern lines now held by that company and the Canadian Northern; let the Canadian Northern operate the western lines, now held by that company and the Grand Trunk Pacific system; let the government operate the connections or procure their operation by private companies; all of which should be done under arrangements that are equitable and yet look to the not distant day when the country will have survived the war and resumed its prosperous growth."

The majority report signed by Sir Henry Drayton and Mr. Acworth, recommended that the control of the Canadian Northern, Grand Trunk and Grand Trunk Pacific should pass into other hands; that the rights of the creditors of all three companies be preserved intact; that the three undertakings be united in one system, taken over by the country and operated by an independent board of trustees. Instead of adopting any of these recommendations, the government has decided to leave the railroad problem where it is, except for the acquisition of the Canadian Northern. This satisfies the popular demand that no further financial assistance should be granted the company without the country obtaining control of the enterprise. The price paid for that privilege we do not know. Arbitration will fix the value of the $60,000,000 common stock. Mr. E. M. Macdonald, in discussing the proposals in the House last week, figured that the national debt would be increased by over $600,000,000 by this venture. The finance minister will probably give the House an exact statement of what the country will pay for the privilege of owning and operating the Canadian Northern Railway, leaving aside for the time being the $60,000,000 common stock.

The present proposals do not solve the railroad problem but they effectively postpone consideration of a complete solution until the end of of the war is in sight. That the Canadian Northern experiment is to be a costly one with unknown results, seems pretty clear.

LIVING COSTS' INVESTIGATION

Breaking away from dusty precedents, Mr. W. F. O'Connor, K.C., acting commissioner inquiring into the cost of living, dives into the mysteries of trading, with refreshing abandon. His is about the liveliest official document published for a long time. A popular mixture of slang, good English, Latin phrases, modesty and boastfulness, it furnishes the reader with an excellent idea of what the O'Connors can do when they begin to investigate. Extra tone is given to the report by a judicious sprinkling of italicized words. It covers a variety of subjects, ranging from cost accounting to the regulation of combines. It discusses the public attitude to the increasing cost of living, public misconceptions as to trading, the lack of manufacturing costs, and a hundred other things. The commissioner says that his investigation into cold storage commodities "was an ambitious effort," that it was undertaken "by a small and at the beginning, comparatively uninformed staff," but, "in the result reasonably complete and satisfactory returns were obtained from every known cold storage establishment in Canada." Later, he refers to "tireless assistance from a small but exceedingly competent staff," the staff apparently having stayed in size and expanded in knowledge.

Commissioner O'Connor says that in the investigation of some lines, notwithstanding greatly enhanced selling prices, he found that dealers were making less profit than when they had been selling the same lines for about half the present prices. "Rarely only have I heard, even, of cases meet for criticism or complaint. I know that this isn't the popular conception of the situation. It isn't in fact the conception with which I began investigating. I know that what I am now writing is not the most popular thing that I could write. But I know my facts and have the proofs. This makes quite a difference when one's endeavor is to be fair. In the various reports that I shall place in your hands you will find these proofs laboriously gleaned from many quarters. They are not based upon the word or oath of those investigated, merely. I have tapped many outside sources."

Mr. O'Connor submits that his cold storage report is of very great value. Besides cold storage, he has investigated sugar and coal, and is now enquiring into the canning business, the flour milling business, the ice business and into the production and marketing of bread, potatoes and other food products. Then there are further investigations, some extensively and others but slightly advanced. These include salt, textiles, knit goods, silk, raisins, sauces, vinegars, yeast, fancy cheeses, starch, syrups and condensed milks. The high cost of living, therefore, is to be severely perforated by Mr. O'Connor and his staff. We shall have at least a library of interesting reports on these commodities.

The commissioner has "noted some recent expressions of doubt as to the value" of his investigations, "with direct relation to their effect in reducing the cost of commodities." It is asked, he says, "how much have they reduced the cost of eggs or butter or flour?" Mr. O'Connor says the answer is "ex necessitate, one cannot tell, but," adds the commissioner, "neither can one establish the proportion of lives saved by the observance of health regulations, or of the crimes which would have been committed were it not for the fear of police. Men die. Crimes are committed. But nobody ever asks, 'What's the use?'" The most cursory perusal of the Order-in-Council under which the investigations are being made will enable the discovery that it has only two aims: (1) The prevention of any undue and unnecessary accumulation and withholding from sale in face of a fair price obtainable; and (2) the prevention of combining in restraint of competition or for the enhancement of prices. Mr. O'Connor takes the ground that his work ceases at that point. In his cold storage report, he makes it clear that his is a work of investigation and that for action, we must look to Food Controller Hanna. The very knowledge that costs and prices were undergoing constant supervision has, Mr. O'Connor is sure, done much to restrain undue inflation of prices.

Mr. O'Connor thinks that the municipalities, as cost of living investigators, are a failure. He knows of no case of a satisfactory municipal investigation, properly instituted and seen through. "To descend to the vernacular," he says, "there has developed on the part of municipalities considerably too much the art of 'passing the buck.'" Finally, Mr. O'Connor says there is much greater liberty of combination among firms abroad, including those in England, than obtains in Canada. He recommends the establishment of a trade and industrial board, with jurisdiction over trade combines and trade methods, and adds that it would be dangerous to permit the formation of trade combinations except under State supervision. All of which is respectfully submitted.

CAPITAL AND LABOR

When the labor leaders were interviewed in Toronto as to their opinion of the proposed income tax, one of them stated that no man should have an income of more than $10,000 per annum. That is typical of much thoughtless comment in regard to capital and capitalists in these days of war. We may first take it for granted there is general agreement that undue profits both in war and peace times should be curbed, especially when they affect the cost of the necessities of life. The wage-earner has a right to live decently, to be given every proper consideration by the employer, to receive a fair wage for his labor, and to obtain the benefits of practical efforts to improve living conditions. This is not encouraged by continually making capital the subject of unfair criticism. To say that $10,000 a year is enough income for any man, is foolish. Most men with twenty times that income, spend several tens of thousands yearly in wages to the very men who complain because their employers have comparatively large incomes.

The trouble is that most of us figure what we think we would be able to do with the other man's income. We do not figure what the other man has to do with that income, what his responsibilities are and what considerable employment he is able to give by reason of his income and of his direct and indirect investments in industry. The tendency to-day is to abuse men merely because they are wealthy, because they are capitalists. Some wealthy men, and some capitalists, are selfish and have no conception of or desire to understand the reasonable demands of labor, but that is not generally the case. Labor leaders only render more difficult a better understanding between capital and labor by making random and inflammatory statements on capital. The only way to successfully resolve our national problems is for capital and labor to try and work well together. Their interests are common. Pulling different ways is bad for both. Capital should analyze and understand labor's position before it makes a statement as to labor's position. Labor should take similar ground. Wild statements by either side make difficulties, misunderstanding and bitterness.

OUR COAL PROBLEM

The coal situation is likely to be materially relieved by the work of our fuel controller, Mr. C. P. McGrath, and his assistant, Mr. McCue. The sources of supply and the United States government are apparently willing to facilitate the export of coal to Canada. It remains for us to see that adequate arrangements are made for its transport. This is the position under comparatively favorable conditions. Fortunately, the two countries are co-operating with a view to relieving the coal shortage and preventing discomfort, inconvenience and perhaps industrial disaster during the coming winter. One cannot help thinking, however, what a serious problem would confront us were the United States indifferent or antagonistic to our interests in this matter. A keen student of the coal situation put it to *The Monetary Times* in this way: "In such an event the United States could almost put Canada out of business in one winter."

As *The Monetary Times* has previously pointed out, it is not impossible that the time may come when the United States may deem it expedient to reserve her supply of coal for her own use. Dr. George Otis Smith, director of the United States Geological Survey, commenting upon the world's supply of coal, and with particular reference to the reserves in his own country, states: "This glance at the world's reserves of coal shows plainly not only that the United States leads all other countries in production, our annual output being nearly 40 per cent. of the total, but also that it possesses the greatest reserves. Yet in respect to no mineral is there greater need to emphasize the folly of exporting the raw material. Let us keep our coal at home, and with it manufacture whatever the world needs."

The seriousness of the Canadian coal situation has been referred to in these columns on several occasions during the past few years. Examples are not wanting to show that when countries have recognized the fact that certain of their natural resources were essential to their national welfare, policies have been adopted designed to stop or curtail the exportation of such natural commodities. While our relations with the United States are likely to be always most friendly, our coal problems are difficult. Despite the good feeling existing between the two countries, we have had several unpleasant experiences in obtaining a sufficient supply of coal, notably last winter. In his article in *The Monetary Times Annual*, 1917, Mr. Arthur V. White, a well-known consulting engineer who has made a specialty of this problem, repeated statements made from time to time by various United States authorities which cannot allow us to forget how dependent we are upon the United States for our coal supply. The situation presents a serious national problem for solution.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Avondale, N.S. [illegible] with a large quantity of hay, [illegible]. Cause, [illegible].

Fingal, Ont.—July 31—W. Davis' blacksmith's shop destroyed. Loss partly covered by insurance.

Forest, Ont.—August 1—Mr. Daniel McKinlay's barn, containing gasoline engine and sleighs, burned to the ground. Estimated loss, $3,000. Insurance carried to the amount of $1,500.

Fredericton, N.B.—August 1—Policeman Wm. Sturgeon's unoccupied house. Estimated loss, $1,000. Practically no insurance carried.

Glencoe, Ont.—July 31—Woodburn flour mill totally destroyed. Estimated loss, $40,000, covered by insurance.

Glencoe, Ont.—August 3—Mr. D. Leitch's house completely destroyed. Cause, [illegible].

Ingersoll, Ont.—August 6—Ingersoll Machine Company's hardening department destroyed. Estimated damage, $2,000. Covered by insurance. Fire started in the oil.

Kingston, Ont.—August 2—W. F. Kelley Oil Company's plant. Estimated loss, $16,000. Some insurance carried.

Kitchener, Ont.—August 6—Roma Theatre severely damaged. Loss estimated at $5,000. Cause, wire in electric piano.

Lethbridge, Alta.—July 29—Mr. A. Jensen's barn, containing 200 bushels of wheat.

Loggieville, N.B.—July 30—The Loggie Homestead's barn and three houses destroyed. Insurance is carried.

Lower St. Mary's, Ont.—August 1—Mrs. J. W. Spurgeon's unoccupied house. No insurance carried.

Michel, B.C.—July 31—Crow's Nest Pass Coal Company's colliery damaged.

Osnabruck Centre, Ont.—August 5—Town hall and old, unoccupied Orange Hall destroyed. Cause, incendiarism.

Pipestone, Man.—August 2—Fire starting in the main street destroyed the post-office, one general store, implement warehouse, butcher shop, barber shop, drug store and the bank. Loss will amount to about $50,000, partly covered by insurance.

Pontypool, Ont.—July 31—Business section, Coulter House and garage. Estimated loss will run into thousands.

Port Stanley, Ont.—August 6—Mr. J. R. Minhinnick's barn.

Steveston, B.C.—July 26—Several buildings in Japanese section destroyed, including theatre, hardware store, electrical supply store and four small cottages. Estimated loss, $[illegible].

Strathadan, N.B.—August 2—Mr. John Keating's barn, containing fifteen tons of hay, destroyed. Cause, lightning.

Strathroy, Ont.—August 4—Strathroy basket factory completely destroyed. Estimated damage, $[illegible].

Trafalgar, Ont.—July 27—Mr. Cavanaugh's house destroyed. Insurance carried. Cause, coal oil stove.

July 27—Mr. Thos. May's barn. Loss partly covered by insurance.

Union, Ont.—August 7—Mr. R. W. Hepburn's barns, containing [illegible] tons of hay, [illegible] destroyed.

Upper Maugerville, N.B.—August 2—Mr. Ashley Dykeman's barn totally destroyed. Cause, lightning.

Upper Queensbury, N.B.—August 2—Mr. Ernest Hay's three barns and contents destroyed by lightning.

Windsor, N.S.—August 2—Mr. A. P. Redden's two barns, containing fifty tons of hay, farm implements and cattle, totally destroyed. No insurance carried. Cause, lightning.

Winnipeg, Man. [illegible] wholesale grocery house. Damage to stock, $300,000; total damage, $110,000. Fully covered by insurance. Cause, defective wiring.

August 5—Mr. W. McIntosh's automobile, 19 Rothesay Apartments. Estimated damage, $400. No insurance carried.

Winnipeg, Man.—August 3—Mr. W. Germaine's house, 533 Belmont Avenue, West Kildonan, destroyed. Insurance carried to the amount of $[illegible].

Yellow Grass, Sask.—August 3—Mr. Leslie Corbett's farm buildings.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Belmont, Man.—[illegible] Drummond Hay's [illegible] Baker and Turner. Estimated loss on building, $5,000; insurance on same, $2,000. Total insurance, $2,000, carried in the Canadian Fire Insurance Company. Other property damaged was Cannon and Houghton's hardware store, Mr. Cosgrove's butcher shop and residence, Forgly and Smith's lumber office. Cause, lighted match.

Haystone, B.C.—July 18—Rock Creek Lumber Company's lumber. Estimated damage, $15,000. Total insurance, 12,000, carried in British Colonial, Springfield, Connecticut and Alliance of Philadelphia. Cause, spark from refuse burner.

Ingersoll, Ont.—Grand Trunk stock car burned with seventeen head of cattle, July 26th.

Macklin, Sask.—July 18—In the recent fire the following property was destroyed: Bakery and confectionery store, drug store, general store and vacant furniture store. Owners, C. C. Crich, J. H. Bamford, Mike Bruser and Colonial Investment and Loan Company. Estimated damage on buildings, $15,000; on stock, $30,000. Cause, children playing with matches. Insured in the following companies:—

Name of company.	Insurance on stock.	Insurance on buildings.	Total insurance.
Royal	[illegible]	$1,000	[illegible]
Guardian	3,000		[illegible]
Hartford	2,500		[illegible]
Mount Royal		[illegible]	2,000
Retail Merchants	2,000		[illegible]
[illegible]	600		600

Montreal, Que. -Tenement at 2943-2943d St. Dominique Street damaged, July 29th. Origin, lightning.

Nashwaak Village, N.B.—July 19—Additional information shows damage to Mr. E. Bank's barn, $1,400. Insurance on buildings, $600. Total insurance, $600, carried in North British and Mercantile.

Niagara Falls, Ont.—Fire of unknown origin did $1,000 damage to buildings used to house servants at the Hotel Prospect at Second Street and Jefferson Avenue, July 22nd.

Salmo, B.C.—July 11—Kootenay Shingle Company's Shingle mill, dry kiln and office. Estimated damage on stock, $2,000; on buildings, $20,000. Insurance on buildings, $3,000, carried in Glens Falls.

Mr. A. Higgins, clerk of the fire department, Saskatoon, makes the following report of July fires to *The Monetary Times*:—

July 7—Wholesale grocery, occupant, McDonald and Crawford, owner, ditto. Damage to stock, $125; insurance on stock, $95,000; on buildings, $9,000; total, $104,000, carried in various companies. Cause, electric motor controller burnt out.

July 13—Automobile, owner, Mr. H. V. Hryrowalk. Estimated damage, $10. Cause, leak in gasoline pipe.

July 23—Dwelling-house, owner, Mr. Pangborne. Damage to building, $40. No insurance carried. Cause, children playing with matches.

July 27—Storehouse, owned by Dominion government. Estimated damage, $10. Cause, spontaneous combustion.

July 31—Mr. J. Montgomery's barn.

Stratford, Ont.—Residence of Lawrence Grant completely destroyed, July 22nd. No insurance. Supposed origin, explosion of kitchen stove.

UNJUST LIFE INSURANCE TAX

Fifteen Per Cent. Surtax Proposed in States on Undistributed Profits

Declaring that the application to life insurance companies of the proposed 15 per cent. surtax on undistributed profits, as contained in the present form of the United States war revenue bill, is against public policy, the Association of Life Insurance Presidents has presented arguments for relief to the members of the Senate finance committee. The avowed object of the proposed undistributed profits tax is to force corporations generally to distribute their net earnings annually, and thus make these funds subject to taxation in the hands of stockholders. The measure does not take into consideration the peculiar relationship of surplus in life insurance to the security of policyholders, and it is on this ground principally that exemption is sought.

In his memorandum, filed with the finance committee, the association's attorney, Mr. Frederic G. Dunham, states, in part, as follows:—

Protection of Policyholders.

"The existence of a surplus commensurate with the amount at risk in an insurance corporation is essential to the protection of its policyholders. Any legislation tending to discourage the accumulation of such surplus is, therefore, necessarily against public policy. The provision in the Senate draft of the war revenue bill (H.R. 4280) imposing a surtax of 15 per cent. upon so much of the annual net taxable income of corporations as remains undistributed sixty days after the expiration of the tax year, by penalizing the accumulation of surplus, tends to induce its distribution. If the insurance company be a stock corporation, the distribution of the entire net annual income will diminish in a corresponding degree the security of policyholders and the insuring public. If the insurance company be operated on the mutual plan and the distribution made be to policyholders, while the distributees will benefit slightly, as individuals, by small additions to the amounts received by them, the security of each as a policyholder, as well as the ability of the company to afford protection to the insuring public, will be no less affected than though the distribution had been made to stockholders.

Government Will Lose.

"In the case of dividends paid to stockholders, the revenue of the government will be increased through the increase in the amount of the taxable income of the distributees. In the case of increased dividends paid to mutual or participating policyholders of life insurance companies, however, the government will not only gain no revenue by reason of such distribution, but will actually lose the normal tax of 2 per cent. imposed by Section 10 of the act of September 8th, 1916, as well as the proposed war income tax of 2 per cent. provided for in Section 4 of the pending bill, which would otherwise be paid upon the net income of the corporation. The reason for this result is that the dividends paid by life insurance companies to their policyholders are properly recognized as mere returns of premiums, and as such are not only deductible from the gross income of the companies in arriving at their net taxable income, but also exempt from tax to the policyholders. (Sections 4 and 12 (a) act, September 8th, 1916.)

"Insurance companies generally have incentive enough to distribute their net annual income. From all sides the demand is heard by the company managers for a distribution of surplus, which they have heretofore withstood only in part. It cannot be said that insurance corporations have in the past improperly withheld payment of dividends to stockholders. Likewise, the dividends allowed to the participating policyholders of life insurance companies have been increasingly liberal, and the additions to surplus or contingency reserves, from year to year, have uniformly been small when the surplus of such corporations is compared with their reserves. For these reasons we believe that the provision of the proposed revenue law imposing a surtax on the undistributed net annual income of corporations, and thus penalizing any increases in their surplus should be made inapplicable to insurance corporations.

"The first exemption incorporated in the Jones amendment, as it appears in the Senate draft of the bill, does not afford relief to insurance corporations. The additions to their reserves required by law are already recognized as the equivalent of disbursements, from the point of view of a proper income tax, in the act of September 8th, 1916 (Section 12 (a)).

Adequate Contingency Reserves.

"In addition to the necessity of accumulating adequate contingency reserves (the term applied to the surplus of life insurance corporations), which we have already explained, the companies are obliged by contract to accumulate funds for the benefit of deferred dividend policyholders. The greater part of these funds are, by the prevailing interpretation of the present law, subject to the normal income tax, and, unless exempted, will be subject to the proposed surtax of 15 per cent. When one appreciates that the companies are powerless to distribute these funds, which, if distributed, would be taxable neither to themselves nor to the distributees, the extreme hardship and injustice of the provision, which the author of the provision and the committee could not have intended, is apparent.

"The following is suggested as necessary to afford the insurance companies the relief from the proposed surtax which the best interests of their policyholders requires that they should have: To be added to or substituted for the first exemption, line 6, page [illegible]

Undistributed Profits.

"'The tax imposed by this subdivision shall not apply to:—

"'(1) That portion of the undistributed profits used for the establishment or maintenance of reserves required by law, or, in the case of life insurance companies, added, with the express approval of the state insurance commissioner or other local supervising authority having jurisdiction over such corporations, to their contingency reserves or surplus, or to funds required to be accumulated to meet their policy obligations.'"

In a supplementary statement the functions of the surplus or contingency reserve of a life insurance corporation are described as follows:—

"1. To ensure the maintenance of unimpaired reserves in event of:—

"(a) Depreciation in the value of assets.
"(b) Inadequate returns from investments.
"(c) Unfavorable mortality experience.
"(d) Other unforeseen adverse conditions.

"2. To equalize the dividends paid or apportioned to policyholders, notwithstanding possible deficiencies in the amounts available for distribution due to variations in the results of operation from year to year."

Some of the recent group policies written by the Prudential Insurance Company, of Newark, N.J., are as follows: Kahn Manufacturing Company, Mobile, Ala., manufacturers of overalls; the Ashland Fire Brick Company, Ashland, Ky.; Edward G. Budd Manufacturing Company, Philadelphia, Pa., manufacturers of automobile bodies, makers of difficult shapes in sheet steel; Williamsport Radiator Company, Williamsport, Pa.; Ransbottom Brothers Pottery Company, Roseville, Ohio, the largest stoneware pottery in the world; P. Rielly and Sons, Newark, N.J., patent and enamelled leather manufacturers; and Stuart-Keith and Company, Baltimore, Md., clothing manufacturers.

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

INCOME TAX AMENDMENTS

Several important changes were made in the federal income tax during the discussion in the House at Ottawa, one being that single men and widowers and widows without dependent children should be given less exemption. As the bill was drafted the exemption was $2,000, but before the clause had been adopted the minister had cut it to $1,500. The exemption to all other persons remained at $3,000.

Despite a good deal of criticism, Sir Thomas White refused to treat the separate incomes of husband and wife as a joint income for taxation purposes. Each will be entitled to an exemption up to $3,000, but a new clause was added that will make it impossible for either husband or wife to transfer income in order to evade the tax.

LONDON & LANCASHIRE LIFE ASSOCIATION

One of the oldest insurance companies in Canada, having commenced business here in 1863, the London and Lancashire Life and General Assurance Association has built up a strong financial position. The company's fifty-fourth annual statement shows an increase of $208,350 in the life and annuity fund, and after payment of all outgoings, that fund stood at $19,955,544. Since 1863 the company has invested considerable funds in Canada and is now doing a substantial business here. Last year it paid to Canadian beneficiaries $351,522, its net premium income here was $463,182, and on December 31, 1916, its assets in Canada had reached the substantial sum of $6,208,124.

The latest annual report shows that last year the company issued 1,167 policies for sums assured amounting to $3,156,005, producing a new annual premium income of $122,215 and single premiums of $7,135, making a total new premium income of $129,350. Reassurances were effected for $108,000. The sum of $14,308 was received for the purchase of immediate annuities. The total life premium income after deduction of premiums paid for reassurances amounted to $1,919,910. The income from interest and dividends on the life and annuity fund was $748,308 after deduction of income tax. The total income of the life department was $2,682,720. The claims by death, with bonus additions, amounted to $1,160,900, including $98,330 directly attributable to the war. Endowment policies matured during the year, representing sums assured of $738,579 including bonus additions.

Mr. Alex. Bissett is the company's manager for Canada and he has his headquarters at Montreal. Mr. Bissett is a capable underwriter in whose judgment his colleagues in the insurance profession place great confidence. He is president of the Canadian Life Officers' Association. The London and Lancashire is writing in Canada a substantial volume of business, selected with great care.

BRITISH EMPIRE TRUST COMPANY

One of the gratifying announcements at the annual meeting of the British Empire Trust Company held in London last month was a recommendation to authorize the resumption of dividend payments on the preferred and deferred shares. These dividends have been paid with the knowledge that, after valuing the company's investments at the lowest figure of the prices quoted for them on the Stock Exchange, there is more than 20s. in the till in respect of every pound of the company's issued capital. The interest income for the year is almost equal to the amount which will be paid out in dividends. In principle, the directors' proposal is to distribute dividends approximately equal to the interest income, to offset expenses against the fees received as trustees, registrars and secretaries and to carry forward to next year approximately the amount released from special reserve by the improved position of our investments. Owing to the war, the company had no profits to report for the past year from issuing or underwriting commissions, as, with the single exception of subscribing for a substantial block of war loan, they did not embark on new business except such ordinary business as is regularly transacted from day to day. The efforts of the directors have been concentrated on protecting the shareholders from loss rather than on seeking to secure profits for them.

An unusually interesting address was presented at the meeting on behalf of Mr. R. M. Horne Payne, the company's chairman. He referred, among other things, to the immense sums of British capital invested in Canada. Since 1902, the British Empire Trust Company alone has been responsible for investments here of approximately $300,000,000. Referring to the marked tendency in certain parts of Canada to treat invested capital unfairly, Mr. Payne says this spirit is the more regrettable as the Dominion parliament itself is always careful to treat British capital with fairness and consideration. "I hope," he added, "that just counsels may prevail, and that the rights of investors will receive fair protection in all parts of Canada, but should the contrary occur, the people concerned must not be surprised if they find after the war that fresh capital is unobtainable, and that existing loans and mortgages cannot be renewed."

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks of August 3, 1916, and August 4, 1917, respectively, with changes:—

	Week ended Aug. 4, '17.	Week ended Aug. 3, '16.		Changes.

The Transfer Books will be closed from the 24th to 31st August, both inclusive.

By order of the Board.

J. P. BELL,
General Manager.

Hamilton, 23rd July, 1917.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Western Power Company of Canada, Limited.—The company reports operating revenues for June, 1917, of $[illegible], an increase of 20.5 per cent. over June, 1916. The net earnings for the 12 months ended June, 1917, are $[illegible], an increase of 31.0 per cent. over the 12 months ended June, 1916.

Dominion Abrasive Wheel Company.—The new plant at Mimico, Ont., the largest factory of its kind in Canada, has been completed and practically all the machinery installed. The plant will manufacture abrasive wheels and stones for grinding and sharpening, at the rate of 150,000 per week. The plant cost, including machinery, $110,000.

McGillivray Creek Coal and Coke Company.—A dividend of $24,143 has been declared for August 1 by the company. The disbursement will be at the rate of 1 per cent. on a capitalization of $2,500,000, a greater part of which has been issued. This disbursement will be No. 5, and is the second of the year, the first having been made on January 1.

Canadian Northern Railway.—Sir Wm. Mackenzie, in an interview in Toronto last week, said that he was of the opinion that the stock in the hands of the company of $60,000,000 was worth at least par, and that the company in the event of its purchase through arbitration would make every effort to get as much as possible for it. It was a great property, he said; the stock represented great prospects, and, speaking for himself, and he believed for his associates, they would be reluctant to part with it. The success of government operation of the road, he thought, would depend entirely upon the men appointed as directors.

United States Steel Corporation.—Analysis of the figures in the quarterly report shows that in the last six months the three principal European owners of the shares, common and preferred—Great Britain, Holland and France—have all been selling steadily and other European owners have generally been following their example. Canada has been a large purchaser of the common stock, but at the same time has been selling preferred, says a New York dispatch. In the six months ended December 31, 1916, the foreign holdings of steel stock dropped as a result almost entirely of this European liquidation, from 625,254 shares of common stock and 236,361 of preferred, to 502,632 shares of common and 156,412 shares of preferred.

Asbestos Corporation of Canada.—The net profits for six months ended June 30, 1917, amounted to $224,560, which was sufficient to take care of $75,000 bond interest, and the two quarterly dividends of 1 per cent. on the preferred stock, calling for $80,000 and leave $69,560 to add to balance at credit of profit and loss. This balance stood at $500,102 at the end of 1916.

Earnings as shown are given as "net profits from operations." As no mention is made of the company's usual provision out of earnings for renewals and betterments, presumably the appropriation under that head is deferred until the end of the year. Charging up only bond interest against the profits shown, the surplus for the half-year was $149,560, equivalent to earnings at the rate of 7.5 per cent. per annum on the $4,000,000 preferred stock.

Ontario Steel Products Company.—Net earnings of the company in the year ended June 30, after providing for depreciation, business profits tax, etc., amounted to $182,296. After bond interest of $36,000, preferred dividends for the year at 7 per cent., and provision for 1¾ per cent. on arrears payable the 15th of this month, and after transferring $24,000 to the bond redemption fund, a balance of $183,497 is carried forward. The profits show a very substantial increase over last year. During the year past 7 per cent. was paid on the preferred shares, and 1¾ per cent. is payable on the 15th of this month, thus reducing the arrears to preferred shareholders to 6 per cent. In view of the increased work in capital necessary owing to the enormously enhanced prices of all raw materials, the directors have decided that it would be prudent to reasonably conserve the liquid and cash resources of the company until the business outlook can be more accurately gauged, and further payment on account of deferred dividends is not looked for in the immediate future.

Nova Scotia Steel Company.—It is understood, says a Boston dispatch, that shareholders took only about 10 per cent. of the recent offer of 50,000 shares. This means that 45,000 shares of this company's ordinary stock have come in possession of a group of underwriters almost wholly living in the United States. Many of these underwriters have been actively interested in the steel industry and are among its foremost leaders.

With the former holdings of Hayden, Stone and Company's clientele, this means the transfer of a decided majority of the stock ownership of this great property to the United States. There is in this transfer of ownership nothing whatever in any possible way inimical to British or Canadian interests, and we believe that fact is thoroughly understood in British and Canadian governmental circles. This transfer, however, fits in perfectly with the plan of Hayden, Stone and Company, and many of their substantial clients to exercise the dominant interest in the development and expansion of this steel property. The owners of this property are well represented at present on the board of directors by N. Bruce MacKelvie, of Hayden, Stone and Company.

Canada Copper Corporation.—A special meeting of Canada Copper Corporation stockholders has been called for August 29 to authorize the issuance of $2,500,000 ten-year 5 per cent. first mortgage sinking fund convertible bonds, dated January 1, 1918, and also to act on increasing the authorized capital stock to the extent of 1,000,000 shares, 833,333 of which will be held for conversion and the balance for corporate purposes. The company now has an authorized capital of 1,000,000 shares, $5 par value, of which 945,454 are outstanding. There are also outstanding $63,800 debentures, which are called for redemption. These are convertible into stock at par.

The new bonds will be used to cover the development of the recently acquired British Canada Copper Company, including the installation of a 3,000-ton mill, and also to supply working capital. Stockholders of record August 14 will be entitled to subscribe for their pro rata share of the new bonds on the basis of $2,644 in bonds for each share of stock owned. Bonds are convertible into stock at any time before maturity at $3 a share, but are redeemable at the option of the company on and after January 1, 1918, at 110 per cent. and interest. The terms of subscription are as follows: 20 per cent. of par on or before September 20, 1917; 20 per cent. November 15, 1917; 20 per cent. January 2, 1918; 20 per cent. February 19, 1918; 20 per cent. April 16, 1918.

Canadian Car and Foundry Company.—Senator Curry reviewing the Russian shell order business at the company's annual meeting said: "Notwithstanding disappointments your company was in a fair way to complete its contracts with a margin of profit, which, while greatly under our original estimates, was of a substantial character, when immediately upon the eve of the completion of our work our loading, assembling and shipping plant at Kingsland, New Jersey, U.S.A., was visited by a fire and consequent explosion which completely demolished it. This occurred on January 11th, 1917; the plant had been efficiently guarded and patrolled and no previous trouble of the kind had occurred. Fortunately, for your company at least, certain agreements had just been completed which vested in the Russian Commission the ownership of the larger part of the materials stored at Kingsland and by far the greater portion of the loss fell upon the Russian government.

"New supplementary agreements had again to be executed, and in the ensuing negotiations we arranged to cancel the contracts; your company received the equity in the assurances of all kinds carried at Kingsland, amounting, after adjustment, to approximately $3,500,000, together with the salvage in plant and materials, and all equity in accounts with sub-contractors, etc., less the sum of $585,000, to cover the entire equity of the Russian government in all matters.

"The Kingsland plant carried all the fire, explosion, use and occupancy and marine insurances which it was possible

V. F. Cronyn, Supt. Eastern Branches

to obtain, aggregating in total about $[illegible]. Upon the result of the adjustments it was estimated that at least $[illegible]700,000 would be collected, and of this sum about $[illegible] has yet to be paid."

Dealing with the question of commissions which have had to be adjusted in connection with the Russian contracts, Senator Curry said:

"Commissions have been adjusted with one or two exceptions and these will be shortly settled. Part of the commission payments have been adjusted through the issuance of $750,000 of the company's ordinary stock in lieu of cash payments. We have, in the main, been successful in reducing our commission liabilities in practically the same proportion as our profits have been reduced, and while it is not advisable, pending negotiations now under way, to make public the details of our commission payments, I shall be glad to discuss the matter personally with any individual shareholder who may desire further information."

Regarding the general business in the books of the company, Senator Curry said: "In the report now before you it was stated that the combined order books of your companies showed a value in unfilled orders of $23,500,000. This has since been increased and at this date the value of unfilled orders aggregates over $35,000,000. Your Fort William, Ont., plant, which has not yet been operated is now being put in condition for operation and it is expected to commence shipments of cars from this plant in October of this year."

As regards the dividend policy of the directors, the president said: "The company will require large borrowings from the banks, in addition to its own resources, to enable it to use its full facilities for the production of the orders now on hand, and as full indications point to increasingly severe monetary conditions this coming autumn and winter, your directors believe that the question of dividend payments must be held in abeyance until the assets of the company are in a more liquid position.

"The facilities of the Canadian Car and Foundry Company, Limited, were only to a small extent adapted to the manufacture of munitions and as the equipment business has been stagnant it has not operated at a profit since war began and is only just commencing a period of activity in its normal lines.

"The Canadian Steel Foundries, Limited, was largely adapted to the requirements of shell production but required a large expenditure for additional equipment and plant extensions to enable it to produce the tonnage required by the Munitions Board. It has and is making fair profits, but has been compelled to put its profits into the business.

"Prices of materials run from 100 to 300 per cent. above normal prices and inventory requirements are very burdensome. The combined inventories of materials at your various plants aggregate over $6,000,000 to-day, and this sum will be greatly increased when the Fort William plant is in full operation. During the operation of the Russian contracts over $3,500,000 of your company's working capital was continuously engaged thereon. While this money has since been returned, it has been required by the parent company for purposes of inventory and liquidation of bank advances, etc."

GRAND TRUNK PACIFIC LOAN FROM GOVERNMENT

According to the financial statement of the Grand Trunk Pacific Railway Company, tabled in the Commons by the minister of finance, the cash requirements of the system for the twelve-month period from July 1st of this year to June 30th of next year, total $7,494,760. The total fixed interest charges amount to $7,684,177, of which $1,189,416 are provided for out of the balance of the eight million dollar loan of last year. The estimated amount required for improvements, including rolling stock, is $2,000,000. On the Grand Trunk Pacific steamship lines an operating loss of $100,000 is estimated for the year, while, on the operation of the railway lines a surplus of $1,100,000 is estimated.

From these figures it will be seen that the government loan of $7,500,000 for the coming twelve months just meets the requirements of the road, with two millions of that to meet the large requirements of additional rolling stock and improvements. In addition to this $7,500,000 which the country is advancing to the company, it is to be noted that the Treasury is also called upon to pay $1,655,000 as interest on the Mountain section 3 per cent. bonds. Under the original agreement the Dominion has to meet this interest charge for seven years from January 1st, 1916.

NEXT LIBERTY LOAN FLOTATION

It Will Likely be on November 15th, Probable Amount Being Three Billion Dollars—National Finances

Another United States government loan of Liberty Bonds will probably be floated about November 15th, according to Washington despatches. The amount will likely be $3,000,000,000. The Wall Street Journal states that what rate of interest it will carry is not even known, as yet, to Secretary of the United States Treasury McAdoo. Market conditions will determine the rate. The rate may be 4 per cent. If this rate is necessary to make the loan a success, that rate will be fixed. If it is so determined, under the terms of the $2,000,000,000 loan, that loan automatically becomes a 4 per cent issue.

"Secretary McAdoo is in constant touch with the financial pulse of the country and is in almost daily conference with members of the Federal Reserve Board here, who, in turn, are in correspondence with the governors and directing heads of the twelve Federal Reserve banks throughout the country. These banks still have the same machinery in hand which they employed so energetically and successfully on the first issue of Liberty Bonds."

Anticipate No Difficulty.

In the opinion of Mr Robert W. Wooley, who was the publicity manager of the first issue of Liberty Loan bonds, the second issue will be floated with little difficulty. Its mere announcement, he feels, will almost be sufficient. These reasons for success are assigned:—

First, the better education of the masses to the necessity of the loans. Second, experience gathered by United States officials in handling the last loan. Third, fact that the new loan will start in with nearly, or quite, $1,000,000,000, the amount that the first issue was over-subscribed.

All the data on the last loan are in hands of the United States Treasury, and those whose allotments were curtailed will have an opportunity to get the amount of bonds they desire.

Annual Revenue of Two Billions.

The revised revenue bill of the United States will probably provide for taxes from which an annual revenue of $2,000,000,000 may be expected. This would leave approximately $3,000,000,000 of needs to be taken care of by an issue of bonds. The Treasury has estimated that approximately $2,000,000,000 more bonds for making credit loans to the Allies will be necessary during the current year. Congress has already authorized an issue of $2,000,000,000 bonds for our own needs and $3,000,000,000 for credit loans to the Allies. The total bond issues in the United States during the first year of the war, consequently, promise to amount to $10,000,000,000.

Credits to Allies.

A further extension of credit was made last week to Great Britain and France by the United States government. The amount advanced to Great Britain was $185,000,000, and the allowance to France was $160,000,000, a total of $345,000,000, leaving a balance yet to be granted of $55,000,000 of the regular programme of $400,000,000 a month to be advanced to the allied governments. The total thus far given to Great Britain is now, including the latest British loan, $955,000,000, and that to France $530,000,000.

INSURANCE BILLS RECEIVE ROYAL ASSENT

On July 25th the royal assent was given at Ottawa to the following bills relating to insurance: An act respecting the Guardian Accident and Guarantee Company and to change its name to the Guardian Insurance Company of Canada; an act respecting the Canadian Order of the Woodmen of the World; an act to incorporate Alliance Nationale; an act to incorporate La Societe des Artisans Canadiens Francais; an act to amend the act incorporating the Canadian Surety Company; an act respecting the Western Life Assurance Company; an act respecting the Empire Life Insurance Company of Canada; an act respecting the Security Life Insurance Company of Canada; an act respecting the Canada Preferred Insurance Company; an act respecting the Western Canada Accident and Guarantee Insurance Company.

TAKING OVER THE CANADIAN NORTHERN

Pledgees and Owners of Stock Willing to Transfer—Value Stock by Arbitration

Sir Thomas White, in speaking at Ottawa last week of the transfer of the Canadian Northern Railway to the government, said the financial position of the Canadian Northern and the Grand Trunk Pacific was such as to demand imperatively further assistance from the government if their systems were to continue to serve the public as solvent, going concerns. Last year in connection with the loans of $15,000,000 to the Canadian Northern Railway and $18,000,000 to the Grand Trunk Pacific, Sir Thomas said he had announced that a commission would be appointed to fully investigate railway and transportation conditions in Canada with a view to finding a permanent solution thereto. He had then stated that it was possible, and even probable, that this solution might involve the Dominion taking over one or more of the existing systems, or even the larger question of the nationalization of the Canadian railways.

Sir Thomas referred to the appointment of the commission. The commissioners, he said, found themselves face to face with the need for constructive aid to the railways, but differed as to the nature of the aid, both now and for the future.

In spite of their differences there were in the reports of the commissioners certain points of agreement. Both reports agreed that the Canadian Pacific Railway was thoroughly sound and should not be interfered with, and both agreed that the Canadian Northern and the Grand Trunk Pacific were in a serious financial position and should be saved from liquidation.

Financial Position of Railways.

Sir Thomas then reviewed the financial position of both the Canadian Northern Railway and the Grand Trunk Pacific. The former was showing a surplus after paying fixed charges, but it had constantly to meet expenditures for betterment and new rolling stock. The result was that the company had not the ready money to meet interest charges. The Grand Trunk Pacific, however, was showing a loss on operation, and it was estimated that for the next year to meet fixed charges, betterments and the purchase of necessary rolling stock $7,500,000 would be needed.

Coming to the government's proposals, he declared that they did not believe there should be further aid to the Canadian Northern while it was privately controlled. Briefly referring to the fact that the government already owned $40,000,000 of the $100,000,000 stock of the Canadian Northern, he said: "We propose to acquire the whole of this $60,000,000 of stock for the people of Canada. With the $40,000,000 stock that we have we shall be the absolute owners of the Canadian Northern Railway system. Whatever money we expend in the payment of fixed charges for betterment, for rolling stock, will inure to the sole benefit of the people of Canada."

The Grand Trunk Pacific, Sir Thomas stated, was in a different position, and the proposal of the government was that it should make a demand loan, payable at 6 per cent. and secured by mortgage, to the amount of $7,500,000. That amount would be presented to the House in the supplementary estimates and power be taken to constitute the board of directors of the company as the government saw fit to do.

"Personally," commented the minister, "I would look forward to the government some day acquiring the Grand Trunk Pacific system, because with the Canadian Northern Railway system belonging to the government, as is proposed, the two systems could usefully co-operate in the west."

Value Stock by Arbitration.

Sir Thomas said he proposed to have the value of the stock of the Canadian Northern to be acquired determined by arbitration in the manner recommended in the Drayton-Acworth report. It was by a board of arbitrators, one member of which would be nominated by the government, another by the owners and pledgees of the stock, and the third by the other two, or, if they could not agree, by the senior judge of the Exchequer Court. If the arbitrators could not agree in fixing the value of the stock, provision would be made for an appeal to the Supreme Court in both law and fact.

Sir Thomas White said that five-sixths of the 600,000 shares could be got in the near future, and it was known that the balance could be secured shortly afterwards. But as soon as the five-sixths had been vested in the minister of finance under agreement between the owners and pledgees and the governor-in-council, the government could declare that all the stock was vested in His Majesty. The pledgees and owners were known to be willing to transfer.

In this, said Sir Thomas, the government was preserving the corporate entity of the Canadian Northern.

"But when we get the stock," he said, "we shall be absolute masters of the whole corporation, and the reconstituted board would be a board of the Canadian Northern carried on for its shareholders, who will be the people of Canada. The private owners would be entirely eliminated."

In return for this, proceeded Sir Thomas, the government would acquire 5,913 miles of the Canadian Northern Railway, with branches in every province except New Brunswick and Prince Edward Island, and entry into every important city and centre in Canada, with all the adjuncts of the road—telegraphs, express, Lake Superior terminals, five elevators with a capacity of 10,000,000 bushels, steamship lines on the Great Lakes, and altogether some thirty subsidiary companies, whose capital stock was vested with the Canadian Northern Railway. By this acquisition of the Canadian Northern Railway for the people the government was securing direct connection for the west for the Intercolonial, with connections to Ontario and every part of Canada.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 3rd, 1917:—

McKinley-Darragh-Savage Mines, 86,699; Dominion Reduction Company, 88,000; Kerr Lake Mine, 59,945; La Rose Mine, 114,259; Nipissing Mining Company, 283,571; Coniagas Mine, 162,041; Mining Corporation of Canada, 119,394. Total, 913,909 pounds, or 456.9 tons.

The total shipments since January 1st, 1917, now amount to 17,299,706 pounds, or 86,498.5 tons.

CANADIAN PORTABLE HOMES FOR FRANCE

During a discussion in the House of Commons recently, Sir George E. Foster, minister of trade and commerce, replying to a question about ready-built houses for France, said: "The matter was brought to my attention, and I took it up with the department and had the woodworkers plan certain houses. After these plans were made it was thought better—and under my advice it was done—to send the plans to Paris to have them thoroughly looked into and vised, as it were, by governmental authority, acting either directly or through a committee. That was done, and we received modified plans from them for two or three different styles of what we would call shacks, to be used temporarily until more permanent buildings could be erected. In every case their plan called for a more elaborate and more costly building than we had planned. Our buildings would cost from $75 to $100, but with the improvements, coverings, and the like of that, suggested by the French authorities, they would cost considerably more. However, a number of houses were constructed, and I got transport for them free of charge to Paris, where they were on exhibition in the Champs Elysees. I, myself, saw them when I was over there last summer. They had the name of Canada on them, and served to show not only our plan of construction for temporary buildings of this kind, but our materials as well, and they were seen by a great many people. But the war has gone on much longer than anybody thought it would, and, although we know now what they want and though the plans are in the hands of the woodworkers of Canada, not much is being done at present. They, too, I suppose, are awaiting the proper time. What works directly against them is the absolute impossibility of getting transport for goods."

The Royal Bank of Canada has opened a branch at Clarke's Harbor, N.S.

Experience in Investment

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

COAL AND THE COST OF LIVING

Commissioner O'Connor Suggests Canadian Hearths Warmed by Alaska Coal Transported by Air-ships, 1937

Anthracite coal is extensively used in the eastern and central provinces of Canada. The amount consumed west of Manitoba is negligible. The coal is all imported from the United States. Canada has no known field of anthracite. There is a small coal deposit at Banff, in Western Alberta, which is termed anthracite, but it differs from the article generally known under that name. Canadian importations of anthracite during the fiscal year 1916-17 aggregate 4,568,440 tons of 2,000 pounds each.

The United States anthracite region is confined to about 480 square miles of the state of Pennsylvania. It embraces the counties of Susquhanna, Lackawanna, Wayne, Luzerne, Schuylkill, Carbon, Columbia, Northumberland and Dauphin. These facts are contained in the report on anthracite coal of Mr. W. F. O'Connor, K.C., acting commissioner, inquiring into the cost of living. The report continues:—

"The coal was first mined in 1765 and, at the rate at which production is increasing, the estimated life of the field is about 50 years. However, as the mines deepen mining costs increase and the resulting price for coal will probably restrict consumption. With a declining output it is possible that the mines may not be wholly exhausted in 200 years. It is considered that the period of maximum production has been passed, so that in all probability Pennsylvania's anthracite has already sold at the lowest price that it will ever reach. But the future holds a ray of hope. A fact not generally known is that there are immense deposits of anthracite coal in Alaska. The area of the field is estimated as high as 950 square miles. About 85 square miles are known to be productive. Chemical analysis has proved that this Alaskan anthracite is at least equal to the product of Pennsylvania.

Perhaps in 1937.

"Perhaps, therefore, ere the exhaustion of the Pennsylvania field, seemingly insuperable transportation difficulties will have been overcome. Perhaps, indeed, throughout the winter of, say, 1937, or 1938, the survivors of us may sit about our hearths warmed and cheered by the glowing product of the coal fields of Alaska, transported cheaply to us by giant freight ships, through the air. We are living in an age of wonder workers, so who can safely say that this is merely phantasy. It is only a question of time in any event when transportation facilities to the west will ensure for British Columbia and the other western provinces of Canada an abundance of Alaskan anthracite. Prohibitive freight rates operate now to bar the product of Pennsylvania from the entire Candian west.

"About 90 per cent. of the United States production of anthracite coal is controlled by a few large concerns, the principal among them being: The Philadelphia and Reading Coal and Iron Company, the Delaware, Lackawanna and Western Coal and Sales Company, the Lehigh Valley Coal and Sales Company, the Susquhanna Coal Company, the Delaware and Hudson Coal Company, the Erie Coal and Sales Company.

Costs and Prices.

"I have necessarily confined my investigation into the anthracite coal business as conducted in Canada to the matters of costs and prices. I have endeavoured to discover: (1) Whether the commodity was being unduly accumulated in the hands of dealers, thus producing an artificial scarcity and an enhanced price; (2) whether the commodity was being offered for sale and being sold by dealers at a fair price; (3) whether any combines, local or other, existed among dealers, for the stifling of competition, by the fixing of a common price.

"I may as well indicate right here my conclusions, some of which will be elaborated as I proceed with this report:—

"1. I found no evidence of undue accumulation at any time since the beginning of the war. I found during the season of 1916-17 a general scarcity, instead. Whatever might have been the disposition of any dealer, circumstances had not lent themselves to the effectuation of anything like accumulation. At some places there prevailed at times during the past winter almost a famine.

"2. I found a most creditable condition as respects the matter of fair prices. Some rare and only recently reported cases of seeming overcharging are yet engaging my attention. High prices and fair prices are not necessarily different things. It will be enlightening, I am sure, to many, as it was to me, to learn what a very small profit, after all, has been derived by coal dealers, notwithstanding the undoubtedly high prices that the cost of coal to them has driven them to demand.

"3. I found no evidence of any general combine as to prices, but I did find ample evidence of local combines (illegal because in partial restraint of competition), made up of all or mostly all of the local coal dealers, in practically every city in Canada. In order to be fair, however, I have to admit that notwithstanding the illegal character of such combinations, they have not been responsible, so far as I can discover, for any enhancement of prices. If price enhancement was their object that object failed. Failure, of course, does not absolve from guilt. It is trite law that the illegality of a combination does not depend upon its success in the effecting of its purposes. But I do not believe that the enhancement of prices is the object of such combinations. They have a different, also illegal object, with which object I must confess considerable sympathy, and my regret that it is illegal, and, as such, reprehensible and condemnable. I think that the main object of such local associations is the avoidance of price cutting wars, resulting in sales below cost, as among their members. They attempt to effect this purpose by the setting from time to time of a ruling or common price. They do not bind their members to invariable adherence to such price. It is intended as an assistance to price stableization. They discovered years ago that invariable adherence to a fixed price was impossible to secure in the coal trade, so they now agree in the most informal way upon a ruling local price or quotation, reserving liberty to each to actually sell below that price, in particular instances, at discretion. This is a very weak species of arrangement, but it is in the great majority of cases the only possible arrangement. Its intention is to restrict competition as to price and so it is illegal. Whether as a matter of fact such an arrangement can ever operate to produce unfair prices it is not necessary for me to consider.

Coal Dealers' Slender Agreements.

"In the case of the coal dealers it has not so operated. The weakness of the structure of such associations seem to be the consumer's best shield. So slender is the tie that binds the coal dealers together in such local associations that the figures for the from time to time arranged ruling price or quotation are necessarily set by those dealers, whether in the majority or minority, who desire to fix the ruling price lowest. Unless those who would set a higher figure accede there is danger of a breach of relations and an ensuing price war with sales below cost. The avoidance of price wars being the primary object of such associations the lowest desired common price rules. Price wars of a local character have been not uncommon. I shall furnish instances of such and of their effects. I am of those who believe, for reasons elsewhere in this report expounded, that their effects are prejudicial to dealer and consumer alike. The organization of some of these local associations is of the loosest kind. Hardly any of them have any formally expressed agreement as among their members, and it is amusing to a lawyer to note the solemn assurance with which this fact is often stated by those in business as freeing them from the responsibilities incident to the existence of an illegal business arrangement under our criminal law. Their arrangements are, in fact, as well understood, and in law as much against the law (even though they be formed by resort to the nod, the wink or the smile) as if executed with the most elaborate formality. While I have throughout my investigations properly conceded the legality of trade organizations designed to promote trade interests, I have insisted always upon the avoidance of combinations or agreements as to prices and I have exacted many obligations to abstain from such."

CANADA LIFE RESTRICTS TERM BUSINESS

The Canada Life Assurance Company, Toronto, has announced that hereafter, during the continuance of the war, it will not consider applications for term insurance on the lives of men under thirty-five years of age.

London and Lancashire Life and General Assurance Association Limited

Extracts from the Report of the Directors presented at the Fifty-Fourth Annual Meeting held in London, England, 1917

LIFE BUSINESS

During the year 1,167 policies were issued for sums assured amounting to **$3,156,005,** producing a new annual Premium Income of $122,215 and Single Premiums of $7,135, making a total NEW PREMIUM INCOME of **$129,350.** Re-assurances were effected for $108,000.

The sum of $14,308 was received for the purchase of Immediate Annuities.

The TOTAL LIFE PREMIUM INCOME after deduction of premiums paid for Re-assurances amounted to **$1,919,910.**

The INCOME from INTEREST and DIVIDENDS on the life and Annuity Fund was **$748,308** after deduction of Income Tax.

The TOTAL INCOME of the Life Department was **$2,682,720.**

The Claims by death, with bonus additions, amounted to **$1,160,900,** including **$98,330** directly attributable to the war.

ENDOWMENT POLICIES matured during the year, representing Sums Assured of **$738,579** including bonus additions.

After payment of all outgoings, the LIFE and Annuity FUND showed an increase of **$208,350** and stood at **$19,955,544.**

ALEX. BISSETT, Montreal, Manager for Canada.

LLOYDS INSURANCE ASSOCIATIONS

No Licenses Granted at Ottawa So Far for So-called Freak Insurance

Lloyds insurance associations were briefly mentioned in the discussion on the insurance act by the House at Ottawa in committee last week. Here is the reference:—

On section 4, subsection 3—Lloyds associations:—

Sir Thomas White: I have to insert after the word "or," in the 16th line, the words "any association of persons." The reason is to more accurately describe the system of inland insurance which is not confined to individuals, but applies to corporations as well. The use of the word "persons" would cover both cases.

Mr. Sinclair: Is this a new section?

Sir Thomas White: It is practically the same as in the old act.

Any Kind of Business?

Mr. Sinclair: I see that it authorizes a number of individuals to be licensed to carry on insurance business. Is there any limit to the subjects that this association would insure In Lloyds you can take out a wager policy. You can get a policy, for example, that the war will terminate before the end of the present year by paying a sufficient premium. Perhaps you could get a policy that the present government would win the next election, but in that case it would require an enormous rate of premium. Does this mean that when an association is licensed to do business it can do any kind of business it wishes?

Sir Thomas White: No; it can only do the business it is authorized to do under the license. We have authority to license a company to carry on the class of wagering business referred to by my hon. friend, but in the exercise of our discretion I think it probable we would not do it. There is power to do it. They might apply for such a license and we would have to consider the question whether we should issue it or not. So far we have not granted licenses for so-called freak insurance.

Mr. Sinclair: The license itself will indicate the kind of business that is permitted.

Sir Thomas White: Yes.

Propriety of Definition.

Mr. Pugsley: Why is the word "individuals" used in reference to the word "association" on line 3, and in the amendment you use the word "persons?" Is there a different interpretation for the word "persons" from that of the word "individuals?" "Persons" would include a corporation, while "individuals" would not. Is it intended in one case to exclude corporations and in the other to admit them?

Sir Thomas White: The word "individuals" would not include "corporations," but it is the correct word to use in respect to Lloyds, because Lloyds is not a corporation, but an association of individuals. I think there is no question about the propriety of this definition of Lloyds. Now we come down to the amendment "or to any association of persons." That word "persons" is wide enough to embrace corporations as well as individuals.

Subsection as amended agreed to.

"FAR EAST" IN TORONTO

It sometimes requires years of work on the part of an entire family in the Far East to produce one of the beautiful Oriental rugs so much prized throughout the world. It has remained for Canadian inventors to perfect machinery to produce in a few hours a rug that would defy an expert to distinguish it from the genuine hand-made article. The first of these machines has just been completed, and will be shown in full operation in the Process Building at the Canadian National Exhibition, Toronto. Other process operations to be carried on there will be the manufacture of blankets and khaki cloth for the Canadian army, while in contrast will be shown an old spinning-wheel turning out rugs as grandmother did a hundred years ago. There will be shown also the blowing of delicate glass surgical and medical instruments and other equally interesting branches of manufacture.

CORPORATION INSURANCE IS VALUABLE

Policies on Lives of Business Executives Provide Protection Against Many Contingencies

While it is probably not a new idea for men of large means and important business relations to carry heavy life insurance, payable to their estates, or even to the concerns in which they are interested, the theory of insuring a life, the existence of which is valuable to a corporation or firm, for an amount approximately equal to its value in the business or, at least, for a sum that would enable the beneficiary under the policy to continue the business, after the death of the insured, without danger of financial interruption or complication, is of comparatively recent origin, at least in the United States.

The character of the modern approved insurance policy, with its accurate and explicit guarantees of cash surrender values, which may be counted upon as a quick asset with perfect assurance, admirably fits it for this purpose. The annual premiums are usually paid by the firm or corportion to which the policy is made payable, and, after charging them to expense during the earlier years of the policies, they are entered on the books of the beneficiary at a certain fixed valuation, easily ascertainable, as a permanent and absolutely reliable asset.

Reinforces Financial Strength.

If, happily, the insured survives the maturity of the policy, the amount realized becomes a most useful addition to the cash resources of the concern in which he is interested, and he himself may enjoy the satisfaction of directing its investment so as materially to reduce the liabilities, or otherwise reinforce the financial strength of the undertaking.

Should he die before his policies mature, the amount thereof immediately becomes available to his business associates, and, in a measure, compensates them for his withdrawal, and enables them to continue business without difficulty. Presuming, as is most likely, that his estate is interested in the continued integrity of his investments, it is strengthened, benefited and made secure from loss by the wise foresight which provided the protection in advance of its actual need.

Formerly it was not an unusual occurrence for a business suddenly to be thrown into financial difficulties on account of the death of its active and most responsible head. Frequently it happened that the death occurred at a critical time in the business life of the concern, as such things have a perverse way of doing. The strain, at such a time, is always heavy upon the one man who must carry the financial burden, and naturally would have a tendency to weaken him physically, thus bringing about the very event that it was vitally important to avoid. The business might have been a prosperous one, inherently, and if it had been given time to recover from the loss of its directing head, it could have survived and prospered, but, under such circumstances, if often became necessary, in order to satisfy creditors and settle the estate, to proceed to dissolution and, as a result, the business became demoralized and disintegrated to the loss of all concerned.

For Assured's Business Interests.

Business life insurance, by which is meant life insurance for the protection, primarily, of the business interests of the assured, in contradistinction to personal insurance, provides the modern and highly satisfactory method of protection against such contingencies as this, and others no less threatening to the enduring prosperity of the going business, in which one, or perhaps several, men take an active and directing part and are chiefly responsible for the outcome.

The benefits of such insurance are not confined, however, to those resultant from the payment of the policy, either at death or its maturity; other valuable qualities are characteristic of it. The fact that a business concern is protecting itself by this method is, in itself, a very material addition to its financial strength and credit. It argues well for the honor and sagacity of a business undertaking that those chiefly interested in it are having their creditors' welfare in mind by providing life insurance in favor of it; it gives added confidence in their ability to meet all engagements, whatever may happen. It is needless to say that the possession of such insurance lightens the business burdens of the conscientious man who feels that to die and leave his business creditors unsatisfied would disgrace and dishonor his name and humiliate his family. He is better and stronger for the knowledge that he has done his utmost to prevent this posthumous calamity, and hence he is physically less apt to yield to death at the time his business needs him most.

Loan Value Available.

Nor do these enumerations exhaust the benefits accruing from sound business life insurance. In the history of almost every successful or enduring enterprise there comes a time when it is inexpedient, or perhaps impossible, to obtain additional money, which may be urgently required to meet an emergency, or tide affairs over a temporary period of reverses or continued dullness. There may be a financial depression during which bankers are reluctant to extend further credit; money may be scarce, and the fact that the business needs and must have it, to be protected from embarrassment or loss of some opportunity clearly seen but not available for lack of ready cash, only serves to lessen the chances of borrowing through the regular channels.

It is then that the business life insurance policy demonstrates its great usefulness, and its beneficiary is glad that during more prosperous years the premiums were paid and scarcely felt at the time. The policy rivals the wonderful lamp of Aladdin, which, being rubbed, brought forth the desired riches. Without any loss of time, its full loan value is available in hard cash; the insuring company will be prompt in giving holder the amount guaranteed by the terms of his policy, taking it as security for the loan, at a low rate of interest.

Acts as a Preserver.

The beneficiary may thus obtain the money needed in the business without applying to his bankers, and with scarcely more trouble than would be required to draw a cheque. It not infrequently happens that, at a a critical time in the life of a business institution, the timely accession to its available cash resources of a comparatively small sum will be sufficient to save it from embarrassment, if not actual disaster, and thus the possession of a business policy, available in an emergency, may act as the preserver and perpetuator of an undertaking which has been years in its creating and upbuilding, and which otherwise might have been in serious peril of impairment.

The possibilities and advantages of this form of indemnity open an enormous field for the extension of the life insurance business. From being a matter of personal and family protection, it becomes one of impersonal and more widely diffused interest, in which both the debtor and creditor classes are vitally concerned. Moreover, the amount of the average personal policy, the premiums of which are paid by the individual, is small compared to that required to protect the interests of a business of even moderate dimensions.

Larger policies and, consequently, greater premiums, the difference between a retail and a wholesale life insurance business, ought to have inspired insurance representatives promptly with an ambition to extend this branch of their service to the utmost possible extent. Strange to relate, however, the business man himself, rather than the life insurance agent, was the first to realize the advantages of this modern method of protecting himself and his associates. Indeed, it is only recently that general and concerted action has been taken by insurance companies more effectually to handle this exceptionally important department of their business.

Minneapolis is a Leader.

To-day it is highly probable that the practice of business life insurance is growing faster, proportionately, in the newer centres of business activity than in the older ones. The exigencies of credit, which, it may be assumed, is more firmly established with old and long prosperous business institutions than with newer ones whose requirements are apt to outrun their original capital, are doubtless responsible for this in large measure. The late Mr. Frank H. Peavey, of Minneapolis, set an example in the Northwest by taking a policy, payable to his business, of a million dollars, and his successors followed it by purchasing like insurance to a similar amount.

In this action, Mr. Peavey was in advance of his fellow business men, as well as the life insurance people, although it is recalled that many years ago the late Mr. Edward P. Allis, of Milwaukee, took a policy for half a million dollars payable to the company which he founded. Taught by the lesson of 1907, when this form of insurance demonstrated its value, the men of large affairs, and many of moderate business inter-

Sound Investment Bonds

At the present time the investor should exercise unusual discrimination in making conservative selections. High-grade Government and Municipal Bonds constitute one of the most desirable investments, offering not only absolute security of principal, but also liberal return in the way of income. They may now be secured to yield the purchaser from

5% to 6¼%

On request we will be pleased to mail our list, which contains full particulars of a wide range of these Bonds.

ests, living in Minneapolis, have generally utilized this method of protection. The result is that Minneapolis not only now carries the largest per capita amount of business life insurance, but, as far as reliable data can be obtained, its corporation and co-partnership heads have purchased more of this indemnity than has been sold in any other city of the United States.—The Bellman, Minneapolis.

INVESTMENT OF INSURANCE FUNDS

Government's Experience with the Union Life Induces Changes in the Insurance Act

An interesting discussion regarding the investment of insurance companies' funds took place in the House at Ottawa last week when it went into committee for consideration of the proposed amendments to the insurance act. Section 59 deals with this subject and several notable additions have been made to this section, the government's experience with the Union Life Insurance Company being responsible for some of them. The following is the official report of the discussion:—

Sir Thomas White: There is an important feature introduced into section 59, lines 16 to 20, as follows:—

Debentures secured by rates or taxes levied under the authority of the government of any province of Canada on property situated in any such province and collectable by the municipalities in which such property is situated.

The object of that is to make available, as investments for insurance companies, debentures in the municipally owned telephone systems in Saskatchewan and the West. That matter has been before me for some time, and I promised at the first convenient opportunity to introduce the necessary legislation.

Mr. Pugsley: It seems very reasonable. This section reads, beginning at line 25:

(ii) The debentures or other evidences of indebtedness of any company which has paid regular dividends on its preferred or on its common stock for a term of at least five years immediately preceding the date of investment in such debentures or other evidences of indebtedness.

Sir Thomas White: That is a change. That also arose out of our experience with the Union Life. That company had at one time among its assets the debentures of its own agent, the National Agency Company. We have made the eligibility of the debenture depend upon the standing of the company, which seems a sensible thing to do.

Mr. Pugsley: It is a question in my mind, whether, with regard to life insurance policies which are held for the benefit of widows and orphans, provision should be made for investing the money in the debentures of any private corporation or whether it should not be limited to government and municipal debentures.

I am inclined to think it should be so limited. The regular payment of dividends for five years upon common or preferred stock is no assurance of the permanent success or prosperity of a private corporation. It is risky to allow the moneys of insurance companies or savings banks to be invested in any other public securities, municipal or government debentures. This is apparently a new provision; I have grave doubts as to its wisdom.

Investment Range Narrowed.

Sir Thomas White: The range of investment is greatly narrowed under this provision; it is a step towards what my hon. friend has in mind. Formerly they could invest in debentures; now we limit their powers of investment in debentures to debentures of the kind here described; that is to say, debentures that are more likely to be permanently good than those authorized under the existing act as investments. I am disposed to agree with my hon. friend; I would narrow very considerably the powers of insurance companies to invest their funds. This, however, is the answer that has always been made to me when I have raised the question or when I have been considering it with the superintendent of insurance. Our companies are in competition with British and foreign companies carrying on business in Canada. My hon. friend knows that the extent of the advantage given under an insurance policy depends upon the rate of interest earned by the company. If we confine our insurance companies to government and municipal securities yielding lower rates of interest than are obtained by other insurance companies upon another range of investment, we put our companies at a disadvantage in the matter of offering attractive policies and obtaining business. By reasons of the war, the yield rate is so high upon the kind of securities that my hon. friend has in mind—government and municipal securities—that there is not the same objection to the course which he has suggested as has obtained in the past. However, I should not be at all surprised if on the next revision of the insurance act, some few years from now, this question should be very carefully considered; it might be practicable to confine insurance companies to a range of investments which would be absolutely safe.

CHARTERED ACCOUNTANTS TO MEET AT BANFF

The chartered accountants of Canada will meet in an annual convention at Banff on August 15th, 16th and 17th. They will be welcomed by His Honor the Lieutenant-Governor of Alberta, and will be the guests of the Alberta institute. The following programme has been arranged:—

August 14th—Informal reception at the Banff Springs Hotel. Registration of members.

August 15th—Meeting of council. Opening session. Address of welcome by His Honor the Lieutenant-Governor of Alberta. President's address. Appointment of committees. Appointment of auditors. Paper on "Merchandise Inventories and the Auditor's Responsibility Therefor," by Mr. John Parton, of the Institute of Chartered Accountants of Manitoba. Discussion. Address on "Canada's Opportunities After the War—a Comparative Study," by President Tory, of the University of Alberta. Dominion Association banquet at Banff Springs Hotel. Guest of honor: Representative of the Institute of Accountants in the United States of America.

August 16th—A day's excursion to some points of interest in Canada's national park.

August 17th—Paper on "Reserves and Sinking Funds," by James B. Sutherland, of the Institute of Chartered Accountants of Alberta. Discussion. Address by F. M. Black, member of the Public Utilities Commission of the province of Alberta. Reports of committees. Luncheon. Reports of constituent societies. General business.

MARINE INSURANCE AND CANADIAN ACT

It is Not Possible for Any One Country to Control Marine Insurance—Discussion in Commons

The following is an official report of the discussion by the House at Ottawa, in committee last week regarding the proposed insurance act amendment, as it relates to marine insurance:—

Sir Thomas White: The bill with the amendments made by the banking and commerce committee has not been reprinted. The banking and commerce committee made an amendment to subsection 2 of section 3 of the bill, as follows:

(a2) To any contract entered into or any certificate of membership or policy of insurance issued before the twentieth day of July, eighteen hundred and eighty-five by any assessment life insurance company.

This is simply a transfer of an existing section 75 from another part of the act to this section, where it would appear to be more appropriately placed.

Sir Wilfrid Laurier: Section 3 refers to the application of the act, and states the cases to which it shall not apply. For instance:

To any contract of marine or inland marine insurance effected in Canada by any company authorized to carry on within Canada the said business.

What was the reason of this exception? If the act applies to all Canada, why does it not apply to a contract of this kind?

Sir Thomas White: The reason is that it is not possible for any one country to control marine insurance, which may be effected anywhere. That is the explanation given me by the superintendent of insurance. I have not a personal knowledge of it myself, any more than my right honorable friend has, but it seems to me a reasonable explanation.

Subject to Law of Some Country.

Sir Wilfrid Laurier: I would hardly think because a contract of marine insurance is universal, it applies to all countries. Neither this country nor any other country can have any legislative control over it. If you make a contract of insurance in London, or Paris, or any other part of the world, it must be subject to the law of some country.

Sir Thomas White: The superintendent informs me that the risk is upon the high seas and consequently it is not possible, in his opinion, for the government of any country to effectually control marine insurance.

Mr. Pugsley: That would apply to marine insurance on the high seas but the bill also excepts inland marine insurance, which would cover insurance on the great lakes and on rivers and insurance in the different provinces, which would be entirely within the jurisdiction of the parliament of Canada. My honorable friend must get a better reason than that.

Marine Insurance Excepted.

Sir Thomas White: The reason I have given is a very good one. The exception applies to ocean marine insurance as well as inland marine insurance. I was addressing myself first to the question of marine insurance, that is to the question of marine insurance, and the answer which the superintendent of insurance gives seems to me to be a very reasonable one. At all events, I believe his opinion is entitled to weight in the matter. As far as inland marine insurance companies are concerned, I am informed that a change was made in 1910, when Sir Wilfrid Laurier was prime minister. It was made by reason of representations, which would seem to me to be well founded, that it would not be fair to subject the agents of inland marine insurance companies to the provisions of this act in competition as they are for business with companies not subject to the jurisdiction of the Dominion of Canada. I can understand that there is a real difference between marine insurance and other kinds of insurance as far as this parliament is concerned.

Sir Wilfrid Laurier: I am not satisfied with the reason given us why, as a general proposition, we cannot legislate on this question, because of the universal form of the contract, applying as it does to the high seas. I am satisfied that they have a law in Great Britain on the matter. If my memory serves me aright, in my time we had some correspondence with the British authorities on the subject. They claimed that they could legislate on these matters as against the colonies. For the reason that their shipping is much more important than ours, they claimed jurisdiction. We did not always agree with them but still we did not contest the point. There must be some law somewhere and if they can legislate on the subject, why can we not legislate here?

Sir Thomas White: I think there is no doubt that we can legislate, that we have the power to legislate, but it is not regarded as expedient that we should legislate upon this question because the companies subject to our legislation would be in competition with companies outside and they would not get the insurance business.

Unlicensed Fire Insurance.

Mr. Pugsley: Does not that argument lose force when you come to consider that there is the same competition in regard to fire insurance? One of the greatest competitors of the fire insurance companies established in Canada arises from the operations of the mutual companies of the United States. They insure properties in Canada, and although they have never made a deposit with the government, they do a very large business. It is true that the contract cannot be enforced in Canada. A party sustaining a loss caused by the destruction of, or damage to, his property cannot recover against these mutual companies in Canada but must go to the country in which they are located for the purpose of enforcing his rights. They are very large competitors of the legalized insurance companies having their offices in Canada. The same argument, in so far as fire insurance is concerned, would apply to the case of marine insurance. As my right honorable friend has stated, marine insurance companies are incorporated in Canada. Some companies are incorporated in Canada and other companies are licensed to do business in Canada.

I do not see why the law should not be made to apply to marine insurance companies just as well as to fire and life insurance companies. The minister of finance has stated that some years ago, under certain legislation, marine insurance companies were excepted. I understand the object of the present law is to get over difficulties in regard to insurance which have arisen by reason of the decisions of the judicial committee of the Privy Council. The minister apparently is urging the passage of this bill, which is of enormous importance at the present time, because of an intimation that decisions of the Privy Council have thrown the insurance business into a state of confusion. If they have, it seems to me that their judgment would affect the position of marine insurance companies. If it is desirable to pass a general act which would relieve the insurance companies from the difficulties caused by the decisions of the court, I think it ought to be applied to all insurance companies doing business in Canada as well as to fire and life insurance companies.

Not a Similar Case.

Sir Thomas White: No question has been raised as to this exception which was inserted in the act. The case is not at all on all fours with that of the fire insurance companies which are licensed to do business here, which have to conform to the conditions of this act and which are in competition with the mutuals outside of Canada. There are no marine insurance companies complaining of this legislation. In 1910, I find representations were made by the transportation companies that unless these companies were exempted from the provisions of this insurance act there would be discrimination against the St. Lawrence route and Canadian ports generally in so far as insurance was concerned, which would mean an increase in insurance rates and an increase in freight rates upon the St. Lawrence route. If my honorable friend desires that these inland marine insurance companies should be subjected to the provisions of this act, and if we should meet his request, it would only mean that ocean freight rates to his own port of St. John and on the St. Lawrence route would be injuriously affected. My honorable friend does not want to bring that about. It seems to me that his objection is ill founded.

It is true that we are bringing this measure down by reason of the decision of the judicial committee of the Privy Council. The judicial committee of the Privy Council raised no objection to inland marine insurance companies being exempted from the provisions of this act, nor did they advert to the status of these companies in their decision. By reason of that decision, because it is so far-reaching, it is unfortunately necessary that we should re-enact the entire insurance bill, and that is why we are now considering this section with

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

all the other sections, although it was not touched by the decision of the law lords of the Privy Council.

Mr. Nesbitt: I spent a good deal of time in the committee when the insurance act was enacted in 1910, and the reason given by the minister is the reason why we exempted these marine insurance companies. Besides that, there has since been no trouble over it, so far as I know. I do a good deal of marine insurance when I am at home, and I have never experienced any difficulty since that time.

Sir Wilfrid Laurier: By what law is it regulated, the British act?

Mr. Nesbitt: The British act. So far as concerns any companies doing business in Canada that I know of, they are regulated by the British act, and we have not interfered with them. We did not interfere with them then because it was represented to us that this might make a difference to the St. Lawrence route insurance, and also to the inland waters insurance. That is why we exempted this marine insurance at that time, and this bill makes no change from the act of 1910.

The section was agreed to.

PUBLICATIONS RECEIVED

How Far is Public Ownership Wise?—A pamphlet dealing principally with government ownership of railways in unfavorable comparison with those owned and operated by private corporations. Written by Andrew T. Drummond, LL.D., 292 Russell Hill Road, Toronto. Reprinted from Queen's Quarterly.

The English-Speaking Peoples.—The author's treatment of his subject in this new volume is graphic and concise. He impresses the reader with the urgent need, in the interests of future international relationships, for closer intimacy between the English-speaking peoples, conclusively demonstrating that a democratic co-operative alliance is not only essential to their own security, but that in the future peace of the world such an association is the only attainable bulwark of freedom and liberty.

"The English-speaking Peoples." By George Louis Beer. Published by the Macmillan Company of Canada, St Martin's House, Bond Street, Toronto. Price, $1.50.

Canadian Railway Problem.—This volume is published at an opportune time. In it, Mr. E. B. Biggar, the author, makes a strong plea for national ownership. "The Railway Inquiry Commissioners," he says, "see an obstacle to state ownership in the 7,000 miles of Canadian railway in United States territory. But in either case lines in the United States must submit to United States sovereignty, as they have done all along; and, moreover, these extra territorial lines are already separated by the articles of incorporation under United States laws.

"The jurisdiction of the United States government over railways now owned by Canadians in that country, or the jurisdiction of the Canadian government over railways in Canada now owned by citizens of the United States, will neither be diminished or increased in the least by state ownership. At any time either country could sell the lines outside of its own boundaries, which lines, in any case, must be subject to the laws of the country on which they are located, for they were all incorporated under local laws. Interchange of traffic in the postal services of the United States and Canada goes on under state ownership without any serious complications; and during peace times there is no interruption of traffic between European nations where state ownership prevails. A moment's reflection on these facts will show that the international danger of state ownership is just a 'loup garou.'"

The volume is well written and reflects the author's thorough knowledge of his subject.

"The Canadian Railway Problem." By E. B. Biggar. Published by the Macmillan Company of Canada, St. Martin's House, Bond Street, Toronto. Price, $1.25.

Mr. N. E. Nelson, M.E., representing the Granby Mines Company, of Phoenix, B.C., has completed the purchase under the terms of a bond, of the Montgomery group of copper-gold claims on Downie Creek, Big Bend, 40 miles north of Revelstoke, B.C.

FIRE LOSSES ARE HEAVY

In Ontario This Year They Have Been at Rate of $1,000,000 Monthly

The average fire loss in Ontario for the first six months of this year has been $1,000,000 a month, according to the report of the fire marshal's department. A total of 4,839 fires was reported. The insurance on these losses amounted to $4,518,792. In June there were 216 fires caused by lightning, with a loss of $57,466.

Ontario's Fire Record.

The following are the details for each month:—

	Fires.	Loss.
January	[illegible]	$ [illegible]
February	[illegible]	[illegible]
March	[illegible]	[illegible]
April	[illegible]	[illegible]
May	[illegible]	[illegible]
June	[illegible]	[illegible]
	4,839	$5,988,314

Canadian fire losses, as compiled by *The Monetary Times*, for the first seven months of this year, were as follows:—

	1917
January	$ [illegible]
February	[illegible]
March	2,050,650
April	[illegible]
May	[illegible]
June	[illegible]
July	[illegible]
Total	$[illegible]

Losses in North America.

Losses by fire in the United States and Canada for the first six months of the year, as compiled from the records of the New York Journal of Commerce, reached the unusually high total of $144,000,000 as compared with $125,000,000 for the first half of 1916 and $92,000,000 for the first half of 1915. For the month of June losses were heavy, having amounted to over $15,500,000, as compared with $12,200,000 in June, 1916, and $10,800,000 in June, 1915. The record for the six months for the three years shows:—

	1915	1916	1917
January	$ [illegible]	$ [illegible]	$ [illegible]
February	13,081,250	24,770,770	29,587,660
March	[illegible]	[illegible]	[illegible]
April	[illegible]	[illegible]	[illegible]
May	[illegible]	[illegible]	[illegible]
June	[illegible]	12,247,500	[illegible]
Total six months	$[illegible]	$[illegible]	$[illegible]

CANADIAN PACIFIC OCEAN SERVICES

The Canadian Pacific Ocean Services, Limited, have taken over the management, operation and control of the Allan Line steamers and the offices of the Allan Line at 14 Cockspur Street, S.W. 1; 103 Leadenhall Street, E.C. 3; 25 Bothwell Street, Glasgow; 88 Commercial Street, Dundee; 50 Foyle Street, Londonderry, etc. The Allan Line office at 19 James Street, Liverpool, has been closed and transferred to the Canadian Pacific Ocean Services, Limited, Royal Liver Building, Liverpool, where all operations of the joint Allan-Canadian Pacific services from that port will henceforth be conducted. The number and combined tonnage of Canadian Pacific and Allan Line vessels on the Atlantic and Pacific for which the Canadian Pacific Ocean Services, Limited, act as managers and agents, is thirty-nine vessels, of approximately 400,000 tons (including seven vessels now building). Passenger and freight services will be maintained between Liverpool, London, Glasgow, Bristol and Havre to Canada and the United States, and between Vancouver and Japan, Manila and China. The Canadian Pacific Railway Company acts as traffic agents for the Canadian Pacific Ocean Services, Limited.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Trenton, Ont.—An issue of $9,500 5 per cent. 30-year debentures has been awarded to Macdonald, Bullock and Company.

Brockville, Ont.—An issue of $28,000 5½ per cent. 5-year patriotic bonds has been entirely purchased by local investors.

Kenyon Township, Ont.—An issue of $15,000 5⅓ per cent. 18-year drainage debentures has been awarded to W. L. McKinnon and Company, Toronto.

Peterborough, Ont.—The city trust will buy $10,000 debentures at par. This is to cover the last expenditure in connection with the purchase of the Peterborough light and power plant.

Montreal, Que.—Messrs. Macneill and Young, Toronto, offered to purchase $1,000,000 or $2,000,000 of city of Montreal 5 per cent. two-year notes at 97. The board of control refused the offer.

Chatham, Ont.—The issue of $60,000 5½ per cent. 20-year school debentures has been awarded to Mulholland, Bird and Graham, Toronto, at 95.26. The remaining bids were as follows:—

Brent, Noxon and Company	95.24
Macdonald, Bullock and Company	95.16
R. C. Matthews and Company	95.10
G. A. Stimson and Company	95.01
Canada Bond Corporation	94.47
A. E. Ames and Company	94.01

Toronto, Ont.—The report of City Treasurer Bradshaw on the first instalment of taxes, 1917, has proved gratifying to those who are watching with interest the improvement in the handling of the city's finances during Mr. Bradshaw's regime. The first collection of the year was satisfactory and gives expectations of an equally good response when the second and third instalments become payable. The gross taxes collectable this year amount to $16,929,321, payable as follows: First instalment, payable June 29th, $7,882,078; second instalment, payable August 29th, $5,656,597; third instalment, payable October 19th, $3,390,646.

The amount of the above received to date is $9,323,550, or 55.07 per cent. of the whole. This is $1,441,472 in excess of the amount represented by the 1st instalment. The total taxes collectable in 1916 amounted to $14,981,712; the amount thereof paid at the due date of the 1st instalment was $7,505,848, or 50.10 per cent. of the whole. This year the amount paid exceeded that paid for the corresponding period in 1916 by $1,817,702, or a percentage increase of 4.97.

Saskatchewan.—The following is a list of bond applications granted by the Local Government Board, from July 16th to 27th, 1917:—

School Districts.—*Border Line, $2,000 10-years not ex. 8 per cent. annuity. M. Wereley, Divide; *Okno, $1,400 10-years not ex. 8 per cent. instalment. N. Nidesh, Sheho; Armstrong, $1,800 10-years not ex. 8 per cent. annuity. E. W. Brown, Rokely; *Estuary, $15,000 20-years not ex. 8 per cent. annuity. R. H. Street, Estuary; St. Magnus, $2,500 10-years not ex. 8 per cent. instalment. P. M. Ramsey, Yorkton; Bloomville, $2,300 10-years not ex. 8 per cent. instalment. A. J. New, Gull Lake; Assiniboia, $9,000 30-years not ex. 7 per cent. annuity. J. H. Smith, Assiniboia; *Dundurn, $3,000 20-years not ex. 8 per cent. annuity. E. G. Edwards, Dundurn; *Sprayville, $2,000 10-years not ex. 8 per cent. instalment. W. E. Greenfield, Springside; White Creek, $1,600 8-years not ex. 7 per cent. instalment. F. Firestone, Sheho; Winton Hill, $1,800 10-years not ex. 8 per cent. annuity. S. Stanley, Winton Hill; *Eagle Crest, $2,000 10-years not ex. 8 per cent. G. F. Bush, Rosetown; *Sunbeam, $2,000 10-years not ex. 8 per cent. instalment. W. J. Passmore, La Fleche.

Rural Municipalities.—Winslow, $6,000 10-years 7 per cent. instalment. R. H. Percival, Druid; Dufferin, $5,000 10-years 7 per cent. instalment. J. H. Peele, Bethune.

Town.—Davidson, $4,300 10-years 6½ per cent. annuity. A. J. Robertson, Davidson.

Villages.—Eston, $2,800 7-years 8 per cent. instalment. John Littlejohn, Jr., Eston; Plato, $2,600 7-years not ex. 8 per cent. instalment. W. J. Pomery, Plato.

The following is a list of bonds reported sold:—

School Districts.—Butterton, $1,600. Goldman and Company, Regina; Howard, $1,200. Goldman and Company, Regina; Mabel Hill, $1,200. C. M. Gripton, St. Catharines, Ont.; Olga, $500. Town of Francis; Bird's Eye View, $600. Town of Francis; Quill Lake View, $1,200. Canada Landed and National Investment Company, Winnipeg; Wymark, $2,000 Canada Landed and National Investment Company, Winnipeg; Parkside, $1,200. Canada Landed and National Investment Company, Winnipeg; North Instow, $1,400. C. M. Gripton, St. Catharines, Ont.; Estuary, $15,000. Great-West Life Assurance Company, Winnipeg; Curzon, $2,000. Goldman and Company, Regina; Acreworth, $1,900. C. M. Gripton, St. Catharines, Ont.; Glasslyn, $1,500. C. M. Gripton, St. Catharines, Ont.

Rural Telephone Companies.—Prairie Rose, $9,000. W. L. McKinnon and Company, Regina; Wartime, $11,000. Wood, Gundy and Company, Saskatoon; North-East Webb, $3,400. W. L. EXPERIENCED FINANCIAL EXECUTIVE desires [illegible] Best of references. Apply Banker, *Monetary Times*, T

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

TWO ENERGETIC MEN WANTED.—Advertiser desires to get in touch with two energetic, ambitious men, not over forty years of age, possessing good business ability and of unquestionable character, to join him in the active management of a thirty-five years established and very successful Canadian manufacturing concern, in which he is employed in executive position, and from which the two principals are retiring on account of age and health. This firm dominates the Canadian market in its lines, protected by trade-marks and patents, and does an excellent export business. Its books will show it has always made big money, is at present in flourishing condition, has large selling organization, and the contemplated change will be made without disrupting its affairs in any way. A $25,000 investment is required from both men, but more than the ability to invest this sum is required to entitle them to share this rare opportunity. Fullest references and investigation will be required and exchanged. Preliminary to interview write in some detail to Box 97, *The Monetary Times*, Toronto.

GOLD EXPORTS FROM CANADA

The arrival of $6,000,000 from Canada at the Philadelphia Mint on August [illegible] was the first import by the United States of the metal announced since July 6th. Imports of gold since the entrance of the United States into the war have totalled $206,000,000; since the beginning of the calendar year, $508,000,000, and since the beginning of the war in Europe, $1,669,000,000.

The Canadian banks are anxious that those who are holding interim certificates for the 1937 Dominion war loan [illegible] for the purpose of having them exchanged for definitive bonds.

The customs revenues of Canada for July amounted to $14,269,643, or $3,187,749 more than in July, 1916. Receipts during the four months ended July 31st, 1917, aggregated $60,949,847, as compared with $46,513,299, an increase of $[illegible]

[illegible] said Sir Thomas White in the House at Ottawa last week in [illegible] provided and was lying to the credit of the Dominion government in New York [illegible]"

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending June, 1917, were: imports 1915, $132,602,879, 1916, $34,058,009, 1917, $28,997,629 and exports 1915, $77,715,149, 1916, $80,287,037, 1917, $107,376,543. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

CANADA LIFE
ASSURANCE CO.
Head Office, Toronto
Established 1847

New Records

Results secured during the past year re-affirm the position of the Sun Life of Canada as the leading life assurance organization of the Dominion.

It leads all Canadian Companies in annual New Business, Total Business in Force, Assets, Surplus Earnings, Net Surplus, Premium Income, Total Income and Payments to Policyholders.

Fair-dealing and progressive business methods are the foundations for the Company's phenomenal growth.

PERSONAL NOTES

Mr. W. B. Fairley, for some years associated with the Monarch Life Assurance Company in Fort William and later in Winnipeg, has been appointed branch manager at Hamilton.

Mr. F. T. Stanford has been placed in charge of the new sales department of the Canada Life Insurance Company. This department will include editorial, publicity, advertising departments, multigraph and other work of this nature now being performed at the head office. Mr. Stanford is especially well qualified for this position.

Mr. J. E. McAllister, one of the best known and most capable of Canada's consulting engineers, has been appointed vice-president and general manager of the National Steel Car Company, Hamilton, Ont. Mr. McAllister was born and brought up in Toronto. He is a graduate (1895) of Toronto University, with degrees of Bachelor of Applied Science (B.A.Sc.) and Civil Engineer (C.E.) He is also a post graduate of the Michigan College of Mines. The first years after leaving college were spent at structural steel work as draftsman an engineer with the Dominion Bridge Company, Montreal, and subsequently in the United States. Mr. McAllister has held many important positions and his experience and ability will be of great value to the National Steel Car Company. Among these positions are the following: Superintendent of reduction works with the Tennessee Copper Company; general manager of the British Columbia Copper Company; consulting engineer to Doctor F. S. Pearson; and consulting engineer to the British-America Nickel Corporation. Sir John Gibson, who is president of the National Steel Car Company, and is quite hopeful of its successful future, in telling *The Monetary Times* of the new appointment, said: "Mr. McAllister is a consulting engineer and is a very able man." The company's new vice-president and general manager carries to his new position the best wishes of a large number of financial and engineering friends both in Canada and in the United States.

COPIES OF THE MONETARY TIMES WANTED

A few copies of *The Monetary Times* of July 20th are wanted. Readers sending their copy for that date to the head office, 62 Church Street, Toronto, will be granted one month's extension of subscription, free of cost.

TWO WELL-KNOWN TORONTO FIRMS MERGE

Messrs. Rolph and Clark, Limited, and Messrs. Stone, Limited, lithographers and printers, have amalgamated. The two firms will in future be known as Rolph, Clark, Stone, Limited. The new company has an authorized capital of $3,000,000. The officers of the company are as follows: Honorary president, Mr. Frank Rolph; president, Mr. William Stone; vice-president, Mr. T. J. Clark; second vice-president and managing director, Mr. Frank A. Rolph; general manager and secretary, Mr. F. W. Stone. In a statement to *The Monetary Times* Mr. Rolph said that the amalgamation had been effected for purposes of economy and for efficient operation. The stock is not being offered to the public, but will still be held by interests of the two concerns which have merged.

HAMILTON BOND ISSUE SOLD

The Hamilton, Ont., board of control accepted yesterday an offer for $723,300 5 per cent. 10 and 20-year bonds as follows:—

Ten-year bonds—Military building, $33,230; Red Cross, $45,540; municipal purposes, $79,100; Canadian Patriotic Fund, $97,570; total, $255,440. Twenty-year bonds—Technical School site, $83,000; public school, $62,000; hydro-electric, $180,000; Hamilton Health Association, $50,000; public school, $30,000; waterworks, $22,860; public school, $40,000; total $467,860. In a statement to *The Monetary Times* this morning, Mayor Booker said: "We are more than satisfied with the price received for these bonds through competitive offers. In view of the prevailing market conditions, we believe that we have done very well. Borrowers cannot tell from one hour to another what price they may expect for their bonds." The sale of this issue will probably be confirmed at the city council meeting on Tuesday. In view of this fact, *The Monetary Times* is not at liberty at present to publish the price which the city received for the bonds.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates to *The Monetary Time*s as follows:—

BRITISH EMPIRE TRUST

Payment of Substantial Dividends Resumed

The sixteenth ordinary general meeting of the British Empire Trust Company, Ltd., was held on Tuesday, July 17th, at Liverpool-street Hotel, London, England, Mr. J. Davidson (managing director) presiding.

The secretary (Mr. R. W. Bartlett, A.C.A.) read the notice convening the meeting and the auditors' report.

The Chairman stated that owing to ill-health Mr. R. M. Horne-Payne, the Chairman of the company, was unable to be present, but he had prepared a very interesting statement, which Mr. T. Blundell Brown would read to the shareholders.

Mr. Horne-Payne's address was as follows:—"Gentlemen,—We are thankful to find ourselves able at to-day's meeting to recommend you to authorise the resumption of the payment of substantial dividends on the Preferred and Deferred shares. The inconvenience and even hardship which the suspension of dividends has caused to many people has been a matter of deep concern to us, and we hope that it is a state of affairs that may never recur, although while the war lasts it would be rash to make any forecast of such matters. It is especially satisfactory that we are able to pay these dividends with the knowledge that, after valuing our investments at the lowest figure of the prices quoted for them on the Stock Exchange, there is more than 20s in the till in respect of every £1 of the company's issued capital. I may point out that the interest income for the year is almost equal to the amount which will be paid out in dividends. In principle the directors' proposal is to distribute dividends approximately equal to the interest income; to offset expenses against the fees received as trustees, registrars and secretaries; and to carry forward to next year approximately the amount released from special reserve by the improved position of our investments. We have, owing to the war, no profits to report this year from issuing or underwriting commissions, as, with the single exception of subscribing for a substantial block of War Loan, we have not embarked on new business except such ordinary business as is regularly transacted from day to day, and the efforts of your directors have been concentrated on protecting you from loss rather than on seeking to secure profits for you. I am glad to be able again to point out that the company's ordinary business revenue is well maintained, and I think I may claim that the company's affairs are in a very satisfactory position. This is mainly attributable to two factors—namely, to the policy adopted in the past two years of providing in the accounts for the full nominal loss from depreciation in the value of our investments, and to the devoted and able work of your managing director, who, well seconded by the assistant manager now serving with the Colours, the secretary and the few members of the staff left to us, have not spared themselves in their efforts to carry on the company's business, and I do not think any of you could believe how continuous, arduous and responsible the work of the company, and especially that arising from trusteeships, is."

CANADA AND BRITISH CAPITAL.

"As you know, our business interests and investments are largely in Canada. There, as in every other country, the war has produced many changes in conditions. The flow of capital from Great Britain to Canada which has been going on steadily for years and could be relied upon with certainty, was at the outbreak of war suddenly and completely cut off, causing embarrassment to many important enterprises which were in the midst of extensive programmes of development and had expended large sums of capital on works which could only become fully remunerative on completion, and for the completion of which further capital was required. Difficulties were increased by the fact that all over the Dominion men responded to the call to arms in such large numbers as to cause in some centres in the West a serious depletion of population, which disorganized trade and business, and incidentally led to a great demand for labour and extremely high wages. These conditions continue at the present time, and to one or other of them is attributable the difficult position which confronts several of the great railway and public utility enterprises. Capital cannot easily be raised, and the rates charged, being fixed by law or agreements, cannot immediately be readjusted to correspond with the increased cost of labour and materials, and in some cases cannot be adjusted at all. On the other hand, Western Canada has benefited greatly from the increased demand and higher prices for foodstuffs and Eastern Canada from the enormous orders for munitions and war supplies of every description, which with her vast supplies of raw materials and well organized modern industrial plants, she is well able to undertake. I have no doubt that Canada will emerge from this war greatly enriched, and that peace and the return of the troops will be followed by several years of great trade activity and development. We have thus a strange mixture of prosperity and adversity, the latter falling especially heavily upon a class of enterprise in which British capital is largely invested. During the seven years from 1908 to 1915, inclusive—one of which was a full year of war—it is estimated that the people of Great Britain invested in Canada no less than $1,472,000,000—approximately £300,000,000—without taking into account the very large sum placed in real estate and mortgages on property. The British Empire Trust Company alone, since it commenced business, in 1902, has been responsible for the finding of some £60,000,000. The result to Canada has been that great increase in her population, and agricultural, mineral and commercial development and wealth which has proved of such supreme value to the Empire in the present struggle, and the investor who placed his money in investments under the British flag, in preference to under a foreign flag, has this deep reason for satisfaction. I hope it will not be found that from a financial standpoint confidence in British institutions and laws has been misplaced, and that these afford the investor less just protection than those of other countries, but a spirit has manifested itself in certain parts of Canada which seems to show a very great deal less than fair play towards enterprise. This is the more regrettable as the Dominion Parliament itself is always careful to treat British capital with fairness and consideration. I hope that just counsels may prevail, and that the rights of investors will receive fair protection in all parts of Canada; but should the contrary occur, the people concerned must not be surprised if they find after the war that fresh capital is unobtainable, and that existing loans and mortgages cannot be renewed."

EXPANSION OF THE TRADE OF THE EMPIRE.

"Last year I referred to the organisation of ways and means of expanding the trade of the Empire and of capturing trade from the enemy, and I asked shareholders to help this company to do its share by bringing before us any opportunities they might meet with of assisting in establishing new, or extending old, undertakings. We believe that after the war there will be endless opportunities of financing sound enterprise, and we wish to get into touch with these. We are well equipped for the work. We have capital and credit with which to assist enterprise in the initial stages, and we have very extensive machinery with which to permanently provide them with capital by the sale of shares and securities at a suitable period of their development. We hear a great deal of the fierce international trade competition which is to follow the war, and the necessity of placing our manufacturers, merchants and contractors in a position to obtain larger banking facilities and longer credits than in the past. The British banks are reproached with having withheld these facilities, and they are asked in future to model themselves on German lines. German commercial banks undertook dangerous responsibilities and locked up their capital and their depositors' money in long credits and in commercial and industrial enterprises in which they, in effect, became partners with the manufacturer and contractor. I believe that the threatened financial crash resulting from this system was one of the two main factors which caused Germany to precipitate this war. The question of who came to the rescue at the outbreak of war and paid the huge losses incurred by the German banks has not yet been answered. It does not, however, require much inside information to divine that it was the German Government. British banks are second to none in the world. Surely the latter half of 1914 proved this beyond all question. They have rightly declined to endanger their institutions by following German commercial banking practice. They hold on deposit from the public enormous sums repayable on call or at short notice, which it is impossible for them to lock up in the German fashion in long-term credits or industrial enterprises; but there is not now, and never has been, any lack of proper banking facilities of this class in this country. I think I may permit myself to speak with some confidence on this subject, as not many men have had greater experience in the organisation and financing of enterprises of magnitude and Imperial importance. The locking up of money in industrial enterprises at home or abroad does not come within the proper scope of the banks. It belongs to the business of the numerous large financial houses and of institutions such as ours, which have no liabilities to the public on current account or short-term deposits. I hope that the new British Trade Corporation will have a career of great usefulness and success but the addition of one or several new trade banks cannot very greatly affect the vast business of the British Empire in one direction or the other unless they should unfortunately develop into any sort of exclusive financial ring under Government auspices and patronage, in which case their influence would be paralysing and destructive. This country in its banks, its financial houses and its Stock Exchanges possesses all the financial machinery necessary to facilitate commercial enterprise at home and abroad on the largest imaginable scale."

ELIMINATION OF GERMAN INFLUENCE.

"It is not new financial machinery, but better use of the old that is required. Our finance and trade must be released from German influence and be provided with scientific assistance of the highest order and with a highly efficient and independent Consular service. Let the influence of German peaceful penetration be totally eliminated from our financial system. Let the public absolutely decline to do business with a bank or financial house or firm of brokers who has a single director or partner who is a German, naturalized or unnaturalized. Let Government provide well-organised, efficient, accessible and reasonably inexpensive facilities for obtaining scientific guidance and an extended well-paid Consular service composed of men whose time and efforts are exclusively devoted to the national interests, and it will be found that with the fresh opportunities offering after the war we already have in this country the most efficient and reliable banking and financial system the world has ever seen or ever will see. In conclusion, I will repeat what I said last year. The British Empire Trust, with its £750,000 of capital, is but a small wheel in the huge machinery of the Empire, but I hope to see it doing its part in holding and capturing trade. It is with this in view that we are shaping its course, and we would ask shareholders to co-operate by bringing before us, or in asking their bankers to bring before us, any opportunities they may meet with of assisting in establishing new or extending old commercial undertakings within the Empire. In so doing you will be assisting not only the company in which you are shareholders, but the interests of the country generally."

The Chairman moved: "That the accounts for the year ended 30th April, 1917, and the report of the directors and auditors thereon, be received and adopted."

Mr. Norman Scott-Russell seconded the resolution, which was carried unanimously.

The Chairman next proposed: "That the payment of the dividends on the Five per Cent. Cumulative Perpetual Preference shares for the year be approved, and that dividends of 5 per cent. per annum on the Preferred Ordinary shares and of 7 per cent. per annum on the Deferred Ordinary shares be and they are hereby declared for the year ended 30th April, 1917, payable to all shareholders of record on the 17th July, 1917."

Mr. Scott-Russell seconded the motion, which was unanimously agreed to.

The retiring directors (Mr. Norman Scott-Russell and Lieut.-Colonel E. F. O. Gascoigne) and the auditors (Messrs. Robertson Hill and Co.) were re-elected, after which the proceedings terminated.

NEW INCORPORATIONS

Two Million-Dollar Shipbuilding Companies Chartered, Also Two Large Mining Companies

The largest companies incorporated last week are:—

British American Shipbuilding Company, Toronto.	$1,000,000
Bourkes Mines, Limited, Toronto	[illegible]
Rand Consolidated Mines, Limited, Toronto......	5,000,000
William Lyall Shipbuilding Company, Montreal ..	1,000,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital and the persons named are provisional directors:—

Moose Jaw, Sask.—Chivers, Limited, $10,000.

Duncan, B.C.—Cowichan Producers, Limited, $10,000.

Burnaby, B.C.—Highland Shingle Mills, Limited, $300.

Saskatchewan. — Tuckett, Limited, $10,000, Hamilton, Ont.

Vernon, B.C. — Vernon Lumber Company, Limited, $10,000.

Beulah, Sask.—Royal Victoria Mutual Fire Insurance Company.

Gravelbourg, Sask.—The Gravelbourg Turf Club, Limited, $800.

Regina, Sask.—The Western Discount Company, Limited, $10,000.

Golden, B.C.—Tarheel Copper Company, Limited (non-personal liability), $300,000.

Saskatoon, Sask.—Serif's, Limited, $20,000; the Central Drug Store, Limited, $20,000.

Revelstoke, B.C.—Dunvegan Mining Company, Limited (non-personal liability), $250,000.

Winnipeg, Man.—Mude's, Limited, $20,000. Joseph T. Beaubien, L. N. Landry, B. Baleshta.

St. Malachie, Que.—La Compagnie Dorchester, Limitee, $200,000. N. Labrecque, E. Boutin, J. Lacasse.

Fernie, B.C.—Swift Creek Lumber Company, Limited, $20,000; Bull River Water Company, Limited, $125,000.

Ottawa, Ont.—McAuliffe, Davis Lumber Company, Limited, $300,000. A. M. Davis, C. H. Walters, G. D. Kelley.

Eganville, Ont.—The Mud Lake Rural Telephone Company, Limited, $1,500. F. Kumm, E. Vanderbeck, H. Butt.

Owen Sound, Ont.—Empire Stove and Furnace Company, Limited, $100,000. A. A. Parks, A. J. Creighton, E. W. McQuay.

Victoria B.C.—Gordon Bay Mines, Limited (Blue Grouse Claims), (non-personal liability), $400,000; Draftite, Limited, $25,000.

Vancouver, B.C.—Pacific White Lead Company, Limited, $300,000; Hotel Cunningham, Limited, $20,000; E. B. Morgan and Company, Limited, $10,000; United Water Power Company, Limited, $32,000; Swindell and Fowler, Limited, $15,000; N. C. Foster, Limited, $10,000; Helman and Sapers, Limited, $10,000.

Toronto, Ont.—British American Shipbuilding Company, Limited, $1,000,000. F. H. Keefer, A. L. Martin, A. A. Kinghorn; Curry-Jansen, Limited, $40,000. F. J. Hughes, D. Patrick, J. Kelly; Toronto Dry Dock Company, $100,000. J. E. Russell, H. Cresswell, S. W. McKeown; Toronto Shipbuilding Company, Limited, $100,000. J. E. Russell, J. J. Nanley, S. W. McKeown; Potash Patents, Limited, $250,000. F. J. Hughes, D. P. J. Kelly, V. Stewart; Bourkes Mines, Limited, $2,500,000. G. R. Sproat, C. Carrick, J. Clark Thomson; Industrial Accident Prevention Associations. W. C. Phillips, J. B. McCarter, J. F. Martin; Rand Consolidated Mines, Limited, $5,000,000. A. Fasken, R. S. Robertson, A. B. Nind.

Montreal, Que.—Techno-Chemicals, Limited, $40,000. C. Hurtubise, J. Hurtubise, G. Hurtubise; Perfection Counter, Limited, $40,000. M. Langlois, P. St. Germain, L. Guerin; Mathews-Horton, Limited, $40,000. F. T. Enright, E. W. Westover, I. S. Macfarlane; House of Style, $10,000. L. H. Duclos, V. Martineau, A. Jodoin; the Sydney F. Jenkins Company, Limited, [illegible] S. F. Jenkins, F. [illegible] Drummond Hay, A. J. Miligan; Maheu Automobile, Limited, $20,000. A. Racine, L. Huberdeau, T. W. Maheu; Le [illegible] Company, Limited, $500,000. P. T. Legare, J. H. Fortier, P. W. Fortier; the William Lyall Shipbuilding Company, Limited, $1,000,000. E. Languedoc, R. E. Allan, W. Taylor; Quebec Charcoal Company, Limited, $50,000. A. Wainwright, C. G. Ogden, G. V. Cousins.

FIVE-MASTED SCHOONER LAUNCHED

The "Mabel Brown," motor-driven, five-masted schooner, launched the other day by the H. W. Brown Company, Limited, Vancouver, B.C., is built throughout of British Columbia Douglas fir. She took on her load in ten days at the plant of the Victoria Lumber and Manufacturing Company, Limited, Chemainus, B.C. The freight charges on her cargo amount to $45,000. The "Mabel Brown" is the first of many similar vessels which are now being built in Canada to take the water. She is equipped with two 160 horse-power engines of the Diesel type.

MANITOBA FARM LOANS SCHEME

Editor, *The Monetary Times*:

Sir,—I notice your remarks re Manitoba farm loans, and beg to say you read my letter incorrectly. What I stated is: To borrow money, $1,000,000 at 5 per cent. simple interest, and put it out in the manner described, makes the "goodly profit" shown at the end of thirty years. The $22.65 is, therefore, not used to pay current expenses.

In the following paragraph of my letter I ask "how" the current monthly expenses are to be paid, and I suggested therein that legal and valuation fees must be collected from the farmer to pay same.

Your figures are correct if the current expenses are to be paid out of the $72.65.

I am not connected with the Farm Loan Association in any way.

Yours, etc.,
W. C. Alderson.

Winnipeg, August 3rd.

INCOME TAX EXPENSIVE TO COLLECT

Editor, *The Monetary Times*:

Sir,—Many people were pleased to see the announcement in the press of the Dominion government's proposal to impose a tax on incomes. This is what most people meant when they asked for the conscription of wealth, and the government has apparently only very reluctantly responded to the insistent demand of the people for a more equitable distribution of the burdens of the war. The extraordinarily inadequate nature of the proposed tax, however, makes one doubt the genuineness of the government's intentions, as the following examples will show:—

Income.	Tax.	Super tax.	Total.
$[illegible]	$[illegible]	$[illegible]	$[illegible]

This is for a married person where the exemption is $3,000.

Income tax is one of the most expensive to collect, and needs to be adequate if substantial benefit is to be gained. What is really needed is the raising of sufficient revenue to enable the government to pay the expense of the war without recourse to further borrowing. Canada is enjoying great prosperity now, and a period of the worst financial depression is to be looked for in the years following the termination of the war. All great wars have been followed by severe economic disturbance, and the best illustration is the period of twenty years after 1815. Whatever we pay out of income now, so much will we lighten the burden of the future.

Yours, etc.,
E. L. Richardson.

is impossible for the company, unaided, to complete its venture; and that it is absolutely vital to the interest of the country that further duplication should cease.

Under these circumstances, have the Canadian Northern shareholders any claim to compensation? Not, we think, as of right. But governments in the past have not taken a stand on strictly legal grounds in their dealings with other companies. There are grounds on which similar action could be justified in this case. The company has done much to develop the prairie provinces. Its lines there are well located, economically constructed, and valuable for public service. Of the later constructed lines also we can say that they have been well located from the engineering, if not from the traffic standpoint, and economically constructed. And if in recent years the Canadian Northern shareholders were carried away by a wave of unreasoning optimism, at least it may be said for them that almost the whole population of Canada shared their expectations. We think that, on the whole, the equity of the case would be met, if the Canadian Northern shareholders were permitted to retain a moderate portion of the $60,000,000 of shares which they now hold.

Arbitration Recommended.

But under the scheme we propose, the trustees will operate the Canadian Northern lines as part of a combined system. It will be impossible, therefore, for the Canadian Northern Company, as such, ever to earn a dividend on its separate stock. We suggest that, if it is decided to permit the present shareholders to retain a portion of their holding, the act of parliament constituting the board of trustees shall contain a provision for arbitration between the trustees and the Canadian Northern Company and establishing an arbitration board to act forthwith. The trustees should appoint one arbitrator and the Canadian Northern shareholders the other, and the two arbitrators should agree on the appointment of an umpire; failing agreement, an umpire should be appointed by the chief justice of the exchequer court; and the decision of the board should be final.

The arbitrators should be empowered to decide two questions:—

(1) What proportion of the Canadian Northern common stock may fairly remain the property of the present holders;

(2) What proportion of the earnings of the Dominion Railway Company may fairly be regarded as attributable to the Canadian Northern lines?

To illustrate our meaning, we will assume that the arbitrators decide that 5 per cent. of the Canadian Northern shares shall remain the property of the existing holders, and further decide that one-half of the total earnings of the Dominion Railway Company will be fairly attributable to the Canadian Northern lines. Then their decision will mean that, out of any dividend declared in future by the Dominion Railway Company, 2½ per cent. (one-half of 5 per cent.) will be payable to the existing Canadian Northern shareholders or their transferees. We think the arbitrators should fix this resulting percentage once for all. It should be made a condition of the settlement that the minority shareholders of the Canadian Northern should by deed irrevocable appoint the trustees as their proxy to vote their shares. Care will of course be taken to provide that the arbitration board shall have regard only to the Canadian Northern lines, as they exist at the date of the passing of the act, and that any subsequent increase of revenue due to the expenditure of additional public money shall be excluded from consideration.

CANADIAN NORTHERN RAILWAY AND FOOD WASTE

[illegible] stewards by Mr. W. Pratt, general superintendent, sleeping and dining car department of the Canadian Northern Railway, on the conservation of food on dining cars. The circular [illegible] a dish unless passenger orders same.

"In the conservation of foods," said Mr. Pratt, "the careful serving of bread is necessary. Three slices of bread from the loaves at present supplied, with one pat of butter, are ample for an order. Deep pies, with top crust only, either meat or fruit, should be used in preference to pies with top and bottom crust. Open fruit or jam tarts also should be used.

"We have already issued instructions that no young meats, such as early spring lamb, veal, young chickens or squabs, will be supplied. Fresh roasts must not be used daily. Every effort should be made to use up cold meats in some form so that no waste will follow. Fish is plentiful throughout the territory we operate, and great care must be used in ordering fish that is plentiful in the province in which you are running, and this can be served freely by making specialties of same. Butter and lard must be avoided as much as possible in cooking. Milk, cream, cheese, etc., must under no circumstances be wasted. Sour cream can be used to advantage in many preparations, and every scrap of cheese can be used up to make some palatable dish."

Mr. Pratt has arranged to remove all silver cream pitchers from dining cars, and in future individual cream jugs will be used. Many articles on the present menu card are to be eliminated altogether.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the month of July:—

Canadian Pacific Railway.

	1916.	1917.		Increase.
July 7	$2,[illegible]	$3,101,[illegible]	+	$[illegible]
July 14	2,[illegible]	2,[illegible]	+	[illegible]
July 21	2,641,000	2,950,000	+	30[illegible]
July 31	[illegible]	4,[illegible]	+	[illegible]

Grand Trunk Railway.

July 7	$1,[illegible]	$1,[illegible]	+	$[illegible]
July 14	1,[illegible]	1,[illegible]	+	[illegible]
July 21	1,[illegible]	1,[illegible]	+	[illegible]
July 31	1,[illegible]	1,[illegible]	+	[illegible]

Canadian Northern Railway.

July 7	$ [illegible]	$ 9[illegible]	+	$ [illegible]
July 14	874,900	935,600	+	60,700
July 21	[illegible]	[illegible]	+	[illegible]
				Decrease.
July 31	2,2[illegible]	1,1[illegible]	−	[illegible]

The Canadian Pacific Railway gross earnings in June were $13,586,979, which compares with May earnings of $14,355,149, a decrease of $798,170. The working expenses for June were $9,641,073, the net profits being $3,915,906.

The gross earnings for six months were $71,356,776 and the working expenses were $50,359,327, the net profits being $20,997,449. In June, 1916, the net profits were $3,689,633, a decrease as compared with June of this year of $226,273. The net profits for the same six months in 1916 were $19,601,733, being $1,395,716 less than the amount for the same period this year.

The Canadian Northern Railway system reports gross earnings for June of $[illegible], which compares with the earnings of $[illegible] in May. Net earnings were $[illegible],600, a gain over May of $33,200, and an increase over June of last year of $102,600.

For eleven months of this fiscal year the system shows gross earnings of $41,244,700, an increase of $7,819,700 over the same period in 1916. Net earnings in the eleven months of June [illegible] were $[illegible] and the increase in net for that period was $[illegible].

Modern Problems of Life Insurance

RECKLESS *Taxation of People's Insurance Savings Should Have People's Attention—The Value of the World-wide and Unconditional Policy—Progress in the Benefits of Life Insurance to Policyholders.*

By **R. W. BARTON, A.I.A.**

IN spite of the shadow of the Great War, wider benefits were extended to life policyholders during the generation immediately preceding it than in the whole previous history of life assurance. Some of the more important of these benefits were the introduction of guaranteed loan and surrender values, certain disability benefits such as cessation of premiums during total incapacity due to accident or disease, and the removal of restrictions as to residence, travel and occupation.

The guarantee of loan and surrender values is noteworthy because it was the assumption by life assurance institutions of some functions hitherto peculiar to banks. Although the practice met with some criticism on this account, it supplied a public want and life assurance so greatly increased in public favor owing to it that in spite of objectors there is little probability of the withdrawal of these popular features.

The liability under disability benefits until the outbreak of the war was less than had been expected. There are no figures as yet available as to the effect produced by the war, but so far as can be gathered the claims are not unduly heavy.

The removal of restrictions as to residence, travel and occupation produced the "world-wide and unconditional" policy, so-called because when once issued the person whose life was assured was at liberty to travel and reside in any part of the world and to engage in any occupation however hazardous, without addition to the original premium. This was a great advance towards the ideal policy. Indeed, it was only when the war caused its withdrawal that the public really appreciated the full value of these concessions. That the suspension of this form of policy is only until the destruction of Prussian militarism is complete, may be safely assumed.

There are other problems affecting life assurance to which the war has given added prominence. Perhaps the most important is the provision of wider facilities for the assurance of sub-standard or under-average lives. That is, those who either from hazardous occupation, from hereditary taint, or personal defect, cannot be regarded as ordinary or standard risks.

Such persons have as great, if not greater, need for life assurance than normal lives and to this already large class, the war is daily adding those who are especially entitled to every aid that humanity can give them, in whose defence they have sacrificed so much.

W. J. Graham, Fellow of the Actuarial Society of America, wrote: "The service of bringing life insurance by a scientific measure of risks to *all* classes . . . is the final achievement of scientific research in commercial dealing with human life."

Something has been done in this respect both in Europe and America and with gratifying results, but much remains to be done and the need is immediate. Especially is this so in Canada, where domestic life assurance institutions have not yet provided even the limited facilities offered in Great Britain and the United States to this deserving class.

The question of sub-standard lives has, however, a wider aspect and that is as to how far life assurance institutions can prevent deterioration in the health of their policyholders. One or two prominent companies have gone so far as to offer to their policyholders a free medical examination once a year; while one American industrial life assurance company provides sanitaria for those of its members suffering from tuberculosis. These actions are not prompted by philanthropic motives but are the practical attempts of far-seeing men to eliminate a source of waste in the ordinary course of business. It is only the extension of the practice of fire insurance corporations, which have from the earliest history of fire insurance contributed to organizations for the prevention and extinguishment of fire. In fact, it is so obvious that it seems strange that life assurance administrators have not long since done more in this direction, but we confidently look for developments in this respect in future.

A problem also of urgent importance to all policyholders is the reckless taxation to which life insurance companies are being subjected. Most of this taxation is as much a direct tax upon the savings of the people as would be a tax upon all savings accounts deposited with the chartered banks of Canada.

If the companies could get together and arrange an educational propaganda by means of leaflets to be issued with renewal receipts, annual reports, etc., sent periodically to policyholders, a great body of public opinion might be influenced in time to forestall the growing danger which already threatens the savings of the thriftiest class of the community.

Another problem, as old as insurance itself, is whether proprietary or mutual companies are the better in the interests of policyholders. By the recent mutualization of one great American company and the almost completed arrangements for the mutualization of another, a tendency in favor of mutualization is marked in the United States. The question was prominently before the public in Canada about two years ago and is not unlikely to be so again after the war, when it is to be hoped that Canadian life policyholders will give very careful thought before yielding the tried security and progress of proprietary companies for the comparative obscurity of mutualization.

Communistic as is the basic idea of life assurance, only to a very limited extent can its government in the past be called democratic, while there are many and cogent reasons, too long to set out here, that its best development lies in continued individualistic control.

LIFE UNDERWRITERS' CODE OF ETHICS

Minneapolis Insurance Men Have a Good One—Qualifications of an Underwriter

The Minneapolis Association of Life Underwriters has adopted a code of ethics which is said to be the first of its kind in the United States. By setting forth clearly the principles for which it stands and the rules of conduct which govern its members, it establishes a high standard of life insurance morals which will necessarily increase the public confidence in life underwriting.

"The most important truth about the vocation of life underwriting is its professional character," says the code. "In the last analysis it embraces the essential elements of all the great professions. The actuary's tables of mortality are based upon the physician's knowledge of the laws of health and the science of life. For the necessity of clear and precise language in its policy contracts and for its ideal confidential relationship between agent and client it draws upon the genius and ethics of the legal profession. It solves its fiduciary and investment problems by utilizing only the soundest practices of the trust companies and banking houses.

Accepts no Financial Profit.

"Life insurance in its purest form accepts no financial profit for itself, but propagates its work of persuading men to conserve their moral and financial resources for the common good by altruistic co-operation with their fellow men; and, therefore, upon this unselfish service life insurance bases its right to be classed as a profession of the highest character.

"The constitution of the Minneapolis Association of Life Underwriters defines an acceptable company as 'one that is incorporated, operated and supervised under legal reserve laws; one that does not indulge in any special scheme or device as inducement to take insurance; one that does not make use of extravagant methods or depleted policy valuations and one that for a satisfactory period has maintained a reputable history as measured by the standard herein defined. The life underwriter, in moral fibre, intelligence, address and understanding of business problems, should compare favorably in all these attributes with leading professional and business men in other high-class vocations.

"The agent should be trained for his work just as individuals are trained for other professions. It is not sufficient that the agent be actuated by honorable motives alone, but, coupled with his high purposes, he must have such a thorough understanding of the science of life insurance as will enable him to show its relation to other business and economic problems. Only those who are in this business from an earnest conviction that it affords them the best opportunity to render their greatest service to humanity can claim to have the true professional spirit.

Duties of Managers and General Agents.

"It shall be the duty of all agents intrusted with the management of companies: To create and maintain the professional atmosphere in the conduct of the business. To engage as regular sales agents only those who are specially fitted in moral and mental equipment to bring intelligent, efficient and conscientious service to the profession. To refuse to hire agents who are already engaged with other life companies before they shall have been honorably released from such employment. To refuse to contract with or to accept business from any person, making him an intermediary, when such person has no serious intention of becoming a life insurance agent in good faith. To observe strictly the advanced idea of 'Truth in Advertising,' to discountenance the use of misleading and unfair comparisons by their agents and to forbid them from speaking disparagingly of any sound life company. To co-operate with the state insurance commissioner: in preventing all unworthy persons from being licensed to write life insurance; in securing adequate legislation governing the prerogatives and conduct of life insurance companies, and in the strict enforcement of such law.

Duties of the Agent to his Fellow Agents.

"In his attitude toward his fellow agents, as toward all mankind, the agent should endeavor to follow the golden rule: 'Therefore, all things whatsoever ye would men should do to you, do ye even so to them, for this is the law.'

"The agent worthy of respect and confidence will never make unfair criticisms or untruthful statements regarding a fellow agent or his company. On the contrary, he will respect all worthy competitors and will cultivate a friendly relationship with them. Competition should always cease when the application is signed in good faith and when the applicant feels morally obliged to complete the transaction. The fact that the applicant has made a settlement for the premium shall be conclusive evidence of his moral obligation. If the applicant has been given the privilege to accept or reject any policy issued upon his application, the case is open to competition.

Duties of the Agent to his Client.

"The true relationship between the agent and the buyer of life insurance is that of adviser and client. The profession of life underwriting is a service to humanity, and reward or financial gain must always be a secondary consideration in the mind of the conscientious agent. He should not be influenced by any calculation of commissions, but, after thoughtful analysis of the particular circumstances of each case, he should recommend that policy which he considers best suited to his client's needs.

"The agent who is actuated by such motives may rightly expect to win the confidence of the public. This conscientious service, together with an intimate knowledge of life insurance and its social and economic value to society entitles the agent to the complete confidence of his client, and such a relationship must be established before intelligent service can be rendered. The agent should feel the responsibility of such confidence placed in him and he should not under any circumstances divulge any information thus entrusted to him.

Necessity for Adequate Legislation.

"Human interests of vast magnitude are inseparably connected with the destinies of life insurance. Enormous sums of money representing the savings and faith of millions of people are annually deposited with life insurance companies to be invested in sound securities and to be returned after a period of years either to the insured himself or to his beneficiary. The trust relationship thus created may extend over a period of a hundred years or more. Since nothing so disturbs the healthy growth of life insurance as breaking faith with the public, it is a matter of the utmost importance that this institution, organized upon a scientifically sound basis, should be protected by law against the possibility of becoming corrupt or insolvent. Of equal importance with the need of legislation governing the organization of life insurance companies is the necessity for adequate laws regulating the conduct of the agents.

"In support of this necessary legislation the association is unalterably opposed to the practice of licensing as part-time agents individuals who do not sincerely intend to become, within a reasonable period, full-time regular agents. The constitution of this association provides that those who are not 'engaged specifically in the business of legal reserve life insurance in connection with an acceptable company,' are not eligible to membership in this association.

"Self-styled life insurance 'auditors' and 'experts' by insinuations and manipulation of figures are inducing policyholders to surrender for their cash values policies which are partially or fully paid up and are advising them to buy new insurance in companies they represent. This 'twisting' of policies, as it is commonly designated, results in a financial loss to the insured, is the grossest kind of malpractice, and is, therefore, prohibited by the state insurance law.

"This association is committed to the practice of advising policyholders to complete all standard forms of contracts in accordance with the original terms thereof. This applies to policies in the company in which they have been placed as well as to those in competing companies. A loan against a policy is of the same nature as a loan secured by any other form of collateral, and does not justify the substitution of a new policy at an increased age and cost. Policyholders should notify the commissioner of insurance regarding malpractice of this character. State laws prohibit life insurance companies or their representatives from offering, making or permitting any advantage or distinction in favor of any individual, with respect to the amount of the premium to be paid on any policy of insurance. Within the meaning of the law, any reduction of the premium or any valuable inducement not specified in the policy, or any offer to give, sell, or purchase, as inducement to insure, any stocks or bonds or other securities of any corporation, association, partnership or individual, or the exchange of merchandise or other commodity for a policy of insurance constitutes a rebate.

"The person giving or offering a rebate and the person accepting a rebate are equally guilty and liable under the statute. Policyholders are hereby warned that the acceptance of a rebate not only makes them liable under the statute, but that it may place a cloud on the title to their insurance.

Duty of the Public to Discriminate.

"It is the duty of the public to use the same keen, analytical discretion in the selection of its life underwriters which it employs in choosing its lawyers and its physicians. Buyers of life insurance are morally obligated to co-operate with the association in eliminating from the profession those agents who are unfitted for the work. Standardization will progress more rapidly if the public refuses to recognize or favor with patronage the untrained or the unreliable agent.

"Such discrimination on the part of the public will result in better service than is otherwise possible. Every profession has its own duties, which must be understood and obeyed if its ideal achievements are to be attained. The life underwriter who subscribes to this code of ethics thereby breathes into it the living spirit of the profession. He makes it more than a mere abstract statement of the ideal, he adopts it as the atmosphere of his life's behavior.

"Having deliberately subscribed to these rules of conduct, it shall be the duty of every member of the Minneapolis Association of Life Underwriters to expose without fear or favor every violation of these rules, and any member of this association who shall wilfully depart from the spirit of these obligations shall be dealt with as provided in the constitution and by-laws of this association."

NATIONAL STEEL CAR COMPANY

Interests close to the management of the National Steel Car Company, says a Hamilton despatch, state that that company has recently received substantial orders from the French and United States governments. The French orders are chiefly for regulation army wagons and trucks, a very large number of which are required for immediate delivery, though part of the order is spread over a considerable time. The United States orders include freight cars as well as other army supplies. The new orders are regarded by the management as quite good business, the prices contracted for being satisfactory in every respect.

Negotiations with the French government for readjustment of prices on the large delivery of cars made several months ago are expected to be soon completed. Profits for last year depend largely upon this adjustment, so it is unlikely that the financial statement will be forthcoming for some little time.

As exclusively stated in *The Monetary Times* last week, Mr. J. E. McAllister, a Toronto consulting engineer, has been appointed general manager and vice-president of the company.

RAILROAD COMPANIES' FINANCIAL POSITION

Statements of Canadian Northern and Grand Trunk Pacific Railways

The following are statements tabled in the House of Commons at Ottawa regarding the financial position of the Canadian Northern Railway Company and the Grand Trunk Pacific Railway Company. The government proposes to obtain control of the former company and to loan $7,500,000 to the latter company:—

Canadian Northern Railway.

The total assets of the Canadian Northern Railway system are placed at $581,084,678, and the surplus of assets over liabilities is given as $37,494,870, as on April 30th last. The land account shows that the Canadian Northern Railway Company holds 843,127 acres of land in Manitoba and Saskatchewan, 2,000,000 acres in Ontario, and 402,860 acres in Quebec. The land in Saskatchewan is valued at $15 an acre and that in Ontario and Quebec at $3 an acre. The estimated total value of unsold lands is $19,855,485; deferred payments receivable amount to $7,140,996.59, and cash in hand from lands aggregated $2,408,683.67. The total of land assets of the company is thus $29,405,165.16, against which there are mortgages outstanding to the amount of $21,251,07[illegible].

The estimated cost of completing lines and terminals under construction is given as $4,188,099 and to meet this cost there is cash in trust accounts to the amount of $3,683,831 together with government guaranteed securities to the value of $217,160 and the Canadian Northern debentures stock to the value of $287,108. It is pointed out that the contemplated expenditure does not represent the complete construction programme of the company, but only that portion of the same which it is desirable to proceed with before the end of the war. On construction account the company owes $999,566.

The estimated amounts required for betterments and rolling stock are stated to be $6,590,000 for 1918; $8,355,000 for 1919 and $8,317,500 for 1920.

Up to date the government has advanced $2,634,500 to the Canadian Northern Railway interest account under the legislation of 1914 granting a guarantee of $45,000,000 of the company's bonds. The advances were made during 1916 and 1917.

Grand Trunk Pacific Railway.

The net cash requirements of the Grand Trunk Pacific Railway Company to meet interest charges between July 1st, 1917, and June 30th, 1918, and to provide necessary betterments and rolling stock, amount to $7,494,760.78. The total of interest due in the period is $7,684,177.74. Of this sum, however, $1,189,416.96 is to be paid out of the balance of the loan of $8,000,000 made to the company by the government last year. The estimated cost of needed betterments and rolling stock is placed at $2,000,000; operating loss of the Grand Trunk Pacific Coast Steamship Company at $100,000, and surplus from the operation of the Grand Trunk Pacific system including Grand Trunk Pacific branch lines at $1,100,000.

The par value of bonds authorized for the Grand Trunk Pacific Railway and Grand Trunk Pacific branch lines is $229,434,896. Of the total, bonds to the par value of $202,494,151.35 have been issued. Of these issues the net proceeds to the companies were $193,300,001. Issued debentures to the amount of $76,480,848 are guaranteed by the Dominion and $11,892,366 represent the proceeds to date of loans made by the government to the company.

The proceeds of bonds guaranteed by the province of Saskatchewan total $13,230,088, and those guaranteed by the province of Alberta total $3,589,596. Bond issues guaranteed by the Grand Trunk Railway Company amount to $97,301,252.

The Dominion government will make a demand loan to the company of $7,500,000, with interest at six per cent., secured by mortgage, to be availed of for the purpose of paying interest on underlying securities, making necessary expenditures for betterment, rolling stock and any deficit on operations.

CANADIAN NORTHERN RAILWAY

Minority Commissioner A. H. Smith Said Railroad Could Work Its Way Out in Reasonable Time

The reference to the Canadian Northern Railway, by Mr. A. H. Smith, president of the New York Central Railway, who signed the minority report of the Railway Inquiry Commission, is as follows:—

The lines of the Canadian Northern, particularly in the prairie provinces, appear to be advantageously located in view of traffic conditions. Inspection of the property brings out the fact that this road was built with proper regard for economy, and the creation of a permanent public service utility.

In some instances, the system has extended its lines where it should have obtained a traffic interchange agreement or the joint use of facilities instead; at least until the traffic had grown enough to justify further expansion. A public policy intended to develop and serve the country as a whole, at the lowest cost, would have enforced arrangements which would have obviated the needless duplication of facilities.

The line from Yellowhead Pass to Vancouver, in part at least, may be unnecessary, but it is there by the joint action of government and the company. The character and capacity of this line through the Fraser River canyon, where it is alongside the Canadian Pacific for about 200 miles, would suggest that no more money should be spent for double-tracking or revising grades on either of the railroads for years to come. From Yellowhead Pass to Edmonton, the proximity of the Grand Trunk Pacific places two lines where one affords abundant capacity.

Invasion of East Unwise.

The invasion of the east by the Canadian Northern now appears to have been unwise, but condemnation thereof must be tempered with a knowledge of the conditions which forced this extension. There was a public demand for railroads. All Canada was enthusiastic over the prospects of a rapid growth in wealth and population. Railroads were on a competitive basis, and the public stood ready to back any new railroad enterprise, since that meant a rival carrier, and, incidentally, a new business in construction. There was no regulation which enforced co-operation among rival lines. The Canadian Northern, seeking to expand and become a profit earner, quite naturally desired to get all the traffic it could, and to hold all it got for as long a haul as possible. As a result, it undertook to do what appeared to be necessary under the conditions then existing—that is, to extend its line to both oceans.

An inspection of this company's property shows that generally it is of a type of construction well suited to its needs, and that the builders have installed it at a cost which, by comparison, seems small. Nowhere was there evidence of waste in the construction work itself. It is true that the company had some construction under way, or planned, that appeared wasteful because unnecessary, but this is due, I understand, to the unregulated competitive system, or to bargains with public authorities.

Example of Duplication.

The building of expensive terminals in cities already supplied with adequate facilities affords an example of duplication for which the public must eventually pay. However, in the absence of restraint and regulation by consistent public authority, it is difficult to determine how the company could have avoided this.

The precarious financial situation of the Canadian Northern is due, in part, to its uncompleted condition, and to the fact that needed capital cannot be obtained on its own resources, especially during the period when capital is so greatly in demand by powerful governments. This system is not at present able to earn all of its fixed charges. As important parts of the system have but recently emerged from the construction period, it would be truly remarkable if it were able to do so. It does earn a very large proportion of such charges, and probably could earn all of them but for the burden of eastern extensions and duplications that have been placed upon it. Practically all commercial enterprises, and particularly railroads, must go through a development period.

The Canadian Northern is short of equipment. With the return to normal conditions, and provided with the capital necessary for equipment and for additional local facilities, this road can, in my judgment, work its way out in reasonable time.

HOW TO GET INSURANCE APPLICATIONS

Some Good Advice to Life Underwriters in the Days of 1870

The following article is reprinted from *The Monetary Times* [illegible] in it much counsel of value, as undoubtedly did the comparatively few underwriters who were selling life insurance in Canada fifty years ago:—

It is safe to assert that life assurance has not been overdone in the sense of glutting the market, or of having insured all who desire or can pay for policies, but it cannot be so confidently asserted that the business that has been obtained was properly done, or that the methods in vogue during the past seven or eight years and still existing, are either the most effective for obtaining business or retaining it.

The day has gone by when policies are taken without a question of solvency or dividend returns, when opportunity and importunity are the open sesame to success. Men do not insure to get dividends, or regard life policies per se as a good investment. An idea, though a somewhat nebulous one at present, is prevalent that there is no way to make a profit out of a policy except to make it a claim during its earlier years, and if the assured neither dies nor makes bad investments, the money appropriated to this purpose might, as far as dividends proper are concerned, be more rapidly accumulated in a tin savings bank.

Insurance for Its Own Sake.

The legitimate object of life insurance is to provide for the family during the earlier and productive years in which a competence is, or is sought to be made; it is life insurance for the sake of life insurance, and any modification of policy which proffers to do more is a relic of the speculative era of life business and a perversion of its beneficent purpose.

Life assurance has prospered and grown in spite of the wrongs which have been grafted upon it; policies have been persistently kept in force long after every parole promise upon the faith of which they were applied for and taken has been broken and falsified, and it is time that this abiding faith and trust deserves to be met by the agent, and the company also, with a corresponding frankness and a clearer exposition of the principles which underlie his contract. The more thoroughly the assured comprehends the nature of this contract, the more perfect the confidence between the assured and the assurer.

Ignorance and Misapprehension.

The assertions may be safely ventured that upon no subject of equal importance and magnitude does so much ignorance and misapprehension exist—and that this is due not to a disclination to acquire information, not even to the absence of an eagerness to do so, but to the want of a lucid and comprehensible analysis of the processes of a computation, and a translation of its seeming mysteries into the common arithmetic and vernacular of the assured.

The assured is, at least in the mutual companies, which comprise nine-tenths of the competitors for patronage, solicited to become a partner and a stockholder. A part of the incentive to invest in them is the privilege of participation in the profits and benefits as an equivalent for the liabilities and duties assumed by him. He would certainly not invest in any other business or partnership for a whole lifetime (except, perhaps, in matrimony) without inquiring minutely into the duties, liabilities, immunities, privileges and profits to be assumed or enjoyed; and that he is willing to make an exception of life assurance, of which he has been taught in general little more than the process of getting in, and less than nothing of the method of getting out again, will ever remain a riddle unsolvable upon any other hypothesis than that the assurance is of such inestimable value, of such prime and indispensable necessity as to be accessible upon any terms.

Less than 4 per cent. of the aggregate annual income of the people of the United States and Canada is invested in life insurance premiums; 87½ per cent. of all estates left for administration consist only of life insurance. Of the people who die 66 per cent. leave nothing, 25 per cent. leave estates (average) of $1,292, 9 per cent. leave estates of $5,000 and upwards.

FIFTY YEARS AGO

Fifty years ago this month, on August 15th, 1867, the first issue of *The Monetary Times*, containing eight small pages of reading matter, was published. During the next four years the size of the paper was increased to twenty pages. Since then, regular issues have had as many as eighty and ninety pages, while our annual numbers have exceeded three hundred pages. Looking back over the old files of the paper, one is impressed by the growth of life insurance since that date. In those early days only one Canadian life insurance company was doing business here, the Canada Life. In 1869, it issued 831 policies representing $1,156,855 of insurance, a record which many individual agents now make in less than a year. The company's business in force at the end of 1869 was $5,476,000, an amount which many companies now write in less than two months.

Reviewing in August, 1870, the work of this paper during its first three years career, it was said: "We take some credit for having excited greater interest in the beneficent cause of life insurance, and for contributing to its spread among all causes. As an Insurance Chronicle this journal has become a vade mecum with the life agents—a most deserving and benevolent class, whose efforts prevent a world of misery every day, whose persistency very often secures the bread and butter, home comforts, friends, all, to many a household in the hour of saddest bereavement."

Then, as now, we put in many a good word for life insurance as a necessity, as an investment. In our issue of October 7th, 1870, for example, appeared the following: "This method of family provision is becoming daily more popular in this country, and there can be no greater evidence of the good sense, the prudence, and the stability of a people than life insurance. It is a trait in the national character which is indicative of mental advance, for, as a habit, life insurance is never adopted except where civilization is far advanced towards perfection. Persons with moderate incomes, whose tardy accumulations from the savings from their annual stipend, have generally abandoned this mode of ultimate provision for their families, and have resorted to life insurance, which secures to them, at any period after the policy is once effected, that support in case of death which would occupy many years of careful hoarding to effect."

Again, in our issue of April 12th, 1871, this reference was printed: "The principles of life insurance are sound, and a fair and just appreciation of the scheme depends only upon a correct understanding of it. Let not the importunity of some pertinacious canvasser make life insurance so offensive as to induce you to forego its consideration and repudiate its claims. Take a book and quietly investigate its merits. Some men undoubtedly are in this as in other matters, injudicious in their action and by overloading themselves, become embarrassed. Treat it in a cool, business-like manner, and no reproaches will succeed, but rather hearty commendation. Changed circumstances in life have often suddenly made enthusiastic converts, who have deeply regretted and severely chided their delay in this important matter. Act in the living present. 'Be wise to-day, 'tis madness to defer.' "

BUYING MORE INSURANCE

The increasing demand for life insurance is normal. It is based upon the growing appreciation by the Canadian people (who are, generally speaking, greatly uninsured) of the necessity and benefits of life insurance. Over 80 per cent. of the estates left in the United States consist solely of life insurance. In Canada, many estates would be of little or no value were it not for life insurance policies. The past year was the greatest in the history of life insurance in the United States as regards the amount of new business written. In Canada also, the new issues exceeded the 1915 totals and approached closely to the largest life insurance year the Dominion has known. In the two countries $4,500,000,000 of new business was written, about $4,270,000,000 in the United States and $231,000,000 in Canada.

So far in 1917 the demand for life insurance has been beyond all precedent. Reports to The Insurance Press of New York and to *The Monetary Times* from a number of companies, including the largest corporations, show increased business of 30.96 per cent. during the first five months of the year. Reports from the same companies show that the new life insurance written in May, 1917, was 32.39 per cent. greater than in May, 1916. If a ratio of gain of 31 per cent. holds good during the remaining seven months of the year as an average for all companies, new business for 1917 will probably be the largest on record. The Canadian companies whose salesmen will meet in convention at Winnipeg next week are getting a vast amount of good business. Many of our companies already have in sight the breaking of their excellent records made last year in respect to the volume of business. In the United States, the popularity of group insurance plans has increased, many notable transactions being recorded in large industrial plants. This form of insurance has yet to be written in Canada. Monthly income insurance is appealing to an increasing number of insurants who prefer to leave monthly incomes to their beneficiaries rather than lump sums. Business insurance is being written for large amounts to protect firms and corporations against money loss by the death of partners or corporate officers. Both monthly income and business insurance are making rapid strides in this country. The placing of $1,500,000 policy on the life of Sir Mortimer Davis, president of the Imperial Tobacco Company, Montreal, (as exclusively reported in *The Monetary Times*), is an example which will be followed by many other captains of industry in the Dominion for larger or smaller amounts.

OUR NEXT WAR LOAN

As the Canadian government's recent short-term loan in the United States was for only $100,000,000, it is probable that another domestic war loan cannot be postponed longer than the end of 1917. There may be ways and means of financing our heavy war expenditures for the remaining five months of the current year and for a month or so next year, but at present it looks as though the fourth domestic war loan would have to be issued soon after fall, possibly December, when the greater part of the crop movement financing has been accomplished. The experience with the marketing, to the ultimate investor, of the third war loan particularly, makes it imperative that much more effective arrangements should be made to insure the success of the next domestic loan. This is not a reflection upon the excellent work of the finance minister and his staff. It is a reminder that a much bigger task is ahead.

A greater number of subscribers to the next loan must be obtained than the 40,000 who subscribed to the third loan. To do this, considerably more organization work will prove necessary during the months preceding the issue. The United States sold $2,000,000,000 of 3½ per cent. bonds to 4,000,000 people. That was the first war loan and paid a rate of interest 1½ per cent. less than the Canadian loan and at least that much less than the average man could get on his funds, with a reasonable amount of safety. In other words, without any previous education in domestic war loans and at a rate of interest which was far below normal for the ordinary American, the government reached 4 per cent. of the population. To have secured equally wide distribution the last Canadian war loan should have been sold to 280,000 people. Instead, it reached only 40,000. While the Liberty Loan subscription lists were open, the appeal to patriotic necessity and self-interest was proclaimed in every newspaper, on every bill board, in every window, at the movies, in the theatres, on the street corners, throughout the length and breadth of the land. As Mr. R. D. Bell, Montreal, stated in an exceptionally interesting contribution to *The Monetary Times* the other week, "no man, whether he was a capitalist or a laborer, could go through a day's work without having the Liberty Loan impressed upon him, not once, but twenty times. Every inducement was offered to the people at large to subscribe. The facilities of the periodical payment plan, whereby the bonds could be paid for on easy payments out of income were advertised energetically by practically every bank and security house in the United States. In Canada only those who habitually read the financial page of the newspapers came in contact with the war loan advertising; in fact we know of one firm which had great difficulty in persuading one of our leading newspapers to allow them the use of the first page. Only one house actively brought to the attention of the public the fact that they could buy the war loan on easy payments out of income. The security houses did most of the work of actually distributing the loan, but the work was confined largely to the restricted classes that usually buy bonds. So far as this goes we have lost a splendid opportunity to make this country a nation of bondholders. Certainly our war loans are attractive enough and our people are prosperous enough."

The finance minister and his colleagues will undoubtedly make effective plans to endeavor to double the number of subscribers to our next war loan. The effort will cost money and considerable labor by the finance department and by various organizations throughout the country. If effectively planned and carried out, these efforts should make a great many more citizens bondholders as well as taxpayers.

BANKING AND LIFE INSURANCE

In many of its functions and purposes life insurance is similar to banking. It collects the savings of thousands into a common fund which can be loaned for the development of industries and the improvement of municipal enterprises. It places within the reach of the man of small means a safe investment and a plan of saving which nets a comparatively low but certain rate of interest. In its co-operative and semi-public character it is closely allied to banking.

Life insurance is becoming more popular in Canada but the Canadian people are still greatly under-insured. The amount of insurance carried in this country is large in sum total, but it is small in proportion to life values. The United States carries one-eighteenth of the amount needed to be fully insured, and here the proportion needed is probably still greater. The banks and the life insurance companies are co-operating in their work to some extent because one of the reasons frequently given by the prospect to the insurance salesman is that he cannot afford life insurance. Thrift and economy are good things for the individual, for banking institutions, for life insurance companies and for the country generally. As the New York Bankers' Magazine recently pointed out, the man who says he cannot afford adequate life insurance may be right, but it happens in most instances that the reason he cannot is that he does not live within his income. Consequently, when the agent presents a plan of life insurance to him he cannot see where the money is to come from to pay the premium. That is sufficient basis for the statement of the up-to-date banker to the insurance agent, that "adequate life insurance protection rests primarily upon intelligent preparation for the payment of premiums."

LIFE INSURANCE AND MOVING PICTURES

Can the moving picture be used successfully to encourage the sale of life insurance? This question will be considered in a practical way by over four hundred Canadian life insurance salesmen who will meet in Winnipeg next week. Four moving pictures, having for their moral the necessity of buying life insurance, have been prepared by a film company in the United States. These pictures will be shown at the Life Underwriters' Convention at Winnipeg, and the opinion of the underwriters as to their value as an advertising and educational medium, will be of considerable interest. Here is a brief synopsis of the stories of the four films:—

(1) Scene opens with a man, woman and child looking at a beautiful cottage. The man says: "A few more years and I'll have it paid for." As they look at the house, the man fades out and the dress on the woman changes into black (mourning) with the child clinging to

ADDRESS:

THE MANAGER, BOND DEPARTMENT,
TORONTO

62

her dress. A large hand enters the picture and spreads its fingers over the house. The hand is entitled "mortgage." This wording follows: "You have a mortgage on your home, perhaps? Protecting the family and the home is one of the big things legal reserve life insurance does."

(2) Scene opens showing black screen. In the centre, there is introduced a want advertisement reading: "Widow with three small children, willing to do any kind of work for money, food or clothing. Address Box 432, this paper." This scene changes to a woman sewing on a machine. Three small children are seated around. The woman's features show a haggard and weary look. Across this scene the following words appear in large letters, "Some man is to blame—He intended to—But he put it off too late." Final the words appear, "Do you wish your widow to seek employment after your death? A life insurance policy will prevent this. Consult any agent of one of the representative life insurance companies."

(3) Scene opens showing the interior of an office. Business man is seated on the right of the picture at his desk and another on the left side of the screen. Both are seen working over papers, etc. The man on the right fades out and his desk is closed. The man on the left of the picture turns in his chair with a troubled look on his face and says, "Poor John. It seems as if I have lost my right arm." This wording fades in across the bottom of the screen: "Your partner means money to your business. Make sure you do not lose that money even though you lose him." This advertisement follows: "Ask any agent of a representative life insurance company what it will cost to carry business insurance."

(4) Scene opens showing a scroll diagonally across the screen. Neatly within the scroll at the upper right-hand corner is shown a loaf of bread with knife lying across a slice as if it had been cut from the loaf. At the lower left-hand corner with the scroll a man is shown at work over a table, laying out plans, maps, etc. (representing a draftsman). He fades out and in his place appears a young woman, dressed in black with two small children. This picture gives place to a large question mark with the wording: "Who earns the bread and butter when you are gone?" This advertisement follows: "Secure a monthly income for your wife. Ask any agent of a representative life insurance company what it would cost for an income of $100 a month."

The moving picture has taken the greater part of the audiences of the theatre; it has found also a new audience. As yet, it has been used chiefly for amusement purposes. Its greatest value will be found in its use as an aid to education, as the nation's advertising agent, and as the magnet of capital. The Ontario government has already established a motion picture bureau and through it instruction will be given in agriculture, fruit growing, road construction, and so on. The resources of the province will also be advertised. The Canadian Manufacturers' Association is considering the advertising of Canadian industries through the medium of moving pictures. That such pictures could be made of material value in educating the public to the necessity of life insurance, may be taken for granted. It is absolutely necessary, however, that the scenarios be well conceived and written. A mediocre exhibition and in only second-rate picture houses, would prove a poor advertisement for Canadian life insurance. The life insurance salesmen of Canada should prove good judges as to whether or not the pictures to be shown in Winnipeg are suitable as a beginning.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dome Mines Company.—In view of the large amount required to carry on development work as planned, the directors have decided not to pay the dividend at present.

The Hudson Bay Company.—The company is now able to recommend a further dividend of 20 per cent. on the ordinary capital for the year to May 31st last, making 30 per cent. for the year. Of this distribution 15 per cent. is in respect of the receipts of the land department, payable free of income tax. The remaining 15 per cent. is in respect of the profits of trade, being the same rate as last year, of which 10 per cent. has already been distributed.

Canadian Pacific Railway.—At a meeting of the directors the following dividends were declared on Monday: On preference stock, 2 per cent. for half year ended June 30th last. On common stock, 2½ per cent. for quarter ended June 30th last, being at the rate of 7 per cent. per annum from revenue and 3 per cent. per annum from special income account. Both dividends are payable 1st October next to shareholders of record 1 p.m. on September 1st next.

Ontario Steel Products Company, Limited.—The annual report submitted to the shareholders shows assets $2,430,075, liabilities $77,266. The figures are:—

Fixed assets—Real estate, plant, power rights and goodwill, $1,816,717. Current assets—Cash, $98,182; bills and accounts receivable, $168,663; inventories, $338,060; securities, $6,202. Deferred charges to operations—Unexpired insurance, etc., $2,249. Current liabilities—Bills and accounts payable, $59,716; bond interest due July 2nd, 1917, $17,550.

Reserves—For depreciation, etc., $54,698; for sinking fund, $24,900; for business profit tax—Reserve provided, 1916, $2,500; balance due on adjustment, 1916, $1,701; current year, $10,410.

First mortgage 6 per cent. bonds—Due July 2nd, 1943, $600,000; less bond redemption fund, $24,900. Capital stock authorized and issued—7 per cent. cumulative preferred shares, $750,000; ordinary shares, $750,000.

Profit and loss account—Net profit for year, after providing for depreciation, business profits tax, etc., $182,295; balance brought forward July 1st, 1916, $123,076; less—bond interest, $36,000; preferred dividend for year at 7 per cent., $52,500; provision for 1¼ per cent. on arrears of preferred dividend payable August 15th, 1917, $9,375; amount transferred to bond redemption fund—July 1st, 1916, $12,000; July 1st, 1917, $12,000.

President W. Wallace Jones said in his annual report: The sales for the year, both in tonnage and value, are the largest in the company's history, and much larger than the combined sales of all subsidiary companies in their best year prior to the formation of Ontario Steel Products Company, Limited. During the year, owing mainly to the adverse conditions of British exchange, war orders for the company have been negligible, but the directors are pleased to report that the foreign export business for commercial products has largely increased, and the management is hopeful of retaining a large portion of this newly developed trade after the war is over. During the past year the directors have declared the full regular dividend of 7 per cent. on the preferred shares of the company, and have also declared a dividend of 1¼ per cent. payable on August 15th, 1917, on account of arrears, thus reducing these arrears of dividends to preferred shareholders to 6 per cent. Further payment on account of deferred dividends may be made from time to time, if conditions warrant, but in view of the increased working capital necessary, owing to the enormously enhanced price of all raw materials, the directors have decided that it will be prudent to reasonably conserve the liquid and cash resources of the company until the business outlook can be more accurately gauged. Net quick assets over liabilities, after payment of bond interest and sinking fund, due July 2nd, 1917, and after making provision for the 3 per cent. dividend on preferred shares, payable on August 15th, 1917; also provision for the business profits tax for the fiscal year ended June 30th, 1917, amount approximately to [illegible], as against $450,000 last year.

INSURANCE FOR BUSINESS MEN

How Policies Have Helped Canadian Captains of Industry

BY WILLIAM LEWIS EDMONDS.

When the multiplicity of advantages that accrue from commercial life insurance are taken into consideration, it is rather surprising that it is only during the last decade, it has received much attention from the business men of the country.

One of the outstanding features in modern business practice is the increasing attention which is being given to the subject of life insurance for business purposes. That is the practice of placing life insurance on heads of firms or on men filling positions of responsibility, the policy being payable to the firm or company as the case may be.

Many years ago there were men in Canada who recognized the advantage of this kind of insurance and governed themselves accordingly. The late Senator Fulford was one of the pioneers in this respect, with the result that when he died several years ago a check for the snug little sum of two hundred thousand dollars came into the treasury of his company as compensation for the loss of his personality and influence.

And even in this day and generation, notwithstanding the increasing attention which is being given to it, it is not yet receiving the attention that its utility demands. It is, however, significant that the practice of taking out commercial life insurance is more common among those engaged in large business enterprises than among any other class.

That the practice of carrying commercial life insurance is destined in time to become as general as commercial fire insurance there can be little doubt. When one considers objects possible of attainment through the medium of commercial life insurance one cannot well come to any other conclusion.

Insurance Against Financial Loss.

Take, for example, insurance against financial loss through the death of either the head of a one-man concern, a member of a partnership, or the executive head of an incorporated company. True, there is an old theory to the effect that when one man passes away there is always another somewhere who can fill his place just as well. But theories are sometimes platitudes which do not in practice work out according to schedule. And this is one of that kind. Given time the desired man might probably be found to fill each and every vacant position. But the loss of time usually means to the business enterprise loss of money. Where commercial life insurance is carried compensation against financial loss is provided, either in part or to the full extent.

"Look at the position I would be in if my partner died," recently remarked a well-known business man. "I could probably in time replace him. But because of his peculiar fitness for the department in which he is in charge, it might take me a year to find his equal in efficiency and capacity. In order to protect ourselves against such an eventuality we carry commercial life insurance."

Obviates Necessity for Liquidation.

There is a certain manufacturing concern which does a large business both at home and abroad. But it is practically a one-man concern. The head of it being its centre and circumference, his death would undoubtedly be a serious loss to the business, but although the firm is a wealthy one its head some time ago took out commercial life insurance policies to the aggregate amount of half a million dollars. Every one connected with the firm now sleeps easily.

It frequently happens in the case of the death of a partner that his heirs desire to withdraw the investment which the deceased had in the business. As every business man knows, this is not always easily accomplished without serious impairment of capital. And instances are not wanting where insistence has resulted in the business being forced into liquidation. It is possible through commercial life insurance to [illegible] the [illegible] of the [illegible] for liquidation.

Another use to which commercial life insurance is being put by some firms is protection against loss through the death of valued travelling salesmen and resident representatives. One Toronto firm which did this in regard to a representative had reason a couple of years ago to thank its stars that it had done so. The particular representative on whose life the policy had been taken out had charge of the company's European business and resided in England. He was particularly fitted for the position he filled, and feeling that his death might entail a serious loss the company took out a fifteen-year endowment policy for a hundred thousand dollars on his life. Early in 1915 the policy fell due and the company received a check for the full amount entailed. And the fortunate thing about it was that the hundred thousand came into the company's treasury at a time when the country was still suffering from the financial stringency which had been accentuated by the war, and, furthermore, when the company needed funds for contemplated expansion, which, through the ordinary sources might at that time have been difficult to obtain.

Create a Reserve Fund for Future Contingencies.

The object some firms have in taking out commercial life insurance policies is the creation of a reserve fund for the purpose of providing for future contingencies or possible expansions in business. One Toronto manufacturing concern that has gone extensively into commercial life insurance for the purpose of creating a strong reserve fund has within the last few years paid out over fifty thousand dollars in premiums. From what the writer can gather from conversation with business men this is a phase of commercial life insurance of whose potentiality comparatively few have contemplated. Those, however, who have given some thought to it are of the opinion that it is one of the most useful purposes to which it can be put. Its utility for the purpose of creating a fund for the retirement of mortgage, bond and other forms of indebtedness is, of course, pretty widely recognized.

One significant feature in connection with commercial life insurance is the increasing favor it is meeting with in the auditing profession. In many instances they insist upon their clients taking out policies of this kind. And it is the direct result of this insistance that many of the munition firms are taking out policies on the life of managers and superintendents, and particularly on those who are possessed of a high degree of efficiency in industries of this kind, and consequently would be difficult to replace.

Naturally the carrying of a relatively substantial commercial life insurance policy greatly strengthens the credit standing of a firm. That explains, in turn, why the banks are such strong advocates of the practice. In fact this is often the only condition upon which desired accommodation can be obtained. There probably isn't a bank in the country that does not preach this doctrine to its customers. A commercial life insurance policy being classed among the best of securities it is not surprising that the banks should be found among its strongest advocates.

Policy Taken Out Depends Upon Object in View.

The character of the commercial life insurance policy taken out depends, of course, upon the object in view. If protection against loss by death of a member of the firm is the desired object the ordinary whole life plan with profits is the best. But if in addition to protection it is desired to build up a reserve fund to be drawn upon in cases of emergency the endowment plan is preferable.

Some years ago, on the death of the head of the firm, it was agreed that each of the surviving partners of a large wholesale dry goods house in Canada should insure his life in the interest of the company. Each of the partners was below middle age, and under the policy accepted payment was to be made as each reached the age of sixty-five. The immediate effect of this was the strengthening of the company's credit with its bank, which would otherwise have been impaired by the death of its senior partner, while to-day the aggregate value of the policies is estimated at $125,000.

In view of the prosperity which obtains, the present is a particularly opportune time for business men to consider the advisability of investing some of their surplus profits in commercial life insurance policies.

It cost 0.3 cents a pound for Granby Consolidated to deliver its copper in New York during June, this including [illegible] and selling the product.

PERSONAL NOTES

Mr. A. E. Ham, superintendent of insurance in Manitoba, who will address the Life Underwriters' Convention at Winnipeg next week, is a capable government official, and well posted on the business of insurance. He has occupied his present position for many years, and will address the underwriters on the advantages of the licensing of insurance agents, dealing particularly with the Manitoba act.

The late Mr. G. P. Scholfield, former general manager of the Standard Bank of Canada, who died on May 8th, left an estate of $50,468, half of which consisted of stock in the Standard Bank. The remaining half comprised shares in the following Ontario companies: Trusts and Guarantee Corporation, Dominion Telegraph Company, Canada Permanent Mortgage, Great West Land Company, and Steel and Radiation.

Mr. A. E. Fisher, superintendent of insurance, Saskatchewan, will be one of the speakers at the Life Underwriters' Convention, Winnipeg, next week. He is well known by the insurance fraternity both in eastern and western Canada. With the other western insurance superintendents, Mr. Fisher has worked incessantly for uniform insurance laws in Canada, and he will have something to say on this important subject at the convention.

Mr. C. C. Ballantyne has declined to accept the position as one of the five members to represent Montreal on the Food Control Council. Mr. Ballantyne gives as his reason that he was not consulted on the matter. The other members are Ald. Weldon, Z. Hebert (president of the board of trade), J. McKergow (mayor of Westmount) and C. Burke. Mr. Ballantyne is vice-president and managing director of the Sherwin-Williams Company.

Mr. Chas. Hale White, who is a prominent member of the Canadian Manufacturers' Association and the London Board of Trade, started his business career with the London Bolt and Hinge Company in 1888, later becoming manager of the Guelph Iron and Steel Company in 1899, of which he formed a joint stock company which took over the business, removing the plant to London in 1902. Mr. White is manager of the London Rolling Mills Company, London, Ont.

Mr. Mederic Martin, mayor of Montreal, according to a Montreal Gazette statistician, made a path of ink one-third of a mile long in signing last week-end at his country home, at Laval des Rapides, 1,400 loan certificates for $1,000 each. These are the certificates for the last city loan floated. In driving his pen this distance, Mayor Martin will be undertaking a task comparatively easy as compared with some of the bond signing campaigns he has undertaken in New York on one or more occasion when the city had floated a loan there.

Mr. Alvo von Alvensleben, reputed head of a German spy system in the west and alleged financial agent of Germany in Canada, is in the internment camp at Fort Douglas, according to a Salt Lake City dispatch this week. He was brought to that city on Monday in custody of department of justice agents. Alvensleben is said to have declared that he had lost a fortune of several million dollars in Canada and the United States since the outbreak of the war. *The Monetary Times* criticised his enterprises in Western Canada some years ago, and by a curious coincidence, much of the information which *The Monetary Times* obtained regarding Alvensleben's operations, came from another German banker in Canada, who many months ago, left the country. Alvensleben was reputed to have represented the Kaiser in making Canadian investments, but this story has always been taken with a grain of salt.

Sir William Mortimer Clark, Lieutenant-Governor of Ontario from 1903 to 1908, died suddenly last week at Prout's Neck, Maine. Sir Mortimer was one of Toronto's most respected citizens, and a popular public man. Born in Aberdeen, Scotland, on May 24th, 18[illegible]. He did not come to this country until he was 2[illegible] years old. His keen business instincts and commercial acumen were no doubt inherited from his father, the late John Clark, who, although he died at the early age of [illegible]8, had achieved a commanding position in the Scottish insurance world. He had also founded the Caledonian Bank. Up to the time of his death, he was still head of the legal firm of Clark, Gray & Baird, although he had not attended to the legal firm for some years, preferring to devote much of his attention to his business and [illegible] interests. During his career he served in several important offices in the gift of the Law Society and legal associations. The late Sir Mortimer Clark was president of the Toronto Mortgage Company, trustee of the Hospital for Incurables, member of the Board of the Belmont Home, director of the Consumers' Gas Company and the Canadian General Electric Company, as well as several other organizations.

Sir Thomas White, on behalf of Canada, has just received one of the biggest cheques ever issued through the New York Clearing House,—one for $96,111,111.11, the proceeds of our recent loan in the United States. The biggest cheque previously cleared through New York was drawn by J. P. Morgan & Company on the National Bank of Commerce on April 3rd, 1916, for over $72,000,000, and was made payable to the agent of the Bank of Montreal. That cheque was in payment for the Canadian government 5, 10 and 15-year 5 per cent. notes, aggregating $75,000,000, placed here last year. Previous to that transaction, a cheque for $62,075,000 was drawn June 1st, 1915, by Kuhn, Loeb & Company, on account of the Pennsylvania bond issue. On February 17th, 1916, another Pennsylvania bond issued called for a cheque of $49,000,000 by the same banking house. On March 16th, 1916, Lee, Higginson & Company drew a cheque on the Guaranty Trust Company calling for the payment of $43,538,141. This payment was for the issue of Midvale Steel convertible 5 per cent. bonds, sold by a syndicate headed by Lee, Higginson & Company, the Guaranty Trust Company and the National City Bank. Sir Thomas has not yet made an announcement in the House at Ottawa, regarding the issue of this loan.

Mr. Edward A. Woods, of Pittsburg, gave an interesting address on salesmanship to the Toronto Underwriters' Association three weeks ago. He advised life insurance salesmen not to emphasize the cost of a policy too early in the interview. One man he knew had a good method of treating the question of cost. He talked the points of the policy to his man, who kept asking, "How much would that cost?" He did not tell him, but continued to explain his proposals. "Well, that is the policy I want, but what will it cost me?" said the prospect. "Now, do you know, I am almost ashamed to tell you how little that policy will cost you. Do you know (taking a couple of cigars out of a box he spied near at hand), that policy will only cost you two of these cigars a day." There are five reasons, said Mr. Woods, why people buy anything. These are (1) for profit; (2) for use; (3) for satisfaction of pride; (4) for emotional reasons; (5) because they cannot say "No"—weakness. Omitting the last, we have four main motives. The big problem in the art of influencing men is to classify a man and judge correctly from which motive he buys. Mr. Woods was a speaker at the Life Underwriters' convention at Hamilton last year. He is head of the Pittsburg agency of the Equitable Life Insurance Company, an agency which probably produces more new insurance business than any other life agency in the world.

Sir Richard McBride, K.C.M.G., former premier of British Columbia, died in London, England, recently. Born in New Westminster, B.C., December 15, 1870, Sir Richard McBride was a son of the west. He was educated at the public and high schools of his native city, completing his training at Dalhousie University, Halifax, N.S., taking the degree of Bachelor of Laws. He was admitted to the Bar of British Columbia at New Westminster in 1892, and became K.C. in 1905. In 1896 he unsuccessfully contested New Westminster in the Dominion general election. He was returned as member of British Columbia legislature for Dewdney riding at the general election of 1898. In 1900 he entered the provincial cabinet (B.C.) as minister of mines, but owing to a difference on a matter of policy he resigned from the government the following year. In 1902 he was chosen leader of the opposition in the legislature, and became premier June 1, 1903, at the youthful age of thirty-three. He was returned to power at the general elections in 1907, 1909 and 1912. He was senior member for the city of Victoria, and also held the portfolio of minister of mines. In politics he was a Conservative. Sir Richard McBride was married in September, 1896, to Margaret McGillivray. He was created K.C.M.G. in the birthday honors in 1912, and was invested with the insignia by H.R.H. the Duke of Connaught, Governor-General, at Victoria, B.C., in October, 1912. With the death of Sir Richard, Canada has lost one of its formerly prominent political figures. Sir Richard was an occasional contributor to *The Monetary Times*.

How Insurance Companies Invest Funds

They Help to Build Cities, Towns, Villages, Aid the Homebuilder, Create Industries, Assist in Transportation and Furnish War Funds—United States Companies Have Loaned Over $700,000,000 on Mortgages.

"How are the funds of Canadian and United States life insurance companies invested?" This is a question often asked. Early this year *The Monetary Times* published a series of articles by Mr. R. W. Barton, A.I.A., showing the investments of Canadian companies. Briefly they are divided as follows:—

Security.	1910.	1911.	1912.	1913.	1914.	1915.
Real estate	3.94	4.17	4.27	4.94	4.96	5.14
Mortgages	[illegible]	33.33	35.55	[illegible]	[illegible]	35.03
Collaterals	.99	1.25	1.36	.64	.84	.62
Policy loans	11.95	12.04	12.23	13.24	14.04	14.33
Bonds and debentures	37.58	35.91	32.96	30.57	30.03	31.45
Stock	8.82	7.51	7.70	7.05	6.77	6.60
Cash	1.34	1.31	1.37	1.44	1.61	1.88
Interest and rents due and accrued	1.60	1.78	1.91	2.06	2.26	2.45
Premiums outstanding and deferred	2.50	2.52	2.52	2.58	2.63	2.40
Other assets	.10	.18	.13	.09	.11	.10
	100.00	100.00	100.00	100.00	100.00	100.00
Invested assets	94.40	94.21	94.07	93.83	93.39	94.17
Cash	1.34	1.31	1.37	1.44	1.61	1.88
Uninvested assets	4.26	4.48	4.56	4.73	5.00	4.05
	100.00	100.00	100.00	100.00	100.00	100.00

How Total Assets are Divided.

The total assets of all Canadian life companies (ordinary), showing distribution and percentage of each class of security to total assets for the two years 1911 and 1915 were as below:

Security.	1911. Amount.		1915. Amount.	
Real estate	$ 7,958,156	4.17	$ 14,[illegible]	5.14
Mortgages	63,565,430	33.33	96,058,936	35.03
Call loans	2,388,759	1.25	1,699,754	.62
Policy loans	22,960,040	12.04	39,303,673	14.33
Bonds & debentures	68,475,565	35,91	86,250,032	31.45
Stocks	14,328,471	7.51	18,107,239	6.60
Cash	2,492,061	1.31	5,150,420	1.88
Interest & rents due and accrued	3,402,193	1.78	6,724,460	2.45
Premiums deferred & outstanding	4,807,239	2.52	6,562,725	2.40
Other assets	343,544	.18	[illegible]	.10
Total assets	$190,722,358	100.00	$274,2[illegible]	100.00

Mr. O. H. Boles, statistician of the Association of Life Insurance Presidents, recently analysed the figures for the United States for the period 1904-1914. The investments of life insurance companies in the United States are classified in the table at the foot of this page.

Period of Prosperity.

For the year 1904 the investments of 63 of the 93 companies then doing business, being 67.75 per cent. of the number of companies, but holding over 99½ per cent. of the total admitted assets of that year were analysed.

For the year 1914 the investments of 116 companies out of the 250 doing business, or 46½ per cent. of the number of companies, but holding 97.9 per cent. of the total admitted assets of all American companies.

The period from 1904 to 1914 was one of great general prosperity in the United States during which the population increased about 20 per cent., while the national wealth, as estimated by the census bureau, increased 94 per cent., and the wealth per capita, 62 per cent. During this same period the admitted assets of life insurance companies increased about 97 per cent. and the insurance in force, 72 per cent., but the insurance per capita increased only 44 per cent.

This rate of increase in insurance in force per capita was only about two-thirds the rate of increase in the wealth of the country per capita, indicating that the insurance protection did not keep pace with the ability to furnish such protection. If we turn to the previous decade from 1894 to 1904 we find conditions almost exactly reversed. While the wealth per capita increased during that period but 17 per cent., compared with 62 per cent. during 1904 to 1914, the insurance in force per capita increased at the rate of 85 per cent., compared with 44 per cent. in 1904 to 1914.

High Pressure Policy Writing.

The period from 1894 to 1904 has been called the era of high pressure in writing new life insurance, and these figures show that the insurance per capita increased about twice as fast as the wealth of the country per capita. The period from 1904 to 1914 might be termed the era of high pressure in promoting new life insurance companies, the number having risen from 93 in 1904 to 250 in 1914. From 1894 to 1904 new companies increased 66 per cent., while insurance per capita increased 85 per cent. From 1904 to 1914 new insurance com-

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
25 West Broadway **New York, N.Y.**

panies increased 168 per cent., but the insurance per capita increased only 44 per cent.

The investments shown above are divided into 14 classes. Class 5 includes only bonds of "railroads," so-called and recorded by the Interstate Commerce Commission, which are nearly all steam roads, while Class 7 includes bonds of street railroads and inter-urban electric lines. The electrification of portions of some of the steam roads and the increasing amount of freight and express business handled by the inter-urban lines make it increasingly difficult and somewhat arbitrary to make two classifications of them. In Class 7 are also included bonds of all gas, electric light, power, water supply, telephone and telegraph and other companies which have come to be pretty generally known as public service corporations.

Class 6 includes national and state bonds as well as bonds of every minor civil division, such as county, municipal, levee and drainage districts, school districts, etc.

Class 9 includes the stocks of companies of the same character as Class 5, while Class 10 includes the stocks of the same description of corporations as Class 7.

Mortgage Loans are Largest Investment.

An examination of this table in detail will show that, aside from mortgage loans, which constitute the largest class of life insurance investments and show the greatest increase in amount though not in rate of growth, Class 4—policy loans—shows the greatest rate of increase and, next to mortgage loans, the greatest increase in amount. The problems connected with this class of investment, the increase in which is not under the control of the investment officials of the companies, but is dictated by the policyholders of the companies. The ratio of loans to reserve, which was 16.03 per cent. in 1912, had risen to 17.79 per cent. in 1914 and 17.86 per cent. in 1915.

Coming now to Class 5—railroad bonds—it will be noted that the proportion of admitted assets invested decreased from 30.16 per cent. in 1904 to 26 per cent. in 1914. The total investments, however, increased over half a billion dollars or 67.32 per cent. This investment, however, large as it is, has fallen short of keeping up with the increase in the total amount of railroad bonds in the country, which increased during the period 68.28 per cent.

The proportion of the total bonded indebtedness of the railroads of the country held by life insurance companies has fallen a trifle, as in 1904 they held 10.92 per cent. of the total outstanding bonded indebtedness, while in 1914 they held 10.86 per cent.

The investments of life insurance companies in railroad stocks have shown a marked decline, not only in relation to other investments but in actual amount. They have decreased more than twelve and a-half million dollars, and in 1914 were only .68 of 1 per cent. of their total assets as compared with 1.83 per cent. in 1904.

The influences which have affected insurance companies' investments in railroad bonds have evidently prevailed in the same degree with regard to public service bonds, as there has been a similar reduction in the proportion of such securities held—i.e., 4.47 per cent. in 1904 to 3.81 per cent. in 1914, while the total amount invested increased nearly $75,000,000, or [illegible] per cent.

Increase in State and Municipals.

Perhaps the most notable item in the whole statement is Class 6—state, county and municipal bonds. This class shows the highest rate of increase of any over which the companies have control, the total investments having increased from $163,000,000 in 1904 to $534,600,000 in 1914, or 227½ per cent. Only policy loans show a more rapid rate of growth. As the amount of money invested by life insurance companies in national and state bonds is comparatively small, the great bulk of this increase has been in municipal bonds. During the period from 1902 to 1913, according to the estimate given out by the census bureau, the total amount of such municipal indebtedness in the United States increased $1,845,000,000, or at the rate of about 113 per cent., while the life insurance companies increased their investments at nearly double that rate and have taken more than one-fifth of the total increase in such bonds of the country.

In striking contrast to the reduction in the proportion of railroad securities held by life insurance companies and the great increase in municipal securities is the change which has taken place in the savings banks' investments in these classes of securities. These institutions, according to the report of the comptroller of the currency, held only $291,-[illegible] in 1904, while in 1914 their investments had grown to $878,266,864, an increase of $586,288,209 in amount and about 200 per cent., or over three times the rate of growth of the insurance companies' investments in railroad stocks and bonds. During the same period, the investments of savings banks in state, county, municipal and all other bonds, show a decrease of $69,288,852, or nearly 6 per cent., as compared with the increase of $371,000,000, or 227 per cent. in the case of life insurance companies. While "all other bonds" are included with municipal bonds in the savings bank figures, because in some states the reports do not show a separation, the amount of "all other bonds" is in no case over 20 per cent., and probably not over 15 per cent. of the total of the class.

Of the 14 classes of assets it is significant and perhaps surprising to find that seven classes—viz., real estate, collateral loans, railroad stocks, public service stocks, stocks of banks and financial institutions, all other stocks and cash on hand, each show a decrease amounting collectively to $93,452,000, while non-ledger assets show a decrease of $43,300,000.

Armstrong Laws' Effect.

While the Armstrong laws are perhaps responsible for most of the $50,000,000 reduction in stocks which has occurred in ten years, yet it appears that in addition to the New York companies, eight other companies—from Connecticut, Massachusetts, Pennsylvania and Maryland—show reductions in railroad stocks and 17 companies from nine other states show reductions in stocks of banks and financial institutions. The largest reduction, both in amount and percentage (over 50 per cent.), was in stocks of banks and other financial institutions, railroads coming second and public service stocks third.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 10th, 1917:—

McKinley-Darragh-Savage Mines, 88,522; La Rose Mine, 87,885; Temiskaming Mine, 76,203; Coniagas Mines, 59,507; Dominion Reduction Company, 88,000; Nipissing Mining Company, 262,965. Total, 657,082 pounds, or 328,541 tons.

The total shipments since January 1st, 1917, now amount to 17,956,788 pounds or 89,783.94 tons.

HUMBLE CITIZENS ALSO NEED LIFE INSURANCE

Many life insurance men make the mistake of thinking that only people of a certain income are good prospects—that it would only be a waste of their time to solicit those in humbler circumstances.

As a matter of fact, the main question is not whether in the agent's judgment a man can afford to take out a policy—rather is it a question of whether or not you are enough of a salesman to make him want it, and want it badly. If you can do that the prospect will insure, and will in some way or other, by special effort, meet each premium as it falls due. This is a point to which the Mutual Life Insurance Company, of New York, recently has directed attention.

Merchants who have popularized high-priced articles and luxuries through advertising campaigns have established this selling truth time and again. They have stocked the homes of the poorer classes with articles not needed nearly so much as the necessities of life. If the heads of these families can find money somewhere and somehow to purchase expensive pictures, sets of books, musical instruments, etc., they can and will pay for a life insurance policy if the agent will make them see the advantage and need of protection.

Remember in your search for new policyholders that every person is a prospect if not uninsurable or wholly incompetent. Not only are the poorer people good prospects, but because in the majority of cases they are improvident they need insurance more than any other class. Once arouse their desire and ambition to possess something not out of their reach and the cost becomes a secondary matter.

Administratorship

The "Next of Kin," appointed Administrator through an estate being left intestate, may "renounce" his trust in favor of this Corporation. This is desirable when the next of kin is inexperienced or does not wish to assume the responsibility. It relieves him from providing a bond and leaves the management of the estate in competent and trustworthy hands. Write for our booklet on Wills.

IMPORTANT DECISION IN BOND CASE

New Brunswick Judgment is of Especial Interest to Municipaliites and Bond Houses

BY M. L. HAYWARD, B.C.L.

The case of Grimmer vs. the County of Gloucester, N.B., decided by the Supreme Court of Canada arose out of a rather interesting state of facts and lays down some important principles governing the liability of municipalities on bonds issued under their corporate seal.

In this case the New Brunswick legislature had passed an act authorizing the county council of the county of Gloucester to appoint three residents of the parish of Bathurst, in the said county, to be "The Almshouse Commissioners of the Parish of Bathurst"; these commissioners were authorized to acquire land and buildings not exceeding $3,000 in value in the parish for the purpose of an almshouse and workhouse; and the act further provided that "the County Council of the said municipality are hereby *authorized and required* to order the said sum to be assessed on the said Parish of Bathurst."

The act also provided that the county council "may cause bonds to be issued by the municipality, entitled 'Almshouse Bonds,' Parish of Bathurst, which bonds *shall be wholly chargeable* on said Parish, and shall be signed by the Warden and Secretary-Treasurer, and have the corporate seal affixed thereto, and be placed in the hands of the Secretary-Treasurer of the municipality to be disposed of; and the proceeds to be placed to the credit of the said Commissioners."

Authorized County to Levy.

Another section of the act authorized the county council to levy and assess the inhabitants of the parish of Bathurst for the interest and principal falling due on the bonds.

Then the county council of the county of Gloucester passed a resolution authorizing the issue of the bonds for $3,000, according to the provisions of the above act, and the bonds were issued and sold in the following form:—

$1,000 No. 1.

Almshouse Bonds, Parish of Bathurst.

This certifies that the Parish of Bathurst, in the County of Gloucester, Province of New Brunswick, is indebted to George S. Grimmer, in the sum of one thousand dollars, current money of the Province of New Brunswick, which is payable to George S. Grimmer, or order, on or before the sixth day of April, one thousand eight hundred and eighty-four, together with interest at the rate of seven per centum per annum, payable half-yearly, at the Bank of New Brunswick, St. John, on presentation of the proper coupons for the same, as hereunto annexed, pursuant to an Act of Assembly made and passed in the forty-first year of the reign of Her Majesty Queen Victoria entitled "An Act to provide for the erection of an Almshouse and Workhouse in the Parish of Bathurst, Gloucester County."

In witness whereof, the County Council, at the instance of the almshouse commissioners of the Parish of Bathurst, have caused the seal of the Municipality of Gloucester to be affixed hereunto, under the hand of the warden and secretary-treasurer, this tenth day of April, one thousand eight hundred and seventy-nine.

John Sivewright,
Secretary-Treasurer.
John Young,
Warden.

Claim that Bond had been Forged.

The first and second bonds were duly paid by Sivewright, the Secretary-Treasurer, but when the above bond was presented the County Council claimed that it had been forged by Sivewright and also raised the point that the bond did not create any indebtedness on the part of the county.

The question for the Court then was whether the act in question and the bond sued on did or did not render the county liable to the bondholder for the amount thereof.

The decision of the Court was that the bond was a binding obligation on the county.

The following quotations from the judgment of the Court lay down some important rules governing this class of cases:—

"Now I understand a bond to be a written instrument under seal whereby the person executing it makes a promise [illegible] statute referring to these bonds speaks of them as 'bonds to be issued by the municipality' as 'bonds of indebtedness,' and instruments to be 'signed by the warden and secretary-treasurer and have the corporate seal affixed thereto,' as bonds which are to 'be placed in the hands of the secretary-treasurer to be disposed of' (that is sold), by him as bonds the proceeds of which, having first been received by the secretary-treasurer as an officer of the municipality, should be by him, as such officer, placed to the credit of (i.e. paid over to) the body entitled to receive them.

"I can hardly conceive words stronger than these to express the intention of the legislature that the bonds issued under the act were to be the immediate and direct obligations of the municipality to the bondholder. If that was not the intention, who was to be the sponsor of or liable for them? Not the parish of Bathurst, it was incapable of making a promise; and certainly not the almshouse commissioners, whether corporate or not, inasmuch as that liability was not imposed on them. Can it be imagined that no one was to be responsible? Besides, this is the common way by which legislatures authorize municipalities to borrow money for the purpose of carrying out local improvements.

Machinery to Collect.

"The county having greater credit can borrow at a lesser rate of interest than the parish—the improvement though for the special benefit of the parish is as well for the general benefit of the county. But more important than all, if money is to be borrowed for the benefit of the parish, it has no machinery to collect money to refund it. No assessors or collectors or treasurers, and the county machinery is most appropriately used therefor. And even this, too, adds force to the view of corporate liability. It is upon the county council alone that the duty is cast of raising funds to pay interest and the bonds themselves as they mature. Section 3 particularly provides for this. The money necessary is to be assessed collected by whom? By the same officers as assess and collect the general rates. And this money is to be paid by whom? By the secretary-treasurer. And to whom? To the persons entitled to the interest and principal. And this consideration appears to me conclusive. The secretary-treasurer (the money being collected) was bound to pay the interest and principal to the bondholders and to them alone. That is as clear and explicit a statement of the county's liability as words can make.

"I entirely agree with so much of Mr. Justice Gregory's judgment, on this part of the case, as in my view it is an admirable exposition of the meaning and design of the act.

Bond was Clumsy Instrument.

"I now turn to the bond itself. It is most certainly a clumsy, imperfect and obscure instrument. Its form is not a credit to the commissioners by whom it was, under the statute, drafted. But that is not the question. We have to determine whether in such a form there is an obligation on the part of the municipality to pay the bond.

Now, as I view it, the most important statement in the instrument, executed as it was by the municipality, is that it is issued in pursuance of the act. We therefore have to refer to the act and construe them both together. We read the act into the bond and then proceed to ascertain whether there is or is not a municipal promise or obligation. So that when we read in the certificate that the parish of Bathurst is indebted to George S. Grimmer (an extraordinary statement to make if the parish is not an entity capable of being indebted to anybody), we turn to the statute for relief and instruction and we there find that the parish is, in a certain sense, the debtor of Grimmer inasmuch as it will be from the ratepayers of the parish that the money to pay the present loan will eventually come, the bonds authorized by the statute to be issued by the municipality being 'wholly chargeable on the parish.' And, inasmuch as we are bound to give some meaning to the words of a contract unless they are in fact meaningless, we conclude that it was in that sense the words were used. That granted, as there is no express statement as to *who* woud pay Grimmer, only a statement that the thousand dollars 'is payable to Grimmer,' we look to the statute and we find that it is payable by the secretary-treasurer of the municipality out of the special fund to be raised from the Bathurst taxpayers. That is sufficient authority therefore, to read into the bond after the words 'which is payable,' the other words 'by the Municipality of Gloucester.'

Experience in Investment

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

Investments by Experts

to yield 5%

The care and consideration given by the Company as an expert in the selection of security forms in itself a guarantee of safety for moneys invested with it on its Guaranteed Trust Investment plan.

The report on the security offered is made by experts in property values, who are salaried officers of the Company, not paid by commission. From their reports the Executive decides the amount to be loaned—seldom more than 50 per cent. of a conservative valuation. The investment of its client's money, thus made by the Company, is then further safeguarded by the Company's direct guarantee of both principal and income, the latter at the rate of 5 per cent. per annum.

These measures constitute an investment incomparably more secure than can be obtained by the ordinary investor who wishes to loan money on mortgage.

And thus we have an absolute covenant for payment on the part of the municipality.

"If the act authorizes the contract and is to be read into it, then there is presented to us such an instrument as the legislature, in my view, most certainly intended, as expressed in its language, an instrument, which otherwise would be a mockery and snare, converted into one of honest intent and legal force—its ambiguities removed and its obscurities made plain.

"But suppose the interpretation, I have ventured with great deference to give the bond, is erroneous. There is another ground upon which the county's liability may be rested.

"Take the abbreviated words of the bond: 'This certifies that the Parish is indebted to Grimmer in the sum of $1,000, payable to Grimmer with interest on April 6th, 1884.' What do these words 'this certifies' mean? Give them any meaning at all and they are synonymous or equivalents of such phrases as these: 'We promise,' or 'we contract,' or 'we guarantee,' or 'we declare it to be the truth.' In other words, 'we, having borrowed from you $1,000, promise that the Parish of Bathurst will repay you with interest.' There is then a contract by the municipality that a third party will pay. It has not paid; the breach has happened, and the municipality must make good its promise.

"It may be said that the statute does not authorize such a contract, but we must look to the substance rather than to the form. The statute authorized the municipal bond as security for the municipal loan. The form of this obligation was left to the municipality's appointees. Giving effect to this contract so formed gives effect likewise to the legislative intent and the bondholder gets his debt from the municipality."

INCOME TAX AND THE LIFE COMPANIES

Under the provisions of the proposed Dominion income tax bill, the fraternal and mutual insurance societies are exempt from such taxation. Stock life insurance companies are also exempt, except as regards the amount credited to the shareholders' account.

CROP IS BELOW GENERAL AVERAGE

Wheat in the West—Coarse Grains Poor—Manitoba Needs Rain Badly

It is a matter of regret, says The Manitoba Free Press, that this, the fifth, report for the season of 1917 is the most discouraging so far published, but facts are stubborn things, and the crop of 1917 is below the general average for wheat, while coarse grains are, to a considerable extent, a failure.

In the report of July 17th it was pointed out that, with immediate and plentiful rains, there was time for material recovery. The rains did not come immediately, but very hot and windy weather came instead, so that the hoped-for improvement has not taken place. There have been considerable rains, but they appear to have been largely confined to localities. There has been no general soaking rain during the past three weeks. Rains that have fallen have materially helped wheat to fill, but they have not been sufficient, nor did they come soon enough, to help to make a crop of the wheat on stubble nor of the coarse grains.

It may be said briefly that the percentage of damage from thrip and saw fly, hail and rust, in the three provinces, is very small indeed, hardly worth considering if the crop were a normal one.

Manitoba Needs Rain Badly.

Taking the reports by provinces, 78 points in Manitoba have been heard from; all but one have had some rain since last report; 20 points still want rain badly, a number stating that if they are to cut oats at all they must have more rain at once; 28 points, in addition to the 20, need more rain; and 17 points state they can finish without more rain. Yields of wheat are estimated at all the way from 4 to 40 bushels. Putting the acreages of the districts over against the estimated yields, it looks as if Manitoba might count on a crop of 12 to 15 bushels, or possibly a little better, and the sample will be plump and good.

Oat yields run all the way from 8 to 90 bushels, and will probably average 35 bushels on the acreage cut, but this will not be the acreage seeded, as a number of points report that 50 to 75 per cent. of acreage seeded to oats will either not be cut at all or cut only for feed. Barley is much better than oats, and estimates indicate a yield round 30 bushels. The lowest estimate is 8 and the highest 35.

Saskatchewan Oats are a Failure.

Out of 100 points heard from in Saskatchewan, 25 have had no rain since last report; 27 points report very little rain or "a light shower"; 56 points report need of rain badly; and 27 rain needed; while one point in the province reported that no rain was needed.

Wheat yields are estimated from 6 to 25 bushels; 20 points place the yield at 10 bushels and lower, but the indication is for a general average of round 12 or 13 bushels. The crop is too irregular for any definite estimate, and nearly every point makes a distinction between summer fallow and stubble or spring ploughed crop of from 5 to 7 bushels; while there are a number of points that state part of stubble crop has been ploughed down. All agree, however, that the crop is filling well and the sample will be good. As to oats, 7 points report them a complete failure; many points report it impossible to estimate and the estimates made run all the way from 8 to 50 bushels. Yorkton, one of the biggest oat areas, reports an average of 40 bushels. A number of points state that a big percentage of the area seeded to oats will be cut for bundle feed only. Barley estimates run from 8 to 30 bushels.

Out of [illegible] points heard from in Alberta, 4 have had no rain since last report; 4 points state the need of rain urgent; and 9 points want rain. Wheat yield estimates run from 5 to 30 bushels, but indicate, on the whole, an average of around 20 bushels. Where estimates are as low as 5, it is portions of a crop only in a district. Oat estimates run from 20 to 60. Barley estimates are the best in the three provinces.

As already indicated, the report is a discouraging one, but there is this possibility—that sometimes a short strawed crop, light on the ground, ultimately threshes better than the straw indicates. Also a crop like the one of the present year is cheaper to handle. Probably the most serious feature of the crop is the indicated shortage of feed grains.

International Nickel and British-America Nickel

Strong Competition from New Company, Says Boston; Cannot Scare International Shareholders, Says New York; "Not Interested in Stock Market, and Will be Producing Within Two Years," Says Mathewson.

Boston, August 8th.

"Although the European war has brought with it record earnings for the International Nickel Company, another and probably more far-reaching factor has developed from the same cause in the new and strong competition through the British-America Nickel Corporation, in which the British government has control. The International Company has had a practical monopoly of the nickel industry of the world, there being comparatively little competition. Earnings have been large and in them stockholders have shared liberally through cash and stock dividends. Although its raw material comes from Canada, the International Company has refined the product in this country, having a large refinery in New Jersey.

"The war brought about a change, with the result that the International Company started the erection of a new $5,000,000 refinery in Canada wherein to treat all nickel intended for either the Canadian or the British government in their war needs. This, when completed toward the end of the year, will have capacity for producing about 20,000,000 pounds per annum, in addition to the 80,000,000 pounds refined in the United States.

"Canada has large nickel-bearing ore deposits aside from the enormous reserves controlled by the International Company and the British-America Company, which plans spending from $12,000,000 to $16,000,000, will have ample mineral ground from which to draw its raw supplies. E. P. Mathewson left a good job with the Anaconda Copper Mining Company to take charge of the new project, the entire output of which will undergo a long-term contract to the British government."

New York, August 9th.

"The old-time bugaboo employed to frighten shareholders of the International Nickel Company has made its appearance again in the last few weeks. That is the old-young British-America Nickel Company which is to create 'new and strong competition' for the International.

"As yet the sole means the British-America has of competing with the International is the possession of some land near Sudbury, Ont. It has neither smelter nor refinery. Under these circumstances it is difficult to see where the International should worry. It would probably take two years to develop the property alone to a producing basis, while the construction of smelter and refinery would occupy about the same length of time. As an instance of what time means in such matters, it is only necessary to draw attention to the fact that the International began the construction of a refinery in Canada last year which will not be ready before January next. That is, something like sixteen months will have been required for that one task alone.

"In the matter of ore values International Nickel has a long lead over any competitor. The British-America is expected to produce its metal from ore running less than 3 per cent. nickel. International's lowest grade property runs around 3½ per cent. or 3¾ per cent., and it has not been operated for many months, although so great has been the demand for nickel that all mines would be expected to be operated that had ore worth while.

"Interest of the British government in the embryo company continues quite shrouded in mist. It is worth noting that

(Continued on page 27.)

Toronto, August 10th.

Asked by *The Monetary Times* as to these dispatches, Mr. E. P. Mathewson, general manager of the British-America Nickel Corporation, said:—

"We are not interested in statements put out by stockbrokers. We are going ahead with our business just as usual, and all we want to do is to go ahead. We have no interest in stocks or in the stock market or in this dispute. We will be producing nickel within two years. We do not propose to help brokers bear or bull the market."

The following appeared in The Toronto News of August 10th:—

"The British-America Nickel Corporation will be producing nickel at Sudbury for the British government within two years. This is the answer of General Manager Mathewson to the New York report that it will be a long time before the corporation is able to produce nickel, and intimating that it will be well over three years.

"Mr. Mathewson states that his company, which is really the British government, is carrying on the development of the Murray mine and has begun the construction of the smelter and refinery near Sudbury. 'We will be producing nickel two years from this date,' he said. At the present time the corporation has 200 men at work on their plant at Sudbury and construction is proceeding.

INSURANCE REBATING FORBIDDEN

Agents Guilty of Practice, Subject to Heavy Penalties—Bill Given Third Reading

Agents of provincial insurance companies who have hitherto been able to make rebates in order to get business are in future to be subject to the same penalties for rebating as are the agents of Dominion incorporated companies. Hon. C. J. Doherty, in the Commons, last week endorsed an amendment to the Criminal Code making it an indictable offence for any insurance agent to give rebates or to make any special conditions not set out in the policy.

Penalties Will be Heavy.

The minister of justice explained that these unfair methods of securing business were prohibited under the Dominion Insurance Act, but that the jurisdiction of that measure only covered Dominion companies or foreign companies licensed under the act. Provincial companies were not bound by it. By making rebates and special terms an offence under the Criminal Code, the penalties provided would apply to all companies doing business in Canada. The penalties, he stated, were: For a first offence double the amount of the annual premium, but not less than $100; for the second offence, double the annual premium but not less than $200, and for the third offence double the annual premium and not less than $500.

Carvell Says, "Why Not Rebate?"

F. B. Carvell, of Carleton, agreed that the law should be a general one, but he had never been able to see any reason for it anyway. He did not see why a man doing business had not a right to sell as cheaply as he wanted to. "I do not know where we are drifting," he said. "I do not know whether it is socialism or what—it seems as if these public ownership faddists have got in their work again." Mr. Carvell agreed that there should be no rebate on premiums, but the bill simply struck at the agent, who might be willing to cut his percentage a little to get business.

Hon. Mr. Doherty pointed out that the principle had been adopted in 1910, and the present bill was simply making it general. He agreed that there might be no great objection to an agent taking a little less to get business, if it went no further. As it had worked out, however, agents were encouraged by companies to give such rebates and the companies made it up to them. The net result was that some people paid less for their insurance than they should pay on a strict business basis, while others paid too much. The bill was put through committee and given third reading.

MARINE UNDERWRITERS HAVE ORGANIZED

General Conduct of the Business to Have Attention of New Association

There has recently been organized, as a branch of the Montreal Board of Trade, an association known as the Canadian Board of Marine Underwriters, whose special aim will be to secure beneficial interchange of views upon, and consideration of, matters pertaining to the general conduct of marine insurance. These matters, Mr. J. Stanley Cook, secretary of the new organization, tells *The Monetary Times* include the following:—

(1) The selection of correspondents in various parts of the world, for attention to wrecked and damaged property, and such protection thereof as may be duly authorized.

(2) Measures for procurement and use of early and accurate information of shipwreck or other disaster.

(3) To promote or oppose legislative and other measures affecting the interests of underwriters, and with a view thereto to petition parliament, and to appear before parliament or any other body or authority, administrative or judicial, by counsel or otherwise, and to take such other steps and proceedings as may be deemed expedient for giving effect to the views of the board.

To Investigate and Prevent Frauds.

(4) To investigate and prevent frauds practised, or attempted to be practised, or supposed to have been practised, or to be intended with respect to ships, cargoes, freights, or other subjects of marine insurance, or in relation to insurance thereon, and affecting the interests of underwriters, and the wrongful converting or disposal of or dealing with derelict property, and, so far as legally may be, to take or prosecute proceedings for the punishment of persons concerned in such frauds or wrongful acts.

(5) The principles and rules of average adjustments, and powers for the settlement of differences arising upon such adjustments.

(6) Approval and recommendation of standard forms of policies, or insurance agreements, with a view to such uniformity as may be consistent with the essential rights of underwriters and their assured to freely contract with each other.

(7) Rules for classification of vessels for the purpose of insurance, and recommendation of such rules to local surveyors or organizations whose employment or duty it may be to survey and rate vessels.

(8) Rules for loading vessels with grain, livestock, or other articles deemed suitable for special regulation.

(9) To promote, advance and protect the interests of underwriters generally.

(10) To do all such lawful acts as are or may be incidental or conducive to the attainment of the above-mentioned objects or any of them.

Officers of the Board.

The officers of the Canadian Board of Marine Underwriters for the current year are as follow: President, Mr. W. B. Meikle (managing director, Western Assurance Company); vice-president, Mr. R. J. Dale (president, Dale and Company, Limited); treasurer, Mr. R. L. Charlton (Western Assurance Company); chairman of executive committee, Mr. J. L. McCulloch (vice-president, Dale and Company, Limited); executive, Mr. R. Bickerdike (Western Assurance Company), Mr. W. Cairns (Phœnix Assurance Company, Limited, of London). All the above officers constitute the executive committee.

An additional order for 10,000 cars is impending from the Russian government, which will be placed in Canada and the United States, but, it is understood, chiefly in Canada.

Life Insurance in British Columbia for 1916

Abstract (Subject to Correction) of the Returns of Life Insurance Companies Transacting Business in the Province of British Columbia, 1916. (Prepared in Advance of the Provincial Annual Report.)

Name of Company	Premiums for the Year	Amount of Policies, new and taken up.	Net Amount in Force.	Net Amount of Policies become Claims.	Claims Paid, including Matured Endowments.	Unsettled Claims.		Amount Invested in Brit. Columbia.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Manitoba.—An issue of $8,000 7 per cent. 15-instalment school debenture bonds has been awarded to Messrs. C. H. Burgess and Company, Toronto.

Bridgeburg, Ont.—Tenders for $30,000 5½ per cent. 30-year school debentures will be received up to August 27. R. A. Land, town clerk, Bridgeburg, Ont.

Rossland, B.C.—Tenders for $30,000 6 per cent. 20-year school debentures were to be received until August 14. J. A. McLeod, city clerk, Rossland, B.C.

Kenora, Ont.—Tenders will be received for $13,949.79 6 per cent. half-yearly 30-year consolidated debit debentures up to August 27. J. E. Currie, treasurer, Kenora, Ont.

Edmonton, Alta.—The following is a statement by Mr. A. G. Harrison, city commissioner, showing the surplus made by the various utilities of the city over and above operation and maintenance for the first six months of the year: Electric light and power, $143,151.89; telephone, $92,165.20; waterworks, $87,732; street railway, $42,488.04; total, $365,537.13.

Hamilton, Ont.—As noted in *The Monetary Times* last week, the issue of $723,300 5 per cent. debentures was awarded to Brent, Noxon and Company, at 92.40. The remaining bids are as follows:—

Mulholland, Bird and Graham, Æmilius Jarvis and Company (joint account)	91.34
W. A. Mackenzie and Company, Canada Bond Corporation (joint account)	91.27
Wood, Gundy and Company, the Dominion Security Corporation, and A. E. Ames and Company (joint account)	91.00
Nesbitt, Thompson and Company, Harris, Forbes and Company (joint account)	90.85

Saskatchewan.—The following is a list of bond applications granted by the Local Government Board from July 30th to August 3rd:—

School Districts.—*Sunny Valley, $2,000 10-years not ex. 8 per cent. instalment. Geo. Brockhurst, Hanley; *Sharon, $1,800 10-years not ex. 8 per cent. annuity. E. H. Robbins, Heath; *Querrin, $2,000 10-years not ex. 8 per cent. annuity. L. B. Quinn, Querrin; *Norden, $800 10-years not ex. 8 per cent. instalment. A. Bergrud, Prestfoss; Upper Wakefield, $350 5-years not ex. 8 per cent. instalment. Jas. Cregan, Montmartre; Kutawagan, $1,800 10-years not ex. 8 per cent. annuity. Cole Dennis, Tate; Glen Elder, $1,800 10-years not ex. 7 per cent. annuity. G. R. Curry, Glen Elder; Purple Hill, $2,100 10-years not ex. 8 per cent. annuity. D. E. Miller, Oxbow.

Rural Telephone Companies.—Hillsborough, $23,200 15-years 7¼ per cent. annuity. H. K. Carmichael, Old Wives; Montmartre, $1,200 15-years not ex. 7 per cent. annuity. Jas. Cregan, Montmartre; South Pennant, $10,800 15-years not ex. 8 per cent. annuity. S. Goodwin, Pennant; Warren, $5,400 15-years not ex. 8 per cent. annuity. W. Termuende, Warren; Conger, $3,600 15-years not ex. 8 per cent. annuity. E. J. Davis, Truax; Forgan, $10,000 15-years not ex. 8 per cent. annuity. F. B. McNaughton, Forgan; Quinton, $13,100 15-years not ex. 8 per cent. annuity. J. F. Rose, Quinton; Idaleen, $1,800 10-years not ex. 8 per cent. annuity. John Lawson, Rosetown; Denzil, $22,100 15-years not ex. 8 per cent. annuity. A. C. Robinson, Denzil; Eden Valley, $1,000 15-years not ex. 8 per cent. annuity. E. Erickson, Broderick; Elbow, $16,900 15-years not ex. 8 per cent. annuity. W. Humphreys, Dafoe; South LaFleche, $37,600 15-years not ex. 8 per cent. annuity. A. E. Hastings, Maidstone.

Village of Dunblane, $1,500 7-years not ex. 8 per cent. instalment. D. E. Miller, Oxbow.

The following is a list of bonds reported sold:—

School Districts.—Burke, $1,800. Canada Landed and National Investment Company, Winnipeg; Marcelin, $6,000. W. L. McKim and Company, Regina; Crocus Prairie, $2,000. Goldman and Company, Regina; Beatty, $2,000. Goldman and Company, Regina.

Rural Telephone Companies.—Plenty, $26,000. J. A. Thompson, Winnipeg; Rockhaven, $7,000. Mulholland, Bird and Graham, Toronto; Pearl Creek, $6,600. John A. Todd, Duluth; Narrow Lake, $6,500. W. L. McKinnon and Company, Regina; Spears, $22,000. Geo. Foley, Saskatoon; Talmage, $1,800. Regina Public School Sinking Funds; New Imperial, $12,100. Regina Public School Sinking Funds.

Toronto, Ont.—Commenting upon certain features of the tax collections, Mr. Bradshaw says in a recent report: "The collection of the first instalment in June instead of July, was attended with much success, and so far as is known, with practically no inconvenience to the taxpayers. As a result, the city, which of course means the taxpayer, saved approximately $40,000 in interest charges on borrowings. It is hoped that next year's collection may be made in the month of May, which, if done, would effect a further saving in the borrowing charges of a like amount, and bring the time of the receipt of the city's revenue more in harmony with that of the expenditures.

"Considerable attention has been given to the securing of improvement in the collection of overdue taxes with the result that at present the only tax rolls outstanding in the collectors' hands, are those covering taxes due in the year 1916. Notwithstanding the special efforts put forth, the amount still unpaid, of taxes which fell due in 1916, and in previous years is no less than $2,167,958. These large arrearages represent moneys which were appropriated for current expenditure in the estimates of 1916, and preceding years. Although not received, they have all long since been paid out, the city having had to borrow funds therefor at the current rate of interest. This condition emphasizes the necessity of still greater effort being put forth to secure the more prompt collection of the city's current revenue.

"In the past it has been the practice, during the tax collection period, to establish branches for the receipt of taxes in five different sections of the city. It was found that the amount paid in at these branches was less than 5 per cent. of the whole; and it required the whole time of seven collectors. In view of the almost negligible service rendered by these offices it was decided not to open them this year, but instead to provide that all taxes be payable, and the whole staff available, at the City Hall. The change has been helpful in affording increased facilities to taxpayers generally, and insuring greater efficiency and expedition in the collection.

"This year, for the first time, it was decided to collect the business and income tax with the first instalment. The plan has worked out so satisfactorily that it should be regarded as an established custom."

---

*Being sold by the Local Government Board.

INTERNATIONAL NICKEL AND BRITISH-AMERICA NICKEL

(Continued from page 25.)

the Canadian government, which knows the nickel industry and has been most careful in its supervision of the International's business since the beginning of the war, is standing decidedly aloof from the proposed enterprise.

"For over two years the demand for nickel has been greatly in excess of anything known before, and those two years have been allowed to lapse without anything being done towards putting the British-America in condition to be a factor in the metal market. Obviously the situation is not such as to cause the stockholders of the International to lie awake nights worrying over competition.

"On the other hand they have the prospect of greatly increased earnings after the opening of 1918 from the operations of the new Canadian refinery which will be able to produce 20,000,000 pounds of metal a year. In addition, the company is charging higher prices for metal than ruled during the first thirty months or more of the war."

Ninety-five per cent. of people fail to provide either for their old-age or for their families. In the United States and Canada about 9,000,000 women must work to live; 95 per cent. of men engaged in business fail; 90 per cent. of men leave no estate when they die; over 96 per cent. of people have incomes of less than $2,500 per annum; 90 per cent. of estates of over $5,000 are entirely dissipated in seven years; less than 7 per cent. of the value of American and Canadian lives is covered by life insurance; life insurance has decreased pauperism more than 33 per cent. in 35 years.—Nalaco.

UNAUTHORIZED INVESTMENTS OF COMPANIES

How the Revised Insurance Act Will Treat Them—Position of Directors

The revised section of the Dominion Insurance Act (section 77) relating to the disposal of unauthorized investments of insurance companies and the liability of directors for such investments, was the subject of an interesting discussion when the bill was being considered in the House at Ottawa. Sir Wilfrid Laurier first asked whether the director who, within a certain time, protests against an unauthorized investment, relieved himself of any liability.

Sir Thomas White: A director who is present at a board meeting at which it is determined to make an unauthorized investment and who opposes that investment should not be held jointly liable with the directors who favor the investment. This case of the director who is overruled, came before the committee, and in order to meet this difficulty this proviso has been inserted. I think that the publication in a newspaper of the protest as here provided would be very rare, but it would be very effectual in preventing improper investments. Investments have been made, rarely, I am glad to say, which were quite unauthorized by the act and which have entailed heavy losses. I would move to amend the proviso by substituting for the word "made" the word "authorized." That would make it refer to the meeting at which such investment was "authorized"—an investment would not be "made" at the meeting.

Suppose all Directors Protest.

Mr. Pugsley: Suppose all the directors protest against it?

Sir Thomas White: Then they would not authorize it.

Mr. Pugsley: Why not? The investment is authorized. One director protests, and the others follow his example. I think that they should cease to be directors. A man ought not to be allowed to continue to be a member of the board and to exonerate himself from liability by making publication in a newspaper, where the investment is made contrary to the provisions of this statute. There ought to be some more stringent provision than that.

Sir Thomas White: Does my honorable friend seriously contend that, if a board authorized an investment and then protested against it, the court would relieve them of joint responsibility under this provision?

Mr. Pugsley: If the statute says so.

Directors Would be Careful.

Sir Thomas White: Would not the court look through the form to the intent and ascertain who, as a matter of fact, did protest in the proper sense of the term, and who, as a matter of fact, put forward sham protests in order to protect themselves under this act? In the companies act there is an almost identical provision, section 162, relating to the payment of dividends when a company is insolvent. That has been in the companies act for many years, and I believe is a useful safeguard against the payment of dividends when a company is insolvent. The practical effect of this provision would be to make boards of directors exceedingly careful with regard to the investments they make.

Mr. Pugsley: It is very important that some provision should be made. I have known two or three cases where very considerable losses occurred. Let me illustrate what might occur under this provision. There might be two wealthy men on a board of directors, both of whom would be absent from a meeting. They might desire to make investments in certain securities on which they looked with favor. Three directors, of little or no means, in the absence of the other two, might pass a resolution authorizing the investment. Those who were absent would publish a protest in the newspapers.

But they still remain directors, the illegal investments still remain, and the wealthy directors who would be able to respond are freed from liability. After three or four years, or longer, the company gets into difficulties. It may be discovered that its difficulties have arisen very largely, if not wholly, through the illegal investments which have been made. The wealthy directors, who are the only ones able to respond in damages to the stockholders or policyholders, are freed from liability because they have published a protest; yet they are still allowed to remain members of the board. It seems to me they should be compelled to take some effectual means to have the securities disposed of and the funds restored to the company. They should not be allowed to escape liability merely by publishing a protest, they still remaining directors, and the illegal investment still allowed to continue.

Absent Directors Liable.

Sir Thomas White: I think that case is a very fanciful one, and not likely to occur in practical experience. In such a case, in which there would be collusion, the absent directors would be liable. But the real safeguard is publicity, which is the best safeguard in matters of this kind. An illegal investment is made; months afterwards, on an inspection it comes to the attention of the department that there is depreciation and loss and a certain amount of damage is done. This section will have the effect, so far as honest directors are concerned, of making them notify the superintendent of insurance, or publish this protest. If the inspector of insurance were made aware at once of the unlawful investment, there would be no loss, or very little loss, in most cases, because action would be taken at once to make them return the security to those who sold it, if it were a fraudulent transaction. I think it is a valuable safeguard in connection with the investments of these companies.

Mr. Pugsley: Yes, it is a safeguard, but it would be extremely more valuable if it were left as it stood in the original bill. The banking and commerce committee have emasculated the salutory provisions of the section to such an extent that they might be rendered nugatory. One of the difficulties with insurance companies, as with all companies, is that many directors do not give personal attention to the affairs of the company, and under this proviso they are only liable if, after they become aware of the illegal investment, they give notice. Investments might be made by the acting directors, by the small executive committee which companies often have, and the directors, really capable of responding in damages to the policyholders, might have no personal knowledge of the matter. It seems to me there would be no great hardship in leaving the section just as the minister had it in the original bill.

Two Conditions Necessary.

Mr. Murphy: As I gathered the sense of this amendment while the chairman was reading it, I understand there are two conditions to be complied with before a director can relieve himself of liability for an investment of which he disapproves, and which may have been authorized at a meeting at which he was present, or not present. One of these is that he shall have his protest entered on the minutes, and the other is that he shall later publish that protest. There is a similar provision in a section in the companies act, on which the proposed amendment is based. I did not hear the language.

Sir Thomas White: It is the same language.

Mr. Murphy: What are the words?

Sir Thomas White: The words are: "and is able to do so." The section is taken from the companies act.

Mr. Murphy: I am familiar with the section in the companies act.

Sir Thomas White: The committee felt—and one can quite understand the feeling—that a protesting director who desires to do his duty, but is overruled by his fellow-members of the board, should have some means of protecting himself against liability on a loss which might be very heavy. On the whole, I think it is a wise proviso.

Directors and Minutes.

Mr. Murphy: The minutes are usually in the custody of the secretary, and it is not always easy for a director to have access to them as would be necessary if he is to protect himself.

Mr. Pugsley: There are directors in these companies, residing in the various sections of the country, and upon the reputation and high standing of these directors the policyholders are induced to accept policies in the companies. Suppose the directors choose—as directors often do—to allow two or three of their number to carry on the business of the company, and that those so carrying on the business make illegal investments through which the company sustains loss. Suppose that the company gets into litigation, and it is found that the assets are largely dissipated through this illegal investment, the directors should not be allowed to plead that they did not know of these illegal investments being made. The directors ought to know of the investments of the company; they ought to know whether the money of the shareholders is being invested in duly authorized securities or not.

It seems to me that if the minister insists upon the amendment, it ought to be provided that an absent director should within thirty days after the investment has been authorized, publish his protest. He should not be allowed to escape liability—by saying, perhaps after a lapse of years, that he was not at the meeting, did not know of the investments which were being made, and had not the slightest idea they were illegal. This law will enable him to escape.

Sir Thomas White: I do not think so.

Mr. Pugsley: Yes, it will.

Sir Thomas White: No.

"I Was Not Present."

Mr. Pugsley: When the case comes before the court, he can say: I was not present when that investment was authorized; I did not know anything about it, and it was only when a suit was brought by the policyholder that I learned that this illegal investment had been made. It seems to me that thirty days would be long enough for an absent director to find out whether an illegal investment has been made or not. It is his duty to do so. He holds himself out to the shareholders and policyholders as taking an active interest in the management of the company and he should within thirty days, or say within three months, publish his protest. That would make it obligatory upon every director to keep himself in touch with the investments which are being made from time to time. I would allow reasonable time, because a director might be absent from the country; but he ought not to be allowed, after a lapse of many months or of years, to come before the court, as he is permitted to do under this proviso, and say he had no personal knowledge, and the investment therefore ought to be excused.

What Subsection Says.

Sir Thomas White: I think my honorable friend has misunderstood the effect of the subsection and the proviso. I need not tell my honorable friend, who is a lawyer, that there would be liability on the part of any director for negligence; that is to say, if this proviso did not exist at all, the general law of negligence would apply to the director he has spoken of. It would be for the court to determine whether, having regard to his duties and to all the circumstances of the case, the director was negligent in his duty towards the shareholders of the company. The subsection says:—

The superintendent may request any company to dispose of and realize any of its investments not authorized by this act, and the company shall within sixty days after receiving such request absolutely dispose of and realize the said investments, and if the amount realized therefrom falls below the amount paid by the company for the said investments, the directors of the company shall be jointly and severally liable for the payment to the company of the amount of the deficiency.

That is the law in the case of the superintendent taking the action mentioned. In order to protect a director who was present at the time the investment was authorized, and, though honestly desirous of doing his duty, was overruled by his fellow-directors, a proviso is inserted enabling him to escape from the liability imposed by the subsection. I do not think that the insertion of the proviso in any way relieves a director from his liability under the general law relating to negligence.

Helps Honest Director.

Sir Wilfrid Laurier: What is the use of it, then?

Sir Thomas White: It makes a specific instead of a general provision.

Mr. Pugsley: It helps the directors.

Sir Thomas White: It helps an honest director; that is what the proviso is intended to do.

Sir Wilfrid Laurier: But it injures an innocent policyholder. If a loss occurs to the company by reason of an illegal application of funds, the loss falls upon the policyholders. Somebody has to suffer for it; either the innocent policyholder, or the innocent director.

Neglect of Duty.

Sir Thomas White: If a director neglects his duty, he is liable under the general law of negligence. But this is a case in which an honest director attends a meeting at which an illegal investment is authorized. His objection to the investment is overruled by his fellow-directors, and, desiring to put himself right and avoid liability, he publishes his protest and has it entered upon the minutes of the meeting. If my right honorable friend (Sir Wilfrid Laurier) were a director of a company and was overruled by some fellow-directors, who had not as high a sense of duty as he had, with regard to an investment upon which a loss was made, I do not think he should be held liable, provided he did everything possible to give notice of the improper transaction. That is the purpose of this proviso. The general law of negligence still applies. As I say, the precedent for this is found in the companies act.

Mr. Marcil: Is the publication of this protest intended to serve as notice to the shareholders of the company?

Sir Thomas White: It would have that effect.

If Protest Were Published.

Mr. Marcil: In the province of Quebec a man could publish a notice of that kind in an obscure paper and the great bulk of the people interested in the company would never see it. Thousands of English people in Quebec never read French papers, and vice versa. The common law of that province ought to be followed; publication of such notice should be at least in at least one paper in either language.

Sir Thomas White: If the protest were published in any paper of Canada against the action of directors of an insurance company, the rivals of that company would at once fasten upon it; it would become public property very soon.

Sir Wilfrid Laurier: I think it would be better if, under such circumstances, the director should at once notify the superintendent of insurance.

Sir Thomas White: I had that same idea in my mind when the matter was under consideration. There is a great deal of wisdom in that suggestion. I beg to move that all the words after the word "thereafter" be struck out, and that the following words be inserted in lieu thereof: "gives notice of his protest by registered letter to the superintendent."

Liable for Negligence.

Mr. Pugsley: This is the way a case of the kind referred to would work out: an illegal investment would be made by the manager. After the lapse of some months, the superintendent of insurance, during the course of an inspection, would discover the illegal investment. The thoroughly respectable directors who were merely figureheads on the directorate of the company, having learned that the superintendent of insurance had discovered the illegal investment, would proceed immediately to absolve themselves from liability under the act by giving notice as set forth in the proviso, or by notifying the superintendent of insurance. That is like locking the barn door after the horse is stolen.

Sir Thomas White: They are liable for negligence.

Mr. Pugsley: Not at all. I do not think it is negligence not to attend meetings.

Sir Thomas White: Not necessarily so.

Mr. Pugsley: I do not think it is even prima facie evidence. I think, therefore, the result would be as I have just stated. Under this proviso the shareholders or policyholders who have been transgressed against are freed from all liability. I think that is the way it would work out.

Can Notify Insurance Superintendent.

Sir Thomas White: My honorable friend knows that it is not possible to provide legislation covering all phases of fraud, but if this provision was not in the act, in a case such as my honorable friend has mentioned, it would be a question whether or not, according to the law of negligence, the directors were liable. We are not changing that, but are providing for the cases—and there have been many of them—in which the board of directors make an unauthorized investment and one of them objects to it but is overruled. We are giving him an opportunity of notifying the superintendent of insurance, so that prompt action may be taken. I think the proviso has been improved by the suggestion of my right honorable friend.

Mr. Pugsley: It expressly provides the means by which the director may exonerate himself from liability. Does not my honorable friend think that there ought to be a clause to the effect that nothing in the proviso shall be held to relieve the directors from liability for negligence?

Sir Thomas White: This would only apply to the specific case. I do not think the director would be relieved from the general law.

What Courts Would Say.

Mr. Pugsley: It would relieve him from any presumption of negligence by reason of his not attending the meetings and having some oversight over the investments. A court would say that parliament had made an express provision pointing out the means a director may take to relieve himself from liability. I think we ought not to take away the ordinary remedies which might exist against a director for negligence in not properly attending to the investments of the company.

Sir Thomas White: I follow my honorable friend's argument, but I would point out that the corresponding provision in the companies' act has stood and has not affected, so far as I am aware, the question of general liability for negligence on the part of a director. I would suggest that we pass this section, and in the meantime I will think over my honorable friend's suggestion. I might add that in deference to my honorable friend's request I consulted further with the deputy minister of justice on the point of our declaring by this act a foreign company to be a Canadian company after it has taken out a license, and the deputy minister of justice is of the opinion that we should not change the language of the act by inserting the words "for the purposes of this act" which my honorable friend suggested.

The section as amended was agreed to.

SUCCESS IN LIFE INSURANCE; HOW ACHIEVED

What Makes a Successful Life Insurance Agent Outlined by Expert

It must be conceded that the first step in the training of a salesman should be one which would lead him to acquire the right mental attitude towards the business in which he is about to engage—in other words, he must be taught to believe thoroughly in his business—he must have positive, enthusiastic faith before he can successfully sell. So stated Mr. George H. Hunt, superintendent of agencies, of the Imperial Life Assurance Company of Canada, when addressing the Life Agency Officers' Association, at Detroit.

How can the right mental attitude on the part of the salesman be induced? Canadians for a long time have been passing through a period that has brought death closely home, and in consequence has made a more thoughtful people. We can cite to the prospective life assurance salesman many instances where children are being fed and educated, where widows are being taken care of, from the proceeds of life assurance policies on the lives of men who have been killed in the great battles of the present war. We can point out to him the millions of dollars that the life assurance companies have subscribed to the war loans, and how in this way they have assisted the state very materially, etc. In these functions towards the home and the state we have been supported by several of the great companies in the United States.

If after going into the details with the prospective salesman along these lines he does not fully believe in, and become enthusiastic regarding the great business of life assurance, I am of the opinion that such a man will never become an outstanding success as a salesman and is therefore better left alone. One or two outstanding successes are of more value to themselves and to their company than half a dozen mediocre men. A life assurance salesman who does not become possessed of the highest degree of optimism as to his future development and the recognition he is going to demand in the business has a poor chance of ultimate success.

Belief in His Company.

Secondly, he must be taught to have supreme belief in the company he represents. How can this be brought about? Not by "knocking" any of his competitors, for if this be done you are teaching him a wrong principle right at the commencement—you are not only destroying in part his own belief in the institution of life assurance as a whole, but you are making him an instrument to weaken the faith of others.

Speak instead to the prospective salesman of the strength of the company—this can be readily shown in a few of the outstanding figures in the company's annual report.

Show him its peculiar ability to earn surplus, by directing his attention to the class of investments held by the company and the splendid interest return received thereon. For instance, in the case of a great many companies his particular attention can be directed to the splendid farm mortgages held and the remunerative rates of interest derived from this source.

Also direct his attention to the careful selection of standard risks—to the specially selected committee that deals with sub-standard risks, thus ensuring a low mortality. Do not overlook emphasizing the fact that a proper and equitable premium must be charged.

Point out the fair treatment of all policyholders—old and new. All good companies are from time to time introducing new features into their policy contracts. These privileges, in most cases, have been extended to holders of old policies as well as new.

Show him the personnel of the company's board of directors—men who are respected throughout the country for their outstanding business ability in the different businesses in which they are engaged.

Service to Policyholders.

In short, make him so enthusiastic about your company that he will want to work for it rather than accept a higher commission from some other corporation.

Never talk commissions to a prospective life assurance salesman during the forepart of the interview. Talk about the company and endeavor to show the prospective salesman that he can sell the company's policies to the credit of all concerned and meet competition where necessary, although at the same time show him that the biggest men in our business sail right ahead and talk the merits of their "goods" so hard that they do not leave much room for competitors, and, therefore, have practically no competition.

The next point is service. A prospective life assurance salesman should be taught that service begins the moment he opens the interview with his prospect, first, by fitting the plan of assurance to take care of the peculiar circumstances surrounding the case of the individual, so that, as years go by the assured is satisfied and his future business is given to the same salesman, who will, in this way, make far more money for himself by getting future business than he would have done had he, in the first instance, sold a misfit policy for the sake of making a larger commission at that time.

Insuring for the right amount is a big factor in good service. The prompt and correct delivery of policies is now emphasized.

Work and System.

Numerous other ways of giving good service are explained and the necessity of giving good service on all occasions insisted upon. Next comes work and system.

In the larger towns and in cities, the life assurance salesman should be trained to have a certain number of interviews each day and to use prospect cards and keep these cards properly tabulated each day; then at the end of the week he should review his cards, preferably with his manager. In this way he creates a check on his work. If he has been making six calls per day, he should have 36 cards for the week. Some of these cards will represent business closed, for a certain average business is bound to follow systematic work of this nature. The cards will also show the class of people interviewed and in this way he has a chance to ask himself the question: Am I calling on the right class? and if not, to improve himself and get after better business.

FALL WHEAT, HAY AND CLOVER, AND ALFALFA

The government's preliminary estimate of the average yield per acre of fall sown wheat for 1917 is 22 bushels as compared with 21½ bushels in 1916, 29.41 bushels in 1915 and 21.70 bushels, the average of the seven years 1910 to 1916. The total yield of fall wheat for 1917 is therefore now estimated at 17,816,000 bushels, from 809,250 harvested acres as compared with 20,060,000 bushels from 932,500 acres in 1916. In Ontario, the chief fall wheat province, the total yield is 14,515,000 bushels from 656,500 acres, as compared with 16,465,000 bushels from 774,800 acres in 1916, the average yields per acre being 22.11 bushels in 1917 and 21¼ bushels in 1916. Saskatchewan now ranks as the second fall wheat province with 2,220,000 bushels from 105,700 acres and Alberta is third with 836,000 bushels from 38,000 acres. The total yield of hay and clover is placed at 13,379,000 tons from 7,824,000 acres, as compared with 14,637,000 tons, the record crop from 7,892,900 acres in 1916. This year's total yield of hay and clover has only twice been exceeded—viz., last year and in 1911, when the yield was 13,989,000 tons. The average yield per acre this year is 1.70 tons as compared with 1.85 tons in 1916 and 1.62 tons in 1911. The yield from alfalfa is 152,200 tons from 86,500 acres as compared with 260,500 tons from 89,470 acres last year, the average yields per acre being 1.76 tons as compared with 2.91 tons.

VALUE OF CANADIAN NORTHERN STOCK

Sir William Meredith Appointed as Arbitrator—Drayton-Acworth's Figures Inaccurate?

Two important statements were made by Sir Thomas White in the House at Ottawa on Tuesday regarding the Canadian Northern proposals. Sir William Meredith, Chief Justice of Ontario, has consented to act as the representative of the government on the board of arbitration to fix the value of the stock to be acquired. Some of the figures of the Drayton-Acworth report are not accurate.

Sir Thomas White met opposition criticism to the arbitration proposal by asserting that the Drayton-Acworth report could not be accepted as the final word upon the value of the Canadian Northern system. The Royal Commission had not been appointed to place a value on the stock, and as a matter of fact the commissioners had not included a number of important assets of the company, including land, deferred payments for land and cash in hand and working capital. On the other hand, they had not considered certain liabilities. Sir Thomas reiterated his previous statement that arbitration did not presuppose a value for the stock.

In bringing down the bill he stated that he had given so full a statement with the original resolution as to the reasons actuating the government, in its decision to acquire the whole of the capital stock of the Canadian Northern, that now he proposed to confine himself to dealing with the various criticisms brought against that proposal.

First it had been suggested that instead of securing the stock the government should acquire the physical property, by expropriation, with all the subsidiary companies.

By its present course he replied, the government preserved the identity of the Canadian Northern Company. If they expropriated, the government would own the properties as they owned the Intercolonial and National Transcontinental, which would be directly against the Drayton-Acworth report and also the report of President Smith, of the New York Central.

Advantage in Preserving Corporate Identity.

There was a great advantage in preserving the corporate identity of the various companies, particularly in financing them. In addition to its fund debt the Canadian Northern had short-term loans and liabilities to the extent of about $98,000,000. If the Dominion government expropriated it would have to provide the money for these, and if it failed to do so the creditors could appoint a receiver, with the result that the full indebtedness would at once become due, causing choas to the financial system of the road. To take over the road and meet these floating short-term liabilities would be a serious matter in face of the government's enormous war expenditures. But taking the stock and thus acquiring the company while leaving its identity intact would enable the company to take care of its short-term obligations, or make new issues, so that the Dominion Government would not be called upon to pledge its credit to any great degree for the Canadian Northern.

The same would apply to financing the rolling stock.

Then it was stated that the Drayton-Acworth report showed there was no value in the stock which was proposed to be submitted to arbitration.

Quoting the Drayton-Acworth report Sir Thomas showed that they found $270,000,000 the maximum possible cost of the system, but later found the present reproduction cost of $402,794,663, while the outstanding liabilities were about $400,000,000. Further they stated that as a going concern it was evident no company would buy the system for a sum equal to its present liabilities.

Important Omissions in Report.

Sir Thomas said there were some important omissions in the Drayton-Acworth report. Prof. Swayne in his valuation had overlooked the company's lands amounting to 3,000,000 acres of which there were 2,000,000 in Ontario, 400,000 acres in Quebec and 800,000 acres in the west. He had also overlooked deferred payments on lands sold amounting to $7,000,000 and cash in the land sales trust account of $2,400,000.

Then the Drayton-Acworth report overlooked Prof. Swayne's recommendation as to cash in hand and working capital, so that capital to the extent of $25,000,000 and current account of $8,700,000 were not included in the valuation. On the other hand, the commissioners had overlooked the income charge convertible bonds, amounting to $25,000,000 so that the finding of the Drayton-Acworth commission that the outstanding liabilities of the company exceed $400,000,000 and that the assets were represented by $402,000,000 was not accurate.

Sir Thomas said he did not mean to say that the common stock was worth the difference between the liabilities and assets of the company. The arbitrators must consider the value of the assets and liabilities, not as determining factors, but as an element. There would also be the question of the earnings, present and prospective. Further, there was the financial condition of the company at the present time, and the arbitrators taking this into consideration would reach an equitable conclusion as to the real value of the stock.

Assets and Liabilities Overlooked.

In closing his reference to the Drayton-Acworth report the finance minister stated that there was such a considerable amount of assets overlooked on one hand and such a considerable amount of liabilities on the other hand that the findings of the commission were not entitled to be regarded as accurate.

Taking up the argument that the value of the stock should be determined by the Exchequer Court Sir Thomas stated that the government had decided against that course because of the time that would be taken in liquidation of this kind before a court of record.

In closing, he pointed out that the Dominion by acquiring the Canadian Northern Railway stock was getting a system consisting of 9,500 miles of railway and telegraph, express, steamship systems, elevators, storage and other facilities. It would be necessary to provide for fixed charges, betterments and improvements, in order to give a proper service, but had the system of temporary aid been continued the problem would still be there and the government would have been compelled to go on for four or five years assisting the company.

KAISER AND ANGLO-FRENCH LOAN

The Kaiser's interest in the Anglo-French loan of $500,000,000 is referred to in ex-Ambassador Gerard's interesting articles in the Philadelphia Public Ledger. Mr. Gerard, writing of an interview with the Kaiser, says:—

"The Emperor complained because a loan to England and France had been floated in America. I said that the first loan to a belligerent floated in America was a loan to Germany. The Emperor sent for some of his staff and immediately inquired into the matter. The member of the staff confirmed my statement."

The German loan was for about $10,000,000 and the cost exceeded 10 per cent. It was a failure in the New York market, being taken entirely by German sympathizers there, and not with any great zest even by them.

LIFE UNDERWRITERS AT WINNIPEG

A number of articles in this issue of *The Monetary Times* of especial interest to life insurance men, are indexed on the front cover.

A full report of the Life Underwriters' Convention will appear in the August 31st issue of *The Monetary Times*. We shall be pleased to send you gratis, a copy of this issue. Kindly fill out and return the attached form to our head office, 62 Church Street, Toronto.

Winnipeg, August, 1917.

Kindly send me copy of *The Monetary Times* for August 31st, 1917, containing report of Winnipeg Convention of Life Underwriters' Association.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Arran, Ont.—August 12—Mr. Robert Porter's barn, containing several tons of hay, burned to the ground. Cause, lightning.

Belledune, N.B.—August 7—Railway station, freight shed and a number of cars containing lumber. Estimated loss, $3,000.

Brockville, Ont.—August 11—Soperton cheese factory, owners, Davidson and Murray, totally destroyed. Loss, $6,000.

Delhi, Ont.—August 7—Mr. G. Kingsbury's buildings completely destroyed.

Delaware, Ont.—August 10—Two barns, property of Mr. James and George Hays burned to the ground. Loss partly covered by insurance.

Dunwich, Ont.—August 13—Mr. D. McGugan and Mr. Ed. Clarke's barns destroyed. Cause, lightning.

Edmonton, Alta.—August 8—Mr. A. Bailey's paint shop, 9602 Norwood Boulevard. Damage covered by insurance.

Edmonton, Alta.—August 9—Hook Sign Company's paint shop, owner H. Getty. No insurance carried.

Fingal, Ont.—August 11—Mr. D. Lawrence's barn. Cause, spontaneous combustion.

Gardiner Mines, N.S.—August 4—Mr. R. Stubbert's house and contents destroyed.

Hamilton, Ont.—August 10—Kilgour Manufacturing Company's plant. Damage to boiler room. Loss about $200.

Humberstone Township, Ont.—August 7—Traveller's Hotel and barn totally destroyed. Insurance carried, $1,775. Cause, defective stove.

Hastings, Ont.—August 8—Shamrock cheese factory completely destroyed; also house near by, occupied by Mr. and Mrs. Wm. Stillman.

Kirkland, Ont.—August 6—Rock house of the Teck Hughes mine. Estimated damage, $1,000.

Maillardville, B.C.—August 3—Lamont Brothers' shingle mill burned to the ground. Estimated loss, $10,000. No insurance carried.

Nairn, Ont.—August 8—Mr. W. G. Northcott's general store, adjacent dwelling and two stables, completely destroyed; also $300 in cash.

Niagara Falls, Ont.—August 9—Clifton House ice-making plant partially destroyed. Estimated loss, $20,000. Cause, short circuit.

Notre Dame des Anges, Que.—August 8—Messrs. Frenette and Frere, P. Marcotte and Tel Royer lost three stables containing eight horses and vehicles. Estimated loss, $8,000, with small insurance.

Port Colborne, Ont.—August 5—Mr. Augustine's planing mill destroyed, containing $1,500 of plate glass and lumber. Insurance carried $1,000.

Qu'Appelle, Sask.—August 8—Mr. B. Pringle's frame dwelling and contents destroyed. Covered by insurance.

Quebec, Que.—August 9—Mr. L. L. Paquet's store. Estimated damage, $300.

August 10—Pfeiffer's laundry on McMahon Street. Fire was confined to cellar. Estimated damage $400. Cause, spontaneous combustion in coal pile.

Raleigh Township, Ont.—August 13—Mr. E. Jenner's dwelling-house destroyed. Cause, lightning.

Sunbury County, Ont.—August 4—Mr. Burton Smith's barn. No insurance carried. Cause, children playing with matches.

Smith Township, Ont.—August 7—Mr. W. L. Taylor's dwelling-house destroyed.

St. Thomas, Ont.—August 10—Mr. Lawrence's barn destroyed. Partly insured.

Truro, N.S.—August 8—Mr. L. Langille's dwelling-house. Some insurance carried.

Winnipeg, Man.—August 7—Burdett's stable damaged. Estimated loss, $200.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Deroche, B.C.—July 18—Store and dwelling destroyed, owner, Mr. C. J. Cooper, occupant, Mr. W. Murray. Estimated damage to stock, $7,500; to buildings, $2,500. Insurance on stock, $2,500. Total insurance, $2,500, carried in the Srea, and the St. Lawrence Underwriters, agency of the Western Assurance Company.

North Esk, N.B.—August 2—Mr. John Keating's barn. Estimated damage to stock, $500; to buildings, $600; insurance on buildings, $200; total insurance, $200, carried in Acadia Insurance Company.

Osnabruck, Ont.—August 4—Town Hall, owner, municipality of Osnabruck. Estimated loss, $2,300; insurance on buildings, $1,600; total insurance, $1,600, carried in Merchants Insurance, Limited.

Springbank, Ont.—August 8—Mr. C. G. Northcott's dwelling, store, oil house and barn destroyed. Estimated damage to stock, $4,800; to buildings, $2,500; insurance on stock, $2,700; on building, $1,700; total insurance, $4,400, carried in the Perth and Mutual Insurance Company.

Victoria, B.C.—Fire Chief Davis reports the following fire losses for the month of July to *The Monetary Times*:—

Loss on buildings, $521.95; loss on contents, $142.60; total loss, $664.55; insurance on buildings, $84,750; insurance on contents, $6,750; total insurance, $91,500; property at risk, $253,450; total alarms received, 28.

Vancouver, B.C.—Fire Chief Carlisle reports the following July fire losses to *The Monetary Times*:—

The fire department responded to 53 alarms during the month as follows: Fires where damage occurred, 20; fires where no loss resulted, 10; false alarms, 3; chimney fires (no loss), 3; bush fires (no loss), 7; smoke scares, 4; services not required, 5; and rescue work, 1. The estimated total damage resulting from fires for the month was $8,629, of which $7,486 was covered by insurance, leaving the property loss above insurance at $1,143. The total value of the property involved was $663,956. On July 10th, at 5.19 p.m., a fire occurred in the dry-kilns at the plant of the British Columbia Fir and Cedar Lumber Company, foot of Laurel Street, caused by a spark. The total amount of damage was fixed at $5,100, fully covered by insurance. Another fire, resulting in a loss of $1,415, occurred on July 14th, 1.54 p.m., in a fish-curing plant at the rear of 1941 Main Street, occupied by the Aberdeen Fish Curing Company, flying sparks setting fire to the roof of the building, spreading to a second-hand store adjoining, occupied by Mr. M. A. Dyer, also causing slight damage to a dwelling, 272 Lansdowne Avenue, E., owner, Mr. W. W. Blake; $1,185 paid by insurance. The following list shows the causes of fires occurring during the month: Awning (cigarette thrown from window above), 1; bush fires, 7; children playing with matches, 3; chimney fires, 3; carelessness with cigarettes, 2; defective chimney, 2; electrical origin, 2; false alarms, 3; flying sparks, 14; gasolene left near stove, 1; overheated furnace pipe, 1; overheated range, 1; overheated stove, 1; overheated bearing, 1; rescue work, 1; services not required, 5; smoke scares, 4; and spontaneous combustion, 1.

Yarmouth, Ont.—August 7—Barn, containing 34 loads of hay, occupant, Mr. R. A. Miller, owner, Mr. R. W. Hepburn. Estimated damage on stock, $250; on buildings, $700; insurance on stock, $150; on buildings, $350; total, $500, carried in the Yarmouth Mutual.

"INNES, THE BAND MAN"

"Innes, the Band Man," who will head the musical programme this year at the Canadian National Exhibition, Toronto, with his famous band of soloists, is an Englishman, a graduate of the London Conservatory of Music, and the band of the Life Guards. Later he went to Paris, where he attracted the attention of the late Pat Gilmour, the greatest of all American leaders. He accompanied Gilmour to America, and has proved a worthy successor to the old master. Innes' band was acclaimed the finest of the many fine bands heard at the Panama Pacific Exposition. He it was, also, who planned and carried to success the remarkable series of festivals which made the Alaska Yukon Exposition notable among all other exhibitions for its musical programmes.

PUBLIC OWNERSHIP IN ONTARIO

Control of Industrial Undertakings Must Not Be Trusted to Irresponsible Commissions

Messrs. McCarthy and McCarthy, Toronto, solicitors for the petitioners in the case of the Electrical Development Company v. The Attorney-General of Ontario, before the Judicial Committee of the Privy Council, have prepared, for inclusion in the petitioners' brief, a "memorandum concerning recent provincial legislation and executive action in Canada, with special reference to the Niagara question in the Ontario legislature." The memorandum states with some fullness the economic as well as the legal and constitutional arguments against the legislation in question.

Among the general conclusions of the memorandum are the following :—

While the control and inspection of industrial undertakings may properly be entrusted to a public authority responsible to the people, such functions cannot with safety to the public interest be entrusted to irresponsible commissions.

It is still more disadvantageous to the public interest to endow irresponsible commissions with powers to expropriate private property and to conduct industrial enterprises.

Public Ownership Abused.

Under the name of "public ownership" small groups of persons have been endowed by provincial legislatures, and in particular by the legislature of Ontario, with powers of an exclusive and monopolistic character, without adequate constitutional checks upon their proceedings. Such commissions have been rendered exempt from control by the legislature, and at the same time have been rendered immune from proceedings in the law courts.

The Ontario acts have placed many municipalities of Ontario wholly at the mercy of the commission in question, and have by so doing seriously infringed upon municipal autonomy. Experience has shown that, deprived as the governments and legislatures are of effective checks upon the commissions, these bodies have involved the provinces in financial obligations for which there was no parliamentary warrant. The embarkation of the province of Ontario in extensive engineering schemes, even if these were properly estimated and adequately investigated, is clearly inexpedient at the present critical time, when the resources of the province are already heavily engaged, and may ere long be still more heavily engaged in providing the means necessary for the conduct of the war and afterwards for the liquidation of its cost.

International Waterways Treaty.

The schemes of the Ontario Hydro-Electric Commission cannot possibly be carried out without revision of the treaty between Great Britain and the United States respecting the international waterways.

The following practical suggestions may be added :—

1. That the attorney-general of Ontario should be strongly urged, on grounds of public policy, to grant a fiat or fiats in order that the legal questions connected with the development of power at Niagara may be thoroughly settled in the courts.

2. That the prime minister of Ontario be strongly urged, on grounds of public policy, to disclose without delay the terms of the report upon the Hydro-Electric affairs by Mr. Clarkson, C.A.

3. That at the present time no unnecessary public works should be undertaken.

4. That at the present crisis in international affairs no steps be taken which might involve Great Britain and the United States in renewed controversies over boundary waters.

5. That the legislation respecting the Hydro-Electric Commission in the years 1916 and 1917 be disallowed as contrary to public policy.

According to estimates made by Robert Lynn Cox, vice-president of the Metropolitan Life, $3,000,000,000 of the total insurance of $25.000.000.000 in force in the United States is held by persons subject to the selective draft.

COMMISSIONS TO AGENTS NOT RESTRICTED

Insurance Act Amendments in House at Ottawa—Uniformity of Legislation

Commissions to insurance agents are dealt with in section 53 of the proposed amendment to the insurance act. A brief discussion took place on this in the House at Ottawa recently. "Does the bill place no restriction on the amount of commission," asked Mr. Sinclair. Sir Thomas White replied: "We have not thought it necessary to restrict the amount. The time may come when we shall feel obliged to do so."

Mr. Sinclair: Why say at the end "unless it is determined in advance?"

Sir Thomas White: I do not see any object in these words. The superintendent of insurance informs me that the object of the section is to have an established rate of commission so that the rate will not vary unless determined in advance. This requires the company and its agents to enter into a contract.

The discussion then turned to uniformity in insurance legislation.

Uniformity in Insurance.

Mr. Marcil: Has any move been made to bring about uniformity in insurance legislation between the Dominion and the provinces in order to protect policyholders, so that, for instance, a company before undertaking business would be required to make a deposit sufficiently high to guarantee its policyholders?

Sir Thomas White: By the act of 1910, the Dominion Parliament assumed to regulate provincially incorporated fire and other insurance companies doing business outside their own provinces. It has been held that the Dominion has no such power. We are now proposing to enable any provincially incorporated insurance company to take out a license and subject itself to the provisions of this act. But many companies will not do that, and they will still remain subject to provincial legislation and will carry on business subject only to the safeguards provided by the several provinces. We could not assume authority over such companies unless the British North America Act was amended or unless we could get the provinces to enact legislation similar to ours so as to bring about uniformity in insurance laws in the Dominion.

Protection to the Public.

Personally, I think, that would be a highly desirable thing to do. We would be delighted if that were done, because protection would be afforded to the public, and that is what my hon. friend wants. Unfortunately, all the provinces would not take the same view of this matter as we do, and a considerable feeling of jealousy in regard to provincial rights enters into the question. A good way of dealing with it would be—if the time were opportune—for the Dominion to take the initiative—and get representatives of the several provinces to meet and take up the whole situation frankly. Public men generally look at public questions in the same way at a public conference, and I think a good deal might be done along that line. In the midst of the war it is difficult to find time for things like that, but I think my hon. friend's idea is a good one, and we might be able, at a conference, to agree upon uniform legislation, the object of which would be to protect the public. Of course, provincial legislatures are just as desirous, and the provinces are as anxious to protect the public as we are.

William Gibbons, of London, is said to have been the first man to have his life insured. On June 18th, 1853, he signed a contract with eight men by the terms of which he was to have his life insured for £283 for one year for 8 per cent. of this amount. In 1859 a resident of a Connecticut city was travelling in England and became interested in the workings of accident insurance for travellers. So he came home and promoted the first accident insurance company in this country. His first client was a resident of Hartford, whom he insured for $5,000 against injury in his stroll from the post-office to his home. Marine insurance goes back to the early part of the fourteenth century and comes from Belgium

CHANGING THE BRITISH COINAGE

Arguments For and Against Adoption of Decimal System

There have been many discussions in Great Britain lately regarding the adoption of a decimal system of coinage. The London Stock Exchange Gazette says: The vexed question of establishing in this country a decimal coinage and adopting the metric system of weights and measures continues to be keenly debated by various public and commercial bodies. Generally speaking, there would appear to be a strong current in favor of the proposed changes, which are advocated on the ground that they would greatly facilitate dealings with foreign customers unfamiliar, and never likely to become familiar, with our peculiar currency denominations and weights and measures. It is only fair, however, that the opponents of any alteration of our existing system should obtain a hearing, and that their objections to what is admittedly a revolutionary change should be carefully considered. They point out at the outset that the cost of the change to the nation would be enormous, and that the time necessary to bring into operation so far-reaching a revolution would be considerable. Our existing system of book-keeping would have to be scrapped, and everybody engaged in business, whether in the counting-house or the shop, would have to familiarize himself with what is, after all, a system of currency, weights and measures no less complicated than our own. We quite acknowledge the difficulties to be encountered on this score, and if the object in view can be obtained by any other method we should most certainly welcome it.

Simple Factor Device.

Mr. W. F. Scott Armstrong, F.C.I.S., is sponsor of such a method, which claims to get over all the difficulties arising from the enforcement by various countries of different monetary and metric systems. Under his plan our existing coinage, weights and measures would all be maintained, and by a simple device, involving no complicated calculations, British prices can be translated into any foreign currency, weight, or measure, or the reverse process of translating foreign prices into their British equivalents can be performed with equal facility. How the scheme works will be made clear if we cite some imaginary example of its operation. We will suppose a British merchant is prepared to sell cloth at so much per yard and anxious to quote his price in francs per metre to a potential French customer. Under the simple and ingenious method sponsored by Mr. Scott Armstrong, all he has to do is to multiply his price by a factor to be found in a book of tables shortly to be published, when he arrives at the desired quotation expressed in French measures and currency.

Tables Would be Invaluable.

The tables above referred to cover practically all known currencies and systems of weights and measures in use in the commercial countries of the world, great and small, and with their assistance it is possible by a brief sum in multiplication to convert into any foreign currency, weight or measure the English price of any marketable commodity. It goes without saying that such tables will be invaluable in preparing catalogues for the foreign market, and in quoting prices in familiar terms to customers, whether in, say, Chile, Russia, or the Straits Settlements. A most important feature of the system is that the foreign price can always be calculated at any desired rate of exchange, so that under this method a difficulty which is not provided for under any system of decimal coinage or metric weights and measures is automatically surmounted.

Opinion of "The Investors' Review."

Is it necessary for us to adopt the metric system in our weights and measures? This question is asked on several grounds, but most of all on the ground expressed in the further questions—whether the end sought would be attained by the change, and whether, if attained, it would recoup us for the expense? Let us look at the subject a little from these points of view. It is undeniable that our commerce with countries using this metric or decimal system might be made easier to conduct, but its adoption would not necessarily facilitate the conversion of their money into ours, not even if all the world used coins of identical value.

The same question applies to weights and measures. We have no prejudice in the matter; but it is necessary to point out considerations of this kind once again, and before it is too late. Moreover, our small change for the shilling represents a much greater divisibility of the coin than the decimal sub-divisions of a franc, mark, piastre, or any other decimal coin. Our poor, therefore, and this is well worth the consideration of bankers, stand to lose by a change or revolution which would render the fine shading of prices we now enjoy impossible, although there is not the same trouble arising through variation in the substances weights and measures dealt with as in the case of money. But there will always be the difficulty of persuading the people to use the new weights and measures.

Change Would Involve Expense.

It would be a most expensive change. The whole of our weights and measures would have to be altered, recast, the whole of our bookkeeping system remodelled, and all this would mean an outlay of a good many millions sterling at a time when we have no thousands even to spare for non-essentials.

These observations have been excited, in part, by what we have seen of a simple method recently worked out, by which the British standards of weights and measures and money can be readily converted into metric or decimal values, or vice versa, thus saving the trader or manufacturer from much distasteful work. This method is, like all great good things, so simple that the marvel now is how it should have been so long unthought of. We have no interest whatever in the thing save on one point. If this or any method can be utilized generally, then we should avail ourselves of its help to enable us to postpone any such revolutionary and costly change as the conversion of all our existing weights and measures and our denominations of money would involve.

RESTRICT SHIPMENTS OF STEEL FROM STATES

The United States Department of Commerce, through the Exports License Division, makes the following announcement:—

"The attention of shippers to Canada is called to the presidential instructions given to the press on August 2nd concerning shipments of iron and steel products covered by the proclamation of July 9th, which instructions supersede all previous regulations. Up to the present, shipments of those iron and steel commodities into Canada have been facilitated through the granting of special licenses issued through the collectors of the ports. From this time on, special licenses will be required on all shipments of iron and steel products, in accordance with the President's instructions of August 2nd. Shippers will, therefore, save themselves annoyance and delay if they will apply for licenses before making shipments to Canada, as otherwise such shipments will be held up at the border."

CANADIAN NORTHERN AND FOOD CONSERVATION

The Canadian Northern Railway has asked the co-operation of all travellers in helping to win the war by the conservation of food and elimination of waste. In a recent statement the company says: "We have been striving to meet this situation for the past twelve months having before us three essential facts: First, to conserve the food mostly needed for our soldiers and Allies; second, to reduce our selling prices to meet the pockets of all classes; and third, to reduce the portions accordingly, and thus eliminate waste. To reduce the consumption of flour, we propose serving one standard white bread, and would urge the free use of corn bread and corn muffins. Young veal, young lamb, young pork, squab chickens and turkeys will not be purchased or offered for sale on any of our dining cars. We would encourage the use of fish and all sea food, as the selection is sufficiently varied to meet almost any taste. Fowl, fresh vegetables and fresh fruits will be freely used. Potatoes will be served in various forms. Use potatoes wherever you can instead of bread, and thus save more wheat for the Allies. Do not be wasteful with sugar. To regulate the consumption of cream we are instituting again the individual creamer, as we find the use of the large cream jug leads to waste on account of contents left in same going sour."

Safe and Remunerative Bonds

At the present time the investor should exercise unusual discrimination in making conservative selections. High-grade Government and Municipal Bonds constitute one of the most desirable investments, offering not only absolute security of principal, but also liberal return in the way of income. They may now be secured

to yield up to 6¼ per cent.

On request we will be pleased to mail our list, which contains full particulars of a wide range of these Bonds, yielding this attractive interest return.

AMERICAN BANKERS DROVE HARD BARGAIN

Our $100,000,000 Loan, With Discounts and Expenses, Cost About $4,750,000

According to a New York dispatch on Friday last, a cheque for $96,111,111.11, the largest ever recorded in the New York Clearing House, drawn by J. P. Morgan and Company, for the credit of the Minister of Finance and Receiver-General of Canada, in settlement of the $100,000,000 loan recently floated for the Dominion by a syndicate headed by the Morgan house, was paid there on August 10th, by the Liberty National Bank. The largest previous cheque shown in the clearing-house records was more than $26,000,000 less than the Canadian cheque.

While the reception of the Canadian 5 per cent. 2-year loan of $100,000,000, in the United States was fairly satisfactory, the high price paid for the money will be a matter of concern to other borrowers. The issue was offered to the public at 98, yielding the investor 6.07 per cent. Sir Thomas White, finance minister, stated in the House at Ottawa on Monday that the net proceeds of the loan were $96,250,000 and that commissions and other charges had amounted to about 1¾ per cent. This is a pretty high price to pay for money, having regard to the circumstances.

Messrs. J. P. Morgan and Company, with Brown Brothers and Company, and Harris, Forbes and Company, were the syndicate managers of the group (including the First National Bank, New York City, Guaranty Trust Company of New York, Wm. A. Read and Company, Bank of Montreal, National City Company, New York City, and Bankers Trust Company, New York City), who offered the two-year 5 per cent. gold notes. Last week, they sent out a notice to syndicate members stating that subscriptions had been received in sufficient volume to relieve entirely the syndicate members from liability as participants.

Severe Test of Banks.

Bond experts and borrowers who are anxiously watching the money market, with the object of floating loans at the first favorable opportunity, view the reception of the Canadian loan and the price paid for the accommodation as rather ominous signs for future Canadian issues in the United States. Commenting on the price paid for the money, The Montreal Journal of Commerce says:—"The rate is the more startling when we remember that the United States government has floated its own big loan at 3½ per cent., with no charges for commissions. Thus we are paying about double what our neighbors pay for war money. It is not a pleasing feature of the situation, but it is easier to point out the trouble than to provide a remedy for it. Canada needs the money and it is fair to assume that the terms, severe as they seem, are the best that could be obtained in the New York market.

"This transaction must tend to warn all concerned of the seriousness of the financial situation. We are approaching the harvest season, when our banks require a large volume of money for the moving of the crops and the handling of the general business of the country. The floating of another Canadian loan at home at this time might be possible, but its success would probably necessitate a material restriction of banking accommodation for ordinary business. Even with the help that has been obtained from the States the government will still need funds for which they must look to the banks for temporary accommodation. The ability of the banks to provide funds will thus be put to a severe test which can only be met by the curtailment of all operations not of a very urgent character."

"Somewhat Hard Bargain."

The Montreal Chronicle takes a similar view. "The terms of the new issue," it says, "appear somewhat stiff, in view of the fact that Canada is the United States' second-best customer. However, present conditions are all in favor of the lender. The enormous credits being asked for at Washington apparently presage another early appeal by the United States government itself to American investors, although the immense Liberty loan has only just been subscribed, and the position in the United States in regard to foreign government issues is undoubtedly 'waterlogged.' That the entrance of the United States into the war would result in making Canadian financing more difficult and expensive was foreseen. After every allowance for present-day circumstances, however, it will be difficult to disabuse the mind of the Canadian financial community of the impression that American bankers have used the opportunity to drive a somewhat hard bargain."

COMPANY DIRECTORS AND COMMISSIONS

How the Amended Insurance Act Reads—The Moral of the Union Life Collapse

The regulation of salaries and emoluments of insurance companies' directors was discussed in the House at Ottawa recently, when the proposed amendments to the act were under consideration. Section 56 of the act provides that a salary agreement should be for not more than five years. Here is the text of the discussion:—

Mr. Sinclair: I intended to ask the minister in regard to the policy of allowing directors to take commissions. The first provision of section 56 appears to imply that the directors of the company may be allowed to make a contract to secure business, and obtain a commission from the company on the business secured. Is it not rather unusual that that right should be extended to the directors who are representing the shareholders as well as the policyholders? If a director is allowed to decide the question of commissions for himself, he might be liberal. I want to know what the minister thinks of that section.

How the Section Reads.

Sir Thomas White: I think my hon. friend has misread the section. I direct his attention to section 55, which says:—

"No salary, compensation or emolument shall be paid to any director of a Canadian company carrying on the business of life insurance for his services as such director unless authorized by a vote of the members in the case of a mutual company, and by a vote of the shareholders and other members, if any, in the case of a company having capital stock."

Section 56 reads as follows:—

"No such company shall make any agreement with any of its directors, trustees, officers or agents, to pay for any services rendered or to be rendered, any salary, compensation or emolument, extending beyond a period of five years."

Would Prohibit Arrangement.

That would prohibit a company making an arrangement with a director for emolument for a period of ten years. The principal reason for this is that it was drawn to our attention that some most improvident contracts had been entered into, notably one in the case of the Union Life. There was a company called the National Agency Company which acted as agent for the Union Life and had an agreement with the Union Life extending over thirty years, whereby the National Agency Company was to receive a commission upon all business obtained for the Union Life. When we threw the Union Life into liquidation the claim of the National Agency Company became a very heavy one, for they were prepared to set up this as a contract worth several hundred thousand or a million dollars, because for thirty years they would be entitled to take commission upon all the business of this company. A claim like that, of course, is not allowed by the courts, but no doubt the sum that would be allowed, if the contract were held to be valid, would be a serious matter, as far as the rates of policyholders and the rights of other creditors were concerned. It was a most improvident contract, and we have inserted a provision in the insurance act, which limits the contract to a period of five years, with this limitation:—

"That the restriction shall not apply to agreements with agents in respect of insurance secured or to be secured by such agents, such insurance amounting in any year to less than twenty per cent. of the total insurance secured in that year by the company."

That is the explanation of that provision.

Calgary's association wool sale has closed with the highest record in prices ever paid any association. Bids were opened last week by E. L. Richardson at the exhibition office, and the highest prices reached to 74 cents. Average for the 150,000 pounds was 60 cents. Last year's average was 29.2 cents, in 1915, 27.79, and in 1914, 19 cents. The lot went to Koshland and Company, Boston.

GOVERNMENT INSURANCE PLAN FOR SOLDIERS

United States Will Try It Instead of Pensions—Outline of Scheme

Considerable interest has been taken by Canadian life underwriters in the United States government's proposal to establish a system of life and accident insurance to be carried by the government in lieu of pensions; and to provide additional insurance for soldiers and sailors at moderate rates.

By the act of congress approved September 7, 1916, provision was made for the compensation of all civilian employees of the United States and of the Panama Railroad Company in the event of disability or death incurred in the performance of duty, and more than three-fourths of the states have enacted workmen's compensation laws for a similar purpose. The beneficial effects and wisdom of such laws are almost universally recognized both by employers and employees, and the principle upon which they rest is now recognized as a valuable acquisition to public policy. It is thought that the soldiers and sailors should have not only the full benefit of this protective principle, but the greater hazard of their service, its vital importance, and their inability to buy insurance except at rates which in many cases would be prohibitive, emphasizes the duty of the government to make proper provision for them and their dependants.

The Monetary Times has received officially from Washington some details of the scheme as outlined by Mr. Edwin F. Sweet, United States assistant secretary of commerce. He says:—

"Before a definite, workable plan can be devised many details must be considered and an opportunity should be given to those engaged in the insurance business, to representatives of the army and navy, and others interested to fully express their views so that the subject may be carefully considered from every possible angle. Information has been requested as to what provisions along this line have been made by the other leading nations engaged in the war and this may be of service.

General Plan Outlined.

"It is, however, possible at this time to suggest the general outlines of a plan for consideration and constructive criticism. I believe there should be created, in connection with one of the existing executive departments of the governments, a soldiers' and sailors' indemnity bureau, with a competent man of insurance experience at its head; that the necessary actuarial and clerical assistance should be provided; that protection for a definite amount, not exceeding $4,000, should be automatically furnished to every one in the military and naval service of the United States without regard to rank and without expense to the insured; that such insurance or protection should cover partial and total disability as well as death; that no medical examination should be required except that necessary for admission into the service; that all losses should be paid in regular instalments; that all adjustments should be made with the least possible delay; and that a limit, analogous to statutes of limitation, should be fixed for the correction of records and the presentation of claims.

"As concrete evidence of the government's obligation a certificate or policy might well be given to each soldier and sailor. This would materially add to its moral influence.

"In addition to the protection thus furnished to all engaged in war service, I think the same bureau should be authorized to furnish death and casualty benefits or protection to soldiers and sailors to the amount of $6,000 to one individual, upon terms as favorable as in times of peace. From the experience of the bureau of war-risk insurance it is conceivable that this can be done by the government without material loss. The funds that a private corporation applies to commissions, medical examination fees, advertising, etc., would be available by the government for the payment of losses. But if loss should result, a proper recognition of the obligation conferred upon the general public, by the defenders of their country demands that it should be met by the government, and thus fall upon all who receive the benefit of the service rendered rather than upon those who render it.

"With admirable patriotism many life insurance companies, I am informed, have already notified their policyholders that policies issued prior to the entrance of the United States into the war will continue in full force without the payment of additional premiums, even if the insured engage in the military or naval service outside of the United States. But prudence and a proper regard for their present policyholders forbid that insurance companies take on an additional indefinite number of risks subsequent to our entrance into the war without the payment of premiums commensurate with the greater hazard involved in war service. To determine this in advance with any degree of accuracy is impossible, and rates are suggested which are considered prohibitive.

"Men engaged in war service who wish to buy protection for their dependants and themselves beyond that freely furnished by the government ought not to be left powerless to do so. On the contrary, sound public policy dictates that the purchase of additional insurance should be encouraged. It means fewer dependants in the future. I therefore believe that both justice and self-interest demand that the government itself furnish such insurance. This has the further advantage of introducing an element of flexibility into the system which can not well be provided in the fixed amount of insurance to be furnished without expense to the insured, and adapts it to the varying needs of families which differ in the number of dependants or in the accustomed scale of living.

Some General Suggestions.

"The following suggestions have been made: 1. That the government bureau or the department of which it is a part be given authority to arrange with one or more insurance corporations for the transaction of this business if expense can be saved thereby.

"2. That at the close of the war impaired risks which have not become actual claims but which insurance associations would not accept, be continued by the government.

"3. That the amount of protection to be furnished without cost to the insured be in proportion to the number of dependants, even though the total may, in exceptional cases, exceed the suggested maximum of $4,000.

"4. That discretion be given to the bureau for the payment of benefits in instalments of varying amount whenever it should be clearly shown that the interest of the beneficiaries requires it."

AVERAGE AGE AT DEATH BY OCCUPATIONS

The following table of the average ages at death according to occupations is the result of investigations made by Dr. Louis I. Dublin, statistician of the Metropolitan Life, into the mortality experience of the industrial branch of that company:—

Occupations.	Average age at death.
Bookkepeers and office assistants	36.5
Enginemen and trainmen (railway)	37.4
Plumbers, gasfitters and steamfitters	39.8
Compositors and printers	40.2
Teamsters, drivers and chauffeurs	42.2
Saloonkeepers and bartenders	42.6
Machinists	43.9
Longshoremen and stevedores	47.0
Textile mill workers	47.6
Iron moulders	48.0
Painters, paperhangers and varnishers	48.6
Cigarmakers and tobacco workers	49.5
Bakers	50.6
Railway track and yard workers	50.7
Coal miners	51.3
Laborers	52.8
Masons and bricklayers	55.0
Blacksmiths	55.4
Farmers and farm laborers	58.5
All occupations	47.9

Meetings of the eastern and western sections of the Bond Dealers' Association of Canada were held last Tuesday, the former section meeting at Montreal and the other in Toronto.

Montreal Cottons has declared its regular quarterly dividend of [illegible] on the common and of 1¾ per cent. on the preferred, both payable September 15th to holders of record September 5th.

Service for Women

In the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

A SQUARE DEAL IN LIFE ASSURANCE

"First in the Northwest."

Do YOU know anything about "loadings"???

When the average Life Assurance Actuary figures out your premium he first finds the "net" premium, then adds to it a percentage called a "loading" to provide for expenses.

This method has been condemned by world famous actuaries for over half a century.

The Northwestern is the only Canadian Life Company that uses a scientific method of providing for expenses, and this results in

LOWER PREMIUMS

WORKMEN'S COMPENSATION IN ONTARIO

Report of the Board for the First Half Year—Nearly Sixteen Thousand Cases Dealt With

During the half-year ending June 30th, 1917, there were received by the Ontario Workmen's Compensation Board 15,954 reports of accidents, 13,243 of them being in Schedule 1 industries, 2,700 in Schedule 2, and 11 being Crown cases. The total number of accidents reported from January 1st, 1915, when the act went into force, to June 30th, 1917, was 55,024, 45,419 of them being in Schedule 1 industries, 9,567 in Schedule 2, and 38 being Crown cases. The number of fatal cases reported for the first half of 1917 was 242, 160 of them being in Schedule 1 industries and 82 in Schedule 2. The total number of fatal cases reported since January 1st, 1915, was 865, 636 of them being in Schedule 1 industries and 229 in Schedule 2.

Medical Aid Amendments.

The new medical aid provisions passed at the last session of the legislature went into effect on July 1st, 1917. Under these provisions workmen meeting with accidents on or after that date will be entitled to necessary medical and surgical aid and hospital and skilled nursing services for a period not exceeding one month. This will apply to all cases severe enough to require such services, notwithstanding that the workman may not be disabled long enough to entitle him to compensation.

Under subsection 10 of the new provisions employers are, where the number of workmen employed warrants it, to be required at their own expense to provide at their factory or plant first aid or emergency equipment. This will include antiseptic dressings, etc., with a view to avoiding blood-poisoning or other complications in minor accidents, and will give the necessary emergency first aid before a doctor can arrive in the more serious ones.

Employers' First Aid Compulsory.

A large number of employers have already been furnishing such first aid and it is considered desirable and a matter of justice to both workmen and employers generally that it should be made compulsory.

Apart from the first aid above mentioned, the doctor and hospital bills are, in Schedule 1 industries, to be rendered to and paid by the board in accordance with the provisions of the act. In Schedule 2 industries it is the duty of the employer individually to provide and pay for medical aid as well as first aid.

Employers are not in any case permitted to collect or retain from their workmen any contribution towards the one month's medical aid in accident cases which it is now provided the workmen are to have free of charge, nor are they to collect from their workmen for the first aid above mentioned.

PAPER ACCOUNTANTS TO CONFER

The Canadian government has written the Federal Trade Commission of the United States, asking use of such figures obtained in the Federal Trade Commission's investigation into costs of news print as might aid Canadian officials now engaged in an investigation into news print costs in the Dominion.

The request came from Robert A. Pringle, K.C., commissioner in charge of the Canadian investigation. Accountants are now at work at Canadian mills preparing statements of costs. Such statements, it is understood, are to be submitted to the manufacturers when completed, following which a public hearing will be held at which all parties interested will discuss the statements.

Commissioner Pringle has suggested that Mr. Geoffrey Clarkson, at the head of the Canadian accountants, confer with the accountants who handled the news print investigation for the Federal Trade Commission and submit copies of the Canadian accountants' reports. Commissioner Pringle also has requested a meeting with Chairman Harris, of the commission, in Washington. The commission has replied that it would be glad to comply with Mr. Pringle's request at some future date, to be settled by agreement.

PUT IT IN BANKING TERMS

"Mr. S[illegible] If you die at any time, either to-morrow or fifty years from now, I will place $5,000 to your wife's credit in my bank. If you die before the twentieth year, all interest payments cease at your death, and if you live longer than twenty years, the interest payments cease at the twentieth year; if you are still alive twenty years from now, and care to discontinue the arrangement, I will pay you back all of your interest. If your banker should make you such a proposition you would take it at once, wouldn't you? Yes, indeed, you would. Well, that is all a twenty-payment life policy is."—Alfred Parker.

WAGE-EARNERS AND INSURANCE

Insurance under which all wage-earners on small salaries are compelled to accumulate a reserve during their period of productive activity, which will, at least, in part defray the expenses during periods of disability, was advocated by Dr. Alex. G. Blackader, president of the Canadian Medical Association, and acting dean of the McGill Faculty of Medicine, in his presidential address to the Canadian Medical Association at Montreal. Experience would indicate, he said, that such insurance could be best carried out under government control, on what might be considered a socialistic basis. He urged upon the association the necessity of immediate action in this direction, and asked that a committee be appointed to consider the question and possibly draft a bill.

Insurance of this nature had been adopted in many countries. Before the outbreak of the war it was introduced in Great Britain by Lloyd George. Although condemned by the medical profession at the time, it has since proven acceptable to them, and by doing away with gratuitous services had considerably augmented their incomes.

PRINCE RUPERT'S IDLE PLANT

The following is a plea from the Prince Rupert Daily News for the building of wooden ships at the plant in that port:

"The largest and best-equipped shipbuilding plant on the British Pacific coast, says the paper, was ready for use when the war broke out. Both steel and wooden ships can be built at this plant more cheaply than anywhere else in British Columbia. The large floating drydock—the best on the Pacific coast, with a lifting capacity of 20,000 tons—has been ready for operation for the past two years, but no ships have been built and very little has been done, and that little was when the Admiralty requisitioned it. This plant has cost $2,199,000. It was designed by William T. Donnelly and constructed by the Grand Trunk Pacific Railway Company. After the completion of the plant and acceptance, interest on the bonds at 3½ per cent. is guaranteed by the Dominion government. At the present time there is a question of tools and equipment, valued at $3,438, before the government will accept it as complete—the merest trifle in a plant of this magnitude.

"They tell us that it costs too much to send steel to Prince Rupert, being so far from the source of supply. But Rupert has the same terminal rate as Vancouver. They also tell us that we have no fir here, and that the expense might be a little greater. We reply that we have much better than fir in yellow cedar, and that the cost of producing the same ship in Prince Rupert, even though we have to bring in the fir, is about 10 per cent. less than in any Vancouver plant. The British Empire needs ships, wood or steel. The Prince Rupert plant could have turned out twenty since the war started. It has been idle. This fact has been known to the government of Canada, and in the last analysis that government must be held responsible."

SELECTION OF INSURANCE SALESMEN

Suggested Table Showing Combined Experience of All Companies With Agents

"It frequently happens that many men who are properly selected are afterwards classified as failures." This statement was made by Mr. A. N. Mitchell, superintendent of the Canada Life, of Toronto, at the recent salesmanship congress at Detroit. He added that selected men frequently fail to produce because they have been wrongly placed after selection. Phases of life insurance soliciting which fit one man do not necessarily fit another. Even contracts should be adjusted to suit a type. As an example, he cited the case where two agents were working in nearby territories and both were doing poorly. One was working under a partial salary, and was so constituted that the certainty of a monthly income destroyed his force. The other, working under purely commission conditions, did not feel the binding force of his employment and gave only half-hearted results while he dabbled in other lines. When their positions were reversed both men succeeded. Another case was that of an agent, with a fair record, who became imbued with a scorn for small cases and spent much time dreaming of the large cases he idealized and drafting beautiful details of propositions for wealthy men who often gave him a poor hearing. He failed to materialize enough "large business" to warrant the company in continuing to finance him, but before dropping him a heart-to-heart talk made him see the benefit of persistent daily work, taking the small with the large, and to-day he is again a satisfaction to his company.

A Proposed Experience Table.

A large personal producer got at cross purposes with his manager. Shortly his own results were much reduced, as were also those of the whole agency. By mutually satisfactory arrangements he became connected with another company. Both he and the organization he left then renewed their successes.

The speaker pointed out that every failure must not be entirely attributed to selection of the man, but selection of a proper environment, equipment and general conditions to fit the man must also be made. This really demands a double selection. As a possible means of eliminating the probable failures from selection, Mr. Mitchell suggested that there be some sort of experience table constructed that would show the combined experience of all companies with agents. This table should, of course, be based upon standardized types which might be possible to formulate by the co-ordinated efforts of the members of the association. A tabulation of successes and failures might enable agency men to select men more accurately. Mr. Mitchell said: "We have generalized on the necessity of finding men with certain qualities which our own experience has led us to think brings success, but we have not attempted to make any combined search for the cause of these characteristics or for a method of distinguishing those characteristics in the crude material before they demonstrate themselves by success or failure."

Two Divisions—Seeker and Sought.

Continuing his analysis of this proposal, Mr. Mitchell said: "There are two basic facts in the selection of agents which it would appear should be taken into consideration in attempting to arrive at a decision on methods of standardizing selection. In the first place, agency positions are filled from two broad sources. First, from those who seek the position; and secondly, from those whom the position seeks. While these two broad divisions on first approach seem too simple to require discussion, yet on consideration it would seem that they also compel us to take two distinct lines of investigation. It would seem that in the experience of most agency officers, the largest number of successful producers are secured from the second class, namely, those whom the position sought. It has at least been my experience that, as a rule, the average successful type of insurance man does not in the beginning apply for an agency position of his own accord. Someone has 'sold him the job.' In connection with men seeking the position, considerable progress has already been made by well known investigators towards developing standardized, or what are sometimes called 'laboratory,' tests, which will, to some extent at least, demonstrate fitness for the business involved. This type of test cannot, it seems to me, be applied satisfactorily in our business in a large number of instances."

Here Mr. Mitchell referred to some figures quoted by Mr. Taylor relating to the Equitable Life's experience, saying that the figures did not mean much without a tabulation showing the number of successful men who had been selected from the various groups. It is interesting enough to know where the largest percentages of men come from, but it would be much more valuable to show what percentage of the men who answered advertisements made a success as compared with the number obtained from other sources. "It is probable that no other business has such an insatiable appetite for new employees. In fact, many of us find our chief occupation in searching for men who will consent to give the business a trial. We are in most cases not dealing with applicants, but are actually selling our proposition to more or less unwilling users."

There appears from this standpoint to be a weakness in any "laboratory" plans yet devised for selection. Such selection has, to some degree at least, up to the present, I believe, taken for granted the submission of the applicant to a process of investigation. It is undoubtedly true, however, in a large number of cases that the applicant is in the beginning not an "applicant," but merely a "prospect." In his position of "prospect" it is not usually feasible to obtain his permission to submit himself to the so-called "laboratory" tests.

In the great majority of cases the party who is attempting to find a life insurance producer has to make up his mind, through personal but casual observation, that a certain prospect is one fitted for the business, and then sell him the position. The fitness, however, has to be determined usually before the sale is commenced, and this means before the prospect has really seriously considered becoming an applicant for the position.

Men Beginning Early Succeed.

Mr. Mitchell briefly commented upon the experience of his own company, saying: "Upon locating the origin of our field men we have found that the largest group of successful whole-time writers have been in the business from early ages and a large proportion of this group have received their whole training within our own ranks, quite a large proportion of this group having come from our branch and head office clerical staffs. (In 1916, in fact, it is rather worthy of note that this latter portion of this group gave an average production per man of over $196,000). This would seem to indicate an advantage in starting men in the business early."

Concluding his discussion, Mr. Mitchell said:

"There would seem to be a practical agreement among officers as to certain qualifications to be looked for in searching for field representatives. It is questionable, however, if any one man can give an adequate judgment as to such qualities in another. Hence, as said before, it is best to have several parties interview the proposed representative before deciding on his qualifications. If it could be arranged that each of those reported upon could be classified by several competent officers of the companies reporting, as to the qualities, which some committee of this association should decide as essential, and if the average of these classifications could also be added to the information in the docket regarding each case reported upon, this would also, if feasible, be of assistance.

"To put the matter briefly, it appears to me that we have been considering methods of testing new prospects without having first arranged to analyze the material already on hand and which would, if properly digested, furnish the standards whereby we could judge others.

"Whether plans could be arranged whereby information of this type coming from many sources could be so tabulated and digested as to be easily available is, of course, a problem which would require consideration from many angles, but I submit that if some such plan could be successfully formulated it would greatly assist many of us who at present labor in this matter of selection with more or less variable results."

Washington reports are to the effect that the treasury department is considering a rate of 4 per cent, or higher on a new issue of $6,000,000,000 bonds. Even though action on such a request should be delayed until the regular session of Congress, it ought to be helpful to the forthcoming sale of $3,000,000,000 Liberty Loan bonds, the balance of the issue first authorized, as there is a provision in the terms of that issue that those bonds may be converted into any issue bearing a higher rate issued during the period of the war.

DIVIDENDS AND NOTICES

The Royal Bank of Canada

DIVIDEND No. 120

NOTICE is hereby given that a DIVIDEND OF THREE PER CENT. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the Current Quarter, and will be payable at the Bank and its Branches on and after SATURDAY, the FIRST DAY OF SEPTEMBER next, to Shareholders of record of 15th August.

By order of the Board.
C. E. NEILL,
General Manager.
Montreal, P.Q., July 17th, 1917.

UNION BANK OF CANADA

DIVIDEND No. 122.

Notice is hereby given that a Dividend at the rate of eight per cent. per annum, upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House, in the City of Winnipeg, and also at its Branches, on and after Saturday, the 1st day of September, 1917, to Shareholders of record at the close of business on the 16th day of August, 1917.

The Transfer Books will be closed from the 17th to the 31st day of August, 1917, both days inclusive.

By Order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, July 17th, 1917.

BANK OF MONTREAL

Notice is hereby given that a **Dividend** of **Two-and-one-Half** per cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, payable on and after Saturday, the **First Day of September** next, to Shareholders of record of 31st July, 1917.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 20th July, 1917.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 122

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Saturday, 1st September, 1917, to shareholders of record at the close of business on the 16th day of August, 1917.

By order of the Board.
JOHN AIRD,
General Manager.
Toronto; 28th July, 1917.

At a meeting of the Board of the Royal Trust Company at Montreal last Tuesday, Lieut.-Col. Bartlett McLennan, D.S.O., and William McMaster, were elected directors. Lieut.-Col. McLennan has been on active service with the 5th Royal Highlanders at the front for some time. When he went abroad he was president of the Montreal Transportation Company and the Prescott Terminal Company. He is a director of several concerns. William McMaster is one of the city's best known capitalists, being a director of the Bank of Montreal and several other companies.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c per word, other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

WANTED.

EXPERIENCED MAN as commissioner, Saskatoon Board of Trade; state qualifications and salary expected. Apply earliest, to W. H. Kirkpatrick, President, Saskatoon, Sask.

WANTED.—For a Bond and Debenture house in Toronto, a young man experienced in the Bond Business. Apply with references, Box [illegible], *The Monetary Times*, Toronto.

TABLES OF POLICY VALUES

At a recent meeting of the Actuarial Society of America in New York, Mr. A. D. Watson, actuary of the Canadian Insurance Department, Ottawa, contributed a paper on the subject, "Notes on Calculation of Tables of Policy Values." The paper deals primarily with the adaptation of familiar processes for the continuous calculation of terminal reserves (except the "accumulation formula" methods) to the direct calculation of medial reserves continuously and with the same rapidity, the working sheets being in all cases suitable for printer's copy. The work is carried out on the arithmometer, each operation giving a medial reserve.

Except in the case of all-life reserves, the differences of temporary annuities and the mean of these differences are required. Methods are given for the continuous calculations of these factors, whether in medial or terminal form; and it is suggested, bearing in mind the general usefulness of these differences and that they may be calculated in the same time as a table of temporary annuities, that in most cases where a table of the latter is required it would be better to calculate the differences first and sum continuously to get the annuities.

In the calculation of reserves by the methods outlined, practically the only figures tabulated not finally required for printer's copy are the annuity differences. If the reserve tables are extensive the calculation of the annuity differences will not be relatively important. It is stated that in the preparation of an extensive set of tables, mean and terminal, copy could be furnished to the printer in less than one-seventh of the time necessary if the "accumulation formula" were used.

LIFE INSURANCE AND CREDIT

It Furnishes the Best Collateral and is Excellent as a Reserve Fund

"An insurance policy is a clear bill of health certificate that is negotiable," says Mr. J. H. Baird, of the Ætna Life Insurance Company, Winnipeg, in a recent article appearing in the Credit Men's Journal, Winnipeg. "Can you conceive," he continues, "of a bank or business institution extending a line of credit to a man of doubtful character? Such a person is barred from their consideration. Would you care to extend credit to a customer if you knew that his heart was weak and a sudden shock might be followed by a complete collapse? Thus, in the last analysis, the heart of the man is the heart of the business. Whatever impairs the man, impairs the business. Your good health has a money value, and should be capitalized. The average man who seeks credit is far removed from the concern with which he does business, and, therefore, should be most persistent in analyzing all instruments that will contribute the slightest advantage towards the strengthening of his financial standing.

Creditors and the Deceased.

"It has been said that our larger mercantile agencies, in some localities, send to all those who subscribe to their credit service a notice after the following: 'John Doe, Hardware Merchant, Winnipeg, died July 1st, 1917.' Just take this home to yourself and try and determine the state of mind of your creditors if they received such a notice regarding you, and again, would the effect be any different if the report stated that the deceased had $10,000 life insurance payable to his business? The answer is clear. You must know at least one man who was doing a good business and was suddenly called by death, and whose creditors made quick work of his business. Not because they wished to work an injustice to his widow, but as a strictly business matter, they met and took immediate steps to wind up the business so as to satisfy all outstanding claims. Sales of this nature are very common, and, while these forced sales may satisfy the creditors, the owner's equity is frequently wiped out by such procedure. Now, business insurance is the great natural shock absorber. It is the only way whereby the shock that almost invariably wrecks a business, after the man-power that has been directing it is spent in death, can be taken up. Few men will continue their business in jeopardy when they perceive the great service offered them through the medium of business or corporation insurance. Just across the street from my office one of our leading banks sets forth in gold type on its front window the fact that they have seven millions of capital and seven millions of surplus. One might say that this surplus is in the nature of insurance to them. You would not do business with them if they could not show a surplus.

"The average business man," continues Mr. Baird, "cannot set aside a rest fund equal to his capital to take care of the uncertainty he is subject to, but he can, for a small sum of 1 per cent., get an insurance policy to do this for him. Do you know that every $1,000 produced by your hand and brain represents the producing power of $20,000 at 5 per cent.? Do you ever reflect that your death would destroy that producing power and take from your estate just that much capital? What sane business man would risk $20,000 stock of goods in one building without fire insurance? Yet the same stock may never be destroyed. Is it prudent to carry that much risk upon a life that is certain of destruction in a few years, and may be destroyed to-morrow? Do you know that a life insurance policy costs less than a fire policy? On an average stock of goods you may pay a rate of from 1 per cent. to 2 per cent. per annum, and in case of fire your loss would probably not exceed one-half of the stock, while it may be but a trifle."

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

In conclusion, Mr. Baird gives seven good arguments for the wisdom of business insurance:—

1. Protects insured's estate—who will not be here to look after it.
2. Strengthens credit and furnishes the best collateral.
3. As a rest fund or reserve, it is better than actual cash, even though cash were available.
4. It becomes immediate cash upon death of insured, and immediate cash is more vital to a going concern or business than to an estate.
5. For covering all liabilities, either future or immediate.
6. For covering year's dividends or insuring good-will.
7. Last, but by no means least, your customers and the community, who are largely responsible for your success, are entitled to be protected to the point where their accounts will be dealt with in a normal manner.

Plans have been filed with the Canadian government by a Windsor law firm, acting for the Canadian Steel Corporation, for docks at Ojibway to cost $250,000. The notice stated that the plans included a marine slip, harbor, docks and wharves. A canal running through the corporation's property for 2,500 feet, which will be 200 feet wide and 25 feet deep, will be dredged to accommodate boats.

The Ford Touring Car

The choice of the motor buying public of Canada. It answers the needs of salesmen, collectors, business men and pleasure seekers. The Ford gives maximum service at minimum cost.

LIFE INSURANCE AND CONSCRIPTION

Most Companies Likely to Retain Present Basis of Policies—Two Interesting Interviews

"As far as the Sun Life is concerned conscription will not alter the present basis of insurance policies," said Mr. A. B. Wood, actuary of the Sun Life Assurance Company, in an interview in Montreal a few weeks ago. "Before the war, we issued an unconditional policy, allowing the insured to travel wherever he wished or to engage in any occupation. At the outbreak of the war legally we were therefore bound to continue at the same rate, if the holder of the policy volunteered for active service. In any case we continued to insure those already holding policies, at the same premium, and I should also say that nearly all the Canadian companies did the same, even when their policies gave them the right to charge an extra premium.

War Clause Added.

"Since the war, we have added a war clause to all new policies. An extra premium of $50 per annum was charged at first, which we have gradually increased to $100. If the insured does not pay the extra premium, in case of death we do not declare the policy void, but allow his beneficiaries 25 per cent. of the sum assured.

"No extra premium is charged for military service in Canada. If this country were attacked, all soldiers defending their homes would be insured at the same rate as civilians. As soon as a soldier returns to Canada, and is permanently discharged, his insurance policy reverts to the original basis and the war clause no longer applies.

"Whether a man enlists voluntarily or is conscripted, the same regulations apply in our company."

Men in Khaki.

"No company will insure a man who is in khaki, except perhaps in the medical, dental and nursing branches of the service, so that men who are liable for military service, through conscription, should get their policies at once while they are still in civilian clothes," said Mr. William Wallace, inspector of agencies for Eastern Canada, of the Confederation Life Association, Montreal, in an interview. "Just as soon as a man puts on the uniform, he is practically uninsurable.

"Shortly after the declaration of war, notwithstanding that their policies contained clauses which entitled them to charge extra premiums in case the policyholder went into active military service, most of the Canadian companies voluntarily decided to carry all risks without extra charge incurred through policies taken out prior to the outbreak of war. It was agreed, however, that in the case of all new business, some extra charge should be made, and the extra charge was fixed at $50 per annum per $1,000. This extra premium was later raised in the case of most of the companies to $150 per $1,000.

As to Companies' Losses.

"The losses sustained by the Canadian companies, as a result of this patriotic action, have not been serious, though they have amounted to considerable in the aggregate."

The following table gives the figures to the end of 1916:—

A. Enlisted soldiers killed in action or dying from wounds;

B. Enlisted soldiers dying from other causes; and

C. Other policyholders, not soldiers, dying as a result of military operations.

	Dominion licenses.	Provincial licenses.
Year 1914		
A	$ 15,07[illegible]	$ 1,[illegible]
B	1,622	1,[illegible]
C.		
	$ 17,5[illegible]	$ [illegible]
Year 1915		
A	$1,607,342	$ 70,135
B	[illegible]	10,5[illegible]
C	141,709	4,218
	$1,[illegible]	$ [illegible],853
Year 1916		
A	$4,318,839	$242,555
B	226,987	22,916
C	15,112	..
	$4,560,938	$265,516
Grand total	$6,51[illegible]	$352,[illegible]

In addition to the foregoing, Canadian companies incurred claims under policies held by British and foreign policyholders as follows:—

In 1914	$ 55,[illegible]27
In 1915	175,2[illegible]
In 1916	[illegible]
Total	$52[illegible]

"In the case of the Confederation Life Association, with approximately $70,000,000 at risk, and, after nearly three years of war, our total war claims to date have only been $303,097," Mr. Wallace continued

Some Mortality Figures.

"Again, notwithstanding losses due to the war, the mortality of no company that I know of, has exceeded what we term 'the expectancy.' For instance, we will say that, based upon the mortality tables, an insurance company figures that it will have to pay out $1,000,000 in death claims for the year. The premiums are fixed to provide fully for this. As a matter of practice, under normal conditions, the company would show a considerable margin of profit, from year to year, on its 'mortality,' or accruing death claims.

"Supposing then, again, that an insurance company figured, on the basis of the mortality tables, that it would have to pay $1,000,000 for the year in death claims. And suppose that, prior to the war, the company found that, as a matter of practice, it had to pay out, say but $600,000. Then, we have found that the war has not caused us to lose the whole of the additional amount of $400,000. As a matter of fact, higher interest rates have enabled us to distribute larger profits than ever before to policyholders in spite of higher losses. And most of the companies have been enabled to do the same.

"Those conscripted, who took out policies before the war, will not have to pay any extra premiums; those who have taken them out since the outbreak of war, or who will take out policies before they are actually in khaki, will pay the usual premium charges, plus under our present policies, an amount not to exceed $150 per annum for each $1,000 of the risk; in the event of this extra premium not being paid the insurance is reduced to $150 for the first year, $250 the second year, and so on."

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

LIFE INSURANCE PAYMENTS LAST YEAR

Some of the Estates Which Received Benefits in 1916—Towns and Cities in Which Payments Were Made

In 1916 the life insurance distributions in the United States and Canada amounted to $758,500,000, as computed by the Insurance Press, of New York. The payments for death claims, matured endowments and other benefits amounted to $476,900,000. For premium savings (dividends paid to policyholders), for the cash values of policies surrendered, for annuities, and to beneficiaries under policies issued in foreign countries, the regular companies in the United States and Canada paid amounts, estimated in part, that aggregated $281,600,000.

Summation of life insurance payments of all kinds in 1916:—

Claims paid in the United States and Canada..	$476,900,000
Payments for premium savings and surrender values, and to annuitants and in foreign countries	281,600,000
Grand total	$758,500,000

Evidence of Business Prosperity.

The aggregate amount paid by life insurance companies to policyholders who lapsed or surrendered their policies fell considerably below the 1915 record, indicating an improvement in general business conditions.

The amount returned to policyholders in dividends (premium savings) advanced largely, indicating the increased economies of management and improved conditions in other directions from which come contributions to the divisible surplus.

The increase in the policy loan account was almost negligible, as shown by the combined figures of companies whose operations cover more than 90 per cent. of the business transacted by United States companies. In other words, the aggregate loans on policies increased only $1,851,190 in 1916, against an increase in 1915 of more than $34,000,000, and an increase in 1914 of nearly $68,000,000.

No more conclusive facts, indicative of general prosperity, can be brought forward than the reduction in the amount of life insurance policies surrendered for present cash values and the smaller volume of borrowings from life insurance companies on life insurance policies as collateral. A continuance of 1916 conditions would undoubtedly show the policy loan account greatly reduced at the end of 1917, but that result cannot now be predicted, as the effects of the war remain to be determined.

Some Large Payments.

The largest payment on a single life in 1916 was in the case of Thomas L. Shevlin, of Minneapolis, who died on December 29th, 1915; amount, $1,525,000. The next largest claim was the case of Lewis Parker, Greenville, S.C., $770,000; the next largest, William A. Read, New York city, $617,000.

Three of the largest insurance payments on Canadian lives last year were R. M. Thomson, Winnipeg, $117,000; W. J. Garrigue, Montreal, $100,598; Robert Davies, Toronto, $100,000; and B. B. Law, Yarmouth, N.S., $91,500.

CANADIAN EXPLOSIVES COMPANY'S AFFAIRS

"We are unofficially advised,' says the New York Financial Chronicle, "that on July 15 last a cash dividend of 200 per cent. was paid by the Canadian Explosives Company, with head office in Montreal, for the common stock to holders of record June 30. At last accounts there were outstanding $3,404,300 of the $7,500,000 common stock, and $4,650,000 of the $7,500,000 preferred stock. The $440,000 first mortgage 6 per cent. bonds were called and paid off on June 1, 1916."

"We cannot afford to make any statement at the present time," said Mr. William McMaster, president of the company, when asked this week at Montreal regarding the above report.

"Can you state whether the figures given are correct or not," Mr. McMaster was asked. "We do not want any publicity just now and I would rather you would say no more about the matter. I can only say that the figures are not altogether accurate, but more than that I have nothing to say. It would be bad policy to say even if we have any Canadian shareholders."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first week in August:—

Canadian Pacific Railway.

	1916.	1917.	Increase or decrease.
Aug. 7	$2,985,000	$2,550,000	— $426,000

Grand Trunk Railway.

Aug. 7	$1,256,370	$1,320,700	+ $ 64,330

Canadian Northern Railway.

Aug. 7	$ 868,000	$ 775,500	— $ 92,500

The earnings for this season of the year are unusually high, but they must inevitably suffer from comparison with the record-breaking returns of August, 1916. The harvest of the autumn of 1915 left an enormous tonnage of grain to be moved the following summer. So far as the railroads were concerned, the two crops, 1915 and 1916, overlapped. There was no interval between the moving of the final surplus of the old and the moving of the first wheat of the new crop. The more normal conditions in respect to the yield of the autumn of 1916 is apparently to be reflected in August traffic on the railroads. The wonder is that increases have been maintained so steadily to so late a date. The grain factor in the present returns is emphasized by the fact that both Canadian Pacific Railway and Canadian Northern Railroad show decreases for the first week of August—in the case of the Canadian Pacific Railway, the first decrease of the year—while Grand Trunk reports a small increase.

NEW INCORPORATIONS

Molybdenite Company with $5,000,000 Authorized Capital Chartered at Ottawa

The largest companies incorporated last week were:—

Pacific Mining and Manufacturing Company, Limited, [illegible]	[illegible]
Dominion Molybdenite Company, Limited, Ottawa.	5,000,000

LIFE INSURANCE AGENTS' RECORD

Business Placed on the Company's Books — Lapse and Surrender Returns

Here is the record of Canada's field men and the actual amount of business placed on the companies' books last year. The following amounts were in force at the beginning [illegible]

	[illegible] companies.	[illegible] companies.	[illegible] companies
Amount in force Jan[illegible]	[illegible]	[illegible]	[illegible]
Gross amount in force [illegible]	[illegible]	[illegible]	[illegible]

One British company's figures are not available for end of the year record, but it had $23,000,000 in force on January 1st.

The following is an analysis of these figures compiled by *The Monetary Times*:—

	Canadian companies.	British companies.	United States companies
New policies issued....	$158,404,533	$5,063,356	$85,919,004
Old [illegible]	[illegible]	[illegible]	[illegible]
Old policies changed or [illegible]	[illegible]	[illegible]	[illegible]
P[illegible]	[illegible]	[illegible]	[illegible]
Policies terminated by [illegible]	[illegible]	[illegible]	[illegible]
Policies terminated by [illegible]	[illegible]	[illegible]	[illegible]
Policies terminated by surrender	20,238,884	762,223	6,103,029
Policies terminated by [illegible]	[illegible]	[illegible]	[illegible]
Policies terminated by [illegible]	[illegible]	[illegible]	[illegible]
N[illegible]	[illegible]	[illegible]	[illegible]

While in this record there are many gratifying features, there are others which will cause serious thought to both head office and field man. Why were there $27,000,000 of [illegible] in future, and how?

MILITARY SERVICE AND INSURANCE

Companies Must Keep in Position to Protect Policyholders and Carry Out Contracts

The other day, Mr. Lemieux stated in the House at Ottawa that he had received several letters from young men who are liable to be called upon for military service, inquiring whether the government intends to amend the Insurance act with a view to fixing a maximum amount of premium, covering war risk, payable on their policies. The insurance companies charge a higher premium for war risks. There is a feeling among these young men that when they are called they will be unable to keep up their insurance policies because of the extra premium, he said. Mr. Lemieux asked if it were possible to devise a means by which the extra cost of the premium might be paid by the government, or if legislation should not be enacted fixing a maximum rate or obliging the insurance companies to maintain the present rates. He thought the government should take the matter in hand and either assume the excess rate of premium or amend the Insurance Act in such a way as to fix a maximum premium.

Life Insurance Companies are Protectors.

Mr. G. P. Graham, who has had some practical experience in the life insurance business, pointed out that insurance companies are for the protection of a vast number of widows and orphans, and that they must keep faith with those who are insured, and must maintain themselves in a position to carry out their contracts. Most of the companies in Canada have for those who insured before the war a war clause in their contracts, and if they have gone to the front they have gone under the same conditions as existed before and do not pay any extra premiums. Since the war broke out every risk taken has a clause which says that if the insured goes to war the rates shall be war rates, and the amount is stated in the contract.

Could Not Reasonably Ask Companies.

Mr. Graham continued: "The rates differ with different companies. Some companies, particularly the smaller ones, have practically placed themselves in the position that they do not care to take war risks, because they feel they cannot do it without impairing their financial stability. The increase is considerable. If the government wishes to take the responsibility of assuming the extra liability, I have no objection; but if the government were to pass an act saying that all companies must carry these war risks at a certain rate, notwithstanding the contract with the insured, they might as well ask many of the companies to give up their charters and go out of business. That would be altogether unfair to the insured, because life insurance is not like an ordinary business. A life insurance company is a protector, and it charges so much for the protection it offers. Its first duty is to protect the widows and orphans of the insured. I would protest against the passing of an act to compel insurance companies to carry these risks at a lower rate than they now carry them, because it would mean that many of the smaller companies might as well hand over their whole business to the government."

Sir Robert Borden agreed largely with Mr. Graham's views. "If anything of that kind were done," he said, "it could hardly be done by imposing on the insurance companies a liability which they were not willing to undertake, and which might result in ultimate disaster to persons interested in the companies as shareholders or as insured."

Sir Thomas White, finance minister, did not take kindly to the suggestion. "In the first place," he said, "hundreds of thousands of men have already enlisted and gone overseas; a question would rise at once with regard to their policies. Then you have some men who may be called to the colors under the Military Service Act who are insured for $10,000, $20,000, $50,000, even $100,000, while others have no insurance at all. There would be no means of establishing uniformity. The superintendent of insurance has been looking into the question of policies; in most cases I understand that the insurance involving war risk is allowed to run at an increased rate. If that rate is not paid, the face of the policy is, in some cases, put down to the amount of the reserve.

Mr. Nesbitt: To the extent that the amount of premium paid will permit, and in proportion to the increased rate demanded by the insurance company.

Sir Thomas White: My hon. friend referred me to the proposed [illegible] of the United States. I may point out that that [illegible] is different, as [illegible] pensions. The feature of our military [illegible] which has a bearing on this question is the pension system. When this bill is under consideration further my hon. friend will raise the question and I shall be prepared to discuss it further with him. It does not appear to us, however, that his suggestions are practicable. It would not be fair to ask the insurance companies, as pointed out by the member for South Renfrew (Mr. Graham) to assume heavily increased risks without heavily increased premiums. When you consider whether the additional premium should be assumed, you are confronted with all the difficulties that I have mentioned, not only with regard to the men who are now to be called, but in regard also to the men who have already gone overseas.

Mr. Nesbitt: Nearly all the policies provide that after two years no such question can be raised.

Sir Thomas White: I think that is true with regard to many policies. Policies taken out since the outbreak of the war contain a special clause with reference to military service. When you come to deal with the question of arranging to take care of the life insurance of thousands of men, having different amounts of insurance, some having no insurance at all, you are confronted with a very difficult question. One man puts his savings in life insurance; another man pays off the mortgage on his house; another places his savings in a bank. The only way to deal with them all uniformly is under a pension system, as we are now doing. That is all I can usefully say on the subject at this stage.

BANK CLEARINGS

The following are the bank clearings for the weeks of August 10, 1916, and August 11, 1917, respectively, with changes:—

	Week ended Aug. 11, '17.	Week ended Aug. 10, '16.		Changes
Montreal	$ [illegible]	$ 61,621,428	+	$[illegible]

Ideal War-time Policies
Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

Three compartments or garden plots it has. Think of the flowers, fruit and vegetables it would give you.

This L-Shaped Greenhouse Layout May Just Meet Your Needs

IF, for example, you have a fortunate corner location, it can form part of the property line border.

Should there be available space at the right of the workroom, you could later add a duplicate L. This would give you an attractive, well balanced, thoroughly practical group of glass gardens.

All of which is of course only a suggestion. Mayhap neither this nor the completed layout is what you need and want. In which case you will be decidedly interested in our new Catalog No. 342, with its showing of some 100 or more subjects of various sizes.

Should you wish to see a representative, he will bring along your copy of the catalog. If not, your request will cause its prompt mailing.

Canada's Cold Storage Establishments

THERE *Are 110, Operated by 76 Companies, Two Being American Owned—Five Are Large Export Houses—Abattoir Companies and Their Retail Stores —Public and Private Warehouses—Facts and Figures From the O'Connor Report.*

THE cold storage companies of Canada, including abattoir houses, control about half the meat which is killed in Canada and about one-fifth of the total quantity of eggs produced in Canada, more than one-third of the cheese and about one-fifth of the butter; that is, approximately these proportions of the total products of Canada in each of these commodities pass through cold storage in their transit from producer to consumer. This statement is made in Commissioner O'Connor's cold storage report, which continues: "It is not all the property at any given time of cold storage companies but is either owned by them or stored on their premises. It will be shown in the course of this report, however, that public warehousing, properly so-called, that is, the storing of goods in refrigerated space supplied by a company not owning the goods stored, bears a small proportion to the total quantity of produce passing through cold storage. In this Canada is unique and in spite of the effort of successive governments to encourage the public storage business by subsidies the trend towards concentration in the handling of food to a limited number of private companies has not been checked and with the progress of the war is becoming more marked. This is part of the price Canada has paid for her position as a trader in a world market.

"There are about one hundred and ten cold storage warehouses in Canada, operated by seventy-six different companies, two being American owned. Seven operate one establishment only. Five are large export houses. These include nine establishments, exporting chiefly dairy products, each with at least one branch in Montreal. There are twelve companies dealing chiefly in fish, two of which have two establishments each, the others only one each. There are thirty-nine storage warehouses dealing in general cold storage commodities, including meats, dairy products, eggs and fish, the proportion of each commodity handled depending upon the location of the warehouse. One of the latter companies is affiliated with one of the abattoir companies. Thus thirty-eight independent establishments handle general produce.

"The large centres of cold storage operations are Montreal, Toronto, Winnipeg, Calgary, Moose Jaw, Edmonton and Vancouver. The number of cubic feet of refrigerated space available in Montreal is approximately 3,350,000; in Toronto, 3,600,000; in Winnipeg, 2,500,000; in Calgary, 1,350,000; in Vancouver, 1,500,000; in Moose Jaw, 600,000; and in Edmonton, 800,000. In Vancouver the greater part of the cold storage space is used for fish; on the prairies east to Fort William meat takes the greater part of the cold storage space; in Toronto, meat and dairy products; in Ontario, exclusive of Toronto, dairy products; in Montreal,. butter, cheese and eggs, and in the maritime provinces, fish. Each of the large meat firms which do any export trade have also an export house in Montreal."

The report then gives a list of the names and addresses of every known cold storage warehouse in Canada with the number of cubic feet of refrigerated space. The classification used is on the basis of the food handled by cold storage companies, the abattoirs dealing chiefly in meat, the general cold storage warehouses dealing in meat, eggs, and dairy products and fish to a limited extent. Those classified under the heading "Fish" usually store butter and eggs, cheese (to a very limited extent) and a small proportion of meat. Commenting on the list, the report says:—

"The extent of refrigerated space owned respectively by these different classes indicates the magnitude of their operations. Of a total of over 24,000,000 cubic feet of refrigerated space approximately 12,200,000 is held by the abattoir companies, 2,650,000 by the export houses dealing in dairy produce and eggs, 2,250,000 by the fish companies and 7,200,000 by general cold storage warehouse companies.

"The dealings of the abattoir companies are the most extensive of any of the cold storage operators. It will be observed from the appended list that some of these companies are very large, what might be called zone companies, having establishments in the strategic points, for the accumulation and distribution of meats. Some limit their activities to Western Canada. The export trade of such companies is comparatively small. Those covering Eastern Canada while supplying a large home market have also a very large export trade. Those establishments in the important centres of both Eastern and Western Canada supply both the home and export market. The organization of the abattoir companies is most complete. They buy the live stock in the centres most convenient to the supply, kill in their own abattoirs and by the most elaborate and efficient methods manufacture the by-products and conserve the whole by means of refrigerated space. They are thus enabled to hold the dressed meat as a commodity of commerce longer than is the local butcher, and to supply the home or the export market according as opportunity offers. Three of these huge meat companies carry the control of their products still further and have established retail branches in the larger cities, thus completing the process of transit from producer to consumer.

"Approximately 40 per cent. of the quantity sold by these three companies for home consumption is consigned to their retail stores. Such retail stores are allowed a slight reduction on the cost of food received. One company has about 80 and another about 40 of such retail stores. Aside from the very complete and thorough system of distribution thus evolved, such companies have an immense advantage over the small butcher on account of the facilities which they possess for manufacturing by-products. This enables such stores to compete on more favorable terms with other retail stores dealing in the the same lines. The proceeds from by-products ought to enable the abattoir companies to sell on a much smaller margin than can the smaller butcher and if necessary to pay a higher price to the producer than the smaller buyer can afford, but nothing disclosed upon the investigation indicated that either of these natural results have in fact followed. Such companies do not limit themselves to dealing in meat. The traffic in butter, cheese, eggs and fish, although secondary in importance, is large in volume.

"The export houses for dairy produce and eggs are situated in Montreal. Two of these it will be observed have branches in Ontario. The Montreal branches are designed chiefly to handle the goods exported from Ontario to Great Britain. The Gould Cold Storage Company maintain there a very large public warehouse, storing for others only. The remaining two, while storing for others, devote most of their energies to dealing for themselves, being the export buyers for approximately a quarter of the cheese produced in Canada.

"The fish companies show the rudiments of zone organization but are only slightly developed along that line. Although there are only four inland fish cold storage companies, namely the Doyle Fish Company, Toronto; Lemon Brothers, Owen Sound; the Winnipeg Fish Company and the Guest Fish Company, Winnipeg, yet many of the general cold storage warehouses store fish in large quantities.

Public or Private Warehouses.

"The facts revealed in the report on cold storage in Massachusetts in 1912 show a very striking contrast to conditions prevailing in Canada. In Massachusetts nearly 90 per cent. of the cold storage warehouse business was public warehousing, that is the storing of goods not the property of the firms operating the warehouses. In Canada the conditions are reversed. Approximately 650,000,000 pounds of produce were purchased by Canadian cold storage companies in 1916, and about 88,000,000 pounds of produce not the property of the firms on whose premises it was stored were received into store. Just what proportion of the latter amount was the property of other cold storage companies, storing outside their own premises, for convenience, it is impossible to state. Whereas about 90 per cent. of the cold storage business in Massachusetts in 1912 was public warehousing, in Canada in 1916, only about 12½ per cent. was public warehousing.

"Cold storage warehousing is essentially a public utility in that it preserves perishable farm products so that instead of being subject to commerce only in a local way, as formerly, they have now become subject to the demands and opportunities of world commerce. The public character of this industry is recognized, however, by most of the private companies in that, on request, they store goods for others. There are three classes of cold storage establishments:—First, public and subsidized; second, public but not subsidized; third, private.

"In view of the necessity of providing more space for public storing, a plan of subsidization was instituted in 1907 through the Department of Agriculture of Canada. The Dominion Government makes to newly organized cold storage establishments a total grant of 30 per cent. of the cost of construction, 15 per cent. being paid in the first year, 7 per cent. in the second, 4 per cent. in the third, 2 per cent. in the fourth, and 2 per cent. in the fifth. The grant has been completely paid to twenty-five of these warehouses. Eight are still receiving grants. Up to March 31st, 1917, amounts aggregating $132,539 had been paid on the grant made to these eight other warehouses, the balance still due being $20,953. As stated, however, public warehousing is not limited to warehouses publicly subsidized, but is characteristic of practically all the cold storage plants. A publicly subsidized warehouse is required by law to store goods for others upon request. The public warehouses are supposed to derive most of their revenue from public warehousing, the private warehouses from trading in the commodities which they store. But an instance of a large public warehouse deriving practically all its revenue from private dealing is recorded later on herein."

Lists of Warehouses.

Then follows this list of publicly subsidized cold storage warehouses, with the refrigerated space of each in cubic feet:—Lockeport Cold Storage Company, Lockeport, N.S., 59,940; North Atlantic Fisheries, Port Hawkesbury, N.S., 338,550; North Atlantic Fisheries, Halifax Cold Storage, Halifax, 80,000; New Brunswick Cold Storage Company, St. John, N.B., 744,000; Island Cold Storage, Charlottetown, P.E.I., 150,000; Sansregrette Cold Storage, Joliette, Quebec, 23,394; Algoma Produce Company, Sault Ste. Marie, Ont., 55,806; Dominion Fish and, Fruit Company, Quebec City, Que. 225,000; Brantford Cold Storage Co., Brantford, Ont., 36,000; J. D. Moore, St. Mary's, Ont., 105,000; Flavelles, Limited, Lindsay, Ont., 131,500 St. Thomas Packing Company, St. Thomas, Ont., 174,141; Windsor Ice and Cold Storage Company, Windsor, Ont., 67,300; Lemon Brothers, Owen Sound, Ont., 66,000; Whyte Packing Company, Mitchell, Ont., 30,600 Scott & Hogg, Peterborough, Ont., 90,000 Gunns Company, Limited, Harriston, Ont., 57,069; Chatham Packing Company, Chatham, Ont., 144,400; R. H. Ashton, Morrisburg, Ont., 45,000; Brandon Creamery and Supply Company, Brandon, Man., 27,500; Metropolitan Cold Storage Company, Vonda, Sask., 24,000; Moose Jaw Cold Storage Company, Moose Jaw, Sask., 189,764; Campbell-Griffin, Limited, Calgary, Alta., 111,050; Edmonton Cold Storage Company, Edmonton, Alta., 150,056; Canadian Fish and Cold Storage Company, Prince Rupert, B.C., 781,000; B. Wilson & Company, Victoria, B.C., 64,000; total refrigerated space, 3,823,780.

This is followed by a list of cold storage warehouses not subsidized, with the refrigerated space of each in cubic feet:—Canada Cold Storage Company, Montreal, 762,000; Lovell & Christmas, Limited, Montreal, 460,000; A. A. Ayer, Limited, Montreal, 700,000; Gunn, Langlois, Limited, Montreal, 400,000; A. Ames, Sherbrooke, P.Q., 110,000; Municipal Abattoir, Toronto, Ont., 155,904; Long Brothers, Collingwood, Ont., 36,000; London Cold

Storage Company, London, Ont., 400,000; Ottawa Cold Storage Company, Ottawa, Ont., 129,000; Manning Cold Storage Company, Toronto, Ont., 300,000; Public Cold Storage and Warehouse, Toronto, Ont., 768,000; Government Cold Storage Station, Grimsby, Ont., 40,000; Manitoba Cold Storage, Winnipeg, Man., 1,500,000; Vancouver Ice and Cold Storage, Vancouver, B.C., 700,000; Pacific Cold Storage Company, Yukon, 44,900; total refrigerated space, 6,505,804.

Stored for Others.

"It will be observed from the above list," says the report, "that the publicly subsidized cold storage plants have a total refrigerated space of 3,823,780 cubic feet, and that the other public warehouses have a total of 6,505,804 cubic feet, leaving the total refrigerated space of the private warehouses 13,800,000 cubic feet. Only three of the publicly subsidized cold storage warehouses limit their activities to storing for others only, the contention being that they are not sufficiently patronized and that the income from public storing is too small to enable them to meet their expenses without the profit derived from dealing in cold storage commodities at first hand. The proportion between the goods stored for others and that bought for the purposes of trade by the publicly subsidized cold storage warehouses is shown in the following table:—

Publicly Subsidized Cold Storage Warehouses.

		Quantity received into store for others in 1916.	Quantity purchased during 1916.
Butter	lbs.	1,287,965	3,658,029
Eggs	doz.	950,567	5,388,770
Cheese	lbs.	95,881	1,792,757
Beef	"	2,708,151	210,000
Pork	"	514,153	....
Bacon	"	26,714	200,306
Ham	"	10,570	300,733
Mutton and lamb	"	621,653	414,356
Fish	"	2,033,207	3,320,100
Total		8,908,951	75,367,850

Public Cold Storage Warehouses Not Subsidized.

		Quantity received into store for others in 1916.	Quantity purchased during 1916.
Butter	lbs.	7,603,350	9,273,484
Eggs	doz.	3,844,640	3,169,850
Cheese	lbs.	47,349,410	55,471,110
Beef	"	13,887,252	360,640
Pork	"	1,103,075	1,900,000
Ham	"	16,200	12,010
Bacon	"	......	12,140
Mutton and lamb	"	1,041,213	33,860
Fish	"	492,704	49,512
Total		15,291,130	70,283,214

Produce Handled by Companies.

"The total amount of produce handled by subsidized companies in 1916 was over 84,000,000 pounds; 12 per cent. only was stored for others. The total amount of produce handled by public warehouses not subsidized during the same period was approximately 85,000,000 pounds; 18 per cent. of which was stored for others. The total quantity of produce stored in 1916 in subsidized and public warehouses not the property of the firms occupying the warehouses, was slightly over 24,000,000 pounds. It will be remembered that the total quantity received into store in cold storage warehouses in 1916, not the property of the companies storing, was about 88,000,000 pounds; 64,000,000 pounds of produce was stored, therefore, by concerns which although technically called private warehousing companies deserve the title of public cold storage establishments from the fact that they store 73 per cent. of all the food put into cold storage, not the property of the firms storing. It may be, however, that considerable of the produce thus stored was the property of other storage companies, stored for convenience outside their premises.

"In connection with the above list of publicly subsidized cold storage warehouses and in accentuation of the comparison between the amount of storing on behalf of the companies and of the public, it may be mentioned that one firm in Lindsay which received the last grant on its total subsidy of $15,900 in 1915 reports a very small quantity of produce stored for the public since 1913, so insignificant in fact that no record is kept of the amount. This although the company did a very flourishing trade in that section of the country, purchasing approximately 2¼ million pounds of butter, nearly 4 million dozen eggs, and over 1½ million pounds of cheese, from January 1st, to December 1st, 1916. The company's trade has trebled, indeed, since 1913. But the fact is that public warehousing meets a very real need as is shown by the business handled both by public and private warehouses. In the maritime provinces the public warehouses are particularly useful to the public. In 1916 they stored, three hundred thousand pounds of butter, nearly two million pounds of beef and two million pounds of fish, the property very largely of the smaller dealers in fish and produce.

Performing Valuable Service.

"The public non-subsidized warehouses of Montreal, Toronto, London, Winnipeg, and Moose Jaw are likewise performing a valuable public service. Those storing for others only, in Montreal, received approximately in 1916, 3,600,000 pounds of butter, 600,000 dozen of eggs, 40,000,000 pounds of cheese, and 3,000,000 pounds of meat and fowl.

"Some of the larger public warehouses in Montreal which deal in produce for themselves but also offer public storage space, have proved useful to wholesale dealers, creameries and cheese factories, as depots for their produce destined for export. Two such warehouses stored for others in 1916, over a million pounds of butter, one and one-half million dozen of eggs and five million pounds of cheese.

"The Montreal warehouses lead in public storing because they are located in the great export centre of Canada. The private cold storage warehouses in Toronto are both numerous and extensive. The public warehouses there play a much smaller role than in Montreal. For 1916 they show over a million pounds of butter stored; more than half a million dozen eggs; 600,000 pounds of cheese and about 3,000,000 pounds of meat, two and a half million pounds of which was beef. The Manitoba Cold Storage Company of Winnipeg, a public non-subsidized company storing for others only, show over a million pounds of butter received into store, over a half million dozen of eggs, nearly eight million pounds of beef and about half a million pounds of other meats.

"Some of these figures are very remarkable in view of the increased export trade and as indicative of the degree of concentration of export commodities. Of the 3,600,000 pounds of butter referred to above as being stored by the public warehousing companies in Montreal which limit their business to public warehousing, nearly three and one quarter millions were received into store by one company. The actual destination of this butter is not known, but when it is considered that but 5,241,570 pounds were exported from all Canada, it is fairly safe to conclude that perhaps one-half of the butter exported from Canada passed through the premises of this one company. Eighteen and three-quarter million pounds of cheese were received into store during the year by another public warehousing company and over twenty-two million pounds by yet another company. A very large proportion of this was undoubtedly destined for export. Such companies as these would seem to be performing a very valuable public service. Their revenue is entirely derived from storage charges. It is obvious that these charges are reasonable from the fact that the concerns are so largely patronized.

"In view of any possible effort on the part of the State to control export trade or export prices, it might be well to note that because such a large proportion of these commodities passes through only two or three warehouses governmental control or supervision would not be difficult to bring into effect."

OUR WAR EXPENDITURE

Canada's war expenditures are about $850,000 a day, the total to July 20th being $263,000,000. This includes upkeep of Canadian troops in France, for which Canada owes Great Britain $272,000,000. Advances to the munitions board amount to $288,000,000, while $22,000,000 was spent for hay, cheese, flour, etc. She is supplying about $10,000,000 a month to buy cheese and contributing $25,000,000 a month to the Imperial Treasury for the purchase of munitions in Canada.

NATIONAL'S INTERESTING TRIP

Travellers between Eastern and Western Canada appreciate the high standard of railway service afforded by "The National"—the splendid train which operates between Winnipeg and Toronto, east and west bound. This through train uses the rails of the Canadian government lines from Winnipeg to Cochrane, the Temiskaming and Northern Ontario (owned by the Ontario government), from Cochrane to North Bay, and the Grand Trunk from North Bay to Toronto. At Winnipeg "The National" links up with the Grand Trunk Pacific, serving all the important points of Western Canada.

"The National's" trip between the Manitoba capital and the Queen City of the East is one of 1,256 miles. The departure from Winnipeg is at 5.15 in the afternoon and Cochrane is reached the following night. This is a wonderfully interesting trip through the sparsely populated territory of New Ontario, giving the traveller an opportunity of inspecting this fertile region, including the famed clay belt, where tens of thousands of settlers will make their homes in the future. The area of New Ontario is 330,000 square miles, fully four times the size of Old Ontario and, in addition to great expanses of good farming land, it has wonderful resources in timber, minerals, water power, fish and game.

"The National" next threads the rich districts served by the Temiskaming and Northern Ontario, including the Cobalt silver camp and the Temagami Forest Reserve. There is a daylight run over the Grand Trunk through "The Highlands of Ontario," comprising the beautiful Muskoka Lakes, Lake of Bays and other holiday resorts.

The three railways are combining to make the passenger service over this new road the equal of that offered anywhere on the continent. The smooth, straight and level roadbed embodies all that has been learned in three-quarters of a century of railroad building. The greatest travel comfort is therefore assured.

WATER POWER OF WESTERN CANADA

Dominion's Big Asset Should Place Her First in World's Producers of Manufactures

The London Financial Times, in speaking of the enormous undeveloped water power of Canada, says that there is not much doubt that, given the necessary capital for its development, this power alone should suffice to place the Dominion among the foremost of the world's producers of manufactures. Western Canada is not the least section which nature has so beneficiently endowed with this splendid advantage, and it is calculated that 6½ millions of horse-power run to waste daily in the three western provinces. The following note, furnished by the Canadian Pacific Railway Company and based on the investigations of the water powers branch of the Canadian Department of the Interior, is therefore of very considerable interest:

5,465,000 Horse-power Going to Waste.

Investigations conducted by the water power branch of the Canadian Department of the Interior have revealed that in the great Saskatchewan River and its tributaries, which drain the whole of the southern portion of the provinces of Alberta and Saskatchewan, and in the Winnipeg River and other streams flowing into Lake Winnipeg, there is enough hydro-electric energy to create at least 1,172,000 horse-power. In the Athabasca, Peace, Churchill and other enormous streams which drain the northerly portion of the three provinces, flowing, some into the Arctic Ocean and some into the Hudson's Bay, there is enough to create—according to the very incomplete data that has been obtained—5,465,000 horse-power.

Winnipeg River Rivals Niagara.

Only 12 plants have actually been established yet to avail mankind of this extraordinary volume of power. Only 109,000 horse-power is as yet being used, of which 107,000 is handled through four plants. These latter consist of two on the Winnipeg River, belonging to the Winnipeg Electric Railway and the Winnipeg Municipal Railway respectively, and two on the Bow River at Kananaskis, 50 miles west of the city of Calgary, where 31,000 horse-power are developed and used mostly in lighting Calgary, running its street-cars and supplying motive power at cheap rates to its industries. There is energy enough in the Winnipeg River to produce, eventually, as great a volume of power as is now taken from Niagara Falls—even, possibly, to surpass it; there is enough in the Bow River basin, supplemented by storage capacity, to create 93,000 horse-power, all within easy transmission reach of Calgary.

MUNICIPAL BONDS AWARDED

Alberta.—An issue of $1,000,000 5 per cent. 5-year bonds has been awarded to Messrs. Wood, Gundy and Company.

Victoria, B.C.—Tenders are invited for No. 1 to 160 6 per cent. 20-year waterworks debentures.

PRUDENTIAL AT NATIONAL SAFETY EXPOSITION

The fourth annual National Exposition of Safety and Sanitation will be held at the Grand Central Palace, New York City, September 10th to 15th. The Exposition will be under the auspices of the American Museum of Safety and the National Safety Council.

Among the many interesting features of the Exposition will be a series of thirty charts, prepared by the Statistician's Department of the Prudential Insurance Company of America. Among them will be charts showing the mortality from boiler explosions, estimated industrial accidents during 1916, the mortality from elevator accidents, drownings resulting from water transportation, the mortality from respiratory diseases, accidents and fatalities in the manufacture and transportation of explosives, the reduced accident liability resulting from organized safety work, mortality frequency from accidents to and tuberculosis of locomotive engineers and textile workers, experience with workmen's compensation in the United States and increasing hazards from automobiles.

These expositions are held to stimulate interest in the nation-wide work being done to reduce industrial accidents and the mortality from disease.

BORROWING IN UNITED STATES

It was natural there should be disappointment that Canada was unable to obtain funds in the United States through the medium of the Liberty Loan. At the same time, we must remember that our war loans have been subscribed on a basis consistent with prevailing financial conditions. The three Canadian loans aggregating $350,000,000, were sold on a basis of approximately 5½ per cent. The Liberty Loan of $2,000,000,000 was subscribed on a 3½ per cent. basis. The American investor might, therefore, have some ground for complaint, were Canadian investors to get the highest market yield on their war bonds while American investors got only 3½ per cent., and were some of their funds loaned to Canada at that rate.

To the end of July, the United States had made loans to its allies of $1,523,000,000. This sum was apportioned as follows: $770,000,000 to England, $370,000,000 to France, $175,000,000 to Russia, $160,000,000 to Italy, $45,000,000 to Belgium, and $3,000,000 to Servia. The total known to have been paid over is $1,305,000,000.

Since the signing of the United States War Loan act, payments actually made to the allies have been at the rate of $435,000,000 a month, or $5,220,000,000 a year, while credits have been granted at the rate of more than $6,000,000,000 a year. The War Loan act provided for credits to the Allies of only $3,000,000,000.

In his speech in the British House of Commons, Mr. Bonar Law, Chancellor of the Exchequer, remarked that "the House was astonished to learn that Great Britain's advances to the Allies and Dominions had already reached the huge total of over £1,000,000,000." This total, accumulating for three years, has been at the annual rate of only $1,667,000,000, or less than a third of the American rate up to the present. It is probable, however, that, with the progress of the war and the increasing difficulties of the weaker financial nations, the advances of Great Britain to her Allies have been on an increasing scale. The present rate of Great Britain's advances is, therefore, undoubtedly higher than that indicated.

It is probable that Canada will be able to obtain substantial short-term credits in the United States from time to time during the progress of the war. These loans, however, would have to be obtained from private sources in the American money market and not through Liberty Loan funds. Secretary of the United States Treasury McAdoo has made it plain that his government will control the situation there by determining each foreign offering on its merits, and with reference to the financial condition prevailing at the time. His recent statement, however, that "it is important that our commercial and financial relations with Canada should be conserved in every reasonable way," is a good omen in regard to future credits, should they be needed.

CONSERVING FINANCIAL RESOURCES

Merchants and manufacturers may materially help to strengthen the financial situation if they will limit their demands for loans. This action will have a double effect and is largely of a patriotic character. It will help to prevent a prolonged monetary stringency and it will better enable the banks to extend the necessary financial support to the government. In these days of war, many important transactions are necessary and an unavoidable strain is put upon bank resources. The funds of the country should be conserved in order to prevent adverse effects as a result of this situation. The Canadian Bankers Journal recently pointed out that this could be done by postponing extensions to plants and machinery which could be profitably operated, but which can wait—this does not refer to war industries; buying only such goods as are needed to carry on business, and not stocking up beyond present needs in the hope of gain through a further increase in price; avoiding special operations which promise to be profitable, but might just as well be left alone.

The two principal reasons why merchants and manufacturers should not overstock are cited as follows:—First, the outlook for trade in Canada, after the war, is obscure to a greater degree than ever before, and manufacturers and merchants must guard against finding themselves with goods on hand produced under fictitious conditions as regards cost of labor and material, for which there may be little demand, even at heavy loss. The second reason Mr. E. F. Hebden gave in his timely hint as to how the commercial demand for discounts might be diminished to a certain extent without appreciably cutting down our productive capacity, in his address to the Merchants' Bank shareholders on June 6th, when he referred to "the unreasonable buying and storing of raw material far ahead, and excessive contracting in advance on borrowed money practised by some clients of the banks."

As our banking contemporary says:—"Britain has maintained her financial position and consequent ability to maintain her increasing armies in the field by exports increased in annual volume since the war began. Canada and the Canadian banks cannot ignore at this juncture this object lesson of British financial management. The creation of wealth is the correlative of its conservation if Canada and the banks are to 'carry on' financially until the end of the struggle." Every citizen can help to maintain and improve this desirable condition by the practice of thrift and the investment in the national war securities.

COST DATA

That many Canadian manufacturers and merchants have no precise idea as to what their products cost, is the statement made by Mr. W. F. O'Connor, K.C., acting commissioner inquiring into the cost of living. During his investigation he has experienced great difficulty in securing from most manufacturers and traders the data which their best interests dictate should be always immediately available. Mr. O'Connor touches a vital point in Canadian industry. We have much to learn about proper cost systems in industrial plants and in trading generally. Chartered accountants, efficiency engineers and others who have made a study of this matter in Canadian plants are unanimous regarding the laxity in this direction except in a few cases throughout Canada. Mr. O'Connor says many manufacturers and merchants find it impossible to figure their exact profits. As to price fixing, some sell for what they can get, because they do not know their costs. Others make their prices the same as those of their competitors. The Commissioner had before him some returns which actually showed profits in excess of real earnings. Essential elements entering into costs had been left out of calculation. As Mr. O'Connor says such manufacturers and merchants are simply "fooling themselves." He adds: "Far too many of them charge themselves with nothing or with too little, for depreciation. Others have no costs accounting system at all. Some are manufacturing or selling lines which pay and other lines which do not pay, the losses due to the latter operating as a drag on the profits earned on the former. If they knew the facts they might drop the unprofitable lines. In the next block, maybe," says Mr. O'Connor, "is a struggling manufacturer or dealer who, if he could add to his trade the lines being manufactured or dealt in at a loss by the first-mentioned manufacturer, could coin money. The installation of a proper costs system by the first-mentioned manufacturer would save, perhaps, both concerns. Its absence may mean in the course of time two bankruptcies."

Mr. O'Connor thinks that the information he has collected and provided for in his investigations could be turned greatly to the advantages of manufacturers and business men. The cost data furnished by particular individuals ought not under any circumstances be published. It might be taken advantage of by competitors. But the average costs of particular lines, or particular classes of business, or of particular classes of industries, might be published, or communicated upon request, so that those interested might look into conditions affecting their businesses or industries and, if their costs were running high, be led to detect leaks, or improve methods, or as the Commissioner tersely puts it, "quit." Thus could be placed at the disposal of each the benefit of the accounting skill of all. "In any event," says Mr. O'Connor, "the matter is indisputable that business men who carry on their enterprises vainly imagining that they are making profits which the services of any expert cost accountant for a few days would show are non-existent because of this cause or that, are headed straight for the road to bankruptcy. Some businesses do not pay. There are too many in them. Others are being inefficiently conducted. Proper cost accounting systems will disclose real conditions. Every business man should know just where he stands." The firms which have worked both with and without proper cost systems know the indisputable value of such systems.

GERMAN TRADE PREPARATIONS

The project for a German export bank to assist in the restoration of trade relations with Central and South America, and to promote export trade generally, was launched at a big meeting of trade organizations and Latin-American export houses, at Hamburg recently, according to Copenhagen dispatches. The bank will establish branches abroad, particularly at important centres of trade, Central America, West Indies, East Asia and Australasia. Where German bank representation is now inadequate the export bank will assist German import houses by granting a line of credit on acceptances. The necessity of combating American and Japanese efforts in South America and emancipating German firms completely from the dependence of British banks, which almost monopolize business in acceptances, is given as justification for starting the new bank.

The Imperial Department of Commercial Intelligence recently received copies of circulars which The Deutsche Propaganda-Gesellschaft of Buenos Aires are sending to Germans in the Argentine Republic, asking for information of a commercial nature regarding the various localities of the Republic, with a view to assisting the German merchant to take up afresh his career on the conclusion of peace. From these circulars it appears that a German-Argentine commercial directory, in German and Spanish, is to be published. It is to comprise an alphabetical collection of the names of all the German and Germanophil business houses and representatives of German firms in the Republic, together with lists of articles imported from Germany, and will be prefaced by information regarding Argentine industries, import and export trade, agriculture and cattle-raising, trade statistics, commercial laws and usages, etc., with especial reference to the various provinces and territories. The directory will probably contain 500 pages, and that 50,000 copies will be published. Each copy is to be signed and numbered.

These are indications of German preparations for post-bellum trade. Many signs there are also that German manufacturers and merchants will make a special bid for South American trade. That preparation should be made by Canadian manufacturers, bankers and the Canadian government to prepare for greater Canadian trade in South America, was the opinion expressed in an interview with *The Monetary Times* last month, by Mr. Edward C. Austin, who has resided in Colombia, Peru and other South American republics for the past ten years. "Canada," he said, "has one trade commissioner in South America, a territory 2,000,000 square miles larger than Anglo-Saxon America. This commissioner is at Buenos Aires, in the Argentine Republic. We should have one commissioner representing the northern republics of Colombia, Venezuela and Ecuador; one representing the western territory, Peru, Bolivia and Chile; one representing the Argentine, Paraguay and Uruguay; and one representing Brazil. We already have a commissioner in the Argentine Republic; he could attend also to Paraguay and Uruguay. In Brazil it is absolutely necessary that the trade commissioner should speak Portuguese. Any extension in the Canadian commercial intelligence service in South America should be made immediately. A new Europe means a new Latin America. Now is the time to prepare to obtain our share of the business of these republics."

TRADE AND INDUSTRIAL BOARD SUGGESTED

It Should Have Jurisdiction Over Trade Combines and Trade Methods, Says Commissioner

An interesting reference is made to trade combinations in the general report of Mr. W. F. O'Connor, K.C., acting commissioner, enquiring into the cost of living. He says:—

"In most European countries combinations of producers (manufacturing and other) when devised and operated under more or less complete state supervision, are within the law, and such combinations are common. Some have attained great strength, the benefit of which particularly exhibits itself when these combinations come into conflict in the foreign field with the competition of countries such as Canada and the United States, where trade combinations are not favored. They usually sell abroad through a common exchange, and they are thus enabled to secure advantages as to price and capacity to fill large orders which could not be secured by isolated competing enterprises. The strong reasons which undoubtedly exist against permitting such combinations to operate within home markets fail with relation to foreign markets. There we desire to sell as a nation merely a surplus production. And, by the way, under such a system of state supervised combinations to promote export trade, price fixing by the state, if such should become necessary, is made much easier.

Fixing of Prices.

"The foreign price can be fixed as well as the home price. Thus may excessive exporting be temporarily restricted as the occasion requires. The admitted danger of a possible effort on the part of such combinations formed for the purpose of promoting export trade to combine as well concerning home trade would be obviated by the constant presence of state supervision. Their every move, otherwise illegal, must be taken in the presence, so to speak, of the state, and with the state's prior imprimatur. Even in England there is much greater liberty of combination than obtains in Canada. There the coal, cement, pottery and some other extensive interests are combined for export business purposes through common sales and distribution agencies. If my recommendation that a Trade and Industrial Board be established, with jurisdiction over trade combines and trade methods, be concurred in, such a board might well direct its attention to the subject matter now being discussed. In my judgment greater selling efficiency will lead to better labor conditions and lower prices. I favor production to the utmost and the forced sale at the best obtainable price of any surplus. Factories operated at half time or three-quarters time are producing inefficiently. Canada's equipment for industrial effort is said to be of a capacity twice or three times greater than its home trade requirements demand.

"Only by forcing export trade or through the influx of an abnormal immigration of a non-industrial, preferably agricultural, class can extensive 'scrapping' of plants be avoided. Irregular employment reduces the artisan to the condition of a casual tramp. Fixed residence becomes impossible for him. The high wages so often quoted as his per diem rate sadly peter out when calculated at a per annum rate. Steady employment may enable lower per diem rates, but, whether or not, it would be beneficial alike to employer and employee. As a result of war conditions Canada is now selling all that she can produce.

Must Sell with Efficiency.

"We ought to organize forthwith so that we may sell with efficiency when, after the coming of peace, the buyers now clamoring at our counters may require to be coaxed or informed. The problem of efficient production and efficient marketing of manufactures, which will never, as will our foodstuffs, ordinarily, for instance, 'sell themselves,' is so intimately associated with that of the employment of labor that your department may well exhibit a special interest therein. It involves the provision of employment we know not how soon, but we hope very soon, for some hundreds of thousands of Canadians now temporarily absent on a great mission, performing an exalted national service. There will be much owing to our troops when they return. It is true that there will arise an extra demand for manufactured articles incidental to such return, which will in part care for the loss of employment incidental to the practical cessation of munitions production, but such demand will by no means care for all of such loss. There must ensue a temporary disruption of industry unless we anticipate and are ready to forestall. Merely to produce is well. But what is produced must be sold.

"If in discussing such matters as this it should be considered that I have wandered from my proper text, 'Costs and Prices,' I shall not be able to agree. I consider that by increasing production, thus reducing the cost of production, and efficiently selling, thus reducing the cost of selling, not only the manufacturer, but also the consumer gains. Prices depend upon costs. Lower costs enable lower prices. And, in this same connection, having in mind the demand for the establishment of a board or commission to deal with the legal and other aspects of inland trade, my humble suggestion is that such a board is as much necessary for the purposes of foreign trade. It would be dangerous to permit the formation of trade combinations such as I have described except under state supervison. Such supervision could best be provided by such a board."

MAPLE LEAF MILLING

While there is little activity in the stock of Maple Leaf Milling, the price holding around par, the mills are reported operating close to capacity at the present time. The new unit recently installed at Port Colborne is now in full operation and its complete daily output is required to meet the present demand.

WINNIPEG ELECTRIC

While there have been no sales of Winnipeg Electric stock on the Montreal or Toronto markets recently, a bid was made for the stock on the former market this week of 36. Two hundred and sixty-nine dollars a share was paid for this stock in Toronto in March, 1912. It is estimated that the street railway is losing $300,000 a year through the competition of the jitneys. In June of this year net earnings fell below the charges on the company's revenue, the deficit being $11,459. In June, 1916, the net income was $28,267. In 1893 the Winnipeg Street Railway enjoyed an average net income of $100,000.

BANK CLEARINGS

The following are the bank clearings for the weeks of August 17th, 1916, and August 18th, 1917, respectively, with changes:—

	Week ended Aug. 18, '17.	Week ended Aug. 17, '16.		Changes.

COMPANIES ACT TO BE AMENDED

Directors Responsible for Misstatements in Prospectus—Transfer of Shares—Annual Financial Statement

The proposed amendments to the Companies Act of Canada are largely in the hands of Mr. Thomas Mulvey, Under-Secretary of State. Mr. Mulvey is probably the most notable expert in the country on company laws generally. In a statement sent to *The Monetary Times* he makes the following references to the proposed changes in our Companies Act :—

The filing and compilation of returns, and the searches which will arise through these returns being made, will entail additions to the clerical staff of the department and cause considerable expense. For this reason it is considered advisable that fees should be charged for filing returns and making searches therefor.

Section 43, as it stands, is taken from the Imperial Companies Act of 1867, and has been superseded in the United Kingdom and in all the provinces which adopted that legislation. The proposed amendment follows the Consolidated Companies Act of the United Kingdom of 1908, but it is not so intricate or so difficult to work out as the provisions of that act. It provides that where a company issues a prospectus, a copy thereof must be filed in the Department of the Secretary of State, and must give certain information, but the section does not require every company to file a prospectus or a notice in lieu of a prospectus as is required by the statute of the United Kingdom.

Minimum Allotment of Stock.
